The kerosene can showed a decided talling off in activity. Only seventeen females hurried up the fire.

Of the one hundred and fifty-two householders who borrowed shot-guns and took dead aim at "that infernal cat," three hit the cat and the remainder knocked over small boys and other live steck, and are now wondering how on earth they could possibly have done it.

Eighteen hundred and seventy-nine was a good year for deaf persons to go visiting. Thirty-four of them took the ever: Let the fowls have free range in railroad track to save distance. The day express was on time.

The last year was also noticeable for the number of persons who took a quiet smoke after going to bed, fell asleep and passed into a better land at the expense of insurance companies, A clay pipe and a cent's worth of tobacco are all the outfit needed.

A number of kind-hearted people who went out hunting, mistook a friend for a wild turkey, fox or grizzly and Rhode Island to hear from. Every one of them felt bad enough to cry, but mistakes will happen in all families.

The sea serpent was seen only nine times during 1879. This may influence some persons to believe that he is gradually dying out and will soon become extinct, but there is no danger of itnot with the present breed of sea cap-

The number of mothers who left rat poison and other fatal doses where the children could get at them was twentyone. This is a decrease over the previous year, and in the dim future womankind may possibly realize the fact that children, cats, rats, cockroaches and ants are susceptible to the same influence.

During 1879 only two householders mistook the hired girl for a burglar and popped her dead. There is consequently no demand for a national convention of hired girls to discuss the quescorsets and demand more wages?"

Eighteen hundred and seventy-nine produced no improvement in drawing teeth; no consolation for the man who has to have his hair cut; no better method for breaking in new boots; no new route for embezzlers to get into Canada; no way of getting along on the street cars except to stand up, and no new way of getting back small loans. Considered as a whole, she wasn't anything extra of a year, even for bad

Marquesas Man-eaters

"Do the people of Marquesas, really practice man-eating at the present day?' was asked of some late visitors to that locality. "Oh, yes," was the reply; "it is still very common amongst them. We even saw remains of one of their horrible banquets in the valley of Hanalapa. I think the custom was falling into disuse a half century ago, but during the past twenty-five or thirty years the frequent visits of whalers and traders upon the islands have had a demoralizing effect upon the natives. The women have been debauched and the men let into the secret of distilling a kind of rum from the cocoa trees. When intoxicated they commit the most revolting barbarities, and become embroiled in conflicts between themselves. While in this condition they become worse than beasts; the hereditary man-eating instruct seems to be revived, and breaks out stronger than ever. Any of their number who are killed in these drunken broils are sure to be enemies killed in battle, and, if a man has a deadly spite against another, he does not teel that his revenge has been satisfied unsocial laws are punishable with death, and the body of the culprit, after having been cut into sections, is distributed in the market place, that all may eat and be warned of the terrible punishment that awaits the law-breaker. In fact," continued Captain Blenaime, "the worst punishment that can befall a man at Marquesas is to be killed and eaten by his fellow islanders." Santa Dominica is situated in latitude 9 deg. 30 min. east, and together with the other islands of the Marquesas group has nominally been under French dominion since 1841. tampered with are very vindictive. A number of sailors and officers of whaling and merchant ships have been killed by them at different times since the islands were discovered. A year ago a convoy of provisions, while en route between two settlements of the French colony, on the island of Caledonia, was captured, and the men who were accompanying it, twelve in number, were taken prisoners. Fearing like this yar cost?" for their fate, the Lamothe Piquet, being in the neighborhood, was dispatched along the coast to obtain tidings of them. They effected a landing at the point where the train had been captured, and surprised the savages while about to feast upon the bodies of the Frenchmen. The would-be banqueters fled at their approach, but were pursued and fifteen of them killed. The scene upon the beach, Captain Blenaime says, where they landed was sickening in the extreme. Several large blocks, similar to those used by butchers, were stand ing a short distance back from the shore. These were reeking with blood, and near them were massed the trunks of their countrymen, denuded of their heads and limbs. and their bowels torn open to get at the heart, which is esteemed a delicacy. Piled up near by were the skulls, and bones of the arms and legs, scraped clean of the flesh. The flesh from the lims was cut into streaks or roasts, and broiling and sizzling over the coals of huge fires kindled for the purpose, sending forth a smell that was fairly sickening. The flesh of the head, together with the brains, they had placed in a large kettle taken from the stove in the train, which was boiling over

Iran railway sleepers are said to have

AGRICULTURE.

