BEST VARIETIES OF WHEAT .-- At a recent meeting of millers in Cincinnati, the comparative value of the different kinds of wheat for flouring purposes was considered. It was found difficult to decide which should be declared best, on account of the modifying influences of climate and soil in a territory measured by 23 deg. of latitude and 57 deg. of longitude, an area of three and a quarter millions of square miles. It was declared that the same varieties growing in different States differ materially in milling value; that the Fife of Northern Mintegota and Dakota is far superior to the same kind grown in Lower Illinois and Wisconsin; that the Rappahannock of Virginia, Geergia and Tennessee, is much richer in gluten than the same grown north of the Ohio River.

Still the comittee venture to recommend for milling purposess the following winter varieties: "Longberry Amber," Lancaster, Indiana Red, Alabama Orange, Velvet Chaff, Rappahannock and Jennings. The first two are preferred, being rich in gluten and valuable for shipping to warm climates. The third is also very glutinous, as is the Alabama, a variety that yields poorly in the harvest. The Jennings is whole and hard, making flour of good color and strength. The Orange makes a family flour of fair strength, with small proportion of offal. The Rappahanneck is variable, not very rich, yielding a good family floar as good as ginger preserve. but is easily damaged by moisture. The Velvet Chaff is early, has a stiff straw, well adapted to rich soils, yields fairly in milling a product of good or removing topstalks or roots; boil strength. Cawson and Fultz, both of them an hour in boiling water and which are varieties popular with grow-salt; then peel and slice them and ers on account of their large yield, are unpopular with millers, who declare them soft and weak, with little glu-

he raised some of the finest peach blow potatoes he ever saw in the following manner. In the latter part of May I drove my two horses and plough to the patch of ground I wished to plant and commenced ploughing around it. My b y followed, dropping potatoes, one in a place, every fifteen inches and in every other furrow. I turned a light furrow on them, and when done I covered the whole patch with straw to the depth of three inches. They needed no cultivation, and in August, when we were having our dry spell, the potato vines in fields planted in the ordinary way were drying up and dying, these potato tops of mine were growing vi gorously, completely covering the ground. I shall p'ant again in this way, but, in the event of a wet season, I think the potatoes will be watery. ways.

DURING the dead of winter any living plant which looks green adds to the cheerfulness of a room, and a mass of beautiful verdure is obtained by the following expedient: Take about twenty or thirty ears of wheat and tie them together, leaving the straw about two inches long. Hang them up for a few days, keeping them sprinkled with water; the top will soon become a pyramid of verdure, and will retain beauty for several weeks. Tris simple plan may be put in practice at any time in the winter months.

A farm cart, which, with good usage, would last almost a lifetime, will last only a few years when exposed to the weather.

Not the least promising applications of the new luminous paint is found in the production of a safety lamp for coal miners. It is said to give light enough for practical use, and, as it contains no fire, or heat, it is evident that its use is absolutely free from risk. By means of this form of lamp, in connection with blasting by compressed air, fire and the attendant danger of exploding gas might be ruled out, and the most dangerous mines be made quite safe.

Herr Bergel, of Berlin, has bought out a curious device by means of which pictures of various kinds are burnt out on a piece of ordinary-looking rose-colored paper. A glowing match is applied at two finely-pertorated points, and the sparks communicated then begin gradually to move over the paper, tracing out the picture. Neither leaves its proper path or injures the paper beyond, and when the end of the path is reached the spark goes out.

butter is adulterated with beef fat has been submitted by Hager. He satu- only the remaining one-fifth is availarates a cotton wick with a suspected sample, which is first melted. He then of the burning makes no differencelights the wick and permits it to burn one ounce of zinc, for example, always for about two minutes. At the end of that time, when the wick is extinguished, an odor like that given off by a tallow candle, when its flame is blown out, is readily perceived if the butter | declared he could show all the parts of

working successfully. Sterile tracts formed in the presence of the duke of of land have been converted into fertile plains while no increase of sickness among the inhabitants has tollowed, as was apprehended.

A great telescope lens, nearly twenty-nine inches in diameter, is being fin-ished for the Paris Observatory.

