Scrofula, or King's Evil, SCPOIULE, OF KING S EVII, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitinted, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofu-lous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What-ever be its origin, it is hereditary in the constitu-tion, descending "from parents to children unto the third and fourth generation ;" indeed, it seems to be the rod of Him who says, "I will visit the

third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the hungs, liver, and internal organs, is termed tuber-cles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; con-sequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still ren-dered fatal by this taint in the system. Most of dered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous-contamina-

has its origin directly in this scrofulous-contamina-tion; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in supply in

AYER'S and .

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Enurrive and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTOMES, BLAINS and BOILS, TUNORS, TETER and SALT RUPER SCILD HEAD ENDOWER ENERGY. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsapa-rilla is to purify and regenerate this vital fluid, without which sound health is impossible in con-taminated constitutions. taminated constitutions.

the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so n are the cases of its cures, that almost every se country abounds in persons publicly known, w been restored from alarning and even desperate dis-eases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten. Nycums's Importoved CAST-IRON CARRIAGE HUB.

THE undersigned believes that he has invented a cast iron carriage hub which far excels all oths now in use, for strength, neatness and durability and that it only needs to be examined, and its merits tested; to secure its universal approval and a doption. Indeed it is no longer an experiment, it having been effectually tried by the best judges in our country, and pronounced one of the Greatest Improvements of the Age !

Several vehicles have been in use over two years with the Improved Hub attached, and the wheels

are still as perfect as when they left the shop, the anavoidable wear excepted.

This is the only Cast Iron Hub ever invented sui-table for light wheels. This imprevement is of such a nature that one or more spokes may be taken out changed or replaced without disturbing the other portion of the wheel. Where a wood hub is used, if a spoke happens to become, broken, it is necessary to cut the tire and se-parate the felloes, to get at the damaged part. The wheel must be then recomposed, the tire rewelded and reset. All this involves a considerable expense and loss of time. In the present Improvement the inner ends of the probas are segmed in an Iros Hub, which consider

pokes are secured in an Iron Hub, which consists mainly of two shells fastened together with screws. By simply unscrewing the nuts and taking off the back shell, any one of the spokes may be removed or changed, and the hub again put together, leaving the wheel as solid and firm as ever, all

GENTS :- I am requested by Mr. T. A. C. Cochrane, of this place, to say to you that on the morning of the 4th instant, about 3 o'clock, his store took fire, and the entire stock of goods were destroyed. The heat became so suddenly intense that none of the goods could possibly be saved; but fortunately his books and papers which were in one of your Champion Safes, were all preserved perfectly. And well they may be called Champion, for during the whole conflagration there was one incessant pouring of flame directly upon the sale which contained them. And still, upon opening it, the in-

side was found to be scarcely warm, while the outside was most severely scorched.
