

HINT ON MILKING COWS.—A man who had done his own milking employed a boy to do it; he shrank the milk one third in two weeks. The owner resumed the milking and in two weeks got the same as before. Afterward he set a hired man to milk, and he shrank the milk 10 per cent. in two weeks; and in two weeks more, the owner milking again, got as much as before. This man does the work quickly and makes very clean. He closes the forefinger and thumb around the teat high up, and makes a downward motion, tightening the grip and forcing out the milk; then lets go his hold, keeping the thumb and finger in circle, carries up the hand and presses it smartly against the udder, and closes and pulls down as before, and so repeats until done. The philosophy, if any, is to give as near as may be the same motion that the calf does in sucking. Many a good cow is partially depopulated of her good qualities in consequence of being improperly milked.

Cows that are in milk should be watched and given extra feed so soon as signs of a falling off are seen. It is very difficult to increase the flow after a shrinkage occurs. So soon as the milk begins to get short, supplement the feed of the field by ration of green corn fodder in the yard or stall. Many cows suffer from excessive heat, being exposed the whole day through the hot sun in a treeless pasture. A pasture should afford a comfortable place, as well as furnish food for the animals, that the greatest profit may be obtained.

Pigs profit by a good run in clover, or fresh grass. They are naturally clean animals, and only become "rags" when they have mire and mud holes for a run. Young pigs that are designed for the early winter market should be pushed now by extra feed. A rapid growth at this time will make much difference in the profit of keeping pigs. Pig pork is the best, and young pigs of an early maturing breed should, therefore, be fattened from the start. Sour milk is not enough for them; add grain feed in liberal quantities.

CLOVER SEED IN AUTUMN.—A Pennsylvania farmer who has tried it, recommends that when the spring sowing of clover seed does not "catch" owing to drought or other causes, that sowing clover seed over the stubble in August, or early September, will generally repair the damage, either with or without harrowing. In although harrowing is the most reliable practice. The cost of the extra seed is but a trifle compared with changing the proper rotation of crops established upon every well regulated farm.

If feathered stock is rightly managed diseases of fowls will be comparatively rare. Breeding "in and in," or breeding "close" even, is productive of more delicacies of constitution than most poultry keepers are aware of. It is bad business to be fussing with sick fowls. Better breed right.

Shorts are an excellent fertilizer for potatoes. Dampened and put in the soil they produce a good crop and of very smooth tubers. They do not cost any more per acre than a good many superphosphates, and contain as much phosphoric acid, potash and nitrogen as some of the best fertilizers.

Watch for black knot on the bearing plum trees, and cut it out on the first appearance. Trees may be thus kept clear of this excrescence as easily as the soil is cultivated. By neglect, it becomes incurable.

The following may be accepted as an approximate to the average quantities of milk given by the different breeds of cows: Natives produce annually 1794 pounds; Jersey, 8820; Ayrshire 4300; Holstein, 1627.

Asbes are, for many soils, a standard fertilizer. Places where a tree or brush-heap has been burned often show the effects of the manuring for years. It is an old saying: "The land never forgets ashes."

It does not require heavy pastures for sheep. They are great foragers, and weeds, leaves, and even stubble enter into their bill of fare. They equal the goat in their respect.

Death from a Bush Fire.

Martin McCarthy, with four of his sons, left their thatched homestead in the Hundred of Hunter to reap the wheat which stood ripe for the sickle at a distance of about a mile.

They noticed a bush fire about a dozen miles off, but, as the wind was in the opposite direction, they thought nothing of it, and went on reaping till dinner-time.

Immediately after that meal, which they took in the field, the wind veered round, and, rising to a hurricane, swept the fire down upon their farm. Desperately plunging through the blinding smoke, they barely succeeded in gaining a clearing 100 yards distant before huge tongues of fire fifty feet high rushed past them, roaring and hissing as they licked up every vestige of vegetation in their course.

When the flames had subsided, McCarthy, followed by his boys, hastened with terrible forebodings across the plain, to see if any of his family had been spared. As he ran toward the chimney, which alone remained to mark the site of his dwelling, he stumbled over the charred corpse of his wife.

