PERMANENT OFFICE.

Complying with the urgent request of hundreds of their patients,
DRS. C. M. FITCH & J. W. SIKES,
Have concluded to remain PERMANENTLY IN PITTSBURGH, and may be consulted at their office,
NO. 191 PENN STREET,
Opposite St. Clair Hotel.

Daily, except Sundays for Consumption, Asthma, Bronchitis, and all other Chronic Complaints, complicated with or causing pulmonary disease, including Catarrh, Pleurisy, Dropsy, Hemoptoe, and all the various Disorders, Gastritis, Female Complaints, &c. DR. FITCH & SIKES, would state that their treatment of Consumption is based upon the fact that the disease exists in the blood and system at large, both before and during its development in the lungs, and they therefore employ Mechanical, Hygienic and Medicinal Inhalations, which they value highly, but only as Palliatives, (having no Curative effect when used alone,) and Invalids are earnestly cautioned against mistaking the previous loss of credibility on any treatment based upon the plausible, but false idea that the cause of the disease can be reached in a direct manner by Inhalation, for as before stated, the seat of the disease is in the blood, and its effects only in the lungs.

NO CHARGE FOR CONSULTATION. A list of questions will be sent to those wishing to consult us by letter.

Nycum's Improved CAST-IRON CARTRIDGE HUB.

THE undersigned believes that he has invented a cast iron carriage hub which far exceeds all others now in use, for strength, neatness and durability, and that it only needs to be examined, and its merits tested; to secure its universal approval and adoption. Indeed it is no longer an experiment, it having been effectively tried by the best judges in our country, and pronounced one of the
Greatest Improvements of the Age!

Several vehicles have been in use over two years with the Improved Hub attached, and the wheels are still as perfect as when they left the shop, the unavoidable wear excepted.

This is the only Cast Iron Hub ever invented suitable for light wheels.

This improvement is of such a nature that one of more spokes may be taken out changed or replaced without disturbing the other portion of the wheel. Where a wood hub is used, if a spoke happens to become broken, it is necessary to cut the tire and separate the felloes, to get at the damaged part. The wheel must be then recomposed, the tire reworked and reset. All this involves a considerable expense and loss of time.

In the present improvement the inner ends of the spokes are secured in an iron Hub, which consists mainly of two shells fastened together with screws. By simply unscrewing the nuts and taking off the back shell, any one of the spokes may be removed or changed, and the hub again put together, leaving the wheel as solid and firm as ever, all

WITHIN THE SPACE OF A FEW MINUTES.

This method of constructing Iron Hub Wheels gives them unusual strength.

LIGHTNESS AND NEATNESS besides obviating several other objections that have heretofore attended their use. The cost of manufacture is also greatly reduced.

The subscriber Agent for Bedford County, will dispose of Township and shop rights on reasonable terms.
