One would naturally expect that a candidate for Parliamentary honors would be required to give some proof of his fitness for Parliamentary duties. make them take the wall; and well the of entering Parliament, if he only pays the price, as he would of an opera box by purchasing a ticket. It is simply a question of hew much he is disposed to it square with the electors. There are always constituencies open to representatives of this kind, and who care for no other, and would not have any other, Nor does the candidate need to be resident among them or even have previous acquaintance with them. He may be a total stranger of unknown antecedents, brought from some distant part of the country-London or elsewhere his first introduction to his constituency that is to be given him by the local lawyer who acts as his electioneering agent, often only a few days before the election. But the lawyer himself has been previously made acquainted with his legislative capabilities by having heard the jingle of ms gold. This communicated to the covetous constituency has a marvelous, almost magical, effect, and presto! the unknown Plutus, who may be the veriest adventurer, becomes one of the Senatorial grandees of the great

Down the Flume.

Ed. Falconer, tormly railroad station agent at Durham, now working in the mills at Smoky Flat, came to Chico, Cal., recently in the flume. He started from the mountains about 7 o'clock in the morning, when the atmosphere was cold and crisp, making one wish for an overcoat. He mounted a raft and shoved off, and did stop until he had forward on a down grade at an almost lightning speed, with the boat or raft riding at a seeming angle of 45 degrees, Along the flume, through the canyons the most picturesque scenery of the Sierras which would make the heart of a true artist leap with joy. Very few accidents have ever occurred on the Sierra Lumber company's flume, but if there should be a break at some of would suddenly be dashed into "kingdom come." Riding down the flume has a striking similarity to sliding down the a hill on a sled-it is fun to shoot downward with a tremendous velocity, but difficult to ascend.

Very few persons are allowed to ride in the flume, and it is only by hard efforts that the mill hands can get permission to make the trip to Chico. Boxes of trout are sent down from the tourists to their friends in the valley, and a few years ago this wonderful forty-mile length of flume was used as a sort of message-carrier in bringing down orders for supplies and calls for physicians, the messages being written on a board or nailed up in a small box. But now, since we are connected with the mountains by telephone, the custom of message sending by water has "gone up the

Japanese Farm Lafe.

Something more than one-half the population of the empire, of Japan is agricultural, and the half of these are women. In 1874, 12,000,000 acres were under cultivation, or about three-fourths of an acre per head of the farming population; but the tillage is most 1 orough, and two crops are invariably raised each year. All farm labor is hard labor. A plow is seldom seen, and labor saving machines are unknown. Wages for farm labor seem low. Thirty-five dollars a year with board, or fifty dollars with out board, for a man and ten dollars with board and twentyfive to thirty dollars with out it, for a woman; and then, as the clothing for a laborer costs but four or five dollars a year, and he gets a three-room (bamboo and paper) house for eight or ten dollars a year, and clothing for family of four or five costs not to exceed twenty dollars, and his garden will produce onehalf of his living, the farm laborer is not in a desperate candition, and being exceedingly frugal, he manages to lay up something every year. Yet the Japanese farmers are prosperous, Nearly all can read, write, and keep farm accounts, while the boys are sent to school and the girls taught music and needle work at home, and there is not a house, not even among the coolies, or laborers, that does not have its bathroom, which is put in use every morn-Chinese Wedding.

Previous to the great day the bridegroom gets a new hat and takes a new name, while the lady, whose hair has hitherto hung down to her heels in a single heavy plait, at the same time becomes mitiated into the style of hairdressing prevalent among Chinese married ladies, which consists in twisting the hair into the form of an exaggerated teapot, and supporting it in that shape with a narrow plate of gold or jade over the forekead, and a whole system of boding, presents and congratulations are stocking. sent to the bridegroom, and among the rest a pair of geese; not sent, as we unity and affection.

AGRICULTURE,

SHEEP BOR HARD TIMES .- The past sheep-are far from those conditions by which it should be surrounded where the it will successfully withstand them is just the rule that a "penny saved is a penny earned" does the sheep not make money for its owner, under circumstances where But in boroughs like these no such sheep, will be enabled to partly recoup water. qualification is needed. room and quarters for them. It seldom pays to attempt raising poor breed poultry unless there is ample room, both in yards and houses, for they must have this to insure their healthfulness and consequent

