

AGRICULTURE.

PRESERVING VEGETABLES IN WINTER.—To keep beets, carrots and turnips from rotting it is a good plan to put them up in barrels with heads, or to pile them in the cellar about four feet deep, and cover the pile with a little straw or coarse litter, to prevent evaporation. If the cellar is kept cool they will not sprout and grow; but this is not always easy to do, as mild weather approaches in spring, at which season a good pit keeps the roots in better order than any cellar can do. To keep squashes very different conditions are essential. The squash is a tropical plant, and will not endure cold weather, even an approach to the freezing point below 40 deg., injures them for keeping, and if the temperature can be kept uniformly above 50 deg. from the time they are harvested it will be all the better; free circulation of air is essential also, especially when they are first gathered, and for several weeks afterward. A cellar with a furnace in it, where the temperature is above 50 deg., will keep them well. But a cellar without a fire is too damp and cold, and they will not keep long in it. One of the best places to be found in most houses for keeping squashes is a closet against the kitchen chimney. They need looking over every two weeks to pick out the speckled ones; they keep pretty well till spring if carefully watched. The hard shelled squashes like the Hubbard and Marbled, keep much better than the turban and marrow varieties, which are mostly used in autumn for pies, etc. Tomatoes picked quite green, just before frost endangers their desiccation, and spread out upon the benches of a green house, or under the grass of a hot bed, will ripen after several days exposure to the warmth of the sun, and prove very acceptable after the frost has destroyed the vines. String beans may be easily dried by spreading them on a roof or other convenient places, and furnish an excellent winter dish; they need only be soaked and cooked as if freshly picked. This method is not so generally known and practiced as it should be. String beans are a delicate food in winter, and worth the slight trouble of saving them. Lima beans, shelled and dried, make most excellent stewed beans in the winter season, so much better than ordinary pea beans that one would be quite surprised at the difference who had never before tried it.

DR. MANLY MILES contributes the following on rotation of crops to the American Agriculturist: "In a well planned system of farming, the subject of crop rotations should be carefully considered, and the essential elements of a successful system in its highest and best sense. It seems to be the prevailing opinion that the alternation of crops, in systematic order, is a modern invention that was gradually developed as a direct result of the applications of science to the art of agriculture. The early writers on agriculture, even from the times of the Greeks and Romans, have, however, quite uniformly urged the advantages of a succession of crops from the teaching of experience. They were satisfied that varieties of crops grown in succession, under all conditions being equal, would give a greater aggregate yield than could otherwise be obtained. The reasons for the success of the system could not, it is true, be given, but practical men were fully agreed in giving its importance, and many systems of rotation, more or less perfect, were planned some of which became the prevailing rule of farm practice in particular localities. That these practical rules of alternating crops of different habits and modes of growth are based on correct, but not fully explained, principles, has been shown by direct experiment."

SEEDING TO GRASS.—Before sowing grass seed the farmer should make certain of having a good seed-bed. More mistakes are made concerning the preparation of land for grass than for any other crop. It is no uncommon thing to see a farmer simply running over a plot, where potatoes were grown the previous year, with a cultivator, then following with a harrow. We have seen extreme cases where even the harrow was omitted, the seed sown immediately after the cultivator, then simply bushing in the seed, leaving it to make its way as best it can. Others will use a one-horse plow to turn under the corn stubs, getting in the seed with as little labor as possible. In our experience the best practice is to plow a good deep furrow, followed by the thorough harrowing; and after sowing to bush the seed in and use the roller faithfully.

OF all poultry breeding the rearing of the goose in favorable situations is said to be the least troublesome and most profitable. It is not surprising, therefore, that the trade has in late years been enormously developed. Geese will live to a certain extent and thrive on the coarsest grasses. When timothy and red top are sown in it is best to use a bushel of red top, a peck or eleven pounds of timothy, and a mixture of red clover, which amounts to very liberal seeding and should yield a fair crop of hay about the first of September.

The editor of the Gettysburg Compiler suggests to the farmers of Adams county that instead of applying phosphate to corn in the Spring, they make a trial of sowing broadcast and plowing it down in the fall. The editor tried the experiment with satisfactory results a few years ago.

