WASTE ON THE FARM .- The greatest waste on the farm is in the not using of our brains; the greatest, because at the bottom of all the other wastes. A little thinking often saves much labor. After accomplishing almost any piece of work, the most of us can look back, and see how we could have improved on it, if we had but thought. As we review our crops of this year, we see how they could have been easily increased, had we only thought. The ditch we dug through our medow was not done in the most economical way. We dug too deeply at first, and did not allow for of labor. We omitted buying an implement that would have saved nearly its cost in this one year's use, until we had spent much in trying to accomplish our work without it. Here was another waste. We carry a water pipe too near the surface, to save the expense of digging a trench of a safe depth, and the winter's frost necessitates a replacement of the pipe, and an additional digging. Certainly, a waste here. We allowed the weeds to grow on one piece of land, not thinking to what proportions they would grow by theitime the crops were too lar advanced and distressing, often causing much to admit the hoe. A waste here, which restlessness and irritability—these in might have been obviated. And so on their turn often increasing the fever. arising from our not thinking suffici- allayed; but if left to themselves, to had broken into Spilkins' house and and easily obviated. We omit the orness, from want of appreciation of and are in large part inexcusable; those | very grateful. arising from carelessness, are not deserving of sympathy. The farmer, as

is the most esteemed of all roots for its feeding qualities. When analyzed it gives but little more solid matter the most perfect digestion and assimipractical men, is explained by chemists as resulting from the presence of a substance called pectine, which operates to cos ulate or gelatine vegetable solutions, and tavors this digestion in all cattle. Horses are especially bennited by the use of carrots, and they should be fed frequently with their other tood. Most all sections of the western country produce, when thouroughly cultivated, beautiful crops of carrots, and they can be raised at a usual.

How to FEED Horses,-The trouble with most persons who keep horses, no matter whether for farm work or for driving purposes, is they feed too much hay; and to this can be attributed the general sluggishness often manifested by the horse until they have been working a couple of hours, while their wind is also much impaired. Night is the only time when hay should be fed, especially to animals used for quick work; even the slow plow team should have but little hay at the morning and noon feeds, but give them a generous supply at the evening meal. By doing this your horses will keep in better spirits and condition, and tree from any tendency to "pot belly," which horsemen so much dislike to see.

FATTENING stock will thrive most when fed only such quantity as will be eaten readily with good appetite: any excess of feed laying before them will destroy the relish, make the animals dainty, and lessen the quantity they will consume. A variety is desirable; one feed daily should be some esculent, as potatoes, turnips, or beets, not so much for the food element they contain as to give tone to the appetite and digestion. Feed and water should be given at regular times, and by one feeder, who will, if a proper hand, soon learn what each animal requires and will feed no more or less.

ground, then the least disturbance of the soil disarranges its connections, and it dies in a hot sun; but, if it grows until it makes roots, if it is disturbed considerably you do not kill it; it has hold upon the soil, and it lives in spite of you.

ties of gathering the ingredients from the soil and air, and the effects of different fertilizers upon the growth; hence the proper fertilizer in a given case depends upon the crop as well as upon the soil.

DANGE MOR

DOMESTIC.

CONCERNING HAIR CUTTING .- She is mother, but she does not know how to cut the children's hair. This is a pity, because it is expensive to send to the barber, and Papa neglects the job. Besides, the children do not like and he could not swim. In terror, he their hair haggled, and it is not nice to look at either. The trouble often is the scissors are dull; now, this should he vowed that if he escaped he would not be. A woman ought, above all earthly things, to have sharp scissors, especially where a whole family is to sew for. Next in importance to having plenty of dry kindling wood and lively yeast, is having sharp scissors. Given sharp selssors, she cannot then their heads catsteppy; for the life of her, she can't help it. The trouble is she does not manipulate the comb properly. Let her push this instrument through the hair in a direction opposite to which it lies on the head, and clip off those hairs that protrude hrough the comb. Do this, little by little, taking hold of fresh bair continually, and soon the job is completed as beautifully as though the barber had done t. Don't cut off the child's ears.

