THE CAUSE OF TEMPERANCE.

No man will deny that the intemperate use of intoxicating liquors, is hurtful as well to the community as to the individual. Drunkenness has long been a besetting vice among mankind, and, we think, is not more extensively practiced now than formerly. Nevertheless, it is a subject which properly attracts the attention of every man who would be a benefactor to the human race. It is a moral disease which philanthropists have long since tried to cure, but which has thus far baffled their good intentions. Societies have do you? been established for this purpose, pledges have been administered, lecturers have harangued the people upon their short-comings in this regard, but all have proved comparative failures. The last cure proposed is prohibitory legislation. This has been tried in a number of States, but, we are sorry to say, the statistics on the subject, show that there is more drunkenness, now, in those States, than there was before prohibitory laws made it a temptation to engage in clandestine drinking and contraband liquor selling. Prohibitory laws in regard to articles of diet and drink, have always been defied by man. Even the Divine edict, "Thou shall not eat of the fruit of the Tree of Knowledge of Good and Evil," was disobeyed. As God's own command failed to restrain man before the fall, how shall human laws restrain him, in his fallen estate? All experience teaches us that sumptuary laws fail to reach their purpose. But there is one cure for intemperance. It is the same that nable. We shall lay it before our readmust be applied to the healing of every other sin. It is the proper moral and religious education of the people. Parents, guardians and religious teachers are responsible, in a great measure, for the prevalence of drunkenness. As aids to the education of which we speak, tomperance societies are, doubtless, of great use. So long as these confine themselves to the implanting of true moral principle in the minds and hearts of the people, they can do much good. For the principle itself must be rooted in the understanding and affections of man, before his life will be in conformity with such principle. But when such societies desert their legitimate mission and seek to force upon the people, by positive law, what they should inculcate in the mind and plant in the affections, by the efficacy of moral teaching, they not only fail in their purpose, but cause the people to add to the sin of drunkenness, corruption, evasion and secret breaking of the law, and even the heinous crime of perjury. Hence, we are sorry to see indications that the present temperance movement, of which we had hoped so much, is about to end its career in a struggle for political power. It is with unbounded regret that we feel constrained to write these words, but we feel it our duty to warn the true friends of temperance against the fatal mistake which ambitious and unprincipled men are leading | toration of the Union: them to commit, and only hope that our warning will be as kindly received as it is honestly intended.

VATERLAND!

The Germansare coming! Carl Heinzer, editor of the Boston Pioneer, the most ultra Radical paper in the country, has cut loose from the so-called "Republican" party. The Pittsburg Volksblatt, an influential Radical daily, says that the German "Republicans" must form an alliance with the Democracy. The Iowa German Republican papers take similar grounds and Carl Schurz himself, recommends, in the St. Louis Westliche Post, that the German Radicals vote for the Democratic candidates for legislative and municipal offices. The Germans left their Vaterland to struction" of the South, at forty millions never assist in establishing a worse tax-payers! than Austrian tyranny in America.

THAD. ACKNOWLEDGES THE CORN!

A correspondent of the N. Y. Herald. who visited Thad. Stevens, at Lan caster, a short time ago, gives an account of his conversation with the Radical leader, in which Stevens is represented to have been very severe upon Butler, Forney and other prominent men in his own party, and to have acknowledged that Pensylvania would be lost to the Radicals at the approaching elections. Stevens took notice of this letter, in his place in Congress, a few days ago, and whilst he disclaimed any intention to censure Butler & Co., he did not deny the authenticity of the stateand failed entirely to contradict that portion of those statements in which he is reported to have admitted the prospective defeat of the Radicals in Pennsylvania. We, therefore, give the following extracts from the Herald's article, with entire confidence in their