A little further on was the body of his 7-year-old boy, and round the chimney lay the remains of his five daughters.

The eldest, a girl of 19, clasped in her arms the youngest, a baby of 2 years old. Accustomed as the colonists are to bush fires, this unusual holocaust cast a gloom over the neighborhood.

The Insect Population.

In 1849, Alexander von Humboldt estimated the number of species of insects preserved in collections, at between 150,000 and 170,000; Europe alone being represented by more than three times as many species of insects as of phanerogamous plants. Ten years ago Dr. Gerstaecker estimated the number of species of insects to be 225,000, five times as many as the known species of all other classes of animals together. If we assume that there exists in the whole world only three times as many insects as there are phanerogamous plants—the latest estimation of which approaches 225,000—we arrive at the startling sum of about 750,000. Bewildering as this estimate appears it is probably too low. The oak alone gives shelter and support to 450 species of insects, and the pine to more than 500, and one moth alone has 35 different species of parasites. Without going further in our calculations we may safely assert that if the number of species of all other classes of animals should be doubled by new discoveries, (which is rather probable for some classes and impossible for the vertebrates), the number of species of insects would be more than five times that of all other animals taken together.

Nearly thirty buildings in Plymouth, Pa., are threatened with destruction by the caving in of the ground above some of the mines.

HUMOROUS.

LAST WEEK a fair but fickle maiden of the blue grass region, Ky., said "Yes" to two persistent suitors. The two would-be husbands met at the house of the pretty double-dealer provided with marriage licenses. Did the swains blow each other to atoms with double-barreled shot-guns, or perforate each other with big bullets from large revolvers? Nothing of the kind. They simply compelled the coquette to accept one of them, with the, to her, horrible understanding that the rejected one, instead of going out to commit suicide for love of her, was to have the name in one of the licenses altered so as to enable him to marry a maiden across the way, a hated rival, too. Instead of a double shooting there was a dual wedding, and the meretricious girl, who tried so hard to make two men miserable, only succeeded in rendering a rival happy.

On a Canada Southern train the other day a Detroit had a seat behind a couple who got on at a little station near St. Thomas, and he thought he had seen the man's face before. He was looking at him sharply and trying to remember where he had met him, when the man turned and asked:

"Aren't you Thomas—of Detroit?"

"Yes; and aren't you Williams—of Buffalo?"

"I thought so when you came in. And ain't you running away with old Judge Blank's daughter, of St. Thomas?"

"I've got a better thing than that," whispered Williams, as he leaned over the seat, "I'm running away with his wife!"

(See Moines Iowa State Register.)

Hon. S. H. Yoder's Position.

A representative man's opinion on other than political matters, is often of great use to his constituency. The Hon. S. H. Yoder, of Globe Mills, Pa., has thus rendered his opinion on a subject of popular interest. I have been selling St. Jacob's Oil for the last year. I have never heard a person speak of it, except as a splendid medicine, and as the great specific for rheumatic affections, whether inflammatory, acute or chronic, swellings, sores, sprains, burns, wounds, etc. I sell more St. Jacob's Oil than of any other kind of liniment, and it gives universal satisfaction. I will always keep it on hand. The farmers say, that for man and beast, they find nothing to equal it.

There's nothing like keeping cool and carrying a level head in cases of emergency. In one of those rough periods which have occasionally enveloped Baltimore political life Mr. Wm. R. Travers, as he was returning late in the evening to his residence from the club, was stopped by two unwholesome-looking individuals, of cadaverous beak and sepulchral aspect, who gruffly demanded: "Are you a blood-tub or a plug-ugly?" "Gentlemen," said Travers, with that delightful hesitation which at once inspires tenderness and gives time for reflection, "I respect both. He was permitted to pass on."

"Pa" quoth Sammie to his sire, "why don't you go out West?" "Why do you ask my boy?" "Because Bill Higgins' father went and he struck a banana." "A banana, you mean, Sammie?" "Well, what's the difference?" "Why when people strike a banana it sets them up, and when they strike a banana it sets them down, and very emphatically, too."