To the sick thirst is most important wastes, little and big everywhere, all The urgent thirst must, therefore, be ently-waste, because not necessary satiate their craving, patients will always drink to excess, which is very dinary wastes from neglect, from lazi- liable to disarrange the stomach, impair digestion, produce flatulence and cleanliness and thoroughness, - the even diarrhea. Theory and experiwastes from our stock, from our man-ence both show that drinks, made pre heap, from our household. Verily, slightly bitter and somewhat acid, a little inought will save the farmer slack thirst most effectually. A weak much, and the saving, through this infusion of cascarrilla or crange peel, means, even on a sman farm, will represent the interest on a considerable acid is a favorite thirst-allaying drink capital. CHEAP DYES .- A lovely dark brown well as the business man, must use can be obtained by using catechu and business principles, to secure the larg- bi-cromate of potash, two ounces of the est success, and the one should be potash and four of the catechu. A as careful of the out-goes as the lighter yellowish brown, can be colored by making a strong tea of hemlock bark, and putting in the goods while hot. A correspondent says that last CARROTS FOR ANIMALS.—The carrot rall she sent some muslin to be colored in the vats at the tannery, and was delighted with the shade—a yellow brown, and free from spots. Soft maple than any other root, eighty-five per bark with copperas added, makes a cent, being water; but its influence in lovely dark purple. It will wear well, the stomach on the other articles of and bear washing if dried in the food is most tavorable, contributing to shade. Hickory bark and copperas will make a dull dark green. White lation. This result, long known to clover blossoms and alum produce a bright yellow.

STARCH FOR SHIRT BOSOMS,-Take two ounces of fine gum-arabic pewder put into a litcher, and pour on a pint of boiling water, according to the strength you desire, and then, having covered it, let it stand all night; in the morning pour it carefully from the dregs into a clean bottle, cork it and keep it for use. A tablespoonful of gum water stirred into a pint of starch | Irish orator the other day at a meettrivial expense. The land upon which made in the usual manner will give to carrots are to be cultivated should be lawn, either white or printed, a look the days of Adam." "Adam indeed!" mellow, and be plowed deeper than of newness when nothing else can re- replied a voice in the crowd. "do not store them after they have been speak of him; he was evicted from the washed.

> A MOLD OF COLD MEAT .- A pound or a little more of cold meat-beef. mutton, anything except pork-two ounces of maccaroni, one teacupful of fine bread crumbs, a tablespoonful of butter, one egg, pepper and salt. Cut the meat very fine. Wash the maccaroni in cold water then boil for half an hour, drain and cut into inch-lengths. Mix with the meat crumbs, butter, pepper and salt, mix thoroughly, bind together with the beaten egg and pack into a well-greased basin or bowl and steam for an hour. This is very nice for breakfast or tea, sliced and eaten cold.

Laws of life say it does not necessarily follow that a person with an ill-developed or peculiarly shaped chest wall should have consumption. One great primary cause of consumption is the want of inflation of apices of the lungs, whether from habit, occupation, inattention or whatever cause. This fact is the primary cause of more consumption than anything else. It opens the door for the enset of the disease under any exciting cause, as cold, fine." congestion or pneumonia.

CABOTTES A LA FLAMANDE.-When parboiled and drained, put the carrots into a saucepan with a piece of butter, a pinch of sugar and as much water as may be necessary for sauce; add some finely-minced parsley and white pepper, and salt to taste. Let the carrots WEEDS .-- The best time to kill a weed simmer till done (about fifteen minis as soon as it is born, before you can utes), shaking them occasionally. see it. When the seed is germinated Beat up together the yolks of two eggs and is just ready to break through the and half a gill of cream, stir this into the carrots off the fire, and serve.

For cholera morbus, take black pepper and grind it tolerably fine. Then put in a glass a tablespoonful of this and a tablespoonful of salt, and fill about half full with warm water, then fill up the glass with good cider vine-PLANTS vary greatly with respect to gar, and stir it up. South Africu

South Africa, speaking in the rough,

is a semi-circle, the shore line of which is low and level, while the interior rises in two or three tolerably distinct steps to a high plateau. The printed for them a set of seven beautihills and mountains which form these | ful cards, each in six colors and on a steps runs on the whole, parallel with the seashore, while the rivers form he radii between the center, which is the interior plateau, and the periphery, which is formed by the sea. The two largest rivers, the Orange and the Limpapo, flow respectively in a westerly and easterly direction. The northern boundary of the South Africa semi-circle is formed by the tropic of Capricorn. The territory thus limited is capable of supporting a great empire-an empire, moreover, which can support itself and has a position of matchless security. It has the most salubrious climate known to medical science. The soil produces everything needed by a civilized and luxurious people. Nevertheless, the empire has not interested mankind greatly save as a stopping place on the way between the European states and their colonies in Asla. In that capacity the Dutch occupied the cape in 1652, by the proclamation of a Surgeon Ribeck. Some adventurers, mostly Dutchmen, settled at the cape, their wives being furnished them by the Dutch government, which emptied its workhouses for that purpose. These Dutchmen had no difficulty in taking from the Hottentots what land they wanted, and a man who chose to leave the settlement usually went where he pleased the Hottentots being either his slave or his game. The Dutch Boers-an appropriate name-were joined by Huguenots and Germans, and the result was a peculiar mixture. The Boer of to-day has a language of his own, the basis of which is Dutch; he that he was disabled from performing is tough, bold, yulgar; he is an intense Calvinist; he detests English freedom he looks apon the African tribes as tasted-and deposits them over the egg. his slaves; his institutions are patriar- | ready for the larva she will never see. Many others of our acquaintances have chal; most Boers read, and many of | The life history of every insect exthem write; they hold science, art, and refinement in contempt. To All Our Friends.

