A PROPOSED NEW STATE.

An association has been organized in the western part of Penusylvania, with headquarters in the city of Pittsburg, which has for its object the erection of a new State out of a portion of the Keystone State, called the State of Allegheny. It is proposed to divide the State of Pennsylvania so as to follow the county lines between Mc-Kean, Cameron, Clearfield, Blair, Huntingdon and Fulton counties on the one side, and Potter, Clinton, Centre, Mifflin, Juniata and Franklin counties on the other; the new State to consist of all that part of Pennsylvania west of the line so defined. It will embrace twenty-eight counties, with a population of 2,454,196. The total population of the entire State of Pennsylvania is 4,237,312. This would leave the State, after taking from it the State of Allegheny, with 2,783,116 inhabitants, or nearly twice the population of the proposed State of Allegheny. A number of leading men are interesting themselves in the movement, who are very earnest in advocating the formation of the new State. It is not likely though that the project will meet with much favor throughout the State generally, unless there are stronger reasons for it than appear on the surface.

WASHINGTON LETTER.

Washington, D. C. Nov. 13th, 1880. There will always be a belief that Mr. Barnum, Mr. Hervilt and others, who had the management of the late campaign on the Democratic side, failed to do all that their means and opportunities made possible. We were defeated where we had a right to expect success, and much of the blame will always remain, in the Democratic mind, with Mr. Ba rnum and his asso-The Millheim Cornet Band meets in the Town Hall on Monday and Thursday evenings. NEW YORK, November 11.—In an interview with General Haucock at Governor's island by an Associated Press reporter this morning, the General denied that the letter purporting to have been written by him to an army officer at Washington touching the New York vote was written by him, and said that he was one of the few persons who could not discuss the presidential election at present without HALL'S VEGETABLE SICILIAN HAIR RENEWER

COMING CHANGES IN THE U. S. SUPREME COURT.

From the Washington Republic Oue of the most important dnties the new President will have to perform will be the appoin tment of four Associate Justices of the Supreme Court of the United States. Justice. Nifford, notwithstanding the natural sensitiveness of his friends on the subect, is mentally and ph ysically incapable of ever taking his seat upon the woolsack again. He is seventy-seven years old, and his health is so precarious that he can bardly be expected to long survive. Justice Hunt's health is also threatening. He has not been upon the bench for two years and will probably never be able to resume his duties. He is seventy years old. Justice Swayne, although in good health, is seventy six years old, and it is understood that he will retire within a year. Justice Strong is also in good health, but he is seventy-two years old and it is understood that he, too, will retire after the 4th of March and take advantage of the full pensio n allowed by law. Thus Mr. Garfield will have the appointment of four new Judges, a responsibility he ought not to regard lightly. Of course only Republicans will be selected and the Court will then stand eight Repuplicans to one Democrat (Justice Field), who was appointed as a Republica n. One of these Judges should come from New England, one from New York, one from Pennsylvania and one from the South Justice Swayne is from Ohio, but that State has the Chief Justice and the South has hardly her quota.

MURDER.

An old man by the name of Finkboner, aged 80 years or more, and residing some distance in the country back of Georgetown, Northumberland county, was so badly beaten by his own son, on the 28th of October, that he died three days thereafter-on Sunday last. The son is near about 60 years of age. The old man owned a small farm which he deeded to the son, with the understanding that the son was to keep him the remainder of his days. But soon after the conveyance of the farm trouble ensued. The old man made application to court for admission to the poorouse, but the court refused and decided the son must keep him. Last Thursday whilst Mrs. Finkboner was away from home, her hus band got the old man into the barn and there beat him with a club and threw, him down from the barn above. Finkboner was taken to Sunbury jail on Friday. It has been said that some other party had a heavy insurance on the old man, but we do not know if this is correct.

> Captain Eads, Ship Railway. The **Ncientific American* of this week contains two full page illustrations of Captain Eads' proposed railway for transporting ships with their cargo across continents.
>
> Captain Eads claims by his plan to be able to take loaded ships of the largest tonnage from one ocean to the other across the Isthmus of Panama, as readily as can be done by a canal after the Lessup plan, and at much less cost for engineering construction.

The project is certainly bold and ingenious, and the project or anticipates no serious difficulties in carrying forward his enterprise. The engravings referred to in the Scientific American engravings referred to in the Scientific American show the proposed construction of not only the rainroad, but the appliances for transferring the ships from the water to the rail.

In add ton to the large number of engrayings, illustrative of engineering works, inventions and new discoveries which appear weekly the Scientific American has, during the past year, devoted considerable space to illustrating and escribing leading establishments devoted to different manufacturing industries.

This feature has added very much to the attractiveness and usefulness of the paper. More than fifty of the most important industrial establishments of our country have been illus rated, and the processes of the different manufactures described in its columns. The Scientific American has been published for more than thirty-four years by Munn & Co., 37 Park Row, New York, and has attained a larger weekly circulation than all similar papers published in the country.