EGG-EATING BY PULLETS .- As a general thing, this habit is introduced by may be induced by throwing egg-shells only eighty-four. Let us be thankful from the kitchen into the poultry yard; they should be broken into small pieces times eggs crack by freezing in cold weather, and thus expose a portion of their contents. Eggs are very delicious morsels to hens. If one fowl acquires this habit, all the others in the same flock will soon learn it too, if confined where they see what is going on; and they always make a rush at whatever one of their fellow is eating. The habit is one very hard to kreak; killing the whole flock seems to be a desperate resort; but if the brood is not especially valuable, and the flock a small one, is is really the best possible method saving time and money in the end. The following method may be tried first, how, summer, or draw them off to a locality at some li tle distance from the nests in winter, and let the nests be so covered as to be quite dark, and prevent the laying hens from seeing the eggs. Hens will not stay in a dark nook to scratch and peck, although they prefer a rather dark place to lay in. Scatter wheat screenings and pounded chandler's scraps, or other attractive food among straw, or some such light stuff, to induce them to spend their time scratching for it. Their visits to the nests will then be only on the legitimate business of laying. If towls have other attractions of the fields will answer the purpose of an artificial scratching-place in summer; but in fowls must be employed in-doors to prevent forming bad habits, or to cure them if already formed. All the grain night very likely will be devoured by remainder of the day's allowance can be given before dark.

The harvesting of the carrot crops can be facilitated by running a plow on one side of the rows, when the roots are easily removed by hand. The tops are then cut off, and surface moisture from the roots dried by exposure to the sun a day or two, when they may be stored in a cellar, out of doors, or in pits like turnips and potatoes. Garrots having a greater tendency to decay than many roots, should never be stored in great bulk, tion: "Shall we wear bullet-proof but placed in small heaps only, and kept at as low a temperature as possible above the freezing point. On the approach of warm weather they incline to sprout, if left in bulk; hence, when it is desired to preserve them longer, the crown ought to be cut off and the roots spread in a cool dry place. Horses thrive on carrots given judiciously with other feed; they are also excellent for working cattle.

> Surface Drains .- If not already made, ample drains should be provided to free the fields from surface water. Drains that have been plowed out, may need clearing in places with spade or hoe, that the water may pass off readily. In laying out open drains, the the slopes should be so made, that the water will not flow off too rapidly. with a gentle inclination only; in this case much of the water will soak into the soil ; and will not wash away either the soil, or any manure that is on the slopes.

yield at least five bushels to an acre; it wont hurt the timothy, and the clover seed can be sown after the harrowing is done. It is an easy matter for any farmer to prove the truth or falsity of such a statement. Try it on one acre in the spring if you do not want to ris the whole field, and watch the result. It is only by experimenting that the farmer advances.

REQUISITES FOR GOOD BUTTER. First: Good cows, Second : Good feed. Good eaten. They also eat the bodies of their sweet hay and corn meal will do it if you cannot provide any better. Third: The utmost care and neatness in every manipulation from the milking to the til he has eaten a piece of his heart, stewed | marketing; skill to put up an attractive in its own blood. Infractions of any of the package. If the producer is not able to attend to these matters, the business of butter-making may as well be given up, for it will not pay.

"Fisherman, Mister."

He was tall, lean and a stranger. He didn't seem to care a cent whether his relations saw him or not, but when he faced of shortening, and a teaspoonful of Justice Duffy at the bar of the Jefferson Market Police Court he sought to dislodge min. south, and longitude 138 deg. and 40 the mud that had gathered in inseparable masses the ends of his flowing locks and made ineffectual efforts to straighten out The natives are brave, and when they have cut off while he lay in the ashbox couch the tails of his coat, which the boys had reason to believe their rights are being at night, a sigh escaped his lips, his jaw dropped and he murmured:-

"I ain't bin yar long, Mister." "Don't mister the Court, sir," ordered

His Honor.

"Is this yar a Court?" "Yes, sir, and I want you to respect it. "Let's look 'roun' a minit', mister, will ye. Durned ef this don't beat all I've ever seed. Say, mister, how much does a court

The Court was growing angry and spoke n stern tones.

"What is your business, sir?" "Fisherman, mister, an' I come -"Don't mister the Court, sir," ordered His Honor.

"Yes, sir, but I war about to say I come

the Court heedless of his question. "Come yar to fish in the Hudson for shad, halibut, hadlock and -"They don't abound in the Hudson, sir."