Having had numberless inquiries for advertising cards from ladies in all parts of the country who are interested in the prevailing fashion of making "Card Collections," we are having gold background, in the very highest degree of art, illustrating Shakspeare's "Seven Ages of Man," We have spared no expense in these cards-they are simply little art gems. Our only aim has been to publish the finest cards yet shown. Applications for them have come in so rapidly that nearly the whole edition is engaged before the receipt by us of the cards from the artist. We have therefore been obliged to adopt the following plan for the distribution of the remainder: No more of the gilt Shakspeare cards, seven in the series, will be sent excepting upon the receipt of a statement from a grocer that the person applying for the eards has bought of him on that day at least seven bars of Dobbins' Electric Soap, with price paid for same. All applying in this manner will receive the full set of seven cards gratis by mail. This will insure us that our friends and patrons get their share of these beautiful designs, although it in no manner repays us for the cost of the cards, Your grocer has the soap or will get it, and the purchase by you of seven bars of it at one time will secure for you gratis seven really beautiful cards. The soap improves with age, and is an article of necessity in your house every week. Therefore you are not asked to buy a useless article, but one that you must have anyway. Please send us your application at once, and tell your lady friends making "Card Collections," to do the same. Grocers do not have the cards to deliver. Buy the scap of them, send us their bill, and we will mail you the cards free. Yours respectfully, I. L. CRAGIN & Co., 116 South 4th Street, Phuadelphia, Pa. P. S .- Ladies not wishing to buy soap can get the cards by remitting

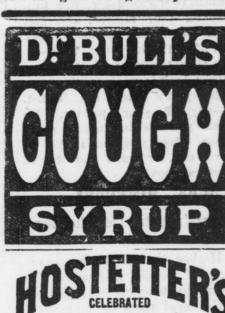

cost price, 25 cents

Let us examine the marvellous instinct of the solitary wasp in providing for the worm that will issue from her egg after her own death. She brings grubs-food that, as a wasp, she never hibits instincts of this perplexing description. Look at the instinctive character of bees in their far-sighted provisions for the future. Witness the caterpillar, how at the proper time it selects a suitable situation and spins insect world; every little bird is its own skilful accoucheur. We or ce observed the self-delivery of the chicken. The prison wall is not burst in pieces by struggles. By a regular series of hard, sharp horn on the top of the upper mandible, which, being required for no other purpose, disappears in a few days. Obviously each individual bird no more acquires the art of breaking its way out than it furnishes itself with the little pick-hammer used in the operation: and it is quite clear tha which she calls by a language she never before used-may have never derstand.

THE soft and silky appearance given to the hair by the use of Carboline, the natural hair restorer and dressing, as now improved and perfected, is the subject of general remark by all who have witnessed its effects upon the human head. Sold by all dealers in drugs.

MUSIC BOOKS For SCHOOLS

Song Bells, (50 cts.) The latest book for Emerson. Has a g eat variety of cheerful, genial, musical songs, such as the girls and boys must like, and also a good Elementary Course. Among our older and standard School Song Books that are still favorites and in constant demand, we mention Whip-poor-will (50c.) Mocking Bird, (50c.) and Golden Robin. (50c.) all by W. O. Perkins.

Welcome Chorus. (1.00) The latest book for High Schools, Academies and Seminaries By W. S. Tilden. Is of the best character, and well fitted to follow those most successful books, the High School Choir (\$1), and the Hour of Singing (\$1), bo h by Emerson and Tilden and the Laurel Wreath (\$1), by W. O. Perkins. We also mention Emerson's Quarfets and Choruses for Male Voices (80c.). us out, as a good book for practice in High Schools, Academies and Colleges.

OPERETTAS AND CANTATAS FOR SCHOOL EXHIBITIONS. Coronation, (60 cts.) Culprit Fay. (\$1) Fairy Coronation, (60 cts.) Culpit Fay, (all Fair) Bridal, (50 cts.) Flower Queen, (new, 75 cts.) Guardian Angel, (50 cts.) Hour in Fairy Land, (60 cts.) Miracle of Roses, (60 cts.) Little Bo Peep, (60 cts.) Mud Irving, (50 cts.) New Year's Eve, (60 cts.) Three Little Kittens, (50 cts.) Quarrel among Flowers, (35 cts.) Spring Holiday, (60 cts.) and Cinderella, (50 cts.) are all lively and pretty
