It is well ascertained by the testimony of aged and respectable residents that the indians, years ago, gathered oil from the surface of the ravines on this property and used it for rheumat-

In later times the teamsters of the Bullion Iron Furnace gathered and used the oil for the nurpose of applying it to galls and bruises on their horses. Oil, for years, was seen to exule at a number of places; among others, at the root of an old stump n the bank of the Allegheny river, and in the ra

A lew years ago, the then owners of the tract, with one or two of their neighbors, bored a well, a tew feet above the old stump. The first vein of oil was struck at the depth of 286 feet, and the second at 460 feet, an experienced man from Oil Creek was employed to tube the well, which projuced a stream of oil three quarters of an inch in dameter. The owners of the well, not satisfied with its production, pulled out the chamber and drilled some feet deeper, when they struck salt water in large quantities and of great strength. Beneving that the manufacture of salt would, at the time, yield them a better profit, they arranged their seed bags in the well, so as to enable them to exclude the oil, and pump the salt water. Still, oil was pumped a-

There is every reason, therefore, to believe that the property of the Company is rich in its supplies of oil. The inclination of the strata proves, conclusively, that those supplies of oil on Oil Creek have a higher level than the oil-hearing focks on this property; and that, consequently, the supply will be more permanent than that of Oil Creek its of A.