"Then I'll ketch pike, pickerel, pollywogs, perch or suthin'. Please led me go, mister, I'm all alone in this world an' -"Ah, a 'lone fisherman." "That's war yer right, mister."

"You can go," said his Honor. The stranger left to try his luck in the waters of the Hudson.

Right and Left

Paralyzing blows are being dealt at disease by the great tonic and regulator. Hostetter's Stomach Bitters. Fever and ague general debility, rheumatism, nervous ailments, constipation and dyspepsia, are among the malathe fire. The provisions, wines, etc., were dies for which experience has proved it a spe-scattered about in the greatest confusion. prompt. It is not, however, advertised to pro-One of the men who accompanied the duce immediate cures, though it affords speedy relief, and will, if given a reasonable trial, French crew recognized among the bodies by portions of the clothing still left upon by portions of the clothing still left upon them, two of his own sons, and such was out the meladics to which it is adapted. In the impression made upon his mind that he never fully recovered from the shock. emergencies arising in families it is particularly serviceable, and it is esteemed throughout the land as a medicine of comprehensive uses, wholesoms vegetable composition and proved, both in India and Eugland, much cheaper than wooden ones. Their gradual adoption is predicted. unobjectionable flavor. It has risen to popu-

DOMESTIC.

To PREPARE FISH .- Fish is a delicious dish for the dinner-table, and or itself the accidental breaking of an egg. It often suffices for a good dun r. But it must be nicely cooked and served. What can be more unappetizing than a fish brought to the table all broken to before giving them to fewls. Some- pieces, or not half done-saimon red with blood, cod nearly raw, or mack-erel not properly cleaned? Let great care be taked to clean the fish well before it is cooked. Slit it low enough so as not to leave any blood on the backbone. In almost all kinds of fish the portions to be removed are the gills, the alimentary organs and the settlement of slime and other impurities inside and outside the fish. Cleanse the inside thoroughly, without making too large an meision, which distigures the fish when it is brought to the table, and may make it, if it is for boiling, watery. The sound, which adheres to the bone, must be left undisturbed, but cleansed; the hard and soft roe must also be left in their places; and care Especial care must be taken not to break the gall, as that renders the fish very bitter.

BLACK PUDDING .- For black pudding the method in Ghent, Belgium, is to take one pound of fat of pork to one quart of blood, (which must be rapidly stirred while pouring out of the animal to prevent congealing,) and a number of onions, to be chopped to a pulp, as well as the fat; put in pepper, salt, summer sayory, and sweet marjoram. peppered him dead was fourteen, with an unrestricted range, the insects and mixed all together, with as much flour as will make a thin batter; then put it in well cleansed skins, tied every few inches apart with string; put them in rough, wet weather, or in winter, the a well-filled boiler of cold water, and let it come near to boiling; then take them out and put in fresh cold water, and they may be suffered to boil an remaining at the scratching-place at hour, unless the skins show signs of bursting; then cool off the water a litrats and mice. However, by ex- tle before they are done. They are a ercising a modearte degree of calcu- feast for an epicure. The English lation, one will coutrive to throw down method for black pudding is simply just enough in the morning to last till | the fat pork chopped into small lumps, the middle of the afternoon, and the with a very small quantity of onion, and groats for consistency. I suppose they should be boiled previous to mixing with the blood, add a little salt, and boil as directed.

> AN ARTICLE OF MERIT .- "Brown's Bronchical Troches" are the most popular article in this country or Europe for Throat Diseases and Coughs, and this popularity is based upon real merit. Imitations are offered for sale, many of which are injurious. The genuine "Brown's Bronchial Troches" are sold only in boxes.

> Drinking water excessively in warm weather weakens and debilitates the Coffee taken when thirst first approachproaches will often allay it until the dinner or supper hour. Tea, Vinegar and water, or lemonade, are excellent; ginger, molasses and vinegar, with water, is refreshing, as is also cool sweet milk or buttermilk. Frequent baths allay thirst. I often refresh myself in the heat of the day by bathing head, neck and arms in a cool spring brook-not by dousing the members suddenly. but by laving them with the moist hand first. During the heated term it is profitable to take longer noon rests, working more in the cool of the mornings and evenings.