(Pittsburgh Evening Chronicle.)

Dangers to Iron Workers.

Mess. R. Esterbrook & Sons, City Iron Foundry, Boston, Mass., speak on our men as follows: Two or three of our men were badly hurt in working. They were, however, immediately cured by using that valuable remedy, St. Jacob's Oil. All our men are highly pleased with it, and we shall always recommend it to those afflicted with pains or rheumatism.

"FORWARD!" cried the captain. "Forward there, Dennis McCarthy!" "Be asy, Captain Sullivan," said Dennis; "OUI shure was basful from me youth, and shure, though OUI jay shupling to go into this fight, OUI wud not be thought forward, don't you see. OUI think it's your rear OUI'd be guarding while yez go on."

Recent experiments tried at Niagara Falls prove that a dog can smell a bone exactly twenty-two feet from his nose. How far a Niagara Falls tacksman can smell a victim has not been determined, but the distance can safely be set down at a mile.

Wicked for Clergymen.

"I believe it to be all wrong and even wicked for clergymen or other public men to be led into giving testimonials to quack doctors or vile stuffs called medicines, but when a really meritorious article made of valuable remedies known to all, that all physicians use and trust in daily, we should freely commend it. I therefore cheerfully and heartily commend Hop Bitters for the good they have done me and my friends, firmly believing that they have no equal in the family use. I will not be without them."

Rev. Washington, D. C.

In some of our best medical colleges it is seriously debated whether or not it would be best to discard ether as an anesthetic, and substitute college Commencements in its place. The only objection to the latter is that it is too powerful an opiate.

"Where is the island of Java situated?" asked an Austin school teacher of a small, rather forlorn-looking boy. "I dunno sir." "Don't you know where coffee comes from?" "Yes, sir; we borrow it ready parched from the next-door neighbor."

The grasshopper is some pumpkins when a rail fence is to be eaten, but the army worm has the boss appetite. He begins eating at daylight and never stops until bedtime, and he wouldn't knock off then except to see the comet.

Even in this hot weather the horse-rail road superintendent took out that their conductors do not have sticks in their punches.

An Indiana man is reported as having two hearts. What the average resident of Indiana really needs is an extra liver.

A SCIENTIFIC editor explains: "What shall we drink?" He might wait until somebody asks him up.

One thing that New Haven has reason to be grateful. It hasn't any baseball club to apologize for.

The Panama people would like to see a little more work done on the Isthmus, and hear less talk about it in Paris.

When an arm of the sea encircles a neck of land, look out for fishing smacks.

Adam is the patron saint of the Western pork raisers, because he had the first spare rib.

Why are clergymen like brakemen? Because they do a good deal of couplins.

The advantages of spreading manure from the wagon as it is drawn out are a saving of labor and a more even distribution of the double salts (ammonia, potash, phosphates, etc.) in the soil by rain. If the manure is heaped on the field and gets under the hoofs before spreading, the ground under the hoofs receives an undue share of the best part of the manure, which not unfrequently renders these spots barren for a season or two.

STEEL sheep will not need much more feed than a good pasture will afford. Give them salt at frequent intervals, and see that they have shade through the hot days of midsummer and a free access to pure water. Sheep for the butcher should be fed liberally with meat. A quart of ground feed a day will, with good pasturage, bring the animals into good marketable condition.

To prevent sows from crushing their young, nail a board about one foot wide to the side of the pen. The board is to be put on like a shelf, so that the little pigs can run under it to get out of the way.

In the roasting of coffee, Dr. O. Bornheimer finds three principal products—solid fatty acids, caffeine, and caffeine, a heavy oil which turns yellow after having been exposed to the air, and which is the vehicle of the peculiar aroma of coffee.

Vegetine
Will effectually eradicate from the system every taint of
Scorful, Scrofulous Humor, Tumors,
Cancer, Cancerous Humor, Erysipelas, Salt Rheum, Hereditary Diseases, Canker, Faintness at the Stomach,
and all Diseases that
arise from Impure Blood.