#### DOMESTIC.

CURE FOR DIPHTHERIA. - Diphtheria is becoming a dreadful scourge and the writer of what is here said, saw the working of this cure in the hands of an English physician at a time when the disease was prevalent in an English town. Speaking of the physician's application, the writer says: "All he | blamed for the false of the key, am took with him was powder of sulphur and a quill, and with these he cured every case without exception. He put a spoonful of flour of brimstone into a wineglass of water, and stirred it with sulphur does not readily amalgamate with water. When the sulphur was well mixed he gave it as a gargle, and which he had been called just in the nearly closed to allow the gargle, he the throat, and after ehe fungus had shrunk to allow of it, applied the gargle. He never lost a patient from diphtherria. If a patient cannot gargle, take a live coal, put it into a shovel and sprinkle a spoonful of flour of brimstone at a time upon it, let the sufferer inhale it, holding the head

ONE secret of making short crust light is to roll it only once, and to handle it as little as possible. Superfor pastry will be improved by the addition of the yolk of an egg and two or three drops of lemon juice. It is generally understood that, for the best crust, equal quantities of butter and flour should be taken; but very excellent pastry indeed may be made with half the weight of butter to that of flour, and good plain pastry may be made with six ounces of butter or clarified dripping and a teaspoonful of baking powder to one pound of flour. For meat pies it is really undesiriable that a large portion of butter should be used.

over it, and the fungus will die. If

be filled almost to suffocation, the pa-

tient can walk about in it, inhaling

the fumes with the doors and windows

shut. The plan of fumigating a room

with sulphur has often cured most

violent attacks or colu in the head and

lentitully used, the whole room, may

MOCK GINGER PRESERVE .- Cut into strips the thick rind of a watermelon. trim off the green and cut cut the inside until the rind is firm; cover with water, into which throw enough soda to make the water taste of it; let stand from twelvs to twenty-four hours; take out, boil in clear water until a straw will go easily through; drain; put into syrup made of good brown sugar, very strongly flavored with pounded ginger; let boil slowly until the syrup penetrates the rind. This is almost

STEWED BEETS .- Wash two or three large beets without breaking the skin stew them an hour in the following sauce: Mix together in a saucepan over the fire one tables poonful each of butter, flour and vinegar; gradual-POTATOES -A Kansas farmer says salt and a quarter of a saltspoonful of I've made toilet cushions and tidies,

tablespoonfuls of milk in which has been dissolved one teaspoonful of soda. Beat two eggs quite white and add them. Mix two teaspoonfuls cream tartar with half a pound of flour and a teaspoonful of powdered cinnamon. Mix the whole together, adding more flour from time to time to make a dough. Roll thin and bake quickly.

To wash a fine cambric handkerchief, embroidered in colored silks, so that the colors do not run, the secret is to wash in a soap lather very quickly, wring thoroughly and then iron, so that it dries at once. There should be no seaking, and the embroidered It will be a good plan to plant both corner should be kept out of the water as much as possible. A little alum in the water will make the process more

ALWAYS have in the house a bottle of alcohol for use in case the gas pipes become frozen. A portion of the alcohol poured in the top-cock opening in the main supply pipe will enable you to have gas light, whereas you may be obliged to spend an entire evening, as Mosses did when the light went out in the dark.

LEMON PIE - For a good sized pie take one large lemon; grate the rind and add the juice to one and or e-quarter cups of brown sugar. Beat the yolks of four eggs with a pinch of salt; add to the above, which requires only one crust. When baked, beat the whites of four eggs to a stiff froth with a little white sugar spread and dry in the ove n.

Professor Fleeming Jenkin has stated that the following are the main conditions to be fulfilled in putting a house into good sanitary order: 1. The liquid refuse from the house must have a free passage to the town sewer. 2. The air from the town sewer must not have a free passage into the house drain. 3 No air or gas from the drainage channels of the house must enter the house. 4. No water or liquids must leak from those channels into the ground under the house. 5. The drinking water must be stored in such a manner as to run no risk of contamination. 8. The air of the dwelling rooms must be supplied wit hout contamination.