The day of brute force in the machine-shop has gone by. The entire operations today are more of the brain than of the muscle, and since some one must furnish the brain work, it is a pertinent question for the individual machinist whether he shall educate himself to supply the larger part of it, and get paid for it, or whether on the other hand he shall put himself nearer the level of the machine he operates, and settle some one else to get paid for thinking. This is a matter the mechanic has to decide for himself.

The light-house board want to introduce the electric light into several of the more prominent light houses, and in their annual report they ask for \$50,000 for this purpose. The proposed lamps have been tested to thorough satisfaction, and prove much more effective than the lights now in use. The board now control about 700 light-houses on the coast, besides 800 or more lights on interior rivers, and their estimate for new work and for the maintenance of the service the coming year is about \$3,000,000.

Messrs. Galloway and Abel have found coal dust to be an important factor in explosions of the gasing in mines. A mixture of coal dust and air is not explosive, but a quantity of fire damp too small to produce any effect when mixed with air alone causes the mixture to become violently explosive. Prof. Abel's experiments find that any kind of dust mixed with air containing a small quantity of fire damp converts the mixture into an explosive compound.

The labors of the Seismological Society of Japan have established the fact that there is a chronic center of disturbance within a radius of a few miles from Yokohama.

DOMESTIC.

HOT AIR BATHS.—Now that the hot air bath has been fairly naturalized, it is necessary to examine the institution critically. One of the most obvious sanitary conditions of the bath, but, unfortunately, that which is the most difficult to secure, is the purity of the atmosphere in which the breathing organs of persons in a peculiarly susceptible or physiological state are immersed. The breather of impure gases, under ordinary circumstances, takes his poison largely diluted. If the air of a Turkish bath is laden with germs of disease thrown off by the lungs of a fever or a consumptive patient, there are no currents to carry the particles away. It is a physical certainty that others breathing in the bath must inhale them. This is an evident source of peril, and suggests the wisdom of taking measures to insure the frequent changing of an atmosphere which may be thus easily polluted. Care is also required to compel those who conduct these baths in the way of trade to provide attendants who not only can but will do what is necessary for the bathers. For example, when cold water is ordered for a patient, he or she should not be deprived of the full benefit such an application may be likely to afford because the attendants are too indolent to procure the requisite appliances, as recently happened at a well-known bath.

HINTS TO POULTRY EATERS.—The reason why poultry killed at home, though young, is not as tender as that bought in the market, is that the former is not generally killed until wanted, and when eaten is still rigid with death, while that bought at the poultryer's has been killed at least hours—more often days. Poultry ought to be killed several days before eaten, dressed at once, and with a few pieces of charcoal in it, hang in a cool place. If poultry are kept from food and drink at least twelve hours before killing, the flesh will be juicy and the fat firm. If left three days without food or drink, though in good condition previously, the flesh will be dry and tasteless, and the fat soft. Never buy an undrawn fowl. The gas from the crop and intestines will taint the flesh, even though retained but a short time.

PLUM CAKE.—This is a good school cake, and, if covered with sugar icing, is rich enough for children's birthday parties. Make two pounds of flour into dough, with two ounces of German yeast and three gills of tepid water. Let it rise for an hour, then work in a pound of dissolved butter, a pound of well beaten, the rind of a lemon, half a small grated nutmeg, a pound of stoned raisins, a pound of currants and half a pound of candied peel, shred finely. When all the ingredients are mixed beat the cake up well, and let it rise in a hot place for an hour. Then put it into a greased tin and bake in a good oven for two hours. If made in more than one cake it will not take so long to bake.

LOBSTER CUTLETS.—Take a tinied lobster, remove finely and mix with a little fresh butter, pepper and cayenne according to taste, a blade or two of mace, and a dessert spoonful of anchovy sauce. Add one egg and a little flour, or, if you have it ready, a small quantity of cold boiled potato mashed. Divide the mixture into small crescent-shaped cutlets, brush them over with egg, dip them into bread crumbs and fry them a light brown color. If eaten cold they should be garnished with parsley or arranged around a dish, the center space being filled with water cresses or small salad; or, if served hot, with melted butter and anchovy sauce.