TABLECLOTHS .- Tablecloths are often a source of disputes between mistress and maid, but much of this may be obviated if the servants will wash out each spot carefully with a damp cloth immediately after meals. A piece of stone or of some heavy material,, the exact size of the tablecloth when fold-HARROWING WHEAT. - Harrowing ed, should be kept in the dining-room wheat in the spring will increase the closet, and the cloth should be kept under it when not in use. This keeps in the creases.

> ALABASTER ORNAMENTS .- There is nothing-prettier than graceful little vases and caskets of alabaster, and few household ornaments more trying to one's temper, because of the difficulty in keeping them clean. They may be thoroughly and easily renovated by cleaning them with a weak solution of aquafortis prepared in the proportion ef two ounces to a pint of filtered rain thoroughly and dry in the sun.

> STOP coughing at once by the immediate use of Dr. Bull's Cough Syrup; 25 cents a bottle

> MUSHROOM PUDDING.-Cleanse a quart of fresh mushrooms, cut them in smallpieces, mix them with half a pound of minced ham or bacon, season with a teaspoonful of salt and half a saltspoonful of pepper; spread them on a rolypoly crust, made by mixing one pound salt, with about 1 pint of water, roll up the crust, tie it lightly in a floured cloth, or salted water; serve hot with bread or vegetables.

To PURIFY WATER .- Pulverized alum possesses the property of purifying water. A large spoonful stirred into a hogshead of water will so purify it, that in a few hours the dirt will sink to the bottom, and it will be fresh and clear as spring water. Four gallons may be purified by a teaspoonful.

FAMILY VINEGAR .- A cheap vinegar consists of twenty-five gallons of warm rain water with four gallons of treacle and one gallon of yeast. Let this ferment freely and it is then fit for use.

COFFEE CAKE. One cup strong coffee, one cup molasses one cup of sugar, one cup chopped raisins, four cups flour. one cup butter, one teaspoonful soda. Stir up the soda in the molasses.

The price of soap is rapidly advancing. A year's supply of Dobbins' ELECTRIC bought now at old price wiil be avery judicious purchase.

RAILWAY CAKE -To cupfuls of flour, one of sweet milk, two eggs beaten, one teaspoonful of soda, one of cream of tartar. Mix all into a batter and put into a buttered tin. Bake for twenty minutes.

Egg Bread.-One quart of butter-

milk, three eggs, three tablespoons

hour, lump of butter size of an egg,

half teaspoon soda, corn meal enough to make a thick batter. Pound Cake .- Fourteen eggs, one and a half pounds each of sugar and flour, one-fourth pound of butter and one teaspoon baking powder; bake one

and one-half hours.

AFTER War, Pestilence and Intemperance, Colds lead to the greatest destruction of human life, mainly in consequence of their being sumption, Asthma and Bronchitis.

HUMOROUS.

"CLAMAVI PROFUNDO."-The proprietor of an oyster house, in Providence R. I. was astounded during the last rain by the entrance into his estab-1 shment of plucky resolu e little fel low, who was lugging and tugging at a three-bushel basket, filled heaping full of long clams. He sat the basket at the feet of the proprietor with a slam, shook his fists fuciously and shouted: "This must never happen again; never sir!" "What?" demanded the bewildered proprietor. "Why, these claims have stood out for more than a half hour in the drenching rain. I held an umbrella over their heads until I could stand it no longer. Look at them, heads out, and ladies among them at that, wearing low-neck dresses! Have you the first instincts of a gentleman about you? Put your ear down to the basket and listen to the wild wail of matchless sorrow that proceeds therefrom, their inconsolable clamor for relief, if I may be pardoned must be taken not to injure the liver. the apparent jocoseness of the expres-

"But it don't hurt clams to be out in the wet," argued the dealer. "I declare it does." said the fiery man. "I know the nature of a clam, sir. I am conscious that there are chords in their make-up that vibrate exquisitely to violent emotions. I know the secret sorrow of a clam's existence. What saith the poet: 'Clamavi profundo That means clams calling for help from the mighty deep. Clams weep, weep weep. Their affairs get at a low ebb and then, clam-bank after clam-bank goes up, and there is nothing left for

the clams to do, but to fritter away their existence. Ah! weep, poor things. mingle my tears with yours. Both of us have grit, but fate is too hard upon us. I shall now resume my station across the street and watch, that your needless infliction of cruelty upon innocent clams be not repeated. An old farmer out in Indiana says

that for his part he don't know where the present rage for trimming bonnets with birds is going to end. Only four or five years ago he bought his daughter a humming bird: next year she wanted a robin, the next a pheasant, and this season he declares he had to chain up his Thanksgiving turkey or she'd have had that perched on top of