"Question—Is the Republican party well united in Pennsylvania? "Stevens-I fear that we shall lose Pennsylvania this next election. I do not think we have earnestness enough in the State to unite and draw out the Re publican strength, while the Republican portion of our Legislature has been so openly, notoriously and shamefully corrupt that all the honest Republicans

in the State are disheartened and dis-

"Question—You do not suppose that you can beat New York in corruption,

Mr. Stevens-I think we could. Cameron had his men with their handfulls of greenbacks working in the Legislature. He had not fourteen votes in his favor at the close of the election, but soon after he had forty. One man now claims \$50,000 for services, and they refuse to pay him. This corruption will certainly beat us here next election unless we can draw out the Republican strength by getting up a furore and excitement on impeachment. Geary, too, hurts us very much. He is an unhappy failure, and his nomination was an unfortunate thing for the party."

Take courage, Democrats! The file eader wavers! We shall capture the enemy, "horse, foot, dragoons" and Charles Sumner! Steady, boys, and charge them in the centre!

SHALL THE NEXT PRESIDENT BE E-LECTED BY NEGROES?

Negro suffrage having been forced upon ten States of the Union against the wishes of the lawful governing people and in violation of their inalienable rights, no negro vote that may be cast in the South for a presidential candidate in 1868 can lawfully be counted. The Conservative, people of the North should therefore take early action to checkmate the Radical conspirators in the infamons design which they are perfecting to elect a Radical President with negro ballots. Let arful white vote of those ten States, in November, 1868, and if by that vote,

be in majority, let that man be made President at whatever cost or sacrifices. This Government was formed by notions white men for white men and their posterity forever. It is not for a mere masses—"You shall take the negroes into partnership with you, and permit them to dictate to you who shall be your President, your Senators and your Representatives." And this, in substance, is just what the Radical leaders are now saying to the laboring masses their necks to such an ignoble yoke without a struggle-a death struggle, even, to retain and perpetuate their right to self-government. Let their watchword henceforth be-This Government was made for white men, and it shall be ruled by white men only! -Patriot and Union.

THE a sistant commissioner of the Negro Bureau at Nashville, Gen. W. P. Carlin, has issued a circular for circulation among negroes, in which they are informed that in case they lose employment on account of politics they will be provided for by the Bureau until they can find work, and that all expenses so incurred will be paid out of the "special relief fund" appropriated by Congress. Here is a most excellent opportunity for lazy darkies. No doubt hundreds and thousands of them will avail themselves of the opportunity to to get fixed in the Bureau as political martyrs, until they can get work. But how will this sort of business suit our Northern hard-working tax-payers, out cial relief fund" appropriated by Congress?—Pat. & Union.

THE DESPOT BILL "PASSED" OVER THE VETO.

WASHINGTON, July 19.—The President's veto message was received in the House at 2 p. m. The President says he has the same objections to this bill as to the previous one, and the bill was passed over the veto promptly.

There is no foundation for the report that the President intends to call an extra session of the Senate to consider the foreign treaties, which were only submitted at this session as a matter of favor and it was expected that they would be immediately acted upon.

The President's message, vetoing the reconstruction bill, besides taking up the bill seriatim, which it is intended to disprove, embraces an argument to show that the result of the bill, if it shall become a law, must be the repudiation of the debts of the Southern States existing prior to the rebellion. This argument is based, not upon the

hypothesis that the States are to be treated as conquered territory, but upon the theory of the reconstruction act, that there are no legal State Governments existing in the ten Southern

The President maintains that if these State governments are destroyed by act of Congress, the legal and logical consequence must be the repudiation of the debts of these States, since the government which incurred the liabilities is wiped out.

The veto message on the reconstruction bill was approved by all the Cabinet except Secretary Stanton.

