GEORGE ELLIS (Cashier National Bank Commonwealth,) Treasurer.

HON. A. K. McCLURE, Philadelphia, Solicitor. The Chinese Government having (through the Hon. Anson Burlingame) conceded to this Company the privilege of connecting the great seaports of the Empire by submarine electric telegraph cable, we propose commencing operations in China, and laying down a line of nine hundred

miles at once, between the following port s, viz : Wan-Chu. ... 499,900 .1,200,000 .1,000,000

These ports have a foreign commerce of \$900,000,000, and an enormous domestic trade, besides
which we have the immense internal commerce of
the Empire, radiating from these points, through
its canals and navigable rivers.

The cable being laid, this company proposes
erecting land lines, and establishing a speedy and
trustworthy means of communication, which must
command there, as everywhape else, the communications of the Government, of business, and of
social life smecially in China. Bus has no nostal social life especially in China. She has no postal system, and her only means now of communicating information is by couriers on land, and by

ers on water.

The Western World knows that China is a very large country, in the main densely peopled; but few yet realize that she contains more than a third of the human race. The latest returns made to her central authorities for taxing purposes by the local magistrate make her population Four hundred and Fourteen millions, and this is more likely to be under than over the actual aggregate. Nearly all of these, who are over ten years old, not only can but do read and write. Her civilization is peculiar, but her literature is as extensive as that of Eurepe. China is a land of teachers and traders; and the latter are exceedingly quick to avail themselves of every profeored facility for procuring early information. It is observed in California that the Chinese make great use of the telegraph, though it there transmits messages in English alone. To-day great numbers of fleet steamers are owned by Chinese merchants, and used by them exclusively for the transmission of early intelligence. If the telegraph we propose connecting all their great seaports, were now in existence, it is believed that its business would pay the coat within the first two years of its successful coveration. pay the cost within the first two years of its cessful operation, and would steadily inc

No enterprise commends itself as in a greater degree renumerative to capitalists, and to our whole people. It is of wast national importance commercially, politically and evangelically.

The stock of this Company has been unqualifiedly recommended to capitalists and business men, as a desirable investment by editorial articles in the New York Herald, Tribune, World, Times, Post, Express, Independent, and in the Philadelphia North American, Press, Ledger, Inquirer, Age, Bulletin and Telegraph. All these indicate diseases of the Laver or Di-gestive Organs, combined with impure blood.

HOOFLAND'S GERMAN BITTERS

is entirely vegetable and contains no liquor. It is a compound of Fluid Extracts. The Roots, Herbs, and Barks from which these extracts are made, are gathered in Germany. All the medicinal virtueus are extracted from them by a scientific Chemist. These extracts are then forwarded to this pressly for the manufacture of these Bitters. There is no alcoholic substance of any kind used in compounding the Bitters, hence it is the only Bitters that can be used in cases where alcoholic stimulants are not advisable.

HOOFLAND'S GERMAN TONIC

is a combination of all the ingredients of the Bitters, with PURK Santa Cruz Rum. Orange, etc. It is used for the same diseases as the Bitters, in case where some pure alcoholic stimulus is required. You will bear in mind that these remedies are entirely different from any others advertised for the cure of the diseases named, these being scientific preparations of medicinal extracts, while the others are mere decoctions of rum in some form. The TONIO is decidedly one of the most pleasant and agreeable remedies ever offered to the public. Its taste is sexulaite. It is a pleasure to take it, while its life-giving, exhilarating, and medicinal qualities have caused it to be known as the greatest of all tonics.

DEBILITY.

There is no medicine equal to Hoofland's German Bitters or Tonic in cases of Debility. They impart a tone in cases of Debility. They impart a tone the appetite, cause an enjoyment of the food, enable the stomach to digest it, purify the blood, give a good, sound, healthy complexion, eradicate the yellow tinge from the eye, impart a bloom to the checks, and change the patient from a short-breathed, emacichange the patient from a short-breathed, emaciated, weak, and nervous invalid, to a full-faced, stout, and vigorous person.

