In order to understand the following, it is necessary for the reader to know that SECRETARY SEWARD has contracted with the King of Denmark, for the annexation of the island of St. Thomas, to the United States, and that his Majesty, KING CHRISTIAN, has determined to leave the question of the transfer of the island to our government, to the decision of the inhabitants of the is-

There are many reasons why the inhabitants of St. Thomas might hesitate about changing their condition. No advantage can ensue to St. Thomas which will balance the disad-The King of Denmark would pocket seven millions of dollars by the transaction, but his West Indian subjects get not a penny of the again by the transfer, and it may be that they will refuse to ratify the bargain, and thus while they flatter CHRISTIAN IX by an expression of their willingness to change their allegiance, they will relieve Mr SEWARD of a deal of

Can the reader guess the source of the sentiments expressed in the above quoted article? "Charleston Mercury," say you? No. "Richmond Enquirer?" No. "N. Y. Daybook?" Guess again. "Brick Pomeroy?" Not at all! That article is clipped from the editorial columns of that most abject of all newspaper toadies to the present Radical Congress, that quintessence of doubledistilled, rectified and bottled-up "loyalty," the Philadelphia Inquirer! Now St. Thomas might hesitate about" government God ever gave to man!" Denmark is mild," says the Inquirer. claws are just visible: Does it mean to insinuate that the Dan-Inquirer is above suspicion on that score. "Their port is almost a free port." idea that Free Trade is a blessing to the St. Thomasians? Impossible! That would be an argument against "Protection to American Industry," of which that journal is a noted advocate. "They are doing well under the a large number of men paid asclerks and flag of Denmark, and if they know as much as we do, they will doubt whether they could do better by adopting the stars and stripes." What, truer happiness and greater prosperity, under the flag of an "Old World Despot," than under the Stars and Stripes of "Free America!" Is the Inquirer jesting? "They will incur thereby a heavy tariff, a frightful national debt, an excise, heavy taxation, greenbacks, and a suspension of specie payments; they will gain the right to send a delegate to Washington, and to have political quarrels." "Incur a heavy tariff!" Isn't that exactly what the Inquirer has demanded for this country? Isn't a "heavy tariff" protection to America, and if St. Thomas becomes a part of the Yankee nation, will it not also be John F. Reynolds declared they would "protected?" "A frightful national debt!" Why, do not Jay, Cooke & Co. tell us that "a national debt is a national blessing," and is not the Inquirer the organ of those renowned bankers? How shocking! That "a great national blessing" should be thus suddenly and strangely transformed into a "frightful" national curse! "An excise, heavy taxation, greenbacks, and a suspension of specie payments." Pshaw! What has "an excise," or "heavy taxation," to do with the happiness of our people? 'Are there not plenty of untaxed Government bonds, and cannot every body, the St. Thomasians included, invest in these and thus escape "an excise" and "heavy taxation?" As to "incurring greenbacks," if the St. Thomasians wish to avoid that difficulty, let them turn printers. But not much trouble need be apprehended on that subject, as the Philadelphia Inquirer and kindred sheets assured us, last fall, that in case

A few days ago it was announced that "500 miles of the Union Pacific Railroad had been completed west from Omaha;" and the bare announcement was made the text for many interesting facts concerning the history of this great national enterprise, and the wonderful rapidity with which its construction has been carried forward. OUR BOOK TABLE.

THE GALAXY .- We have before us the January number of this popular monthly. The "Galaxy" is the most liberal, progressive and catholic of the literary magazines. Without partaking of the narrow partizanship which makes the "Atlantic Monthly" detestable, the "Galaxy" ventilates the politics, as well as the literature, of the day. The true value of Machinery applied to Watch

making is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. If the watches are good, it is because the machinery is good. Of course there must be no defect in the principle or plan of the movement-no mistake in the sizes or shapes of the pieces of which it is composed-nothing wanting in their properties, and no error in their positions. These points once thoroughly settled, it rests wholly with the machinery, constructed with infinite diversity of form and function expressly for the purpose, to produce the finished pieces. By means of multyplying guages and microscopes, tests and inspection for the detection of wear in the cutting tools, and for faults and flaws in steel or stone are made to accompany the work in every stage from beginning to end.