500.000 Persons Cured

is the glorious record of "Anakesis," and none but those afflicted with piles, that most painful and persistent of all diseases, will fully understand or appreciate the significance of such an announcement, Only those who have wasted time, money and health on omiments, lotions, electuaries and the innumerable worse than useless nostrams and catch-pennies put forth to deceive the ignorant, or what is even more unsatisfactory, suffered from the empirical and routine practice of careless or ignorant doctors, can realize how great a boon an infallible remedy for piles must be or how great a benefactor to the human race the discoverer, Dr. Silsbee is. Anakesis is not the chance blunder of inexp rience, but the result of 40 years' practice and study of Piles by an accomplished and scientific physician.

It is now endors: d by the most intelligent physicians or all schools and a imitted to be the nearest to an infallible remedy known. It the nearest to an infallible remedy known. It is simple, safe and easy of application, relieves pain at once, helps up the sensitive tumors, soothes, compresses and medicates the diseased parts and ultimately cur s the worst cases, and any one who will follow the advise of Dr. Silsbee in the printed circular need never have Piles again. It is the only proprietary medicine we ever saw that not only cures but tells its customers how to prevent man life, mainly in consequence of their being systematically neglected—"left to go as they come"—until a simple, curable affection is converted into a serious and generally fatal disease. It is better to take care of a Cough or Coid from its inciplency, by using promptly Dr. Jayne's Expectorant, a remedy thoroughly adapted to remove these complaints, and equally effective in the primary stages of Congular to a sample of "Anakesis," which will be sent free.

cases, and any one who will to circular need of Dr. Silsbee in the printed circular nee

Consumption Cured,

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure for Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, also a positive and radical cure for Neryous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it know to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge to all who desire it, this recipe, in German, French, or English. with full directions for preparing and using. Sent by mail by addressing. with stamp, naming this paper, W. W. SHERAR, 149 Powers' Block, Rochester, New York.

loss of good material involved in mining and preparing anthracite, though greatly to be deplored, seems to be almost inevitable. The disposition of the coal in large, solid beds and highly inclined positions involves strong supports to keep the superincumbent mass from crushing and closing the avenues of the mine, and these supports must consist of heavy pillars wrought out in the solid coal itself. Some of this pillar coal is ultimately, removed, much of it is inevitably tost, especially in the larger beds, which are frequentfound from twenty to sixty feet in inckness, and often inclined at a angle of from forty to seventy degrees It is estimated that no more than slx per cent of coal is ever taken out of the mines. That which is brought to the surface is run through very properly called a "breaker," ingeniously devised for the destruction of coal This process involves a loss of gold coal equal to twenty or twenty-five per cent of the quanity mined. For the amount of coal wasted in mining (say forty per eent) and preparing (say twent-five per cent) no one is paid; it is a dead loss to the landowner, miner and shipper. Plans for utilizing the waste coal dust or culm of atnhracite colleries have been frequently suggested, but none have come into general use. The Anthracite Fuel Company at Port Ewen, in the Hudson, in 1877, used ninety per ent of coal dust and ten per cent. of pitch, and made 300 tons of fuel per day, consuming 50,000 tons of culm annually. The Delaware and Hudson Company also use, at their mines, 60, firmed gambler. "Then you never 000 tons per annum. They now ship played did you, uncle?" "Yes, once, all their coal down to pea sizes, and in 1847, at Baden. A gentleman whom | consume the culm for generating steam. I didn't know preposed a game of cearte at ten francs. I was weak enough to agree; he lost ten games." "Then you to sell over half a million tons more coal and burn the same amount of re-"Yes, I won them, that is so; but I fuse, thus earning or saving one half might have lost them, and I have never million dollars per annum, The Philadelphia and Reading Railroad Company has recently introduced a method of burning coal dust in the furnaces goggles stepped on the Sacramento of its engines, and the plan appears to meet with entire success.

WHY WILL YOU WHO ARE SUFFERING HESITATE LONGER? The days of healthful life are golden, and they are cease-lessly slipping from you. You cannot afford to doubt. It is folly to delay lorger to accept these facts and profit by them. Simmons' Liver Regulator is so simple and harmless and vet it has proven itself a sovereign remedy for Ovspepsia, Costiveness, Sick Headache Bilious Colic, Sour Stomach, Diarrhea, Biliousness, and other like evils of a disordered Liver and Stomach. How can we find words adequate to embody these facts. They cannot be too often reiterated until they have carried conviction to every household in the land? Try it. The first trial will be satisfactory.