Weak and Delicate Children are made strong by using the Bitters or Tonic. In fact, they are Family Medicines. They can be administered with perfect safety to a child three months old, the most delicate female, or a man of

FROM HON. GEO. W. WOODWARD,

Chief Justice of the Supreme Court of Pennsylva PHILADELPHIA, March 16, 1867.

I find that "Hoofland's German Bitters" is not an intoxicating beverage, but is a good tonic, useful in disorders of the digestive organs, and of great benefit in cases of debility and want of nervous action in the system.

Your Truly,
GEO. W. WOODWARD.

FROM HON. JAMES TAOMPSON

Judge of the Supreme Cont of Pennsylvania.

PHILADELPHIA, April 28, 1856.

I consider "Hoofland's German Bitters" a valuable medicine in case of attacks of Indiges tion or Dyspepsia. I A care certify this from my experience of it. Yours, with respect, JAMES THOMPSON.

FROM REV. JOSEPH H. KENNARD, D. D., Pastor of the Tenth Baptist Church, Philadelphia. DR. JACKSON-DEAR SIR :- I have been fre quently requested to connect my name with ommendations of different kinds of medicines, regarding the practice as out of my appropriat sphere, I have in all cases declined; but with clear proof in various instances, and particularly in my own family, of the usefulness of Dr. Hoof-land's German Bitters, I depart for once from land's German Bitters, I depart for once from
my asnal course, to express my full conviction
that for general debility of the system, and especially for Liver Com

it may fail; but usual I js, I doubt not, it
will be very beneficial to those who suffer from the

THE REV. GILBERT HAVEN'S SERMON. We promised in our last to give a fuller specimen from the sermon of the editor of Zion's Herald that was contained in our first extract. We do this in justice to Mr. Haven, inasmuch as we characterized the entire passage as "wild and foolish talk :"

"We shall be attracted to this hue because it is one of God's creatures, and a beautiful one too; because, chiefly, we have most wickedly loathed and scorned it. He will have his revenge, and will yet compel us to discern the loveliness of this most abhorred virtue, and to become enamored of it. The song of songs may have a depletion of the "beaux?" These more literal fulfilment than it has ever confessedly had in America; and the illegal but divinely implanted admiration of Scuthern Solomons for just so much to expend when they get black but comely maidens be proudly away from a summer holiday, and ounce of pepper, one eighth of an ounce acknowledged and honorably gratified who do not desire to pour it all into of ceyenne pepper, pound the whole in the life of Northern and Southern the pockets of the stable-keepers; these and press through a hair seive. NO BEAUX ANYWHERE.

Carette,

No beaux! Absolutely no beaux! Well young ladies, stop and consider, if, after all, you yourself have not pronounced the sentence of banishment.

"We? We banish them? Good gracious! Is it not for them we have devised all this elaboration of adornment? We, indeed! Were we not dism, and that Mr. Haven confidently for weeks, before we came to these odious mountains, where men are as scarce as French hair dressers, closeted with our dressmarkers and milliners to produce these bewitching 'suits,' long and short, for morning and evening, out-door and in-door wear?-Have we not cool dresses and warm sunshine, dresses for neutral weather, with ribbons, gloves, sashes, parasols, hats and fans to 'match,' to the minuest shade? For whom should we take all that trouble but for the beaux? And how are we responsible for their disgusting absence ?"

Listen, my dears, for in that which you have just said lies your offence. Can damsels thus arrayed walk in the woods, climb the mountains (except in poetry?) Can they take even an ordinary, mild walk, without mortal terror of periling their millinery ?-Must they not, therefore, "ride," morning, afternoon and evening, everywhere, to the delectation of the stable keepers, and the consequent pecuniary beaux, whose fathers may be rich, but whose sons have yet to fill their individual coffers; these beaux, who have out of their purses, and make them as it had been wrongfully wrong. Sometimes a girl says no to an offer, when it is as plain as the nose on her face that she means yes. The best way to judge whether she is in earnest or not, is to look straight into her eyes and never mind her noes.

An Irishman who was asked to furnish proof of his marrige, took off his sweet again and perfectly restored by hat and exhibited a scar on his head. mixing with it a small quantity of "Here" sald he, "Is my marriage certificate. That's Judy's mark."

