-The following item which we clip from the Bellefonte Morning News thrifty town of Lock Haven is again looming up pretty briskly and is making rapid strides toward her former prosperity. But how we do wish that we could write something in the same vein about Millheim. Could we not something in the manufactoring line?

Lock Haven Matters.

Lock Haven is quite a busy place this summer compared with what it all the year round and choice fruit of has been during the past six or seven years. Kisler's large tannery, which was burned last spring, is almost entirely rebuilt, and the machinery has been in operation for some time; the furniture factory, a new enterprise of moderate dimensions, is about ready to begin work; the building of the extensive pulp factory is going on rapidly; the machine shops and other established industries are enjoying a good run of patronage, and all together give employment to all the mathanics and laborers who live in the blace.

This augurs well for the future of Lock Haven. The citizens having been aroused to a sense of their duty are moving in earnest to induce capitalists to invest here, and the probability is they will not stop with what they have

already secured. The energy of Mr. William Kisler; proprietor of the tannery above referred to; and of Mr. Dixon, of the pulp mill firm, is worthy ot being studied by those of Lock Haven's citizens who have money but are afraid to invest it in anything but government bonds, or in some other way that is of no benefit to the community and but little to

The Colored People Frightened at the Phenomenon.

MACON, Ga., June 30 .- At about twelve o'clock last night a meteor as large as a barrel, starting from the zenith, pringed down the northeastern sky, and exploded near here with a report tlat reverberated for thirty seconds, and shook the earth even at this point. The meteor was about five seconds in falling, during which time the city was lit up as though by a powerful electric light. Much excitement prevailed in the negro quarter; the inhabitants rushed into their houses and closed the doors, filling the air with creams and prayers. The time between the disappearance of the phenomenon and the report was about three minutes. This won'd make the distance from Macon about forty miles.
