

AGRICULTURAL.

SCAB IN SHEEP.—Scab in sheep is a disease caused by an insect burrowing under the skin, and is perfectly curable by the following methods: Get a lot of tobacco stems, or, if these are not to be had, get one pound of plug tobacco; steep this in one and a half gallons of water until the strength is well extracted and the quantity is reduced to one gallon; to this add one-fourth ounce of crude carbolic acid. If the sheep have the disease only in patches, remove the wool from the diseased spots and well around, so as to expose the surface beyond any infection; use a stiff soft brush—a large stencil brush is best—and, applying the decoction, brush as well into all sores, being sure to break up all scabs or pustules so as to work plenty of the remedy into all diseased places. Having flour of sulphur in a dredging-ox, dust it into and over the sore and brush it in lightly. One treatment, if thoroughly made, will usually cure the worst case, but it is well to look them over again in two weeks. If it is shearing time, and the sheep have been shorn when you wish to treat them, then make a large quantity, but not so strong, and having broken up all scabs and sores on the sheep, take them by the legs and dip them to the top into the medicine. After treatment it is best to remove to new pastures or new pens for a time, for this reason: the scab insect is liable to remain attached to any object against which the sheep have rubbed, and thus be again taken by the sheep.

As an exhibition of the intrinsic worth of St. Jacob's Oil, we think the case referred to, that of Mrs. O. W. Hubbard, of this town, cured of Sciatic Rheumatism of long standing by the Oil, is certainly striking, and, beyond all doubt, conclusive as to its efficacy. The remedy has our indorsement.

GARGET.—Cows that are fat at the time of calving are more subject to congestion of the udder than those in a poorer state. Neglecting to give proper attention to the milking is another cause. Inflammation seldom ever attacks the whole of the udder, but it is confined to one or two quarters, and is indicated by swelling, increased heat, pain and redness, and by alteration in the milk, which is curdled, whey-like and sometimes mixed with blood. The general treatment is to give a moderate purge—say Epsom Salts 1 lb.; powdered Jamaica ginger 3 oz.; water 1 pint; mix for one dose. Drinking water should be limited and dry food given, so as not to encourage the milk supply. The milk should be frequently drawn away with the hand or a test syphon.

The inflamed udder should be well fomented with hops and water for at least one hour night and morning, and after each fomentation some of the following liniment should be freely applied over the bag: Camphorated Oil 8 oz.; fluid ext. Belladonna 4 oz.; mix.

TO REGULATE THE BEARING OF APPLE TREES.—This is a perennial subject of discussion, but no suggestion in regard to it has ever been made practical except the one which dictates careful attention to the conditions of soil, pruning of the trees, with high fertilization of the soil. All the famous productive apple trees on record have stood in a rich soil, moist, but not wet. Careful pruning, manuring and mulching will, as nearly as possible, secure good annual crops from apple trees of any variety worthy of cultivation. Under this system a small orchard of William's Favorite near Boston is the chief support of a family. Thirty-eight trees of Fameuse in a city lot of about half an acre in Montreal, produced, in 1879, fruit that sold for \$500, and the crop is rarely much less. These facts point to the remedy for the shy or intermittent bearing when the variety is naturally productive.

Some believe that even this form of trial is not perfectly free from prejudice. But in our section, St. Jacob's Oil has been tried by that great jury—the public—and has been judged the inflexible cure for Rheumatism and all painful diseases.

Ducks.—Less is known about the diseases of ducks than of fowls. They are, in our experience, best hatched by hens and kept in a dry pen for several weeks. Give plenty of grass, frequently renewed, keep water always before them in shallow vessels, and feed often. A pen of boards a foot high, covered with straw, and one end covered to exclude rain, is all that is required. This pen should be frequently shifted upon dry, grassy ground. If one is noticed in any way, soaked bread and milk, red with cayenne pepper. The best are Rouens, Aylesbury, Pekins and Black Cayugas. Points of excellence for common purposes are the size and number of eggs.

