THE NEW CATHOLIC CHURCH.-Interesting details of the Corner Stone laying.—The following interesting matter

furnished us for our readers: As many are desirous of knowing what objects were deposited in the cavity of the corner stone, laid last Thursday, with so much solemnity, in the new Catholic Church now begun in this place, the following notice is intended to satisfy all inquirers.

After the Bishop had addressed the immense crowd that had assembled to witness the solemn occasion, he invoked a blessing and deposited in the primary, or chief angular stone, a zinc box, containing

1. The two Catholic organs, or papers, of the Arch diocese and the Pittsburgh diocese, viz: "The Catholic Mirror,' and "The Pittsburgh Catholic."

2. The two county papers, ("Gazette" and "Inquirer.") 3. Exemplars of the currency from a

dollar to a cent, kindly furnished by a citizen of this place. 4. There was also deposited in the redeemed. hollow part of the corner stone a Latin document, of which the following is a

IMPORTANT ADVICE TO VOTERS .-On the third day of November the voters of Bedford county will be called upon to discharge a sacred duty they owe to themselves. There are two parties in the contest, both rallying around Law Judge in this judicial district are the Flag of their Country. One of these parties is doomed to defeat, and with that defeat there will be a great depression of spirits, superinducing a loss of appetite and an entire derangement of the digestive organs, or animal functions. The unfortunate in the contest, aforesaid, will find a wholesome panacea in Hoofland's German Bitters or Tonic that will speedily restore the tone 293 of their stomachs and enable them to resume business. PATRIOTS! Heed your country's call

Do those who doubt whether it is wise to place money in a Life Insurance Company ever consider how wonderfully economical the investment concerning the laying of the corner is? Take the ordinary life plan of instone of the new Catholic church, which | surance: where the party insured pays took place on the 22d instant, has been his policy yearly. A man of thirty may be insured for one thousand dollars-at the annual cost of \$16,75, or a little over four cents a day. In other words a working man has only to drink one glass of beer less every morning to secure his family from want. A man of fifty need only pay \$36 65, or about ten cents a day, while a man of sixty may be insured for \$63 20, or a little more than seventeen cents a day. No man, however limited his circumstances, can refuse to put away such a small part of his income for the benefit of those dear to him, especially when we have a company in existence like the National Life Insurance Company, whose advertisement we print elsewhere. This Company has in its management men of national reputation for honor and sagacity. At its head we have such men as Jay Cooke, whose name alone is an assurance that every promise made by the Company will be

information is by couriers on land, and by steamers on water.

The Western World knows that China is a very large country, in the main densely peopled; but few yet realize that she contains more than a third of the human race. The latest returns made to her central authorities for taxing purposes by the local magistrate make her population Four hundred and Fourteen milltons, and this is more likely to be under than over the actual aggregate. Nearly all of these, who are over ten years old, not only ean but do read and write. Her civilization is peculiar, but her literature is as extensive as that of Eurepe. China is a land of toachers and traders; and the latter are exceedingly quick to avail themselves of every proffered facility for procuring early information. It is observed in California that the Chinese make great use of the telegraph, though it there transmits messages in English alone. To-day great numbers of fleet steamers are owned by Chinese merchants, and used by them exclusively for the transmission of early intelligence. If the telegraph we propose connecting all their great seeports, were now in existence, it is believed that its business would pay the cost within the first two vears of its suc-

existence, it is believed that its business would pay the cost within the first two years of its successful operation, and would steadily increase thereafter No enterprise commends itself as in a greater
