STATISTICS OF LIFE AND DEATH.

FIGURES DO NOT LIE.

We have faith in satistics. They Give the douth-blow to all false doctrine, empiricism in death-blow sky-ligh the fine spun theories cience, and blow sky-ligh the fine spun theories of unpractical men. Medical satisfies are of spcof unpractical men. of unpredicted men. Archert satisfies up of spe-cial importance. They teach us to estimate at their just value the curative *powere of the drugs*, which are the stereotypes of the "profession." And what is their value? Figures which do not tell us that those who die are "incurables." If this be so, how is it that so many victims of the this be so, now is it that so many vietims of the most virulent internal and external disorders, whom the profession had given up, have recov-ered through a persevering use of Holloway's Fills and Holloway's Ointment? There can be no doubt about the fact, we opine, and we want somebody to account for it. To our plain mind, comeody to account for it. To our plan mind, it appears that if chronic dyspepsia cannot be cured by the doctors, and is cured with unner-ring certainly by Holloway's Pill, that the lat-ter remedy is worth the whole medical stock of as means of relieving that complaint So again, if a "given up" case of scrofula or erspipelas becomes rapidly convalescent under the action of the Ointment, we cannot escape the conclusion that it is the true specific for external disorders, and that "regular phramacopria" contains nothing that will compare with it as a means of subduing that class of mala-

This is a good logic, we believe. If any cavil at it, we will admit their demuners when they can show us a better basis for argument than facts .- "State Gazette."
