

PROFESSIONAL CARDS. ALEXANDER & BOWER, ATTORNEYS AT LAW.

CLEMENT DALE, ATTORNEY AT LAW.

W. M. C. HEINLE, ATTORNEY AT LAW.

WILBUR F. REEDER, ATTORNEY AT LAW.

W. A. MORRISON, ATTORNEY AT LAW.

D. S. KELLER, ATTORNEY AT LAW.

JOHN G. LOVE, ATTORNEY AT LAW.

MILLHEIM BANKING CO., MAIN STREET, MILLHEIM, PA.

A. HARTER, AUCTIONEER, REBERSBURG, PA.

THE CAVALIER'S SONG. A steed! A steed! of matchless speed! A sword of metal keen!

Through The Tunnel. It was a bright, clear, cold morning in early December. When Kathie entered the car there was scarcely a vacant seat to be seen.

Not let the mistake disturb you," he continued, with impertinent earnestness. In the midst of her distress Kathie could not help thinking how musical his voice was.

The Hyena Dog. Just as the Aard wolf appears to form the link between the civets and the hyenas, being with some difficulty referred to either group of animals, so the hunting dog seems to be the connecting link between the dogs and hyenas.

Death in the Peach. A fatal case of poisoning by peach-stones which has just occurred in Paris may serve as a warning to those families in which children are allowed to look after themselves for hours together.

Charley's Ghost Story. "Talking of stealing," said Charley Bennett, dropping the pumpkin he was turning into a lantern, "did I ever tell you fellows about the time I went down to old Pop Robin's to steal apples, and came back past the barn where the horsehide hung himself years and years ago, 'cause he knew that the constables—they called 'em constables in those times—were after him."

Customer to lady clerk in a very large store. Customer—"Show me some pins." Lady clerk talks on to the next lady clerk.

A Lively Bear Fight. During the late snow-storm in Oregon, Sam Cook of Applegate discovered that bears had been preying on his hogs on the recent range.

Cash Value of a Boston Editor. While in Washington, recently, a certain Boston editor, who has a good reputation for enterprise in obtaining the latest and fullest information upon any and all subjects of current importance, happened to run across General McCook, of Colorado, and at once seized upon the opportunity as a favorable one to secure for the readers of his journal a valuable opinion concerning the Indian question.

Winter Fishing. The winter fishing on Chautauqua lake, New York, is quite a business. Bait an inland lake it freezes over quicker than Lake Erie, and when the latter body is open Chautauqua lake is ice enough to hold up an army of fishermen.

Real Style. A couple of young ladies who went to Dubuque to spend the holidays concluded to couple style with economy, and did so effectually. They left Chicago in a common coach on the Illinois Central Railroad, sitting with their eyes towards a luxurious palace car fronding along at the rear, eyeing the half-dozen ladies who had it all to themselves.

A Remarkable Burial Place. After ascending the tower at Pisa, and enjoying the view we had still an hour to devote to the Campo Santo near by. This cloistered cemetery, constructed 600 years ago, is a vast rectangle surrounded by arches. After the loss of the Holy Land, we are told, the Pisans, casting over fifty ships' loads of soil to be brought thence by St. Calvary, in order that the dead might rest in what they conceived to be holy ground. It was in this Campo Santo that the earliest Tuscan artists were taught to emulate each other's powers, and here the walls are covered with remarkable representations of historical subjects and sacred objects.

The Ventilation Friend. Ever since fresh air was invented has the earth been cursed with people who fancied themselves appointed to ladle out vast volumes, aerial cataclysms, chilling torrents of fresh air to nervous, timid, delicate people who don't want a pint of it. The ventilation idiot, who has not seen him? Who has not suffered at his pitiless hands? Who has not longed to kill him? He haunts the railway train, and makes his dwelling in the church; he goes to the theatre; he invades your offices; he tramples on the sanctity of your home; and, wherever he goes and wherever he comes, he brings with him blasts from Greenland and theories from the stormy caves of Aëolus. And he sweeps down upon you, and your peace, and your tranquil home like a tornado, and he overwhelms you with fresh air until you want to suffocate. How do you do hate him, the man whose hobby is ventilation.

Longevity of Quakers. It appears from the annual list of members of the Society of Friends, that the number of deaths among that body during the past year in Great Britain and Ireland, was 281. There are about 17,000 members; the mortality is consequently much below that of the population generally, and, again, the figures show the longevity which prevails amongst the members of the Society. The infant mortality was very small, only 15 deaths of children under one year; between one and five years, eighteen occurred; between five and twenty years, eleven; between twenty and thirty years, nineteen; from thirty to forty years, fifteen; and eleven only between forty and fifty years. Above fifty years old to sixty, the deaths were twenty-four; between sixty and seventy, forty-six; between seventy and eighty, sixty-five; above eighty and below ninety the number was fifty-three; while from ninety to one-hundred, there were five deaths.
