Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrotulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the

ever be its origin, it is hereditary in the constitu-tion, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tuber-cles; in the glands, swellings; and on the switce lungs, liver, and internal organs, is termed tuber-cles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; conto withstand the attacks of other diseases; con-sequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still readered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamina-tion; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are exofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleans it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we

AYER'S Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Equipmy and Skin Diseases, St. Anthony's Fire, Rose, or Eryspiellas. Pimples, Pustues, Blouders. and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Plyfles, Pustules, Blotches, Blains and Boils, Tumors, Tetter and Sait Rheum, Scald Head, Ringworm, Rheematim, Syphillite and Mercurial Diseases, Drofst, Dyspepsia, Debluity, and, indeed, all Complaints arising from Vittated or Impure Blood. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarssparilla is to purify and regenerate this vital fuld, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIO. are so composed that disease within the range of their action can rarely withstand or evade them. Their peretrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

So wide is the field of its usefulness and so numerous So wide is the field of its usefulness and so numerous are the cases of its cures, that almost overy section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its nse. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