There is not a medicine in this country at the present day prescribed by physicians, or what is known as a remedy for SCORFUL, that is so effective in its cures as VEGETINE—a medicine to combat with SCORFUL. In all the various forms of this disease, to show so many positive cures of persons in all the various walks of life, it must be a good medicine. VEGETINE has done it; it is doing it; the very best of testimony proves it.

Vegetine will cure the Worst Cases of Scorful.

Remarkable Cure of Scrofulous Face.

WESTMINSTER, CONN., June 19, 1879.
MR. H. R. STEVENS—Dear Sir: I can testify to the good effect of your medicine. My little boy had a scrofulous sore break out on his head as large as a quarter of a dollar, and it went down his face from one ear to the other, under his neck, and was one solid mass of sores. Two bottles of your valuable VEGETINE completely cured him.

Very respectfully, MRS. G. R. THATCHER.

Vegetine is sold by all Druggists.

HOSTETTER'S
CELEBRATED
STOMACH
BITTERS

Malaria is an Unseen Vaporous Poison, spreading disease and death in many localities, for which quinine is no genuine antidote, but for the effects of which Hostetter's Stomach Bitters is not only a thorough remedy, but a reliable preventive. To this fact there is an overwhelming array of testimony, extending over a period of thirty years. All disorders of the liver, stomach and bowels are also conquered by the Bitters.

For sale by all Druggists and Dealers generally.

MUSIC TEACHERS

Will Now Select Books for the Fall Campaign.

and cannot possibly find a better book for Chorus, Conventions, and Singing Classes, than L. O. EMERSON'S HERALD OF PRAISE (\$1.00), which is to be the leading book for 1881-1882. Success follows the successful issues of Emerson's books, and this is to be no exception to the rule. It is in press, and nearly ready. A less expensive book will be THE IDEAL (50 cts.), more expressly for Singing Classes, and except in size, is quite as good, and on the same plan as THE HERALD OF PRAISE.

SUNDAY SCHOOL MEN

Will search far and long before finding a better Sunday School Song Book than THE BEACON LIGHT, (30 cts.) BY TENNEY AND HOFFMAN, OR LIGHT AND LIFE, (25 cts.) BY R. M. MCTOON.

SCHOOL TEACHERS

Will not fail to examine our new and superior WELCOME CHORUS, (50 cts.) BY W. S. TILLEN, For High Schools. And the newest and best Common School Song Book, by L. O. EMERSON, called SONG BELLS, (50 cts.)

HOP BITTERS.
(A Medicine, not a Drink.)

CONTAINS
HOPS, BUCHU, MANDRAKE, DANDELION,
AND THE PUREST AND BEST MEDICAL QUALITIES OF ALL OTHER BITTERS.

THEY CURE

All Diseases of the Stomach, Bowels, Head, Liver, Kidneys, and Urinary Organs, Nervousness, Sleeplessness, and especially Female Complaints.

\$10.00 IN GOLD.

Will be paid for a case they will not cure or help, or for anything impure or injurious taken before you sleep. Take no other.

D. C. is an absolute and irrefragable cure for Drunkenness, use of opium, tobacco and narcotics.

SEND FOR CIRCULAR.

How Can I Express My Thanks?

Mr. Marks, of Yorkville, N. Y., writes: It affords me great pleasure to write these few lines to let the public know the value of Allen's, the great External Pile Remedy. I have suffered the last 14 years everything, but death; at that time I have spent hundreds of dollars. I have tried everything I ever heard of; I have had four different doctors, but found very little relief. I at last heard of Allen's; I tried them and in one hour's time I found relief and have not been troubled with them since. How can I express my thanks to you? No tongue can praise them too highly, and I would say to all those who are afflicted with Piles Hemorrhoids or fissures, internal or external, give Allen's a trial and you will no longer be a sufferer.

Ask Druggists for it. It clears out rats, no, roaches, bed-bugs, flies, vermin, insects, etc. 15c.

How Can I Express My Thanks?

