Evans & Watson. Have had the surest demonstration in the following certificate that their manufacture of Salamander Safes has at length fully warranted the representations which have been made of them as rendering an undoubted security against the terrific element of fire.

When we reflect that these Safes were located in the fourth story of the building we occupied, and that they fell subsequently into a heap of burning ruins, where the vast concentration of heat caused the brass plates to melt, we cannot but regard the preservation of their valuable contents as most convincing proof of the great security afforded by your Safes.
