AGBICULTURAL,

SORGHUM FOR FEED. -- I have never raised sorghum for the purpose of syrup-making, but I have raised it for feed, and consider it superior to any other forage plant that I have ever raised in any State for this purpose, timothy and clover not excepted. 1 prepare the ground the same as for any other crop, and drill with my wheat drill half a bushel of seed to the acre. 1 sow it from April to August 1st. If it grows strong and tall, I cut it with a revolving rake reaper, and, after allowing it to wilt for several days, I bind and shock it in large shocks till it is dried, then stack and salt it the same as corn-stalks. If it is finer and shorter, I cut it with a mower and cure it the same as hay. It takes a long time to cure and dry out, otherwise it will heat and spoil. The stack should be long and parrow. The crop should stand until ripe enough for syrup, before cutting. It will not bleach and spoil on the ground like bay or grain. Many let it stand without cutting and feed it on the ground; and cattle and sheep will eat it clean, even the buts and roots, leaving nothing. I am of the opinion that the large, coarse stalks are the best for working animals. My horses are working and driving on half rations of grain (rice corn), and are doing better than when I feed them hay and corn fodder, with full rations of corn crop. The seed is equal to corn, and will produce as much to the acre. 1 think when well cleaned it weighs sixty pounds to the struck

bushel. It is superior to any other dry feed for milk cows. Our dry climate and winds make it easy to cure, and it stands drought better than any crop except rice corn.

WINTER EGGS - To get eggs in winter a perfect system of cleanhness should be practiced. The droppings should be frequently removed and preserved for future use, and while it is necessary to have the quarters warm and the fowls protected against the ingress of cold draughts, care must be taken to have ventilation. A crack in the boards, no matter h w small,

will give a whole flock the roup, and filthy quarters and roosts will promote a successful sweeping off by the cholera. The food should be varied. Soft food in the morning and whole grain at night is better than the usual irregularities practiced. A cheap mess can be prepared for a morning time it ceased. We doctors have been meal by running hay through a fodder cutclipping off the twigs when we should ter, steeping it over night, and, after givstrike at the root. The symptoms I have ing it a warming in the morning, thicken just mentioned or any unusual action or with meal, and feed on boards or any other irritation of the water channels indicate the ciean ptace. It is wasteful to feed cracked approach of Bright's disease even more corn, or even screenings. Though seemthan a cough announces the coming of coningly cheeper than whole grain, the differsumption. We do not treat the congh, but ence will be apparent if a comparison is try to help the lungs. We should not made. Avoid over-teeding or too much waste our time trying to relieve the headfat. A fat hen-one extremely so-is as ache, stomach, pains about the body or useless as one that has been insufficiently

Staten Island, N. 1., says that he has been a great sufferer from rheumatism for many years. He had severe rheumatic pains in nearly every portion of his body, and suffered so that at times he would be entirely unable to attend to active business. He said: "I am quite well now, how-ever, and, as you see, I am able to work without ever and as you see, I am able to work without ever, and, as you see, I am able to work without any trouble. I attribute my recovery endifely to Sr. JACOBS OIL, for I felt better as soon as I com-menced to use that remedy; and whenever I feel anything like rheumatism coming on, I rib the place with the OIL, and it always does what is claimed for it. Finding Sr. JACOBS OII did me so much good, I got my family to use it whenever they had any pains or colds, and it has done good in every case when they have tried it. I can say that Sr. JACOBS OII, is a might good rheu-matic remedy, and Loor't intend to be without it." matic remedy, and I don't intend to be without it." This experience is such as has been enjoyed not only by yachtsmen and others, who follow the only by yachtsmen and others, who follow the water, but by people in every walk of life and variety of pursuit the whole world over.

KIDNEY-WOR" DOES WONDERFUL CURES! cause it acts on the LIVER, BOWELS and KIDNEYS at the same time. Because it cleanses the system of the poiso 1 Unious humors that develope in Kidney an nary Diseases, Biliousness, Jaundice, Consti-pation, Piles, or in Rheumatism, Neuralgia, Nervous Disorders and Female Complaints.

SEE WHAT PEOPLE SAY : gene B. Stork, of Junction City, Kansa , Kidney-Wort cured him after regular Phy ns had been trying for four years. Mrs. John Arnall, of Washington, Ohio, says boy was given up to die by four pro sicians and that he was afterwards of Kidney-Wort. M. M. B. Goodwin, an editor in Chardon, Ohlo

a. A. D. Goodwin, an enfort in Chardon, Ohio mays he was not expected to live, being bloated beyond belief, but Kidney-Wort cured him. Anna L. Jarrett of South Salem, N. Y., say that seven years suffering from kidney troubles and other somplications was ended by the use of Kidney-Wort.

John B. Lawrence of Jackson, Tenn., suffered for years from liver and kidney troubles and after taking "inarrels of other medicines," Kidney-Wort made him well.

Michael Coto of Montgomery Center, Vé unfered eight years with kidney difficulty an was unable to work. Kidney-Wort made him

Kenny, Esq., some time ago, suffered much from rheumatism and tried almost every means to rid himself of this painful evil, but in vain. He was advised to use St. Jacobs Oil, which he did so successfully, that all pain has left him and he is as healthy and as strong as ever before. Mr. Kenny is an enthusiastic advocate of St. Jacobs Oil, and it has done him good.