The farmers of the country, if they would act individually or organize themselves into forestry clubs, could, in a very little while, awaken a widespread interest in tree planting. The advantage of such clubs are highly appreciated in the treeless regions of the West and Northwest. Many of them have been organized, and through their efforts millions of trees have been set out, with an already manifest effect upon the water courses and the humidity of the atmosphere.

One of the best farmers of Worcester, Mass., saves all liquid manure in a cistern so made that no gases can escape to pollute the atmosphere of the stables. The amount of fertility that is annually wasted in the form of liquid manure is enormous, and a means to prevent this great waste should be generally adopted by farmers.

A FARMER of Milton, Va., cut eight tons of good hay this year from three acres of land that in 1879 was a bog meadow too wet to go upon. The means used were drainage, pulverized surface and seeding. There are numerous other bog meadows which by a similar treatment might be made to yield profitable crops where now they are but a nuisance.

Toads are recognized by many leading farmers and gardeners as important pests which they render in destroying insect pests which prey upon growing crops during the summer months. In Paris there is a weekly sale of toads, which are brought in casks filled with damp moss. One hundred good toads are worth from \$15 to \$17. They are bought for gardens.

An English gardener recommends the white clover (*Trifolium repens*) as a hanging basket plant for winter, claiming that it is easy of culture, quickly makes large plants and looks well from Christmas on yards.

MAURE should be forked over occasionally to make it fine. If it is heating, muck or loam should be mixed with it to absorb the ammonia which is formed during the process of decomposition.

VEGETINE

KIDNEY COMPLAINT DISEASE OF THE KIDNEYS. The symptoms of an acute attack of inflammation of the kidney are as follows: Fever, pain in the lower part of the back, and aching downward numbness of the thigh, vomiting, usually at first a deep red color of the urine, which becomes very dark and bloody, and increases, and is discharged in a thin, watery, and difficult; tenderness, a sore, or a pain in the back and limbs, dryness of the skin, irregular urination, (especially at night), great thirst, headache, dizziness, and slight, digests in, and a pain in the breast, grad at loss of strength, paleness and puffiness of the face, cough and shortness of breath.

Kidney Complaint. In diseases of the kidneys the Vegetine is the most efficient. It has never failed to cure when it is taken regularly and directions followed. In many cases it may take several bottles, especially cases of long standing. It acts directly upon the secretions, cleansing and strengthening the system, and removing all impurities. A great many can testify to cases of long standing having been perfectly cured by the Vegetine. It is the only remedy of the kind known here which is said to be expressly for this disease.

Kidney Complaint. Dear Sir—I have used your VEGETINE for some time, and can truthfully say it has been a great benefit to me, and to those suffering from diseases of the kidneys. I cheerfully recommend it. Respectedly, O. B. SMITH, 1818 and Central Avenues.

Vegetine has restored thousands to health who had long and painful sufferings. PREPARED BY H. R. STEVENS, Boston, Mass.

Vegetine is Sold by All Druggists. D.B.M'S

MRS. LYDIA E. PINKHAM, OF LYNN, MASS. LYDIA E. PINKHAM'S VEGETABLE COMPOUND.

For all those Painful Complaints and Weaknesses so common to our best female population. It is a positive cure for all female complaints. Send to Mrs. Lydia E. Pinkham.

KIDNEY-WORT THE GREAT CURE FOR RHEUMATISM.

KIDNEY-WORT PERFECTLY CURED. THOUSANDS OF CASES.

KIDNEY-WORT SPRING MEDICINE.

KIDNEY-WORT PENSIONS.

She knew him: "Do you reside in this city?" asked a masked man of a masked lady at a masked party the other evening. He felt sick when she said to him, in a low voice: "Don't be a fool, John; I knew you by the wart on your thumb." It was his wife.

Not much of a curiosity: They speak of capturing a wild man in Asia Minor with "nothing but a skin over his head." Possibly they are not accustomed to bald-headed men over there.