An invention has just been made by a firm of German gun manufacturers which promises to add very greatly to the power of artillery. Hitherto the fear of premature explosions during the transport or filling of shells has prevented any large employment of auto-glycerine, and certain other extremely violent but easily inflammable explosives, for the purpose of charging them. It is claimed for the new invention that it will enable such substances to be used without danger. The interior of the shell is divided into a number of cells, which are to contain substances non-explosive in themselves, but which, when combined, form a powerful explosive. The walls of the cells must therefore be broken up before an explosive charge is formed within the shells; and the inventor proposes to make these partitions of such strength that, while they will withstand ordinary jolting, they will be shattered by the shock to which a projectile is subjected when fired from a gun.

A new life-saving appliance has been recently invented by Mr. Sherwell of Portsmouth, England, which may prove of widespread utility. The invention is designed to serve the double office of a bell buoy, indicating the presence of a dangerous shoal, and a refuge for shipwrecked mariners to swim to, should the vessel be unable to do any business. He was entirely cured by the use of Hop Bitters. It layed all that burning thirst; took away the appetite for liquor; made his nerves steady, and he has remained a sober and steady man for more than two years, and has no desire to return to his cups; I know of a number of others that have been cured of drinking by it. From a leading R. R. Official, Chicago, Ills.

A French electrician has devised an ingenious electrical low-water signal for steam boilers, which indicates the existing water level at any distance from the generator, and when the water has sunk below a certain point rings a signal bell, while at the same time the sign "low water" appears on the indicating tablet.

HO, YE BALDHEADS!—There is just one way, and no more, by which you may be cured—USE CARBOLINE, a deodorized extract of petroleum. It will positively produce new hair; there is no substitute for this marvelous petroleum hair renewer.

A correspondent in Reimann's Faber Zeitung states that the new and one oil for producing ungreennable blacks is not a success. Impure aniline oils have always a black less liable to turn green.

VEGETINE—It extends its influence into every part of the human organism, commencing with its foundation; correcting diseased action, and restoring vital powers, creating a healthy formation and purification of the blood, driving out disease, and leaving Nature to perform its allotted task.

Japanese cement is made by mixing powdered lime with a little water, and then gradually adding boiling water until the desired consistency is acquired, care being taken to keep it stirred. Lastly, boil for one minute in a clean sauce pan. This cement is very strong and nearly colorless.

In a paper on the theory of the galvanic element, Dr. F. Exner shows that between metals and liquids, there is no chemical action takes place, there is no more electric repulsive power than between two metals. The entire effect of a galvanic element depends exclusively on the chemical action.

My Good Woman.

Why are you so out of sorts, never able to tell folks that you are well? I mean to one it's all caused in the first place by habitual constipation, which no doubt finally caused nervous headache and liver trouble. The cure for constipation is the celebrated Kidney-Wort. It is also a specific remedy for a kidney and liver diseases. Thousands are cured by it every mth. Try it at once.—Toledo Blade.

It does not follow that the man who has no front teeth is a back-biter.

HEALTH, HOPE and Happiness restored by Lydia E. Pinkham's Vegetable Compound, the positive cure for all female complaints.

An incidental inquiry—would artificial teeth enable a person to sing false-set?

AFTER all, a gentle purgative is the best means for curing headache, liver complaint, biliousness, etc. Take "Sellers' Liver Pills."

How does the hair dresser end his days? He curls up and dies.

EVERY one will find a general tonic in "Lindsey's Improved Blood Searcher." Druggists sell it. It's what you want.

HORSE thieves in Texas are serenaded by string bands.

How often the cream of a joke is sour.

Baltimore, Md., U. S. A.

MRS. LYDIA E. PINKHAM, OF LYNN, MASS.,

LYDIA E. PINKHAM'S

VEGETABLE COMPOUND.

Is a Positive Cure

for all these Painful Complaints and Weaknesses common to our best female population.

It will cure entirely the worst form of Female Complaints, all ovarian troubles, inflammation and ulceration, Pains, Displacements, and the consequent Spinal Weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel tumors from the uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use.

It removes fatness, debility, destroys all causes for stimulants, and relieves weakness of the stomach. It cures Headache, Dizziness, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion.

That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the female system.

For the cure of Kidney Complaints of either sex this Compound is unsurpassed.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND
