GRAIN SHEDS.—It would save a good many dollars in the end to those of our wheat growers who have not barns if they would build cheap sheds in which to stack their grain. The losses the past fall on account of ruined wheat stacks have been more than enough to build sheds for the whole grain crop of the State, A good model for such structures we recently saw on the farm of Mr. C. Le Vesconte of Hastings. The posts were sixteen feet in height, and set fifteen feet apart. The length of the sheds was perhaps thirty feet. Over the top was a cheap board roof. The wheat was stacked perpendicularly up to the eaves, instead of an incline, as is necessary in a stack in the open field, and consequently it was impossible for the rain to drive into it. For posts Mr. L. had taken small trees, while for boards for roof he had used some which had come out of an old building. The estimate cost of such a shed with new boards is placed at \$1 per acre. Under four of these buildings he prairie it would be impossible to secure last a good many years if the end which tells me its such an improvement." went into the ground were charred. Such a shed would not need much scientific work on it, and could be constructed in a day by or hired man. In threshing, the straw might be stacked up against the sides and ends, and the shed converted into a stable, the day time, if not at night. Later on it or plow, or whatever farm implement was drawn in from the fields after the day's work was done. They are certainly good things in every way, and from their cheapness ought to have a place on every farm where there is no barn.

THE department of agriculture reports that returns up to the 1st show a decrease in the cotton crop of 33 per cent in Louisiana, 40 per cent in Texas, nearly 60 per cent in Arkansas, and 30 per cent in North Carolina. In South Corolina, Georgia and Mississlppi the crop will be not much below that of last year. Florida reports a decrease of 15 per cent; Alabama an increase of 13; Tennessee a decrease of 42. The average yield of wheat for 1881 is 104 bushels per acre against 13 1-10 in 2880, a decrease of about 20 per cent, or 100,000-000 bushels. The falling off is in the interior, caused by the severe winter, late, cold spring, drought and insect ravages. The quality of the reduced crop is generally good. The average yield per acre of corn is 201 bushels, 25 per cent less than in 1880, caused by drouth during the growing season, excessive rain during harvest, and the chinch bug. The quality is below the average. In Wisconsin and Minnesota, however, there is a decided increase over last year's yield.

MAKING BUTTER. We hope every far. mer who has cows that give milk, will make all the butter they possibly can. It is said that butter making begins at the stablelet it end there. The fact is, butter is so high in our markets at this time, and probas making butter. As the cows will soon, if not already, be in the stables let it be there is actually nothing there but water! remembered that the "stalls must be clean and the animals kept neat; even the air of the stables must be free from foul odors. When milk is once contaminated, and it is a wonderful active absorbent of gases, nothing can be done to make it perfectly pure again. More butter is spoiled "at the pail," than during any other process through which the milk and butter pass. The udder is not properly cleansed or the hands of milk receives that which ever after remains to contaminate.

AMERICAN beef is regarded in England as of a superior quality, but they think the mutton we send there is not to be compared in flavor or tenderness with that of a Missour willage, and a little fellow at the home production. The reason for this is foot of the class, who keeps up with the that our sheep are generally treated in a news of the day, shouted: "The James way to favor the growth of their fleeces, boys," without much consideration of the quality of the mutton

In the absence of anything startling or terrific, -politics and the exploits of the army worm excepted, -news from this delightful valley will not prove nerve-tingling. However an item of very great importance to many people is communicated by Mr. F. Harrington, Wholesale and retail Druggist of Logan who thus writes: Mr. Alex. McClurg, Union Furnace, states that his wife had been afflicted with rheumatism for the last twenty-five years, being unable to walk without canes or other help the most of that time; has now used two bottles of St Jarob's Oil and walks not only about the house but also in the fields without any helps.

A tariff discussion: Jimmy Tuffboy 18 up to the times in all matters of public discussion. "Coming out skating this morning?" shouted his best friend. "Well, hardly. The governor has put so high a tariff on my going skating this year that I can't compete with his strap. But I'il play foot ball with you. The old man's free trade on that." And the two had a first-class tussle in the back yard and went into the house to have their clothes mended and a map of Africa drawn in court plaster alto relievo on their faces.

CAUTION.

All remedial agents capable of destroying life by an overdose should be avoided. Morphine, optum, strychnine, arnica, hyoscianus, and other powerful remedies, does at certain times, in very small doses, relieve the patient during their action in the system. But perhaps the second dose, if repeated, may aggravate and in-crease the suffering, and another dose cause death. There is no necessity for wing these Radway's Ready Relief will stop the most ex-sruciating pain quicker, without entailing the least difficulty in either infant or adult.

THE TRUE RELIEF. RADWAY'S READY RELIEF is the only remedial agent in vogue that will instantly stop pain.

THE SOLDIERS' FRIEND. THE SOLDIERS' FRIEND.

THE SOLDIERS' FRIEND.

Mr. B. F. PRITCHARD, of Washington, D. C., is certainly entitled to great distinction on account of his goodness to the soldier. His long experience—and experience is everything—enables him to bring about a speedy settlement of all class of claims. The fee for obtaining a pension is only ten dollars, while the pensioner frequently draws'several hundred dollars at first payment. And the pension laws are so very liberal that a pension is given for any kind of a wound, disease, or disability, even if caused by accident or otherwise. And it should be known by every one that Mr-Pritchard makes rejected pension cases, and such other claims as have been unskilfully and negligently prosecuted by incompetent attorneys, a specialty. All such cases can yet be favorably settled. It is not uncommon for him to secure the allowance of a pension claim after more than one rejection. There are thousands of just and meritorious claims for pensions that were rejected during the five years that "Mr." Bentley was Commissioner, all of whom should apply again—and we say apply to Mr. Pritchard and know the double advantage of having a good attorney, and one at the Capital, where he can and will give such cases his personal attention. He makes no charge for advice. His address is box 34, Washington, D. O. in ladies' or gents' size, \$25, regular price \$40.