PLANT HICKORY TREES .- Many people would like to have a hickory grove, but have a vague idea that it is a terrible thing to get. But it is not so much of a task. British Empire, on which the sun never Plow your ways four feet apart, follow the marker with a roller which will not efface the mark. Do this the first week in October, or may be earlier. Take a hoe. and at each crossing of your checkrows plant a nut about an inch and a half deep, stepping hard upon it. Next spring lumber camp, can have no idea of this run a harrow over the ground quite early, say as soon as the frost is well out. When beans are first boiled, then placed in an your trees come up cultivate them the iron pot which is covered. A bole is same as corn, being careful not to bruise made in the ground, and a fire built in any way. After they get too high for there; when this fire has burned to coals, the cultivator attend to them with a hoe. the pot is set in, and the whole, pot and Mulch in the fall sufficiently to keep the coals, covered with earth. This is done reached a warm and sunny station along weeds out the next spring. If any should in the evening, and the pot is uncovered the watery side. Traveling in the flume come, keep them pulled. In ten years and taken out at breakfast time the next is dangerous but exciting sport. One you will have all the hickory nuts and tim- morning. No wonder that the lumberis sometimes gliding smoothly along on ber you want, it you have an acre in your men are the sturdy fellows that they level water, and then is suddenly dashed grove. A moist location is the best-just are! as wet as will do to plow-if you have it.

A MASH composed of two-thirds wheat the morning when about blood heat, makes midday teed, and corn and oats for supper the high places, a person riding along feed is recommended for poultry when the ground is frozen and covered with snow, but with the open weather we have bad thus far this season, but little extra feed to table hot, or care has been required. The large amount of insect food which poultry has been able to pick up this season has so far rendered the extra feeding of animal food unneces-

> ROOT PRUNING FOR TOMATOES. - Root several times, which of course destroys is best. some of the roots, and after they are put into their final resting place, a spade is once in a while thrust down into the ground a foot or so from the main stock. In this. of course, size, and perhaps quality, are sacrificed to a few weeks earliness; but many are willing to pay this penalty for the sake of the early dish. Those who wish to secure an early ripening of fruit will do well to practice this system of root pruning upon a portion of their plants. Tomato plants produce better and more evenly ripened truit when afforded some support, as by stakes or trellises, to keep the vines from the ground.

A FATAL scourge has prevailed in Louisiana for come time known as Spanish leprosy or farcy, which has killed a large number of mules. It seems particularly destructive to these valuable animals, and some planters have lost nearly every animal on their places. This visitation is particularly unfortunate at this season of the year, when farmers need every work animal they can use. Some persons claim that it can be cured, but the most of the farmers consider it beyond remedy, and it does its work in a very short time.

THE value of all manufactured fertiliz these manures should all be appropriated brush any part that requires restoring; by the growing crops. To expect any such fertilizing matter to remain in the ground for another year is to presume that the fertilizers are not properly man. main in the soil several years.

A good remedy for all the ordinary ailings of the peach tree is potash. An Eastern chemist found the tissues of peach trees suffering from the "yellows" gorged with starch, and potash would prove a mix with it a quantify of white pitch remedy. For Cancers and Cancerous Humour THE DOCTOR'S CERTIFICATE. READIT.

ASHLEY, Washington Co., Ill., Jan. 14, 78.
MR. H. R. STEVENS—Dear Sir: This is to certify
that I had been suffering from a Rose Cancer on
my right breast, which grew very rapidly, and all
my friends had given me up to die, when I heard of your medicine, Vegetine, recommended for Cancer and Cancerous humours. I commenced to take it, and soon found myself beginning to feel better; my health and spirits both felt the benign influence which it exerted, and in a few mont from the time I commenced using Vegetine the Cancer came out almost bodily.

CARRIE DEFORREST.

I certify that I am personally acquainted with Mrs. DeForrest and consider her one of our very best women. Dr. S. H. Flowers. WHY WILL YE SUFFER!

The Priceless Vegetine! CANCER CURED.

WASHINGTON, D. C., Jan. 6, 1881. DR. H. R. STEVENS—The great sympathy I have for otheas who are suffering from Cancers and Cancerous Humours impresses me that it is my

macred duty to write to you, althoug a stranger to me. For two long years I suffered and endured the most painful tortures of a cancer of the breast. My case defied the efforts of the best physicians. My case defied the efforts of the best physicians. I tried many remedies, when a gentleman in the office with my husban! advised him to try your priceless Vegetine; he brought home a bottle. Before taking half of the first bottle, I slept well nights. I continued taking the Vegetine, gaining everyday. I have taken eighteen bottles. I am now perfectly cured; not a vestige of my disease left. I wish everyone could know what a good medicine it is for such diseases. Your name will never be forgotten. May God ever bless, guide and protect you, is the daily earnest prayer of MRS. E. A. SKIVINGTON, 717 O street, northwest, Washington, D. C.
