#### FARREL, HERRING & CO.'S PATENT CHAMPION SAFE.

## LATE FIRE IN DUBUQUE, IOWA.

Dubuque, Jan. 7, 1859.

GENTS :- I am requested by Mr. T. A. C. try produce. Cochrane, of this place, to say to you that on the morning of the 4th instant, about 3 o'clock, his store took fire, and the entire stock of goods were destroyed. The heat became so suddenly intense that none of the goods could possibly be saved; but fortunately his books and papers which were in one of your Champion Safes, were all preserved perfectly. And well they may be called Champion, for during the whole conflagration there was one incessant pouring of flame directly upon the sale which contained them. And still, upon opening it, the inside was found to be scarcely warm, while the outside was most severely scorched.

Yours truly, N. A. McCLURE.

Nycum's Improved CAST-IRON CARRIAGE HUB.

THE undersigned believes that he has invented a cast iron carriage hub which fac excels all others now in use, for strength, neatness and durability, and that it only needs to be examined, and its merits tested; to secure its universal approval and adoption. Indeed it is no longer an experiment, it having been effectually tried by the best judges in our country, and pronounced one of the Greatest Improvements of the Age!

Several vehicles have been in use over two years with the Improved Hub attached, and the wheels are still as perfect as when they left the shop, the navoidable wear excepted.

This is the only Cast Iron Hub eyer invented suitable for light wheels.

This imprevement is of such a nature that one or more spokes may be taken out changed or replaced without disturbing the other portion of the wheel. Where a wood hub is used, if a spoke happens to become, broken, it is necessary to cut the tire and se-parate the felloes, to get at the damaged part. The wheel must be then recomposed, the tire rewelded and reset. All this involves a considerable expense

and loss of time.

In the present Improvement the inner ends of the spokes are secured in an Iron Hub, which consists mainly of two shells fastened together with screws. By simply unscrewing the nuts and taking off the back shell, any one of the spokes may be removed or changed, and the hub again put together, leaving the wheel as solid and firm as ever, all

WITHIN THE SPACE OF A FEW MINUTES. This method of constructing Iron Hub Wheels gives them unusual strength,

LIGHTNESS AND NEATNESS besides obviating several other objections that have heretofore attended their use. The cost of manu-The subscriber Agent for Bedford County, will

PRILLA., Sept., 9, 1857.

Prof. Wood—Dear Sir: Your Hair Restorative is proving itself beneficial to me. The front, and also the back part of my head almost lost its covering—in fact had. I have used but two half pint bottles of your Restorative, and now the top of my head is wel, studded with a promising crop of young hair, and the front is also receiving its benefit. I have tried other preparations without any benefit whatever. I think m my own personal recommendation I can induce many others to try it.

I have, for several years, been in the habit of using, other Hair Restoratives, and that I find yours vastly other Hair Restoratives, and that I find yours vastly superior to any other I know. It entirely cleanses the head of dandruff, and with one month's proper use will restore any person's hair to the original youthful color and texture, giving it a healthy, soft and glossy appearance; and all this, without discoloring the hands that apply. it, or the dress on which it drops. I would, therefore, recommend its use to every one desirous of having a fine color and texture to hair.

Respectfully yours,