Not a Beverage. "They are not a beverage, but a medicine, with curative properties, the highest degree, containing no poor whiskey or poisonous drugs. They do not tear down an already debilitated system, but build it up. One bottle contains more hops, that is, more real hop strength, than a barrel of ordinary beer. Every drug at its Rochester sells them, and the physicians prescribe them."—Evening Express on Hop Bitters.

Mr. Smith, said a lady at a fair, "won't you please buy this bouquet to present to the lady you love!" "Wouldn't be right," said Mr. Smith, "I'm a married man."

Complicated Diseases. A prominent gentleman in Cerro Gordo County, Iowa, writes us that he finds Kidney-Wort to be the best remedy he ever knew for a complication of diseases. It is the specific action which it has on the liver, kidneys and bowels, which gives it such curative power, and it is the thousands of cures which it is performing which gives it its great celebrity. Liquid (very concentrated), or dry, both act efficiently.—N. H. Journal and Courier.

A GROCER had a pound of sugar returned with a note saying: "Too much sand for table use, and not enough for building purposes!"

Two critics agree: "Oh, I think it lovely," said Medusa, speaking of a late novel. "You are right," said Fogg; "it is a love life."

His Last Dose. Said a sufferer from kidney troubles, when asked to try Kidney-Wort: "I'll try it, but it will be my last dose." The man got well, and is now recommending the remedy to all.

CONJUGAL affection: "I love my wife," gushed Fenderson. "Next to your wife's husband," added Fogg.

When derangement of the stomach acts upon the kidneys and liver, bringing disease and pain, Kidney-Wort is the true remedy. It removes the cause and cures the disease. Liquid (very concentrated) or dry act equally efficiently.—Am. Cultivator.

A FACTORY young man calls a certain female institute a "Venerable weather prediction"—because it contains so many Misses.

MARKET item: "That butter is too fresh," as the man remarked when the goat lifted him over the fence.

LYDIA E. PINKHAM'S Vegetable Compound has done thousands of women more good than the medicines of many doctors. It is a positive cure for all female complaints. Send to Mrs. Lydia E. Pinkham.

WHEN a man says he makes his living by keeping a country tavern isn't it a sort of declaration of inn dependence.

A VAGRANT who had been fined regularly every week for begging requested the magistrate to fine him by the year at a reduced rate.

A Cough is nature's effort to rid the system of waste matter. Assist nature, then, by using Dr. Bull's Cough Syrup. Price 25 cents a bottle.

"THEY quarrel like a church choir," said Mrs. Slobson, as she saw two boot blacks fighting.

WHAT is more nasty than running sores, ulcers, pimples, boils, scrofula, erysipelas, etc.? Now "Lindsey's Blood Searcher" cures them all.

THE objection to horses with white feet, though mostly considered a mere caprice, is more brittle than black ones, and are much more liable to break and contract than those of a dark color.

Perhaps the Scientific American is right in narrowing down the controversy whether the employment of steam dredges on seaboard is most expedient in working the natural oyster grounds of Long Island Sound to the simple question whether progressive or non-progressive methods are to prevail. It would be madness for instance, to prevent the construction and operation of a cotton factory because it produces the same quality of goods it could turn out would give employment to a vast number of independent hand loom weavers. Much of the same sort of reasoning underlies the objection to steam dredges. Yet the fact must not be overlooked that the more efficient process whittles the appropriation to the uses of man the natural productions of the land or sea the greater the necessity for the strict enforcement of laws preventing wanton harrasing. Large profits gains have too often tempted men to neglect the maintenance of the source of profit for the future, and like the boy in the fable, they have under like purblind notions killed the goose that laid the golden eggs. Our "boundless" forests have almost disappeared through recklessness and greed, and unless natural systems are carefully preserved, they, too, will very soon yield no return whatever.

