

AGRICULTURE.

THE HORSE'S BREAST.—Supposing the team to be in the very best possible plight for a heavy season's work, if a badly fitted collar be put into use, the favorable condition referred to will count for no considerable sum as a factor in the spring work.

GRAPE VINEGAR AND CIDER VINEGAR.—Vinegar from grapes may be made as follows: The wine is stirred into a large tub which contains lees, and when thoroughly mixed is squeezed by pressure through cloth sacks into an iron-bound vat, whence, after straining some hours, it is drawn off into casks for fermenting.

THE POULTRY YARD.—The value of pure bloods is now well established. This month is a good time to clear out the old mixed fowls and procure a few specimens of one of the best sorts; both the pleasure and profit of poultry raising will be increased by raising some one or more of the select brood.

WASPS' NESTS are frequently ignited by some chemical action, supposed to be that of the wax upon the paper-like substances of which their nests are formed. Spontaneous combustion of this nature is believed to have been the cause of many mysterious fires in haystacks and farmers' buildings.

MAND S.—This famous trotter is a highly-bred mare, and wants to be humored. She will not stand harsh treatment, will not prove obedient under rough usage. Both her and her husband made much of her.

VEGETINE.—The great success of the Vegetine as a cleanser and purifier of the blood is shown beyond a doubt by the great numbers who have taken it and received immediate relief, with such remarkable cures.

FIG-PUDDING.—Cut up half a pound of figs very finely; mix them with one-fourth pound of coarse sugar, a tablespoonful of molasses, four tablespoonfuls of raisins, and a pint of flour.

TO COOK TURNIPS.—Pare, slice, cut in dice an inch square, boil until nearly done, in as little water as possible; to one quart of turnips, add one tablespoonful of sugar, salt to make palatable, and when they are boiled as dry as possible add two or three spoonfuls of cream and a beaten egg, and serve.

LADIES who do their own work will find that in addition to a long apron a pair of calico sleeves with a rubber cord in the top is a dispenser of happiness. One can slip them on over cuffs and nice dress sleeves, get tea and even wash the tea dishes without injuring the dress.

DOMESTIC.

BIRCH BASKET FOR FERNS.—The following experiment has been successfully tried, and made as pretty a fernery as any one could wish to make. Take a yard square, and cut in each corner a slit not more than three inches long, running from the corner toward the middle of the piece. Then lap the edges of the slit completely over each other, thus forming the side of the basket, which will be about two inches and a half high.

"Don't Know Half Their Value."—They cured me of Ague, Biliousness, and Kidney Complaint, as recommended. I had a half bottle left which I used for my two little girls, who the doctors and neighbors said could not be cured.

TO TAKE OFF IMPRESSIONS OF LEAVES, PLANTS, ETC.—Take half a sheet of fine good paper, and let it well with sweet oil, and let it soak through, rub off the superfluous oil with a piece of paper, and let it hang in the air to dry.

TO PURIFY THE AIR OF A SICK CHAMBER.—Take six drachms of powdered nitre, and the same quantity of oil of vitriol; mix them together by adding to the nitre one drachm of the vitriol at a time; placing the vessel in which you are mixing it on the hot hearth or plate of heated iron, stirring it with a glass rod, a tobacco-pipe, &c.

EXCELLENT DENTIFRICE.—Dissolve two ounces of borax in three pints of hot rain water. Add to it one tablespoonful of spirits of camphor stirred into one tablespoonful of pulverized sugar to prevent its becoming rancid.

Fig-Pudding.—Cut up half a pound of figs very finely; mix them with one-fourth pound of coarse sugar, a tablespoonful of molasses, four tablespoonfuls of raisins, and a pint of flour.

TO COOK TURNIPS.—Pare, slice, cut in dice an inch square, boil until nearly done, in as little water as possible; to one quart of turnips, add one tablespoonful of sugar, salt to make palatable, and when they are boiled as dry as possible add two or three spoonfuls of cream and a beaten egg, and serve.

LADIES who do their own work will find that in addition to a long apron a pair of calico sleeves with a rubber cord in the top is a dispenser of happiness. One can slip them on over cuffs and nice dress sleeves, get tea and even wash the tea dishes without injuring the dress.

WHEN washing fine laces do not use starch at all; in the last water in which they are used put a little fine white sugar, dissolve it thoroughly, and the result will be pleasing.

