The Bedfor N AN MA

(Continued from 1st page.)

islative branches of the government, for the want of properly recorded statistical infor-mation, relating to the development and growth of the resources of the Commonyealth. It is impossible for any State offi cer to report the actual or even the approx imate amount of any of our great natural resources, and it cannot be ascertained from year to year the amount of coal mined, pe-troleum produced, lumber cut or iron manufactured, without special reference to those who have charge of the industries growing out of these products. At very little cost and labor, statistics relating to all these obicts could be gathered and annually em-braced in a report to be made to, and pub-lished by the Legislature. The value of such information would be of incalculable such information would be of incadenate importance in an official way, as well as in the general business of the country. It would stimulate competition, exhibit the in-exhaustible materials within our borders, and give our people and others, a more per-fect idea of our wealth and resources. The fect idea of our wealth and resources. The recommendation made last year for the establishment of a desk for the collection and servation of statistics relative to exports and imports, agriculture, manufactures, sal, iron, oil, lumber, &c., and for the col-ection of mineralogical and geological specnens, and other things that may be deem ed appropriate to such a department, is res pectfully renewed, with the suggestion that the duties be attached to the office of the Librarian and his Assistant, with a reason able increase of compensation, and an appropriation for the same.

Prison Discipline.

In accordance with a law approved April 3, 1867, Mahlon H. Dickinson, Esq., of 13, 1867, Mahion H. Dickinson, Esq., of Philadelphia, was appointed "to visit, for philanthrophic purposes, the prisons and almshoules in the various counties of the Commonwealth." His second report which is herewish presented, embraces a vast amount of useful information, and will be found highly interesting and worthy of ma-ture consideration. It will be seen that while seene of our county unisons have been while some of our county prisons have been constructed and are being conducted with strict regard to the proper objects of pun-isbinent, others are utterly unfit for any such purposes, and are a disgrace and reperpeters to a civilized age and a Christian people. The Commissioner, in regard to ome of these, describes them "as being unpeople safe, where prisoners could not be held un-less loaded with chains, where the sexes were not separated, where there was no dis-cipline, or any offort made towards the mor al or religious improvement of the inmates; the buildings totally unfit for the purposes of a prison; and where the prisoners become schooled in vice, and even ually graduated prepared for a life of lawlessness." In some of the prisons the cells are represented as contracted dangeons, into which not a ray of sunshine or a draft of pure air can enter, and in which a human being could ssibly live through a lengthy term of ce. And in still others, in consesentence. nuence of the want of proper accommoda hardened and aged to the youth of tender years, are permitted to congregate, and in dulge in card playing, profanity, and almost every species of immorality and crime. Under such circumstances, reformation, which is the grand object of divine, and should be f all human laws and punishments, is renlered impossible; whilst hideous lessons of vice are taught and learned, to be practiced when future opportunity occurs. This is all wrong, and a remedy for the evil should by all means be applied. No community has a moral or legal right to inflict punishment as a mere retaliatory measure a manner as to endanger the health and life of the criminal, to deaden him to all the better sensibilities of his nature, and absolutely harden him to the commission of crime.

The commissioners appointed "to inquire into the various systems of prison discipline, as practiced in other States and countries, compared with what is known as the Pennsylvania system," will submit you their report at an early day, from which you will learn that the capacity of our penitentiaries is at present competent for the safe keeping and proper punishment of all offenders of the higher grades, and that work houses and houses of correction are needed for those whose crimes are of a more trivial character, and whose reformatio and future usefulness may be accomplished by a humane system of discipline, such as will be recommended. The Judiciary. Communications have been received from various parts of the State, representing that the present judicial force is inadequate for the purposes designed. Since the number of judges was fixed, the business of the courts has greatly increased, with our rap-idly expanding population, and the mul-tiplication of commercial and business opcrations of our growing Commonwealth. How far relief should be afforded is well for hy of careful consideration. In one district of the Supreme Court, over seven hundred new cases have been docketed within one year. Many of these involve very large amounts, and important legal principles; and their proper considera-tion imposes upon the judges great labor and responsibility. In the other districts of this court the argument lists are also becoming so crowded that it is impossible to discose of the business with that promptness and intelligence demanded by the pub-lic interests; and especially, with one of the he interests; and especially, with one of the judges, as now required by law, assigned to duty in the court of *nisi prius* at Phaladel-phia. I therefore earnestly recommend an additional judge for this court, believing it a public necessity, in justice to the many suitors, and to the judges who have more work than should be required of the present number of men, let them be ever so