Professor Tyndall says that "burning" of zinc is to be regarded as one of the most serious drawbacks to the general use of the electric light. Zinc, it is known, may be burnt in alr-that is. oxidized; it may also be burnt or oxidized in acidulated water, but it has to displace the oxygen from the hyrdrogen for this to occur, and four-fifths of An easy method for showing whether the heat is used up in this process. Thus it is that when zinc is thus burnt ble for the purpose intended. The rate gives out the same amount of heat.

> HAPPINESS and prosperity are so indissolubly linked with good health, that all those suffering with Hoarseness, Cough, Colds, etc., should try Dr. Bull's Cough Syrup and be cured. Price 25 cts.

#### FUMOROUS.

"GUILTY or not guilty?" asked the Galveston Recorder.

"Of course I'm not guilty." "You went into this gentleman's room at the dead hour of night with a false key?"

"That's just so, but I am not to be "No levity, sir. You found him fast asleep?"

"So I did, and I didn't wake him up, either. My family doctor says it's dangerous to waken a sleeping man." "I suppose it is, particularly if he had a six-shooter handy. You took the sleeping man's pants and stole noiselessly down stairs and gave them

to a confederate." "That's all so, except I didn't steal down stairs."

"You mean you stole up stairs."

"No; I didn't steal at all."

"You are doing some tall lying now." "And I didn't turn the pants over to a confederate, either. He was a Union man all during the war."

"You admit you took the pants?" "Certainly, Judge; but if the truth has to be told, I'll give it to you. I went and got those pants merely to show to my friend, who wanted to take a pattern of them to have a pair built just like them. I was going to take them back I was interrupted by the police. Do you suppose if I was a stealing man I wouldn't be in official position?"

The case was taken under advisement.

[Springfield, (Mass.) Republican.]

Edgar T. Page, Eq., Druggist, writes us from Chicopee Falls, that Mr. Albert Guenther, under Wild's Hotel has used that remarkable remedy, St. Jacob's Oil, for a severe case of rheumatism and it relieved and cured him, as it by magic. He also used it with great success among his horses, in cases of sprains, sores, etc., and it cures every

THE other day a bright three-yearold boy, "who has been around some," was taken to church to be baptized and christened. Although the little fellow's parents are church people, they mingle much with the world and are quite regularly at the theater, where the little three-year-o'd always accompanies them. Being taken into church there was some delay before the ceremony was proceeded with, and the unregenerate youth becoming uneasy, cried out in a loud impatient tone, "Ma, why doesn't the curtain go

It was a little evening gathering. She was a delicate daisy of about forty summers and as many hard winters. They were eating truit and she remarked as she delicately pared the peach: "The skin of a peach always sets my teeth on edge." Her little nephew who is sharp eared and sharp eyed, said, "Well, auntie why don't you take your teeth out and lay them on the window sill, like you did this morning?" Her appetite for fruit vanished. The boy will sit sideways on the bench when he goss to school

"AH, dear," sighed Miss Fitzjoy, as ly stir in a pint of boiling water; sea-son the sauce with a saltspoonful of anything to cocupy one's mind now. and embroidered slippers and painted majolica jugs until I'm weary of life. SCOTCH COOKIES .- Beat two cups of I believe I'll go down into the kitchen sugar with one cup of butter and five and watch Jane make bread. I surpose I ought to know how many pints of yeart it takes to make a loaf." And she penetrated the business part of the house only to find out that bread was "raised" from the baker's cart.

[Des Moines Iowa State Register.]

We notice the following in an exchange: Mr. G. B. Haverer, Foreman N. Y. & N. H. S. B. Co., suffered for eight days with terrible pain in the back, almost to distraction, until he heard of and used St, Jacob's Oil, one bottle of which cured him completely.

"ALL's well that ends well" does not apply to a dry oil well.

# VEGETINE

DR. CALLIER SURPRISED

Vegetine Cured His Daughter!