The discovery of Carboline, a deodorized extract of petroleum, has perfected an improvement which will be hailed with delight by thousands. The dense oily properties of the petroleum have been eliminated by a special process which is beneficial to the animal as well as to the human species. It has, of late, been in active demand among lively men and others for use on horses suffering from sprains or abrasions. The most prominent instance known of in this connection, is that related by Mr. David Walton, a well known friend, who keeps a livery stable at 1245 North Twelfth street. Mr. Walton states that he was boarding a valuable horse belonging to Benjamin McClurg, also a resident of North Twelfth street. A few weeks ago the animal slipped and badly sprained his leg, making him very lame. Mr. Walton used two bottles of Carboline Oil, on the animal and found within less than one week, that there was no need for any more, for the animal was as well as ever.

It is claimed by Prof. Raoul Pictet, of Geneva, that a discovery of his applied to the construction of lake, river, or ocean going vessels is likely to cause a revolution in naval architecture. The details are given only in the most general terms. A model, embodying the new principles is in course of construction at Geneva, and when it is tried on the lake it will be seen whether the professor has not been too sanguine. He expects that it will attain a high rate of speed and glide over the water without cutting it, and so diminishing resistance.

Profitable Patients. The most wonderful and marvellous success, in cases where persons are sick or wasting away from a condition of miserableness, that no one knows what all their (probable) patients for doctors, is obtained by the use of Hop Bitters. They begin to cure from the first dose and keep it up until perfect health and strength is restored. Whoever is afflicted in this way need not suffer, when they can get Hop Bitters. See another column.

In 1870 the total coal production of the world was 193,970,683 tons; in 1880 was 294,468,000, an increase of 100,497,317 tons, or fifty-two percent. Taking the growth of the coal industry as a measure of a nation's general industrial progress, Russia makes a very good showing, the percentage of coal output there having increased 275 per cent., and Spain makes a poor appearance, the percentage of increase being only thirty-six per cent.

CHICAGO AND BURLINGTON ROUTE. THE GREAT BURLINGTON ROUTE. For all points East & West.

A GRAND STEEPLE CHASE.

As if there were not sufficient excitement at the usual horse-race, these meetings on the turf nearly always close with a grand steeple chase. This kind of race combines all the excitement of the regular race, with the super-added element of danger which seems to give further zest to the sport. Horses, and good ones at that, often receive severe injuries, which render them practically useless for long periods. At least this was the state of affairs until owners and breeders of fine stock began to freely use St. JACOBS OIL, the Great German Remedy for man and beast. This invaluable article to horsemen has so grown into favor on account of its phenomenal efficacy in diseases of domestic animals, especially the horse, that it would be difficult indeed to discover a horseman unacquainted with its magical potency. The Philadelphia

Easy Hour, in a recent issue says: "But one of the most important developments concerning St. JACOBS OIL is the discovery that it has proved to be a beneficial to the animal as well as to the human species. It has, of late, been in active demand among lively men and others for use on horses suffering from sprains or abrasions. The most prominent instance known of in this connection, is that related by Mr. David Walton, a well known friend, who keeps a livery stable at 1245 North Twelfth street. Mr. Walton states that he was boarding a valuable horse belonging to Benjamin McClurg, also a resident of North Twelfth street. A few weeks ago the animal slipped and badly sprained his leg, making him very lame. Mr. Walton used two bottles of St. JACOBS OIL, on the animal and found within less than one week, that there was no need for any more, for the animal was as well as ever."

The Parrot and Best Medicine ever Made. Accommodation of Hops, Buchu, Mandrake and Dandelion, with all the other Bitters, makes the greatest Blood Purifier, Liver Regulator, and Life Preserver. No disease is so possibly long and exact where Hop Bitters are used, and no person or family who has tried them can be without them.

Diminished Vigor. Is reimbursed in great measure, to those troubled with weak kidneys, by a judicious use of Hostetter's Stomach Bitters, which invigorates and stimulates without exciting the urinary organs.

CAN CONSUMPTION BE CURED?

SOME INTERESTING LETTERS FROM THE PEOPLE. Which should be read by those afflicted.

Dr. Schenck gives the evidence on which he bases his assertion that CONSUMPTION CAN BE CURED.

Clear and explicit statements from well-known persons, which should convince the most skeptical. FROM MRS. EVANS WHO FORMERLY LIVED AT READING, PA.