every allegation of error, and give a favora-ble response to every application; and hence, by the Monroe doctrine, so that whatever petitions for pardon are becoming so numer-ous that the mere examination of them is to republicans of Cuba, it would only petitions for pardon are becoming so numerexhaustive of a large amount of valuable time; at least an hour in each case, exclusive of the time occupied in correspon lence with the judges, district attorneys and other parties. Criminals are no sooner convicted, than their friends, and other interested parties, who seem to think that it is the Gov ernor's constitutional duty to nullify the laws instead of sceing that they are faithful ly executed, prepare a raid upon him, and employ in their importunities for pardon every device that human ingenuity can sug-gest; and if but a tithe of the representa-tions set forth were believed, one would be led to suppose that our courts are daily guilty of the grosse-t blunders, and that justice is far more blind than she has ever been painted by the most skillful artist. During the year ending December 31, 1869, there have been fifteen hundred and ment.

fifty applications for pardon, of which sixty-two, or four per cent., were granted, eleven hundred and eight rejected, and three hund-red and eighty are still under advisement.

For some reason, not easily understood, it seems that public sentiment has become perverted on this important subject of par dons. The framers of our government, as I understand it, never contemplated or intended an indiscriminate use of the pardon-ing power. It was only designed for the correction of manifest errors or oppressions, palpable mistakes, cases of after discovered evidence, and others of exceptional charac-ter. Both the theory of our government renewed by the solemn enaciment of Conand public policy require that the pardon-ing power should be kept within these reasonable limits: and not be made an instrusonable limits; and not be made an instru-ment to defeat the execution of the laws and the administration of public justice. All ordinary cases, therefore, are wholly outside of, and in conflict with, the principle on which Executive elemency should be presented for consideration. It is earnestly hoped the public will understand and act in accordance

National Affairs. Having laid before you a general survey of the affairs and condition of the State, which relate to the common welfare, it af-fords me also the highest gratification to add that the amicable intercourse and pleas-ant relations which have so long existed be-tween the government of Pennsylvania and the government of all the other States of the Union, "to preserve, protect and de-fend" these fundamental principles of hu-manity, equal rights and equal jastice to all, universal freedom and a united country, is greatly strengthened. Will cheer up and re as-ure our business men-and put the wheels of commerce, manufac factures and labor in full operation. It will prevent a decline in the revenues derived from the tarjff and internal taxation, and will save thousands of citizens from the erushing effects of contraction. As a part of the same policy, there should be no hesi-tation about the abandonment of the idea of reducent the amount of legal ten-ders now in circulation. The constant and natural approach to specie payments is the only safe mode, in

greatly strengthened. The general relations of the National Government, as set forth in the recent annual message of the President, continue to be "peace at home and without continue to be "peace at home and without entangling alli-"peace at home and without entangling alli-ances abroad;" the reconstruction of the States lately in rebellion is being rapidly accomplished—the revenues are faithfully "Both to be an all probability be a failure. I do not hesitate to say that the contraction of the carrency at this time would be pro-ductive of great injur, both to individuals and to the general interest of the Nation. collected-the National debt is being liqui-dated, at the rate of about one hundred million dollars per annum, and repudiation bas been emphatically repudiated. A strict and uncompromising adherence to this poli-cy by a prudent and economical administration has alrealy restored the National char acter to the fullest confidence in the minds, not only of our countrymen but of foreign-ers, and has allayed all spirit of discontent that might have been dangerous to the stability of our institutions.

