#### AGRICULTURE.

ICE CREAM WITH EGGS .- Two quarts TRAINING HEIFERS .- It is a very easy matter to train a heifer to stand quietly to be milked, but it is an easier matter to train them to jump, kick and run. The way to teach them to stand still is to always require them to do so. If to always require them to do so. If there is naught to hinder a wild heifer from running, and if her fear prompt her to run, she can and will run. On the contrary if she cannot run, in a short time she loses her fear and stands from babit and habit is on each and add sugar, one to be the eggs and cook, but do not let them curdle, one and a half pounds sugar. Cook the night before so it will be thoroughly cool, add two teaspoons vanilla. It you wish straw-berry flavor to the cream, mash and strain them, and add sugar, one stends from babit and habit is one of stends from babit and habit is one of stands from habit, and habit is one of the most powerful influences in this two quarts of cream. Put the cream into the freezer and set in a tub or pail, world for either brute or man. If you want to transform a wild heifer into a fill the pail with broken ice, strew coarse salt in large quantities between well-behaved well-trained cow you must be patient and exhibit no temper. Never strike or kick her. She must first of all get acquainted with you, and learn that you will not hurt her. and pounding with an axe. As the cream freezes scrape it from the bottom She must learn not to fear you. If, in and sides of the freezer with a knife or Winter, it is best to milk in the stable, wake as little fuss and as few alarming spoon. A large size lard can or tin pail may be used instead of a freezer, motions as possible; handle her very but in that case the cream must be cften gently. Be careful not to pinch the scraped from the sides and well-beaten, teats. This is the great source of trouto make it fine-grained. ble. A cow naturally wishes to be rid

of her milk. She stands quietly until some careless milker has given a flour, one pint corn meal, half pint rye flour, three potatoes, one teaspoonful squeeze that hurts, when she kicks and runs. By following such a course a salt, one tablespoonful brown sugar, few times the habit will be confirmed. The best way to manage, if you have two tablespoonfuls Baking Powno stable, is to have a tall, well-fenced der, half pint water. Sift flour, corn yard, and teach your heifers to stand meal, rye flour, sugar, salt and powder for milking in that; or, next best, to together thoroughly; peel, wash and tie them, using them very quietly. No man or boy is fit to handle animals unless he can control them and control himself. Neither is it right to chas- to mix the flour, eto., into a batter like tise the ignorant.

THE AMERICAN VS. THE ENGLISH DAIRY .- We have on previous occasions, says the London Live-Stock Journal, pointed out that we in England were losing ground in the race, and that America was gaining it, and that minutes. the difference was owing to the improved methods and appliances in gen-

eral use in the latter country. The disparity is only less marked because the soil, the herbage, and the climate in this country are each and all better than those in America for cheese-making purposes. It is purely a question, then, of practical ability, superior management, and we say so advisedly. Ten or a dozen years ago the quality of American cheese sent to this country another column.-Eagle. was such as to cause our own cheesemakers to smile; but now the smile is on the other side of the face. At that time no one thought for a moment that we had anything to fear from the qual-ity, whatever we had to do from the and as much cayenne as will rest on Honor, I am the only man on your volume, of American competition in the point of a trussing needle. Melt a side!" but now we are beaten all piece of butter in a saucepan, mix with cheese: along the line. And this is not so it a tablespoonful of flour, then the much because the quality of English lobster and some chopped parsley; cheese on the average is lower than it moisten with a little fish stock until the mixture looks like minced veal; used to be, as that the quality of Amerthen stir into it off the fire a couple of lean is so greatly improved. Careful yelks of eggs, and put it by to get cold. inquiry into scientific principles and scrupulous attention to details of management are the means by which our American friends have so much bet- baked bread-crumbs. After the lapse tered their dairy products. Increased knowledge, quickened energies, and incessant activity in adopting every improvement in appliances and modes color in hot lard. of management, will alone enable us to compete successfuly.