Dr. J. H. SCHENCK. Dear Sir—You will probably remember that when I last saw you with my little daughter, that you told me you would like to hear in regard to her health at least once in six months, as she might need more of your advice and medicine as she grew older.

Dr. J. H. SCHENCK. Dear Sir—You will probably remember that when I last saw you with my little daughter, that you told me you would like to hear in regard to her health at least once in six months, as she might need more of your advice and medicine as she grew older.

worse. My cough was very bad, my appetite entirely gone, and I was unable to sleep more than two or three hours in a night. My tongue was heavily coated and I had a bad taste in my mouth. I had a headache almost all the time.

Feeling that something must be done, I at last consented to consult with Dr. Schenck, the physician who I think, I have good reason to believe to be the best in the treatment of lung disease. I went to his office in Boston, and was examined. He found my lungs quite badly diseased, and my liver seriously affected. He said that he could cure if I would follow his directions. Of course I consented to do so, and I very soon was satisfied that my confidence in him was well placed.

I took the Mandrake Pills, Sea-Weed Tonic and Pulmonic Syrup all at one time, as directed by him, and within one month my worst symptoms were gone. I went to see the Doctor on his next visit to Boston, which was one month after the first time I saw him, and he said "Only continue with the medicine and you will surely get well." I did so, and kept on gaining in every way until I was perfectly well, and able to work as usual. Since my recovery I have not lost a day's time, except when I have made friendly visits to the Doctor at his Boston office. My cough is gone, my appetite is good, I have no headache or pain in my side, I sleep better than I ever did in my life, and my lungs are apparently healed, as I have no hemorrhages.

These are the reasons why I believe in, and recommend Dr. J. H. Schenck and his medicines. He did just what he said he would do for me, and I believe that I owe my life to his medicines and care. FRED. F. TRULL, Hudson, Mass., May 25, 1881.

Chronic Irritation of the Throat Cured. Philadelphia, August 18th, 1880. Dear Sir—For several years I was troubled with a chronic irritation in my throat, so that every time I took a little cold, my throat was inflamed. I took cold very easily, I was coughing more or less every day from November to May. In February, 1880, I became very hoarse, and my throat was so sore that I could not speak. I kept a bottle of the Syrup in my house for two or three years, so that whenever I took cold, or had a little tickling in my throat, I would take a little of it. When I took it to bed, and that was the last of it. My throat now is, and has been for several years, in a healthy state. I have never since taken cold, or if I do, it only lasts some twenty-four hours. Thanks to the Pulmonic Syrup, I have recovered from a chronic cough, which has lasted for the last eighteen years, and it has given general satisfaction.

Very respectfully Yours, E. HAVEN, No. 1636 North 21st St., Philadelphia, Pa.

FROM MR. JOHN HERTZLER, Residence, 1309 Market St., Philadelphia. Dr. J. H. SCHENCK. Dear Sir—I am anxious that others should know of the great curative properties of your medicines. For three years I was afflicted with a constant cough, accompanied by expectoration of yellow phlegm. My cough was so bad that I could sleep very little day or night. I lost my appetite, and my strength was so much reduced that I could not walk a square. I used all the remedies that were recommended by my friends, but received no relief from their use. At last, I was taken with a severe hemorrhage, which reduced me still more. Soon after this my wife procured one of your books, and reading the description of your medicine, I was induced to try giving your remedies a trial. My daughter, who resides in Albany, N. Y., also wrote about this time, that she had taken several of your cures for her cough; and so I was induced to use them.

I began by using all three of your medicines at one time, as you direct, that is the Mandrake Pills, Sea-Weed Tonic and Pulmonic Syrup. I can see that they were doing me good from the first—my appetite improved, I became stronger, and my cough was so much better that I could rest comfortably at night, a thing I have not done for many months. I continued to use your medicines for about six weeks, I am well. I continue to use your medicines as a preventative, and I write you this letter that others may know of their great curative qualities in diseases of the throat and lungs. I shall be glad to have any one who is afflicted, call on or address me. JOHN HERTZLER, 1309 Market St., Phila. Feb. 14, 1881.

