#### AGRICULTURE.

Fowls during the molting season need some tonic, the best of which is tincture of iron, mixing a few drops the air through the narrow nostrils, with the water they drink. Assafatida, garlie and onions are good stimulants for the lungs and digestion. Cayenne pepper and powdere ! gentian are also good. Charcoal broken in o small bits is a great purifier of the to breathing through the mouth and Insect powder is safer. The American from pasal catarrh, is caused, not by Poultry World gives a receipt as fol- any "dropping" of diseased mucus lows: "For chicken powder, four from the head, but by the simple fact, ounces each of copperas, cayenne pep-per, sulphur and rosin; pulverize and and partially closed, the person mix; two spoonfuls for a dozen fowls breathes only through the mouth. given twice a week. Coal oil, if rightly used, is of value to the poultry keeper. The perches may be sprinkled air, during the prevalence of epidem with it, and also the nests. But it ics, in malarial districts, especially at must not be put where it will touch night, when the sytem is especially the egg in the nest, or bodies of the hens, for then it does harm, being too strong. It for instance, eggs are cove:ed with coal oil, their viality is said present-the rule should be observed, to be destroyed entirely.

INVESTIGATIONS have almost invariably proved that cattle plagues have their origin in filth and lack, of care, either in the stables or pasturos, The causes of these 1 lagues, it has been as certained are largely analogous to those that induce cholers, and many of the other securges that come upon the human 18:e, and when they once attain the degree of contagion, are as unsparing and fatal as they are among the human tamily, B. d food soon in-duces unbeathy blood, and when flith, foul odors and similar influences are encountered in that condition of the system, the result is a development of disease, which althou, h local at the moment of its origin, spreads as rapidly as fresh material is brought into contact with it.

A CORRESPONDENT hands us the following method of preparing sugar for teading bees: To four quarts of white sugar add one quart of boiling water; heat over a brisk fire, stirring all the time until it boils about five minutes. Remove from the fire and set the dish in a basin of cold water, and stir triskly until it begins to get white and creamy. Now your on plates and ) let the sugar cool in large cakes. It there is too much water in it, and you will have to put it back on the stove and boil for a few minutes again. When you have got your cakes of cool, hard candy, put them on the irames over the bees.

For scours in catile change the food and water. Give first a quart of lard oil with two ounces of laudanum. After three to four hours give two ounces each of powdered catechu,'ginger and gentian in a pint of flaxseed tes to cattle under two years old and over nine months; and on -fourth to one third the cose to younger stock, repeating the dose twice daily, and withholding it as soon as the discharges dimit i h. Give nourishing food and flaxseed tea to drink. In chronic diarrhe cea give morning and

#### DOMESTIC.

BREATHE THROUGH THE NOSE .- In cold weather the roundabout course of warms it somewhat before it strikes the larvnx, whose surpassing delicacy of construction renders it peculiarly liable to harm. Many a case of inflamed tonsils, laynx, or lungs, is due the attacks of insects. Whenever the air is loaded with infect on-in sick rooms; in the open lable to be affected, in the curs and all crowded gatherings, for we never know when there are infected persons

to breathe through the nose. Persons who do so are less likely to take disease. The morbid particles are quite likely to lodge on the moist sides of the nasal passages, and thence to be washedout. When the air is loaded with dust-when sweeping rooms, beating carpets, sifting ashes, shoveling coal, facing couds of dust in the three year-old child had apparently street, filling iron and other metals as died, and was considered as having a business, and working in various passed over to the majority for three kinds of mills-it is exceedingly im- and a haif hours. At the end of that portant that the rule be observed. One time Prof. Fort set up artificial resshould train himself to sleep with closed mouth. For this purpose, he should avoid lying on his back, in life. A person had been under water which posture the mouth is much more for 10 minutes, and was evidently likely to open than in any other posi- drowned. Dr. Fournol, of Billancourt, tion of the body. The danger is increased by the mouth becoming dry, managed to make natural succeed artiand thus less able to arrest the particles of dust or any floating miasms.