it directly affects the industrial operations in which Pennsylvania is so largely interested. Movements, characterized with the greatest energy, are now being made by those interested in free trade, to induce Congress to take such action as will permit ar prove disastrous to the great coal, iron and other interests of our State, diminishing the production of iron and other manufactured articles, and consequently the consumption of coal, and be destructive to our valuable home markets. It would also prove disastrous to many of our capitalists and working people—depriving them of all reasonable prospects of future activity and remunerating wages--and bring our production and bring our production and bring our production and the market by harmony among yourselves and the members of the several State Departments, and your deliberations result in lasting benefit to the Commonwealth. EXECUTIVE CHAMPER AND. W. GRAMPER AND. nous competition with pauper labor from road. So far as the present system af fords protection to the manufactures, labor and products of Penn-ylvania, it is obliga-tory upon us to use all honorable means to prevent any reduction of existing duties. Our miners, laborers and manufacturers will ness should not be thrown out of employment by the proposed change of duties on foreign imgive for I ports, which has always heretofore resulted in the prostration of every department of Hou in the prostation business, and entailed upon trade, labor and business, and entailed upon us the manifold evils of National, State and individual bankruptey. We owe it as a du-ty to our constituents to instruct our Sena-tors and request our Representatives in Con-gress to oppose all such attempts. For the same reasons we should oppose any reciproc ity treaties by which the people of Canada can gain advantages over our own lumber-men, farmers and other productions of the people of the pe men. farmers and other producers, within our limits. While acknowledging the rightful constiturional authority of the General Govern ment to dispose of all questions relative to national affairs, and while in no manner seeking to interfere with the exercise of that authority, I cannot refrain from alluding to the fact, that for more than a year, a brave people in Cuba have been struggling for their independence against great odds, in the face of barbarities and atrocities which will forever be a foul blot upon the history of Spain. We should indeed be annindful of Spain. We should indeed be animination of humanity and of the greatness of our na-tionality, if we omitted to notice this patri-otic effort by the Cubans to throw off the Spanish yoke, and like our own ancestors. JE K "to assume among the powers of the earth the separate and equal station to which na-ture and nature's God entitle them." The new organization has abolished slavery, and ofth G atte-ted its right not only to our sympathy, but to recognition, by the vigor and determination of its resistance to the oppressions of the mother country. Almost from the be-ginning of our National Government, Con-Stre M gress has furnished numerous precedents for the action here indicated, even when the B. F for the action here indicated, even when the people struggling for liberty were not upon the American continent. They recognized Greece in her efforts to establish her nation-ality against Turkish oppression. The same spirit prevailed not only towards Poland, Italy and Hungary, but to Ireland in all her movements to regain her long but particular sam a fe bour report of our Commissioners, which is here with communicated. In Memoriam. It is eminently proper that special notice should be taken of the decease of such per sons as have accupied prominent positions in, and rendered distinguished services to the State. Conscisuous among these were every encouragement to the people of that country to establish a Republican form of BE Government. Upon this continent there are numerous instances of active sympathies P with the struggles of the people for liberty in various nations. In the case of Texas, during her conflict with Mexico, she not onties ing ly had our undisguised friendship, but obtained our recognition of her independent nationality, and soon afterwards she was annexed to our great sisterhood of States. It is in singular contrast with these his-65 T ally E en cou pathy of a great majority of the people of this and other States, and I but give ut-It has grown into a custom to regard an application for Executive elemency as an in-dispensable part of the machinery of erimi-sympathy with the people of that Island also pensatile part of the machinery of crimi-nal justice. Because the Executive is in wested with the power to pardon, it is by many supposed that he has not only the right, but that it is his duty to examine into SEED WHEAT AGENCY, feb12tf