PICKED GINGERBREAD.—Excellent.—One cup of butter, one cup of brown sugar free from lumps, one cup of molasses, four eggs, soda, four cups of sifted flour, a little salt, a teaspoonful each of ground cloves and cinnamon, a teaspoonful of ginger and a tablespoonful of grated lemon peel. Beat the salt and soda with the flour. Beat the yolks of the eggs, then the whites, a d then both together, mix the molasses, sour milk and spice together, and cream the butter and sugar. Now drop the butter and sugar into the flour, add the milk and molasses, and stir quickly until in a smooth mass. Bake in shallow tins in a well-heated oven.

PUDDING.—An excellent apple pudding can be made from the remains of a rice pudding. Arrange well sweetened and flavored apple sauce in alternate layers with cold rice pudding; add a little butter and sugar, sift sugar over the top and put in the oven to heat through and brown on top. Any sort of flavoring may be used for this pudding.

CHARLOTTE.—The ordinary apple charlotte is not nearly so nice as this, which is simply more elaborate. Line a pie dish with buttered slices of bread; fill it up with layers of apples cut very small, placing between each layer a little apricot jam, some grated lemon rind, and plenty of brown sugar. Cover the dish up with slices of bread buttered, and bake it till the bread is well browned.

PICKLED MUTTON HAM.—Three gallons of soft water, one pound of coarse sugar, one cup of salt, three pounds of common salt. Boil and remove the scum, and when cold pour over the meat. In two or three weeks the ham will be excellent for baking or boiling. It may be smoked if preferred.

HOW TO MAKE TEA GO FARTHER.—A method has been discovered for making more than the usual quantity of tea from any given quantity of the leaf. The whole secret consists in steaming the leaf before steeping. By this process it is said 14 plants of good quality may be brewed from one ounce of tea.

GRAHAM BREAD.—One pint of sour milk, one egg, one small tablespoonful of soda, one half cup of molasses, one quart of Graham flour; mix well together, bake one hour.

Experiments on cotton-seed oil, which may be found useful in the application of their results for the detection of spurious olive-oil, have been conducted by Prof. Wideman. Cotton-seed oil has at 80° C. the specific gravity of 0.9, 406, but at 0° C. of only 0.9, 206. Treated with vitriol the oil assumes a violet tint, which is deepened by stirring; and after the lapse of 24 hours the mixture thickens and becomes deep brown in color. When sulphuric acid and potassium bichromate are applied to the oil a violent reaction ensues with an evolution of sulphuric acid; the oil then taking a blood-red color. Caustic alkalies of a specific gravity of 1-24 thicken the oil and makes it straw-colored, while the alkaline solution separates and takes a deeper color and when the mixture is stirred with a glass rod the upper layers appear blue, passing gradually into a violet color.

The rapidity of the motion of the wings of some insects is almost incredible. It has been estimated that the common house fly moves its wings 350 times in a second, or 18,000 times per minute, while the butterfly's wings move nine times per second, or 540 times per minute.

WIT AND HUMOR.

A WOMAN found her husband lying in a state of intoxication in a room. Instead of being exasperated, she gently turned him over to a comfortable position, and running her hand into his vest pocket she extracted a \$20 bill and remarked: "I reckon I've got the dead wood on that new bonnet I've been sufferin' for." She made a straight streak for the millinery shop. Strong men wiped the moisture from their eyes at the heroic devotion to a husband who had, by strong drink, brought himself so low as to neglect to provide his wife with the common necessities of life.

[Wausau Central Wisconsin.] Being asked concerning the Oil, Mr. Aug. Kickbush informed the questioner that St. Jacob's Oil had proved an excellent and most useful remedy in every family that had used it. A large majority of cases pronounced incurable have been entirely cured.

The other night, when a citizen was reckoning up his accounts, his wife spoke to him several times, and receiving no answer, said: "You treat me cruelly. I fear you no longer love me," and the husband and father replied: "I love you passionately, devotedly, faithfully, truly; but if you don't hold your jaw till I get these figures added I'll give you a clip in the eye."