LEAF THOTOGRAPHS -A simple and effective method of taking leaf photos is as follows: Procure a few cents worth of bi-chromate of potash, with until hours of trial of artificial respirawhich make a saturated solution. Pour tion gives no encouraging result. some of the clear liquid into a shallow dish and on it float a plece of letter paper till it is thoroughly and evenly moisterred, placing it in the dark to dry, when it should appear of a bright yellow color. On this place the fern it does not crystallize by stirring, under it, a piece of soft black cloth or any other kind of leaf desired; and some folds of newspaper. Place this between two panes of glass and secure with clamps (spring clothes plus will answer). Expose to a bright glaring sunshine; with the rays fall-

ing as nearly in a perpendicular as possible. It will soon begin to tarn brown, and, in a few hours, a perfect and dark impression will be obtained, when it may be removed from the rame and placed in clear water, which must be changol every few minutes, till the yellow parts becomes perfectly white. Sometimes the figures will be perfect every vein and mark distinct; and these photographs are most interesting and beautiful when collected in a book.

FACES .- The following is said to be an

excellent method of fastening cloth to

the top of tables or desks: Make a

mixture of 21/4 pounds of wheat flour,

2 tablespooniuls of powdered rosin

and 2 tablespoonfuls of powdered

alum: rub the mixture in a suitable

vessel, with water, to a uniform smooth

as.e; trasfer this to a small kettle

over a fire and cook. There must be

no lumps. When the mass has be-

come so stiff that the stirrer remains

upright in it, remove it to another

vessel and cover tightly that no skin

collects upon the surfa e. Apply the

paste is, a very thin layer to the sur-

face of the table, the cloth or leather

is then laid on and pressed upon it and

smoothed with a roller. The ends are

cut off atter drying. if leather is to

be fastened on, moisten first with wa-

ter. The paste is then applied to the

table and the leather rubbed smooth.

coral over the fish when served. Put

the fish over the fire in cold water,

with a little salt and vinegar in it.

Boil gently till done and drain tho-

moire paper. The flaps are fastened

between the two top hexagons. Care

must be taken to employ the colors for

the spatter work as dry as possible, so

as to prevent their running on the

tissue paper. The shaped leaves or

flips must be arranged not to lie one

above the other, as this would interfere

PIGEONS ON TUAST -- Split some

young pigeons down the back, wipe

them, season with pepper and salt, rub

with butter, sprinkie lightly with flour

and broil over a clear fire. Toast

some meat, thin slices of bread, butter

them thickly, and put a pigeon on each

slice, arranging about them some

sprigs of the fine watercress.

with the transparency.

### To All Our Friends.

now abundant on many farms, and all Having had numberless inquiries fo. can still obtain them cheaply. But advertising cards from ladies in all they will soon begin to decay, unless parts of the country who are interest-ed in the prevailing fashion of making "Card Collections," we are having they are good keepers and great care be exercised-such care as few can give. An experienced matron, of printed for them a set of seven beautiful cards, each in six colors and on a gold background, in the very highest degree of art, illustrating Shakspeare's "Seven Ages of Man." We have spared no expense in these cards-they are simply little art gems. Our only aim has been to publish the finest cards yet shown. Applications tor them have come in so rapidly that nearly the whole edition is engaged before the receipt by us of the cards from the artist. We have therefore been obliged to adopt the following plan for the distribution of the remainder: No more of the gilt Shakspeare cards, seven in the series, will be sent excepting upon the receipt of a statement from a grocer that the person applying for the eards has bought of him on that day at least seven bars of Dobbins' Electric Soap, with price paid for same. All apply ing in this manner will receive the full set of seven cards gratis by mail. This will insure us that our friends and patrons get their share of these beautiful designs, although it in no manner repays us for the cost of the cards, Your grocer has the soap or will get it, and the purchase by you of seven bars of it at one time will secure for you gratis seven really beautiful cards. The soap

much skill, in response to a request from the American Agriculturist suppltes the following: We keep our ap-ples in the coolest and dryest place we can, where they will barely escape freezing. I have them looked over frequently, and take out every one at all likely to decay, because of its kind, or from bruises, and preserve these either in the form of apple sauce or apple jelly.

