The property of this Company consists of 200 acres of land, in fee simple, situated on the west side of the Allegheny river, a short distance above side of the Allegheny river, a short distance above the mouth of Scrub Grass Creek, in Scrub Grass Township, Venango county, Pa. It has a frontage along the river of one mile, with good boring surface for the whole distance. Two good oil wells are now in operation on the east side of the river, immediately opposite the property of the Company. The following in regard to an adjoining tract, is taken from an editorial in the Philadelphia Price Current of December 17:

"The geological relation of this property to Oil Creek, is such that the oil-bearing strata, which supply the wells on the Middle Section of Oil Creek (from the Washington McClinteck farm on the north to the Buchanan on the south) must pass under this

It is well ascertained by the testimony of aged and respectable residents that the

The first vein of oil was struck at the depth of 286 feet, and the second at 460 feet, an experienced man from Od Creek was ecoployed to tube the well, which produced a stream of oil three quarters of an inc's in duametec. Still, oil was pumped along with the water, in such quantities as to gather upon the top of the water-tanks, from whence it was sall salt at the time, yield

There is every reason, therefore, to believe that the property of the Company is rich in its supplies of oil. The diseases it originates take various children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the all having the same origin, require the same remedy, viz., purification and invigoration of the blood.
