

THE UNDERGROUND RAILWAY OF LONDON .- A New York business man, of great experience in road matters, writes from London under date of January 29, naming some of the things he has seen which he likes:

"Not the least is their extensive system of underground railways. It is perfectly wonderful how they jerk the people about, at the rate of about fifteen miles an hour, from one end of the town to another, and across and aroundstopping about once every half mile, at some prominent corner, at a station, from which you emerge to the upper air, and find yourself somewhere near where you were a half or three-quarters of an hour ago. These trains run each way, being double tracks, about every ten minutes; and morning and evening they often consist of seven or eight cars, holding thirty or forty people each. The cars are lighted with gas-not the tunnels, except at stations-so that you can read your papers; and there is no smell of smoke, or sense of suffocation. How they ventilate them so well I can

OUR STATE ORPHANS .- The report of Thomas H. Burrows, State Superintendent of the soldiers' orphans, has just been published, and contains many interesting statements. It is well known that the State has assumed the care and education of the orphan children of Pennsylvania soldiers who gave up their lives in defence of the country. Schools have been organized, and the children, boys and girls, are being cared for and educated. During the past year four new schools have been established, and three additional schools, now required, will be organized as soon. as possible. There have been admitted during the year 1,575 children, and the total number of scholars on the 1st of December was 2,658, of which 1,591 were boys, and 1,067 girls. These are sixteen, when they are discharged, being judged competent at that age to do something towards earning a livelihood. year ending November 30, was \$309,consider the benefits which are to be