FROM AKRON, OHIO. CONSUMPTION CURED. Akron, Ohio, Feb. 17th, 1881. Dr. J. H. SCHENCK. Dear Sir—Having been asked by many in regard to your medicines, and the benefit I had received from them, I have concluded to give you an account of my case. In the Winter of 1874 I was diagnosed an incurable Consumptive by every physician of this place, as well as several in Cleveland. I had all the symptoms—cough, night sweats, great debility and loss of flesh. I was reduced in weight from one hundred and fifty pounds to eighty pounds. I had taken several of your medicines, but I was told by Mr. James Scanlan that he had used your medicines in several cases, and was induced to give me a trial, although I do not think he believed they would cure me, for I was so sick at this time that I could not get out of bed for two years. I thought however, that they might give me temporary relief, and with this object I commenced to use your Pulmonic Syrup, and in about two days before I felt great relief, especially in the severity of my cough. I then took the Mandrake Pills and Sea-Weed Tonic, and my cough was so much better, and I began to gain strength. I took your medicines for about three months. I was too sick to do any kind of work for two years. Your medicines made a perfect cure, and I have been in good health ever since. I can now do any kind of work, and more than this, unless I believe your medicines to be good, and that they will do all that you say they will do. Yours very truly, J. A. REILLY.

TWO LETTERS FROM OHIO—DO NOT FAIL TO READ THEM. Hanoverville, Meigs Co., Ohio, July 25th, 1880. Dr. SCHENCK. Dear Sir—I write this to give you an account of my case, and to ask if your medicines will do me any good. I am forty-five years of age, and before this time I had all the symptoms of Consumption. I was reduced in weight from one hundred and fifty pounds to eighty pounds. I had taken several of your medicines, but I was told by Mr. James Scanlan that he had used your medicines in several cases, and was induced to give me a trial, although I do not think he believed they would cure me, for I was so sick at this time that I could not get out of bed for two years. I thought however, that they might give me temporary relief, and with this object I commenced to use your Pulmonic Syrup, and in about two days before I felt great relief, especially in the severity of my cough. I then took the Mandrake Pills and Sea-Weed Tonic, and my cough was so much better, and I began to gain strength. I took your medicines for about three months. I was too sick to do any kind of work for two years. Your medicines made a perfect cure, and I have been in good health ever since. I can now do any kind of work, and more than this, unless I believe your medicines to be good, and that they will do all that you say they will do. Yours very truly, LEVI JACKS.

HANOVERVILLE, MEIGS CO., OHIO, FEB. 22nd, 1882. Dr. SCHENCK. Please excuse me for not writing to you before this. You will remember that when I wrote you last July, I was very low with Consumption. As soon as I received your letter I sent for the medicines you told me to get, that is, your Mandrake Pills, Sea-Weed Tonic and Pulmonic Syrup, and began to use them as directed. I soon saw a marked improvement in all my symptoms, and after using them for some time I was cured. I am now free from all pain and trouble with my lungs, and weigh more than I ever did in my life. I am very thankful to you for your attention to my case, and I do not believe that I should be alive today but for the use of your medicines. Consumption is in my family, my father having died of it at the age of forty; as well as several other relatives. I would be glad to advise all who have Consumption or any Lung trouble to use your medicines, as I believe them to be the best medicine in the world for the cure of Consumption. I have been told by a doctor that he did not know what was in your medicines, but that they had cured me of Consumption. Yours truly, LEVI JACKS.

DR. SCHENCK'S MEDICINES. PULMONIC STRUP, SEA WEED TONIC, and MANDRAKE PILLS, are for sale by all Druggists, and full directions for their use are printed on the wrappers of every package. DR. SCHENCK can be consulted, free of charge at his principal office, corner SIXTH and ARCH Streets, Philadelphia, every Monday. Office hours from 9 A. M. to 3 P. M.
