## "Reduced in Circumstances."

The front door of a business office in Griswold street stood open and seemed to invite strangers to enter, and the owner was | This will give sun and air, and produce therefore not surprised when a man of dilanidated looks walked in and took a scat. When asked to state his errand he hitched his chair a little nearer and asked :

"Are you willing to give me a bit of advice ?"

"Well, I guess so," was the reply. "You see, the case is this," continued

the man, hitching still nearer. "Up to six months ago I was rich. By a series of misfortunes I have lost every dollar. What would you term such a case ? How would you refer to it ?"

"Well, if it was me, I should refer to it as 'My late misfortune.' "

"That's good, but very common. Everybody has misfortunes, and plenty of people have had late misfortunes. I wanted to strike something original."

"You might say you were down the banks," suggested the citizen.

"That's old, too, and besides my wife couldn't make use of the term. When a book agent called at my door she couldn't say she was unable to purchase his work because we were 'down the banks.' No, no. We are an educated family, but awful hard up just at present."

"You might state that 'owing to recent unsuccessful speculations,' and so forth.'

speculate, and we all lose. Now, suppose that a big gun was coming to my house to dinner? I make the best spread I can. I have bread and water and pickled beets and knives and forks and water and napkins and so on, but yet I feel a bit cast down, and as we sit down I rise and make a sort of apology to my friend. I don't want to tell him the exact truth, and yet I means as by pouring into the stomach want to account for so much water and so little butter. Now, what would you say under these circumstances ?"

The citizen leaned back, knit his brows, and after a minute replied :

Well, I think I should say : Mr. Filkins, you will please pardon the meagerness of this spread, but our being reduced in circumstances has necessitated-

"Reduced in circumstances'-that's what I want-that's the term I was looking for!" shouted the stranger as he jumped from his chair. "Never mind Filkinsnever mind the rest of the speech ! Reduced in circumstances is what ails me and what I want to get off at grocers and book agents. Good-day-good-bye !"

In Districts formerly Ravaged By fever and ague, immunity from the dreaded scourge is enjoyed by those who have rendered their systems malaria proof with Hostetter's Stomach Bitters, the best preventive and remedy. Quinine cannot compare with it in effi-cacy, and is anything but safe. Physicians commend the Bitters for its remedial and re-suscitating properties and the closest analysis reveals nothing in the composition of a dele-terious nature. It does not deteriorate, is an agreeathe cordial as well as a potent medicine, and when mixed with heading and when mixed with brackish or unwholsome water, neutralizes its hurtful properties. The denizons of malarious localities, not only in the United States, but the tropics, regard it as an invaluable protection, and in hosts of famthe demand for it among those compelled to encount a the vicissitudes of climate, constantly increases.

probably explains why some horse-car companies have found it advisable to have their horses watered at midnight. BUCKWHEAT may be made profitable

ground. No other crop is so effective in mellowing rough cloddy land. The

seed in northern localities should be sown before July 12th; otherwise early fall frosts may catch the crops. Grass and clover may sometimes be sown successfully with buckwheat this

THE best way to raise good fodder corn is to put it in drills thirty-two inches apart, and give it two cultivatings. a vigorous growth with deep green foliage, growing-some ears, which will make the feed all the better. Corn and millet may be cut at the same time, and will make better food for cows if mixed in the manger.

month.

PURE drinking water is of the first importance. More dangerous poisons are taken into the system with the water used, than in any other way. That from brooks is dangerous, as wash from matured fields and soakage from the soil flows into them. Water from clear wells and springs only should be given to cattle, and if such precaution is needed for them, it is equally so for the

owners. Much avoidable disease is due to impure water.

Clams. The small, round, hard-shell clam is by no means driven out of the market, or away from the table, by that big, bloated member of the family, the oyster. Clams which are good in summer. are even better through the fall and winter, There is a common prejudice against clams that they are indigestible. "Yes, but that's dreadful old. We all If they are so, it is because they are im-

properly cooked; they are stewed whole into tough leather; the cook fancying she must serve soles, or other monstrosities, instead of clams. Or they are baked to cinders, as at some of the popular clam bakes, where they are only digested by such mechanical whole pints of strictly prime Bourbon benzine, as the ostrich swallows railroad spikes and bites of junk bottles to assist in cutting up its tough tood. Clams should never be stewed, but cut up finely and gently simmered. But the royal way of serving the clam is to roast it on bars of a gridiron over a bright grate fire-the quicker the better-and the minute It "sizzles," open it, pan it, and let it simmer a little in its own saved juice and a bit of butter. The clam thus cooked is a grateful creature that will repay all the attention shown it. And so served, far from being digestible, it is tender as the
