THE WIND AND STREAM.

A brook came stealing from the ground. You scarcel saw its silvery gleam Among the heris that hung around The borders of that winding stream A pretty stream, a placid stream, A softly gliding, ba-hfal stream.

A breeze came wandering from the sky, Light as the whisper of a dream : He put the o'erhanging grasses by, And gaily stooped to kiss the stream-The preity stream, the flat:ered stream, The shy, yet unreluctant stream

The water as the wind passed o'er, Shot upward many a glancing beam, Dimpled and quivered more and more. And tripped along a livelier stream. The fla tered stream, the simpering stream The fond, delighted, silly stream.

Away the sity wands ter flew To where the fields with blossoms teem. To sparkling streams and rivers blue, And left alone that little stream -The flatter d stream, the chea'ed stream The sad, forsaken, lonely stream

That careless wind no more came back. He wanders yet the fields, I deem. Bot on its melancholy track Compla ning went that little stream The cheated stream, the hopeless stream The ever-murmuring, moaning stream.

The Last Sixpence.

I know, mother dear, you would not feel happy if you could not contribute your mite said the pale-faced girl of tweaty, pressing into her aged companion's hands the sixpence which constituted all the monetary wealth they possessed. "There's quite enough bread and butter and tea for breakfast in the morning, and if I get up very carly, as I mean to do, I shall have finished Mrs. Smith's dress by three o'clock, and she's sure to pay me directly I take it to her.

"But we've no candle or firing in the house."

"Don't you trouble about that ; when we come back from church it'll be quite time for hard-working tolks like us to go to bed; so that we shan't want a light, and our landlady will lend us a shovelful of coals for to-morrow ; so don't say anything more, but take the sixpence and come along, for you'll find her at the Red Lion, in the jug the church bells have almost ceased."

Recovering Lost Timber. That timber in considerable quantity and of substantial value is daily

found floating on the surface of the St. Lawrence river is well known, but that large deposits of timber ie sunken at the bottom of the river at various points adjacent to Montreal is a fact the supposed friend familiarly on the that will by no means be so readily

the surface by gangs of inhabitants and others, who sell it to dealers. The bottom of Longueuil bay, near the shore,

would appear to be literally covered with timber, and during the past few nonths a number of men in canoes, and provided with chains and grappling hooks, have been busily engaged in bringing up the logs, floating them

ashore, where they are hauled away by horses and piled for sale. The timber onsists almost entirely of white oak and walnut. It has been estimated that most of it has been in the river at least from thirty to forty years, and has

A Protessor's Quickness of Retort.

Dr. B-----, who was for many years associated with the University of Vtrgiinia, was noted for his quickness of retort and some of his repartees, which are fading out of contemporary mem-

APPERTISING RATES An American Jockey. There is no dispute as to who is the best English jockey. His name is Fred Archer, and his record is as follows: In 1878 he won 229 races, out of 619 in which he rode. This was the largest

number of races ever won by a jockey in a single season, being in excess of the total attained by Archer in 1877, when he won 218 races, or in 1876, when he was successful 207 times. This year, up to August Ist, he had

won 107 races, in a toatl of 313 mounts -or an average of say one-third. The extraordinary victory of the horse 'Falsetto'' has revealed the champion jockey of America, who happens to be a colored boy with the decidedly Celtic name of Murphy. The New York Times contends that he is quite the equal of Archer, and to prove this assertion give the subjoined sketch : Murphy's riding in the Travers Stakes race. July 18, and in the Kenner Stakes race, August 22, were the two finest exhibitions of skill in the saddle that have been seen in this country in many years. No explanation could be better than that. Murphy has already had thirty-seven mounts this year and has won twenty-five, besides riding a dead heat, and this is a much better average than any English jockey which will be adde 11.71 A Half Breed's Revenge.