"Pray, sir," said a person who had proudly killed the most backward of a crowd, to another who had just joined it, "pray, sir, have the kindness not to press upon me, it is unnecessary since there is no one behind to press upon you!" "But there may be presently," said the other; besides, sir, what's the good of being in a crowd if one mayn't shove!"

MONSIEUR PROUDHOMME lauds the advantage of gymnastics. "There is nothing like it for health," he says; "it increases a man's strength, prolongs his days"—"But," interrupts a pupil, "our ancestors did not practice gymnastics, and yet—" "They did not," retorted M. Proudhomme, "and what is the consequence? They are dead, every man of them!"

[Mt. Clemens, Mich.] True Record.] W. T. Lee, Esq., of this paper says: Being convinced of the efficacy of St. Jacob's Oil in curing rheumatism, I have no hesitation in recommending it.

Lord X., whose popularity was not excessive in a certain Scottish town, having refused an importunate beggar, she renewed her applications with "Now, my lord, if you'd just give me one little sixpence, I could treat every friend ye have in the town!"

A TUTOR of a college, lecturing to a young man on the irregularity of his conduct, added with great pathos: "The report of your vices will bring your father's gray hairs with sorrow to the grave." "I beg your pardon, sir," replied the pupil, "my father wears a wig."

Eminent Physicians are prescribing that tried and true remedy, Kidney-Wort for the worst cases of biliousness and constipation, as well as for kidney complaints. There is scarcely a person to be found that will not be greatly benefited by a thorough course of Kidney Wort every spring. If you feel out of sorts and don't know why; try a package of Kidney-Wort and you will feel like a new creature.—Indianapolis Sentinel.

"The last time I saw Miss X.," said a nobleman, speaking of a well-known actress to a witty dramatist, "was at a morning performance, and she had grown so stout that she almost filled the box." "Oh, that's nothing!" said the witty playwright, "There was a time when she filled the theatre."

A CITIZEN of New Mexico, being informed that a panther had attacked his wife, and that she almost died, he called the animal, merely shrugged his shoulders and said: "Ef that panther had knowed her as well as I do he'd a never niled her up, you bet."

As a tonic and nerve for debilitated women nothing surpasses Dr. Pierce's "Favorite Prescription." By druggists.

A LITTLE girl was eating green corn by gnawing it from the cob, when her teeth became entangled with the corn silk. "Oh, dear," said she impatiently, "I wish when they get the corn made they would put out the basting threads."

The idea of the biggest head knowing the most is not nonsense. The man who had the biggest head of his time, yet he didn't know enough to go into the ark out of the rain, and he saved. The musquito, with scarcely any head at all, was wiser.

The only physician we employ is "Sellers' Liver Pills," and we always enjoy good health. Try them.

The editor of a scientific journal asks: "How did we come to possess our present dress?" How should his contemporaries know? Perhaps he procured it in exchange for advertising for the tailor. Or he may have won it at a raffi. Or probably, what seems more plausible, he told the tailor to "charge it."

Thousands of women have been cured of the most stubborn cases of female weakness by the use of Lydia E. Pinkham's Vegetable Compound. Sent to Mrs. Lydia E. Pinkham, 233 Western Avenue, Lynn, Mass., for pamphlets.

"You haven't opened your mouth during the whole session," said a legislator to a fellow member. "Oh, yes, I have. I yawned through the whole of your speech," was the complimentary reply.

A HOTEL on the European plan has Asiatic laundrymen, African waiters, and a North American clerk with a South American diamond in his shirt front.

BATTLE CREEK, Mich., Jan. 31, 1879. GENTLEMEN:—Having been afflicted for a number of years with indigestion and general debility, by the advice of my doctor I used Hop Bitters, and must say they afforded me almost instant relief. I am glad to be able to testify in their behalf.

THOS. G. KNOX. A REVISION of the birth dates in the family records of the Bible would make the book more popular with maidens of uncertain age.

Our ancestors, the monkeys, were not so ignorant, after all. They were all educated in the higher branches.

For a Christmas present buy one of the Mass. Organ Co.'s Harpettes, and your children will be delighted and give you music in your own home these long winter evenings.

The man who was injured by a burst of applause is recovering.