NEGRO ASSASSINATION.—The horrible account of the butchery of an entire family in Wake County, N. C., just received, reminds us that atrocities of this description, perpetrated by negroes, are coming from the Southern States with alarming frequency. We can remember nothing like it in former years. In every instance, so ar as we have observed, the crime is instigated by a desire to plunder or the gratification of beastly passions. Nowhere do these outrages partake of a political character. They do not proceed from rangements be made immediately, un- a spirit of retaliation or revenge, and der the old State laws, to take the law- can only be attributed to a growing demoralization among the negro population consisting in a large degree of those who lately were slaves, but now readded to the Conservative vote of the leased from almost every form of re-North, a Conservative candidate shall straint. Not only this, but the negroes are often the dupes of mischief-makers, itinerant lecturers and political orators, who fill their weak minds with crude notions concerning their personal rights, the laws of property, &c. The influences thus exerted are incidental to the change suddenly brought about handful of grasping and ambitious in their social condition, and are indemagogues to say to the great white evitable. AMERICAN WATCH COMPANY,

Of Waltham, Mass. This Company beg leave to inform the public that they commenced operations in 1850, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs ovwant to purchase where they can be had er 700 operatives. They produce 75,000 Watches for the least money, buy of the Wash- a year, and make and sell not less than one half

> The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand, and the result is of necessity a lack of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative must vary. But it is a fact that, except watches of the higher grades, European watches are the product of the cheapest labor of Switzerland, and the result is the worthless Ancres, Lepines and so called Patent Levers-which soon cost more in attempted repairs, than their original price. Common workmen, boys and women, tuy the rough separate parts of these watches from various fac tories, polish and put them together, and take them to the nearest watch merchant, who stamps and engraves them with any name or brand that may be ordered.

How AMERICAN WATCHES ARE MADE The American Waltham Watch is made by no such uncertain process-and by no such incompa tent workmen. All the Company's operations from the reception of the raw materials to the completion of the Watch, are carried on under one roof, and under one skillful and competent direction. But the great distinguished feature of their Watches, is the fact that their several parts are all made by the finest, the most perfect and delieate machinery ever brought to the aid of human 0.00@1.45 | industry. Every one of the more than a hundred parts of every watch is made by a machine-that infallibly reproduces every succeeding part with the most unvarying accuracy. It was only necessary to make one perfect watch of any particular style and then to adjust the hundred machines necessary to reproduce every part of that watch, and it follows that every succeeding watch mus be like it.

> The Company respectfully submit their watches on their merits only. They claim to make

A BETTER ARTICLE FOR THE MONEY by their improved mechanical processes than can be made under the old-fashioned handicraft system. They manufacture watches of every grade, from a good, low priced, and substantial article in solid silver hunting cases, to the finest chronometer; and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensable requisite of all their watches is that they shall be GOOD TIME-KEEPERS. It should be remembered that except their single lowest grade named "Home Watch Company, Boston, ALL WATCHES made by them

CONSUMPTION. CURABLE BY DR SCHENCK'S MEDICINES .- To cure consumption, the system must be prepared so that the lungs will heal. To accomplish this, the liver and stomach must first be cleansed and an appetite created for good wholesome food, which, by these medicines will be digested properly, and good healthy blood made; thus building up the constitution. Schenck's Manarake Pills cleanse the stomach of all bilious or mucous accumulations; and, by using the Sea Weed Tonic in connection, the appetite is restored. Schenck's Pulmonic Syrup is nutritious as well as medicinal, and, by using the three remedies, all fitted at once from our stock, in most cases bette impurities are expelled from the system, and good, wholesome blood made, which will repel all dis ease. If patients will take these medicines ac cording to directions, consumption very frequently in its last stage yields readily to their action. Take the pills frequently, to cleanse the liver and tomach. It does not follow that because the bowels are not costive they are not required, for some times in diarrhoea they are necessary. The stomach must be kept healthy, and an appetite created to allow the Pulmonic Syrup to act on the respiratory organs properly and allay any irritation Then all that is required to perform a permanerat cure is, to prevent taking cold. Exercise about the rooms as much as possible, eat all the richest food-fat meat, game, and, in fact, anything the appetite craves; but be particular and mo sticate
