EDICAL.-DR. A. S. SMITH, having resumed the Practice of Medicine is a generous share of the patronage of the unity. Office in his residence, at St Clairs He would call the attention of the public, and to those more immediately interested to the following: His health being too delicate to bear much of the fatigues and exposures consequent on general practice, he has adopted a speciality in the

eral practice, he has adopted a speciality in the profession.

Soon after commencing practice, some twenty years since, he was attracted by the almost universality of female complaints, both in the married and single state. Partly from natural inclination, and in order to obtain success in practice, these complaints were made the subject of incessant study. These alterations, displacements and deranged functions of the organs peculiar to the female, are owing to that refined sense of delicacy on the part of the female, who, ignorant of the consequences, prefers to suffer in silence rather than expose her situation. Seldom cured by the general practitioner, who is prevented by this delicacy from acquiring by experience that tact and skill necessary to discriminate the exact change present, and contents himself with prescribing for the deranged functions, or overlooking the cause, simply for attendant nervous disorders, founding his prescriptions on a Plethoric Anaemonic state of the general system and the result is no benefit, as the number of the long suffering females bears ample testimony. Believing that he has, from long and special attention paid to them, acquired that skill in discriminating and experience in treating, he solicits the suffering to give him a call. No charges for consultation or examination. Visits made to all parts of the county.