Did the horseman who "scoured the plain use soap?"

DR. PIERCE'S "PLEASANT PURGATIVE" SYRUP. MRS. LYDIA E. PINKHAM, OF LYNN, MASS.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND. A Positive Cure for all the Female Complaints and Weaknesses...

LYDIA E. PINKHAM'S VEGETABLE COMPOUND. Prepared at 233 and 235 Western Avenue, Lynn, Mass.

OVER 1,000,000 BOTTLES SOLD. IT CURES COUGHS, COLDS, BRONCHITIS, HOARSENESS, WHOOPING COUGH, ASTHMA, AND ALL AFFECTIONS OF THE THROAT AND LUNGS.

HOP BITTERS. (A Medicine, not a Drink.) CONTAINS HOPS, BUCHU, MANDRAKE, EMBELIN, AND THE PUREST AND BEST MEDICAL QUALITIES OF ALL OTHER BITTERS. THEY CURE All Diseases of the Stomach, Bowels, Blood, Liver, Kidneys, and Urinary Organs...

TAKE THE GREAT BURLINGTON ROUTE. No other line runs Three Through Passenger Trains Daily between Chicago, Des Moines, Council Bluffs, Omaha, Lincoln, St. Joseph, Atchison, Topeka and Kansas City. Direct connections for all points in Kansas, Nebraska, Colorado, Wyoming, Montana, Nevada, New Mexico, Arizona, Idaho, Oregon and California.

THE GREAT BURLINGTON ROUTE. No other line runs Three Through Passenger Trains Daily between Chicago, Des Moines, Council Bluffs, Omaha, Lincoln, St. Joseph, Atchison, Topeka and Kansas City. Direct connections for all points in Kansas, Nebraska, Colorado, Wyoming, Montana, Nevada, New Mexico, Arizona, Idaho, Oregon and California.

THE BEST railway for a bridal trip—The Union Pacific. Warner's Safe Kidney and Liver Cure. The height of coolness—the top of Mont Blanc. Flies and Mosquitoes. Messrs. Morgan & Healdy, Mutual Life Building, Tenth and Chestnut streets, have on hand a superb stock of extra fine Diamonds, which they offer at as low prices as stones of the first quality, perfect alike in color and shape, can be sold for.

On Thirty Days' Trial. The Voltaic Belt Co., Marshall Mich., will send their Electro-Voltaic Belt and other Electric Appliances on trial for thirty days to any person afflicted with Nervous Debility, Loss of Vitality, and kindred troubles, guaranteeing complete restoration of vigor and manhood. Address as above without delay. P. S.—No risk is incurred, as '30 days' trial is allowed.

A Powerful Light.—A new electric revolving light, to be placed on South Head, Macquarie Harbor, Sydney, Australia, was recently exhibited by the makers, Messrs. Chance Brothers, of Birmingham. It is called a first order, dioptric, revolving light, with the electrical arc. The lamp has a special arrangement of prisms for securing vertical divergence of the beam. It is over six feet in diameter, and the height is about nine feet, and it is said to be the first time such dimensions have been applied to illumination by the electric arc. The lamp or regulator has a power of about 12,000 candles in the focus of light, and the revolving beam has a luminous intensity exceeding 12,000,000 candles. The light, will give flashes around half the horizon at intervals of a minute, and will make a complete revolution every sixteen minutes. On an average the light will be visible a distance of forty or fifty miles. Its makers claim that it will be the largest and most powerful light in the world.

A new "sea messenger" the invention of Julius Vanderbergh of Portsmouth, Eng., was recently tested with gratifying results during a cruise of the British reserve squadron. It is a copper vessel three feet and a half long, pointed at both ends and lined with cork and composition to resist external pressure. The inner case will carry a weight of 60 pounds, and is meant for the conveyance of letters and other papers from wrecked or disabled vessels. The vessel was thrown overboard at sea, and was picked up by fisherman off the coast of Jutland. It had been in the water 25 days and traveled 1420 miles, but was found to be uninjured.

We believe it is the style to affect contempt for things that are old. Not so, however, with Dr. Bull's Cough Syrup, which has stood the popular test of 34 years' use, and is more thought of than ever before.