STOCK FEED FOR FALL AND WINTER -In view of the certainty of the searcity of corn and of high prices for all sorts of food for live stock during the coming fall and winter, farmers cannot be too careful of the supply on hand. Straw and corn fodder are sure to be much more largely used as supplementary feed than heretofore, especially at the West, where strew and even corn-stalks have bitherto been lightly esteemed tor feeding purposes in many places. During the terrible drought on the Pacific coast a couple of years ago, when thousands of stock starved to death, loud regrets were heard on all sides at the foolish waste and destruction of straw at threshing time; for had it been stacked so as to keep well, it would have been a godsend to cattle and their owners in those days and months of famine. Kather than over-economize by reducing the feed of stock too much, however, would it not be better to weed out one's herds and flocks and disposo of all inferior animals earlybefore they have duminished the feed suphe spoke very earnestly: ply of those it will pay to keep? With animals intended for market it is more economical to give them full feed so as to have them ready for sale as soon as possible, rather than to reduce their rations and be forced to keep them longer.

APPLES KEPT IN WATER. -Several statements have been published of the entire success which has attended the keeping of Winter apples under water. The experiment is worth repeating, observing the precaution of maintaining the temperature nearly down to the freezing point. The advantage of this practice are, first, the exclusion of air currents; and secondly, a temperatare not liable to fluctuations. or which cannot quickly change. So long as the water can be kept quite cold, the fruit will be likely to remain sound; if too warm the skin will swell and cracks by an over-absorption of moisture. Grapes have been successfully kept in the same way, the water remaining near freezing. A damp cellar for the fruit on shelves, is better than one so dry as to cause shriveling, provided it is cold. If warm, decay would be likely to commence soon.

[Sheboygan Falls, sheboygan Co. News.]

We never saw any one joyous when suffering from pain;-neuralgia for instance. In relation to this malady Mr. George Guyett, Prop. Guyett House, thus informed our representative : I have used St. Jacobs Oil for neuralgia, and can confidently recommend it to any one simlarly affected.

Some housekeepers think tallow is not fit to use for cooking purposes; but I think when it is properly rendered it is as good it ?" for some things as lard. I prefer it for frying doughnuts, and one of my acquaintances, a good cook, says it is the only shortening fit for mince pie crust.

CATTLE undergoing a fattening process, as well as those kept for the production of milk, should enjoy the greatest amount of rest possible, All violent exercise must be guarded against, as it greatly increase the decomposition of fat.

culiar to females. Send to Mrs. Lydia E. Pinkham, 233 Western Avenue, Lynn. Mass., for pamphlets.

An ingenious Colorado man called his cow 'Serial," beause the brief portion of the tail she had needed "to be continued." WELLS. RICHARDSON & Co., Prop's,

WHY do girls kiss each other while boys do not? Because girls have nothing better to kiss and the boys have.

In Aprll Last

twenty-four members of Arlington's min strels were taking Warner's Safe Kidney and Liver Cure. It made them happy.

It is stated that M. Mouches, director of the Paris observatory, 18 making arrangements for taking meteorological ob. servation at an elevation of 2,300 meters by means of a captive balloon, The baloon will be charged with ordinary coal gas. The observations will be specially directed to obtain such data as will facilitate the calculation of atmospheric refraction.

A Sure Cure for Fits will be sent by mail to any address, postpaid, on receipt of one dollar. Address J. Alonzo Greene, Indian Doctor, 816 Pine street., St Louis, Mo.

A paper by Dr. Raoul Pictet, before the faculty of Sciences, at Geneva, contains a recommendation that sulphurous anhydride should supersede the present use of the fumes of sulphur in bleaching silk and wool. Vapor of burning suiphur injures the health of the workman and sometimes damages the cloth or yarn, as volatalized particles become attached to Lem, producing a burn or a spot.

"Sellers' Liver Pills" have been the standard remedy for malaria, liver compleint, costiveness, etc., for fifty years.

The largest room in the world, under one roof and unbroken by pillars, is at St. Petersburg. By day it is used for military displays; by night for a vast ballroom. Twenty thousand wax tapers are required to light it.

There is Nothing Certain

except death, and that is now rendered extremely uncertain by the discovery of an absolutely certain cure for the most painful of all bodily ailments, Piles. For 3 000 years, quacks and medical men have rivalled each other in torturing the miserable sufferers by that terrible disease with all manner of barbarous, ignorant and useless nostrums and devices, and might still have gone on for a thousand more years but for the discovery of Anskesis by Dr. Silsbee. We seldom puff such things, but any man or woman who has ever suffered the agony of Pries, will thank us for calling attention to an almost infallible remedy for this dreadful disease. 500,000 afflicted sufferers testify to its unparalleled virtues. Doctors of all metical schools endorse and use it. It is at once the triumph and admiration of the age; simple, safe, prompt and permanent, it relieves pain at once, supports and com-presses the tumors and ultimately cures the worst cases of Piles, no matter of how long standing. Absolute infallibility is not possi-ble, but medical science has nothing more nearly so than "Anakesis." It is the discovery of Dr. S. Silsbee, an accomplished chemist and practicing physician, after 40 years' study and experience. Samples of 'Anakesis' are sent free to all sufferers by P. Neustaedter & CO., box 3946, New York. Sold by druggists everywhere. Price \$1.00 per box.