A man who was shooting "for fun"

When is a woman called an old maid? When she's a virgin (verging) near forty.

HOUSE AND FARM.

The cutture of Trees .- The recent rcport of the U.S. Agricultural Department contains a valuable essay, contributed by J. M. Edmunds, late Commissioner of the Land Office. Great evils will result to the country, it is predicted, unless the axe of the woodman is restrained. It is asserted that, except in the mountain regions, nearly the entire surface from the Atlantic to the Mississippi has been despoiled of its primeval forest growth, and that nowhere have flat arable lands been allowed to reproduce the forest growth. Three-fourths of the original store of timber, it is believed, have already dresses; dresses for rain, dresses for been consumed. The untimbered surface of the plains between the Mississippi and the Pacific amounts to fourteen hundrod thousand square miles, and it is asserted that, by a little artificial effort, forests may be gradually extended over this large area. Expe riments thus far made have proved successful. Trees to the number of millions have been produced from the seed to almost every forest species by the unaided efforts of a single association in Nebraska.

Prepared Seasoning,-A writer on cookery gives the following recipe for preparing a delicious seasoning. Place in a paper bag one-quarter of an ounce of thyme, one-quarter ounce of bay leaf, one-eight ounce of majoram, and one-eighth ounce rosemary; put the bag into a moderately heated oven, till the herbs are dry; then mix them in a mortar with half an ounce of nutmegs, half an ounce of cloves, a quarter of an beaux, who can get vastly more fun this mixture in a dry, well-corked bottle. These spices are to be used either last longer, with a party of "the fel- alone or with salt added; the proporlows"-this is the reason that, with tion for mixing with salt is one ounce sufficient to season three pounds of forcemeat.

Some years since a wild-goose was shot in Washington Territory, and a yield was found so great as to lead to its propagation, until this variety which is known in the territory as the "Goose wheat," has become a standard one in that section of the country. "Sheep .- As the weather grows warmer, look out for ticks, scab, and lice. We have great faith in corbolic soap, feet and hands have become paralyzed and this may be applied without fear for want of use, that is your misfortune, of injury to the animals. The wool chilled; visit the pens frequently .-Chilled lambs, apparantly past succor, may often be revived by bringing to by friction with dry cloths, and a little mild milk punch.

treating balky horses: "Let me inall who hold the rein, that the way to the carriage, and whirl them rapidly ble circle. One dose will often cure him; two doses generally will; three doses are final with the worst horse that ever refused to stir."

Breeding Animals must be well fed. A quart or two of oil meal daily, or an equivalent of rye bran mixed, is good. to eight quarts a day with the meal; if ing, and after that, to be used until grass comes, or the rye for soiling is fit

Mares should be treated in very much the same way; a few carrots are an excellent addition to the diet, and roots and oil cake may be fed freely if a gay heart; and I enjoyed a sail with care be taken that they do not induce an old sun-bonnet over my curls, or a too great laxness of the bowels; constimoonlight ramble with a merry party. pation is to be always guarded against in animals approaching partuition. The disease known as glanders con-

sists essentially of ulceration of the cartilages of the nose, distinctly developed. There is scarecely a chance of recovery when once fully seated, and, as the disease is contagious, there is little inducement to keep the animal.

Red Ants .- Wash and wipe thoroughly your safes, cupboards, &c.; then sprinkle on salt, and rub it well into the wood, not neglecting the cracks and crevices. This application, properly applied, will relieve you of their annoyance. Cows .- Prepare roomy, loose boxes

for cows to calve in, and litter them well. The cows may be kept tied until the time actually comes, when it is best to give them the freedom of the box. To Restore Milk .- When milk has

become turned by heat, it can be made carbonate of magnesia. To soften hard water .- Dissolve two

tablespoonfuls of quick lime in nine quarts of water, and stir this well into a barrel of hard water, and let it stand twenty-four hours. Forest leaves make an excellent

mulch, and when rotted an excellent manure.

Good fences pay better than the lawsuits with neighbors.