An auctioneer, by birth a native of the Green Isle, of course, caused to be printed on his handbills at a recent sale, "Every article sold goes to the highest bidder, unless some gentleman bids more."

LITTLE Johnny was visiting at a neighbor's house. He was offered a piece of bread and butter, which he accepted, but with no great amount of enthusiasm. "What do you say, Johnny?" said the lady, expecting him to say "Thank you." "I say it ain't cake," was the response.

Poverty and Distress. That poverty which produces the greatest distress is not of the purse but of the blood. Deprived of its richness it becomes scant and watery, a condition termed anemia in medical writings. Given this condition, and scrofulous swellings and sores, general nervous debility, loss of flesh and appetite, weak lungs, throat disease, spitting of blood and consumption, are among the common results. If you are a sufferer from this, poor blood employ Dr. Pierce's "Golden Medical Discovery," which enriches the blood and cures these grave affections. It is more nutritive than cod liver oil, and is harmless in any condition of the system, yet powerful to cure. By druggists.

SOME men, when they go to church, never think of studying the frescoing on the ceiling of the edifice until the collection box is being passed around.

WHEN a man told his wife that he had just traded for new spring wagon, she replied, "You dunce, you! why did you get a spring wagon in the fall of the year?"

MOTHERS DON'T KNOW—How many children are punished for being uncouth, wilful and indifferent to instructions or rewards, simply because they are out of health! An intelligent lady said of a child of this kind: "Others should know that if they would give the little ones moderate doses of Hop Bitters for two or three weeks, the children would be all a parent could desire."

"My dear," said a fond mother to her child, who do you not play with the little Jones boy?" "Oh, he's horrid. He says 'bd words like papa does.'" Reform will begin at home in that family.

The Power of The Press. In no way is the power of the press more surely shown than in the universal knowledge that has in less than a year, been diffused throughout fifty millions of people of the wonderful curative properties of that splendid remedy Kidney-wort. And the people from the Atlantic to the Pacific have shown their intelligence and their knowledge of what is in the papers, by already making Kidney-wort their household remedy for all diseases of the kidneys, liver and bowels.—Herald.

MANY preachers seek to impress their hearers with the fact that life is short, but forget it in their sermons.

CARBOLES, a deodorized extract of petroleum, cures baldness. This is a positive fact, attested by thousands. No other hair preparation in the world will really do this. Besides, as now improved it is a delightful dressing.

WHEN a bank "goes up" it generally fails to come down.

AMBITIOUS man: Is there any fixed rule for writing poetry? There is! Don't.

Important to Travelers. SPECIAL INDUCEMENTS are offered you by the BURLINGTON ROUTE. It will pay you to read their advertisement to be found elsewhere in this issue.

The new coroner has appointed a colored man as one of his deputies. He will be handy for blackburying parties.

S. M. Duker, Colfax, Ind., states that his wife had a tumor on her neck five years, and "Lindsey's Blood Searcher" cured it right up.

The best railway for a bridal trip—The Union Pacific.

Warner's Safe Kidney and Liver Cure.

The height of coolness—the top of Mont Blanc.

Flies and Mosquitoes.

Messrs. Morgan & Healdy, Mutual Life Building, Tenth and Chestnut streets, have on hand a superb stock of extra fine Diamonds, which they offer at as low prices as stones of the first quality, perfect alike in color and shape, can be sold for.

On Thirty Days' Trial. The Voltaic Belt Co., Marshall Mich., will send their Electro-Voltaic Belt and other Electric Appliances on trial for thirty days to any person afflicted with Nervous Debility, Loss of Vitality, and kindred troubles, guaranteeing complete restoration of vigor and manhood. Address as above without delay. P. S.—No risk is incurred, as '30 days' trial is allowed.

A CUTS Yankee has invented a nest, in the bottom of which there is a kind of trap door, through which the egg, when laid, immediately drops, and the hen, looking around and perceiving none, soon lays another.

Dr. Pierce's "Pleasant Purgative" Pellets are sugar coated and enclosed in glass bottles, their virtues being thereby preserved unimpaired for any length of time, in any climate, so that they are always fresh and reliable. No cheap wooden or pasteboard boxes. By druggists.