"I certifiy I have used Simmons' Liver Regulator in my family for a number of years for Sick Headache. Biliousness and Liver Complaints with great sati-faction. B. F. TIGNER."

White Sulphur Springs, Ga., Nov. 10, 1876.

Concenttated Food for Horses .- It is known that the Russian and Prussian Governments have adopted a kind of biscuit for horses containing much nutritive matter in small volume. According to La Nature, the biscuits are formed of the meal of oats, peas, and linseed. The various combinations have been studied with care, and a mixture has been obtained such that one kilogramme of it is equivalent to five kilogrammes of oats. It has been guages," said a new student. "What found that horses bear fatigue better and are more vigorous when fed with these biscuit than when fed with oats. The biscuits can be threaded together by means of an iron wire; thus a horse may carry his own food for four or five days. During the late war with Turkey, Russia, used 20,000,000 of these biscuits, and the results were so good that the authorities have continued their use in time of peace.

A foreign apparatus, shaped like a gun and about as long, has recently been devised for nailing down flooring boards. The contrivance can do, it is said, the work of six men, and the inventor expects ultimately to render it self-feeding. It is kept in position by the foot and knee, and the nail is placed point down, in an aperture at the top of the device. It slides down to the bottom, and then the operator draws up a rod, and, by one downward stroke of this, the nail is cleanly driven into the boards beneath.

VEGETINE. - The great success of the VEGETINE as a cleanser and purifier of the blood is shown beyond a doubt by the great numbers who have taken it, and received immediate relief, with such remarkable cures.

GUILTY OF WRONG .- Some people have a fashion of confusing excellent remedies with the large mass of "patent medicines," and in this they are guilty of a wrong. There are some advertised remedles fully worth all that is asked for them, and one at least we know of-Hop Bitters. The writer has had occasion to use the Bitters in just such a climate as we have most of the year in Bay City, and has always found them to be first-class and reliable doing all that is claimed for them.

Hausen of Stockholm, has patented a process by which biscuit ware can be coated with so thick and adherent a layer of metal-copper, gold or silverthat the articles have every appearance of massive metalic ones, and can, like them, be engraved and chased. Prof. Schmidt suggests that the process is nearly related to the galvano-plastic.

FIVE DOCTORS DID NOT CURE.

TORONTO, Ont., Sept. 18, 1879.

MR. H. R. STEVENS:
Dear Sir.—I hereby certify that I have been sick for three years, unable to get any relief whatever. I have been under the care of five of the best physicians, each one giving my illness a different name. The first said General debility; the second, Female Debility and impoverished blood; the third, Liver Complaint and Dyspensia: the fourth said Lwas in Conand Dyspepsia; the fourth said I was in Con-sumption; the fifth said Neuralgia on the Lungs and was certain I wou d never enjoy good health, so I concluded to give up doctors and com-menced taking. tent Medicines. At this time I was very weak. I had pain in my side, back and chest, slept very little, and the food I ate caused me pain. I was a burden to myself and riends. I was persuaded to try Vegethe. A friend gave me a bottle to try, not thinking it would do me any good, as I had no hope of ever getting any better. After using the first bottle my head was better and I could sleep better. The next two, my appetite came, and I was able to enjoy my food. I have now taken five bot-tles. I have a good appetite and sleep well, have no pain, and am able to do most of my own work. I pronounce your medicine far ahead of any other, and can cheerfully recommend it to any one in need of such a medicine.

Yours respectfully, Miss. E. ALLEN.

VEGETINE. RHEUMATISM CURED.

TORONTO, March 29, 1879, Dear Sir-I was troubled with Rheumatism in my knee and hip joints for nearly a year. I tried a number of medicines to effect a cure; but none gave me any relief. A friend recommended me to try your Vegetine, which I did, and after taking two bottles of it I found relief. took four more bottles, and the the pains com-

pletely left me. I feel satisfied it is a cure for Rheumatism. Yours respectfully. M. ALLEN, 6 Rossin House Block, Toronto, Ont. VEGETINE,

PREPARED BY H. R. STEVENS, Boston, Mass. Vegetine is Sold by all Druggists.
