eral practice, he has adopted a speciality in the profession. Soon after commencing practice, some twenty years since, he was attracted by the almost uni-versality of female complaints, both in the mar-ried and single state. Partly from natural incli-nation, and in order to obtain success in practice, these complaints were made the subject of incess-ant study. These alterations, displacements and deranged functions of the organs peculiar to the female, are owing to that refined sense of delicacy on the part of the female, who, ignorant of the consequences, prefers to suffer in silence rather than expose her situation. Seldom cured by the general practitioner, who is prevented by this delicacy from acquiring by experience that tact and skill necessary to discriminate the exact change present, and contents himself with pre-scribing for the deranged functions, or overlooking the cause, simply for attendant nervous disorders, founding his prescriptions on a Plethoric Anaemon-ic state of the general system and the result is no benefit, as the number of the long suffering fe-males bears ample testimory. Believing that he has, from long and special attention paid to them, acquired that skill in discriminating and experi-ence in treating, he solicits the suffering to give him a call.