The man who tries to stop another's hat when it is blown off generally "puts his foot in it."

HOUSEHOLD ACCIDENTS.

The following suggestions are not designed to induce the public to attempt the duties of the regulator merely to place the readers of these pages in possession of a means of treatment of the minor accidents occurring daily in the household, and which while not dangerous in themselves, are exceedingly annoying. Burns, bruises, scalds, etc., are principal among these troublesome and annoying occurrences, and demand immediate treatment with the best means at hand. In the kitchen, the dining-hall, the nursery and the sitting-room they are liable to happen, and instead of four and six months of the cut, mangled finger, or bruised or burned arm, or scalded surface, a cool and quiet manner should be assumed, and after washing away the blood, if required, the injured parts should be dressed with that most valuable remedy—ST. JACOBS OIL. Its surprising power to relieve, its curative properties, its tendency to quickly remove all inflammation, and its wonderful efficiency, are above and beyond all muscular and other pains, such as rheumatism, neuralgia, toothache, headache, stiffness of the joints, etc., the best remedy now before the people; which claim is fully substantiated by the strongest kind of testimony from all classes of people. The value of human life is so supremely important that anything that tends to prolong its duration is entitled to the highest consideration. Charles Nelson, Esq., proprietor Nelson House, Port Huron, Mich., says: "I have used so much St. Jacobs Oil, and so much with me, and physicians could not help me. I was in despair of my recovery, when some one told me of ST. JACOBS OIL. I did so, and as if by magic, I was instantly relieved, and by the continued use of the oil entirely cured. I thank you for having used this wonderful remedy, for it saved my life. It also cured my wife."

KIDNEY-WORT DOES WONDERFUL CURES!

Because it acts on the LIVER, BOWELS and KIDNEYS at the same time.

Because it cures the system of the poisonous humors that develop in Kidney and Urinary Diseases, Biliousness, Jaundice, Constipation, Piles, or in Rheumatism, Neuralgia, Nervous Disorders and Female Complaints.

KIDNEY-WORT PERMANENTLY CURES KIDNEY DISEASES, LIVER COMPLAINTS, Constipation and Piles.

GET IT AT THE DRUGGISTS. PRICE, \$1.00 PER BOTTLE. RICHARDSON & CO., BURLINGTON, VT. (Will send the dry post-paid.)

WEBSTER'S UNABRIDGED. In Sheep, Russia and Turkey Bindings.

New Edition of WEBSTER has 118,000 Words, 3000 Engravings, 4600 New Words & Meanings, and Biographical Dictionary of over 9700 Names.

THE BEST GIFT.

Most acceptable to Pastor, Parent, Teacher, Child, Friend; for Birthdays, Weddings, or any other occasion. Published by G. & C. MERRIAM, Springfield, Mass.

YOUNG MEN.

MR. B. F. FITCHMAN, of Washington, D. C., is certainly entitled to great distinction on account of his services to the soldier. His long course of study and experience in everything—enables him to bring about a speedy settlement of all claims, and enables him to obtain a pension is only ten dollars, while the pensioner frequently draws several hundred dollars at the same time. And the pensioner says so very often that a pension is given for any kind of a wound, disease, or disability, even if caused by accident or otherwise. And it should be known by every one that Mr. Fitchman makes no charge for his services, and his claims can yet be favorably settled. It is not uncommon for him to secure the allowance of a pension claim after more than one rejection. Mr. Fitchman will just and meritorious claims for pensions that were rejected during the five years that Mr. Bentley was Commissioner, all of whom should apply again—and we say apply to Mr. Fitchman, who will use every advantage of having a good attorney, and one at the Capital where he can and will give his best and certain attention. He makes no charge for advice. His address is box 24, Washington, D. C.

WHAT IS IT? Hoo-hoo! Hoo-hoo! The East India, or Sacred Hindu Liver Cure, recommended by the Hon. Mr. ALFRED MAURICE, Proprietor, of the East India Dispensary, London. Post office box 2161, New York.

CHEAP GUNS FOR THE PEOPLE.