amount to the practical enforcement of what amount to the practical enforcement of what our nation has so long advanced in theory. Cuba*is an American island. Geographi cally it belongs to the United States. Its acquisition has been a leading principle with many of our ablest statesmen from an early period in our history. Jefferson, Madison, Adams, Clay, Van Baren, Buchanan and many others advocated the incorporation of Cuba into the Union. It is hoped the time will soon come, if it has not already arrived, when by the enunciation of a prompt and when by the ennetiation of a prompt and decided policy a brave people may be recig-nized as independent, and the cause of re publican principles receive new encourage-

The management of our national finances is one of the most delicate and important questions now under consideration by the American people, and while it is not my in tention to offer any plan to settle a matter which seems to give so much trouble to many of our most experienced financiers, a few suggestions may not be out of place. It will be remembered that by the estab-

mar a system that has been so generally beneficial. When the government estab-lished the National banks, our State banks were taxed out of existence and destroyed gress. under whose supervision they were promised a just, kind and fostering care. It seems unjust, therefore, that the govern ment should propose to withdraw a part of their circulation from them and give it to new ones to be organized where none now exist. If new banks should be created with this view of the subject, as due alike of Executive and a proper regard for the ex-ecution of the laws. National Affairs. University of the subject and the subject and the same subject and the subject

> The constant and natural approach to specie payments is the only safe mode, in enacted will in all probability be a failure. I do not hesitate to say that the contraction of the currency at this time would be pro-

and to the general interest of the Nation. Let there be a liberal encouragement of rail roads, manufactures and every project that will afford employment and compensation to our toling millions. Encourage a vigorous collection of the revenues on laxuries. M sintain a strong treasury, with gold sufficient to keep a check upon those who might be disposed to di-turb the natural tendency towards specie payments, or for the purposes of speculation. There should be a steady but moderate reduction of the National debt, a funding of the present six per cent. five There is another subject also of National mportance claiming our attention, because it directly affects the industrial operations

at such a rate as will pay off the debt in about thirty years. We shall then not only find the business of the country reviving, but our business men ready to expand their out our business men ready to expand their operations with the greatest encouragement. The foregoing are the only subjects con-nected with State and National affairs that I have deemed of sufficient importance to

ent number of men, let them be ever so Isborious and efficient. Boundary Line. In obedience to "an act to settle, deter-mine and locate the southern boundary line of the Commonwealth," approved March 20, 1869, I appointed James Worrall, E-q., of Harrisburg, and Strickland Kneass, Esq. of Philadelphia, both eivil engineers, Commissioners on the part of Pennselsenic Commissioners on the part of Penn-ylvania, to act "in conjunction with like Commisners on the part of the State of Dela

ware." The Governor of that State was promptly furnished with a copy of the act, and informed of the appointment of Commis sioners under it, and his co-operation in vited. But, so far as I am a lvised, no ac tion of any kind has been taken by Delaware on the subject; and consequently the work contemplated by the act above re-

ferred to has not been performed. Your special attention is invited to the report of our Commissioners, which is here

the State. Conspicuous among these were Hon. Joseph Ritner and Hon, David R. Hon. Joseph Ritner and Hon, David R. Porter, both of whom died during the pre-present administration. During their event ful lives they shared largely in the public confidence and regard, and filed many posts of honor, trust and responsibility, in-cluding that of Governor, with distinguish-ed tilelity and pariotism. They were con-spienously identified with all the grave and important questions of State policy and ad-ministration, through the eventful period in which they lived, and contributed largely in which they lived, and contributed largely to shape and strengthen the firm foundations of our Commonwealth, upon which others have been enabled to build securely. They have passed away, ripe in years and full of hon rs; and it is respectfully submitted whether it be not proper for the Legislature to take some appropriate notice of the la mented death of these two distinguished public servants. public servants.

Pardons.