A CLAM shell is more convenient for scraping lamp glass than a plate of glass. It does the work in less time.

Eighteen comets have been discovered since the year 1800, the largest number of which are microscopic. Science represents the tails of the comets to be millions of miles in length. They often reach from the horizon to the zenith. There are several thousand so-called comets known to exist in the heavens.

Twenty Years a Sufferer. Dr. R. V. PERKINS.—Dear Sir:—Twenty years ago I was shipwrecked on the Atlantic Ocean, and the cold and exposure caused a large abscess to form on each leg, which kept continually discharging. After spending hundreds of dollars with no benefit, I was persuaded to try your Golden Medical Discovery, and now, in less than three months, after the first bottle, I am thankful to say I am completely cured, and for the first time in ten years can put my left heel to the ground. I am, sir, yours respectfully, WILLIAM RYDER, 87 Jefferson Street, Buffalo, N. Y.

WIT AND HUMOR.

It had been arranged that the family should spend Sunday afternoon at the Wood of Bullong. After spending an hour and three-quarters in her bonnet, Madame Innes, leading their child by the hand, the father casts a disgusted glance at the child and bursts out: "You don't catch me going out with the young one rigged up like that; why, you've dressed it out in all of your rhyme and reason—it looks like a monkey, an organ-grinder's monkey."

A WISE DEACON. Deacon Wilder, I want you to tell me how you kept yourself and family well the past season, when all the rest of us have been sick so much, and have had the doctors visiting us so often."

ONE day our dog Towser was a lynx in the sun at midday, but the bees that had been in the air had to catch 'em, and bimby a bee lit on his head and was working about like the dog was his'n.

A SOLDIER on the cars perceives that the smoke from his pipe is more or less obnoxious to an old lady opposite him. "Well, missus," he says, "I suppose they don't smoke in your regiment."

THE fact that Cragin & Co., Philadelphia, Pa., (Dobbin's Electric Soap,) confidently base their claims on the merits of the soap, and only ask a trial, speaks volumes. We know that the soap tells a good story. Try it.

Dr. J. D. Cook, of Cookeville, Tenn., writes: Messrs. P. Neustadter & Co., Gentlemen, I am happy to inform you that Anderson, Dr. S. S. Sibley's medicine, met with my approval. I have tried it in three different cases, and it has failed to relieve them as much as I had expected. I have used it in three cases, and it has failed to relieve them as much as I had expected.

A GENTLEMAN informed by the bill on the window of a house, that "apartments were to be let," knocked at the door, and attended by a pretty female, took a survey of the premises. "Pray, my dear," said he smiling, "are you to be let with these lodgings?" "No," replied the girl, with vivacity, "but I am to be let alone."

THOUSANDS of persons who are bald to-day might have full heads of hair if they would only use Carboline, a deodorized extract of petroleum, which is the only preparation ever discovered that will really do this.

At the morgue: "My mother-in-law," says a visitor to the official in charge, "disappeared three days ago, and has not been heard of since. I had hoped she might be here."

"Describe her, if you please, so that if necessary she can be identified." "She stutters awfully—you'd recognize her easily by that."

A VISITOR enters a French newspaper office, and is greeted politely by the office boy: "If monsieur comes to fight a duel he will have to be kind enough to call again; for our editors are already engaged for to-day."

ERNEST, why have you not sent to the Salon, this year? "Alas! I was compelled to eat my model." "What!?" "A still life—a plate of game."

It does not make any difference how severe the case of Bilious Derangement is, it can be cured speedily and effectually without squalor, or that prostration of the system ensuing from the use of drastic purgatives. Simons' Liver Regulator does not merely relieve the sufferer, but effects a permanent cure. It has been used successfully for a long time as a substitute for Quinine and Calomel, and the effects of the medicine are truly wonderful.

Major Vattel, in his history of the Danish-Norwegian Army, which has just issued from the press, tells at length the story of Field Marshal Count von Moltke's early military career. Helmut Carl Bernhard von Moltke was one of a number of young officers who in the year 1822 sought and obtained the Royal permission to enter for a time into foreign military service.

He was a Danish officer, and the more valuable privilege of receiving education. In 1819 Moltke was made an officer, and appointed to a lieutenantcy in the Oldenburg regiment. After three years of service, he obtained permission, as we have already said, to enter for a season into foreign military service, in order to complete his education as a Danish officer.
