Papular Song.

GENTLE ANNIE.

Thou wilt come no more, gentle Annie, Like a flower thy spirit did depart ; Thou art gone alas ! like the many,

That have bloomed in the summer of my heart

Shall we never more behold thee, Never hear thy winning voice again-When the spring time comes gentle Annie, When the wild flowers are scattered o'er the plain

We have roamed and loved mid the bowers, When thy downy cheeks were in their bloom,

Now I stand alone mid the flowers, While they mingle their perfumes o'er thy tomb.

CHORUS-Shall we never more behold thee, &c.

Ah ! the hours grow sad while I ponder, Near the silent spot where thou art laid, And my heart hows down when I wander,

By the streams and the meadows where strayed. Cuonus-Shall we never more behold thee, &

THE FAMILY OF COMETS.

Here is a very amusing letter from the Lon. don Times, on the subject of comets :

"A very general feeling exists that astronomers are not behaving well about the comet; to crowd at a prize fight. Possibly the melan- bed. choly failure of Bailey's beads and rose lights An anecdote is told of him in this connection eclipsed it in brilliancy, but the exertion was and interest.

without any continuation, supplied that defi is published EVERY FRIDAY MORNING ciency at the rate of 10,000,000 of miles a day. Their speed is immense, and their bulk inconceivable; the comet of 1843 moved at six times the rate of the earth on its orbit, and that of 1811 was 600,000,000 of times its size; the present one is only 400,000,000 of times the present one is only 400,000,000 of times the sid, unless at the option of the publishers. It has seen decided by the United States Courts, that the ponderable matter, but in infinitely less propor

07 The courts have decided that persons are ac- while the tail is merely attenuated vapor, many ountable for the subscription price of newspapers, thousands of times less dense than our atmost they are them from the post office, whether the y phere. It is possible that the nucleus of a comet should strike a planet, but the odds are 300,

000,000 to 1 against it; the chance against the immersion of the tail is much less. The result of collision with the nucleus would be an immediate return to most everlasting chaos, while an immersion in its tail would probably be attended with no visible result. Comets do not affect the seasons. Taking an interval of 16 years, the warmest was 1794, in which there was one comet; the coldest 1759, in which there were two, and therefore it is not probable the comets ever killed cats, wasps, or Julius Cæsar; produced fine vintages or great droughts or can now be saddled with the plague of daddy-long-legs, steel petticoats, and other monstrosilies

A writer in the Sierra(Cal.) Citizen, under

CAPITAL SERMON

"The tree frog acquires the color of whaterif on the sycamore, or cypress, it will be a whitish brown ; and when it is found on growing corn, it is sure to be green. Just so it is with young men, their companions tell us what their character is, if they associate with the vulgar, the licentious and the profane, then their hearts are already stained with their guilt and shame; and they will themselves become like the vilead them on step by step to the gate of de-struction. Our moral and physical laws show how important it is to have proper associations of every kind, especially in youth. How dangerous it is to gaze on a picture or scene that pollutes the immagination or blunts the moral perceptions or has a tendency to weaken a sense of our duty to God and man."

SINGULAR INFATUATION.

It may be within the knowledge of many of In his will, also, he allodes to the part his our readers that a clergyman of this city was ason had acted. After making him some be-quest, he adds : "The part he acted against President, and was never again heard of.