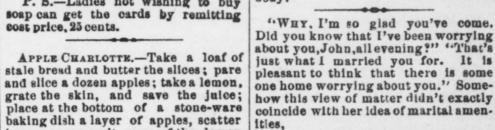

How TO KEEP APPLES .- Apples are

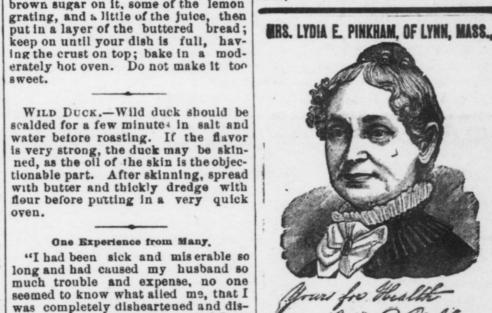

#### Feeble Ladies.

Those languid, tiresome sensations, causing you to feel scarcely able to be on your feet; that constant drain that is taking from your system all its elasticity; driving the bloom from your cheeks; that continual strain upon your vital forces, rendering you irritable and tretful, can easily be removed by the use of that marvelous remedy, Hop Bitters. Irregularities and obstructions of your system are relieved at once, while the special cause of periodical pain is permanently removed. Will you heed this?-Cincinnati Eaturday Night.

OXALIS, begonias and other bulbous costel plants while at rest must be kept in a warm, dry place, in the soil they grow in, and not watered until growth commences, when they should be potted in fresh soll, and as soon as vigorous growth begins.

Atlantic City at This Time of Year.

ing.

Physicians have been sending their patients to Atlantie City in winter time for the past twenty years. At first but few, the number gradually but steadily increasing, until within the last few years the travel has reached such proportions that express trains between Philadelphia and Atlantic City are run the year through, and the hoteis -most of which are furnished and (01ducted in the most elegant manner-are crowded not only with invalids, but many who have realized the fact that 'old ocean' is ever the same, in winter and sum ner, and that the change of air is just as bere. ficial and enjoyable at this season of the year as in the midsummer days. Nervous, dyspeptic, gouty, rheumatic and various other chronic ailments, which are usually benefited there in sumsuer, and for which that resort has become famous, are foun 1 to be equally benefited in winter, and convalescents from acute diseases or from surgical operations nearly always improve remarkably on being removed from the large cities. Many cases of incipient phthisis, chronic bronchitis, asthma, and laryngitis have been either vastly improved or permanently benefited by a sojourn at Atlantic City.

The tonic and alterative properties of the air, acting by the improvement of digestion and nutrition, and the promotion of sleep, go far to accomplish great good in restoring health and vigor.

Atlantic Ctty, unlike most sea-shore resorts, is not only a city in name, but in fact, the population of permanent residents being about six thousand, and the improvements embracing most of the conveniences in the way of street cars, gas, water, good stores, markets, &c., that are enjoyed by the realists of larger cities.

Not only is the visitor surrounded by all these advantages, but the frequent trains and convenience of access to and from Philadelphia (being but ninety minutes' ride) bring it as near thereto almost as though within its limits. In fact, it is the most accessible to the New England and Middle States of any place having claims as a winter resort, and admitting of outdoor exercise for most invalids the whole year through.

The favorite route between Philadelphia and Atlantic City is via West Jersey Railroad, which is operated by the Pennsylvania Rairad Company; and passengers via this line will find the same high standard of appointments and the same close attention to those de a le so ess ntial to the perfect comfort and enjoyment of the traveler, that are such marked flatures of the Pennsylvania Railroad. This, in connection with the natural advantages possessed by the West Jersey Railroad, such as traversing the choices scenic portions of Scuthern New Jersey, being noticeably free harm can occur to either furniture, Two pyramids have been discovered books, paper, etc. Care must only be at Saggarah, north of Memphis. They taken to open doors and windows when were built by Kings of the sixth the apartments are to be occupied, as dynasty.