CALLIERSVILLE, Chilton Co., Ala., May 15, 1878. DEAR SIR.—My daughter has been afflicted with nasal catar.h, affection of the bladder and ki meys, and is of scrotlious diatheses, and, after having exhausted my skill and the moseminent physicians of Selma I at last respred to the use of your Vegetine (without considence) and, to my great surprise, my daughter has been restored to health. I write this as a simple act of justice, and not as an advertising hedium.

Respectfully, T. E. CALLIER, M, D.

#### VEGETINE Worked Like a Charm-Cured Salt

Rheum and Erysipelas. 75 COURT ST., ROME, N. Y., July 10, 1879.

MR. H. R. STEVENS: Dear Sir.—One year ago last fall my little boy had a breaking out of Erysipelas and Sai Rheum, his face being one mattered sore, of the worst description. Noticing your advertisement in the papers, I purchased two ootles of the Vegetine, and with the two bottles my son was cured. I never saw anything like the Vegetine: it worked like a charm. I have been Vegetine: it worked like a charm. I have been city watchm in at Rome for years. This testi-monial is gratu.tous. Yours, respectfully, HORATIO GRINDLEY.

# VEGETINE.

Remarkable Cure of Scrofulous Face WESTMINSTER, Conn., June 19, 1879. MR. H. R. STEVENS:

Dear Sir.-I can testify to the good effect o your medicine. My little boy had a Scrotule sore break out on his head as large as a quarter of a dollar, and it went down his face from one ear to the other, under his neck, and was one solid mass of sores. Two bottles of your valuable Vegetine completely cured him. Very respectfully,
MRS. G. R. THATCHER.

VEGETINE, IS THE BEST SPRING MEDICINE.

To All Our Friends. Having had numberless inquiries for advertising cards from ladies in all parts of the country who are interested in the prevailing fashion of making "Card Collections," we are having printed for them a set of seven beautiful cards, each in six colors and on a gold background, in the very highest degree of art, illustrating Shakspeare's 'Seven Ages of Man," We have spared no expense in these cards-they are simply little art gems. Our only aim has been to publish the finest cards yet shown. Applications for them have come in so rapidly that nearly the whole edition is engaged before the receipt by us of the cards from the artist. We have therefore been obliged to adopt the following plan for the distribution of the remainder: No more of the gilt Shakspeare cards, seven in the series, will be sent excepting upon the receipt of a statement from a grocer that the person applying for the cards has bought of him on that day at least seven bars of Dobbins' Electric Soap, with price paid for same. All applying in this manner will receive the full will insure us that our friends and patrons get their share of these beautiful designs, although it in no manner repays us for the cost of the cards. Your grocer has the soap or will get it, and the purchase by you of seven bars of it at one time will secure for you gratis seven really beautiful cards. The soap improves with age, and is an article of necessity in your house every week. Therefore you are not asked to buy a useless article, but one that you must have anyway. Please send us your application at once, and tell your lady friends making "Card Collections," to do the same. Grocers do not have the cards to deliver. Buy the soap of them, send us their bill, and we will mail you the cards free. Yours respectfully, I. L. CRAGIN & Co., 116 South 4th Street, Philadelphia, Pa.

P. S.-Ladies not wishing to buy soap can get the cards by remitting cost price, 25 cents.

THREE RECIPES TO CURE CORNS .- 1. Bathe the corn with strong borax water: then shave it losely, but be careful not to make it bleed. Place over the corn a white felt corn plaster and wear it constantly until the corn has disappe red. Every night and morning wet the small cavity over the corn (and in the plaster) with a little borax water, or, if preferable, the pulp of a le non. The corn plaster can be procured at any druggist's. 2. Keep the feet clean by frequent ablutions with warm water, and wear easy soft boots or shoes. Without the latter preciution, corns will generally rebeen perfectly removed. 3. After soaking the feet in warm water for a few minutes, pare the corns as close as possible with a sharp knife, taking care not to make them bleed. Place upon the part affected, a small, circular piece of leather or buckskin, spread with some emolient plaster, and having a hole in the center corresponding to the size of the corns. They may now be touched with nitric acid, by means of a small glass rod or wood toothpick, due care being taken not to allow the liquid to come in contact must have a drink. with the neighboring parts. Repeat this process daily until the offender be sufficiently softened to admit of re-
