

A FATAL MISTAKE.

HOW A BLUNDERING JUDGEMENT MAY BE RESPONSIBLE FOR THE MOST SERIOUS RESULTS.

Mr. Edwin Booth said recently that he supposed his lungs were affected, having a persistent cough until he saw Dr. Mackenzie, of London, who found that his symptoms arose from a disturbance of the liver.—N. Y. Herald.

The above item, which has been going the rounds of the Press, is of no special significance other than to the personal friends of Mr. Booth, except that it brings to light a truth of the greatest importance to the world. Few people pass through life without the affliction of a cough at some point in their career. In most cases this is considered the result of a cold or the beginning of consumption, and thousands have become terrified at this revelation and have sought by a change of air and the use of cough medicines to avert the impending disaster. It may safely be said that more than half the coughs which are afflicting the world to-day do not have their origin in the lungs but are the result of more serious troubles in other organs of the body.

Liver coughs are exceedingly common and yet are almost wholly misunderstood. Arising from a disordered state of the liver they show their results by congesting the lungs. In fact, the efforts of the liver to throw off the disease, produce coughing even when the lungs themselves are in a healthy state.

But it is a mistake to suppose that such delicate tissues as the lungs can long remain in a healthy condition when they are being constantly agitated by coughing. Such a theory would be absurd. Consumption, which was feared at first, is certain to take place unless something is done to check the cause. This must be plain to every thoughtful mind. It stands to reason, therefore, that the only way in which "liver coughs" can be removed is by restoring the liver to health.

In this connection another fact of great importance becomes known, which can best be explained by the relation of an actual event. Mr. W., a wealthy cattle dealer of Colorado, became greatly reduced in health and came east to Chicago for the purpose of being cured. He consulted Dr. J., one of the leading physicians of the country on pulmonary subjects and began taking a root drug which he had been told would cure his cough, which is often dreaded as the forerunner of consumption and the wasting strength which accompanies it, in all probability may arise from weakened or diseased kidneys or liver, to restore which would cause returning health. How this most desirable end may be attained has long been a problem, but few people of intelligence at the present day have longer any doubts that the popular remedy known as Warner's Safe Kidney and Liver Cure, which is most correct, relieve and restore these organs than any other preparation ever before known.

There are hundreds of instances which have occurred within the past three months where individuals have believed themselves the victims of consumption, when, in reality it was deranged kidneys and liver which this remarkable medicine has completely cured, as witness the following statement:

BUFFALO, N. Y., July 6, 1882.—I believe it to be a fact that thousands of cases of so-called consumption can be successfully treated by simply using Warner's Safe Kidney and Liver Cure, and in three months I regained over twenty pounds, and my health was fully restored.

W. C. BEACH, Foreman Buffalo Rubber Type Foundry. There are thousands of people in America to-day who believe they are the victims of consumption and destined to an early grave and who are trying to save themselves by the use of consumption cures but are growing worse each hour. Let all such persons stop, and calmly consider whether they are not seeking to check a disease in the lungs when it is really in the kidneys and liver. Let them then treat the disease in its original stronghold and by the remedy which has proven to be the most effective and then look for the return of health and happiness which such treatment is sure to bring.

AGRICULTURE.

PROPERTIES OF CHARCOAL.—As a top dressing for a meadow or a lawn it is excellent. It is so good an absorbent of moisture and grasses that it will keep a lawn green in a drought when the undressed fields are brown and parched. As a basis for compost there is nothing superior. Every housewife knows that if she has any tanned meat charcoal will take out its taints if anything can. A piece as big as one's fist put into the pot with boiling corn beef that has passed its prime will absorb the bad odors and restore it to sweetness if the putrefaction process has not gone too far. In like manner charcoal acts in the compost heap. An effluvia even from a dead horse, will be absorbed and stored up for the use of corn, grass or any crop to which it may be applied. As a top dressing for grass or grain it is particularly beneficial, as when the rich gases have been extracted it is in a position to absorb more from the dew, snows and rains. Ploughed under a thick soil its absorbing power is comparatively limited. We must not omit to mention the strating effect which fine charcoal has on stiff clay lands. It renders them friable and permeable to air and moisture—a result which can hardly be overestimated. It has a softening effect of the same effect, but much does not last as does charcoal. On sandy lands charcoal does good, as it is such an absorbent of moisture that it thus lands dressed with it will remain fresh when the undressed are parched. The only place where charcoal seems to exert little or no ameliorating influence is on low, cold, wet lands, and here even stable manure has comparatively little effect.

UTILIZE YOUR BONES.—Not the bones of your own body, merely, but any and all bones, beef and mutton and chicken, and even fish bones. The American Garden says they constitute the very best food for fruit-trees and grape vines if the fragments are finely placed where the roots can lay hold on them, and adds: "Instead of allowing pieces of bone to be cast into the back-yard, as food for stray dogs and straggle cats, domestics should be directed to deposit everything of the sort in a small tub provided with a lid. As soon as a few pounds have accumulated we take the tub to some grape vine or fruit tree, dig a hole three or more feet long, a foot or two wide, and less than a foot deep into which the bones are dumped; spread over the bottom of the excavation, and cover with the soil. The more the fragments can be spread around, the better. But they should be buried so deep that a plow or spade will not reach them. The roots of growing vines or fruit trees will soon find the valuable mine of rich fertility, and will feed on the elements that will greatly promote the growth of strong and healthy wood and the development of fair and luscious fruit."

CLEAN CIDER BARRELS.—Cider making is now close at hand, and old barrels must be used without a thorough fumigation. A scientific journal gives the following receipts for effecting this, which we hope may do. "The clean cider barrels, pour in lime water, and then insert a tree chain through the bung, remembering to fasten a strong cord on the chain to which pull it out again. Shake the barrel until all the mould, inside is rubbed off. Rinse with water, and finally pour in a little whisky." This is simple enough and would seem to meet the requirements. Really fine cider cannot be expected when the barrels are not perfectly sweet and clean. But if any of our cider-makers have a better or other methods than this, we shall be pleased to find them; and to be of use this season they should be communicated at once.

FATTENING SMALL PIGS.—Corn at seventy cents a bushel is still the cheapest fattening food for pigs, but when corn is so dear it is best to study the most economical manner of feeding; corn in the ear boiled with small potatoes, will be worth twice as much dry as corn and raw potatoes. Indeed raw potatoes will scarcely do more than support life, and may often be injurious, being indigestible and drastic, in their effects upon the bowels. Corn-meal boiled to a thick mush and mixed with skim milk and fed when nearly cold, will make the cheapest pork. A bushel of corn in this way has made twenty-four pounds of pork. Corn meal steeped in water is about as good as boiled whole corn and the latter is the cheaper of the two. Ligs do not thrive well upon warm feed, and they do better with four light meals a day than with two heavy ones.

A LADY, writing to an exchange, says: Never give up a choice but decaying rosebush till you have tried watering it two or three times with soot tea. Take soot from a chimney or stove with which wood is burned and make a tea of it. When cold, use your boiling water a second time on the soot. The shrub will quickly send out thrifty shoots, the leaves will become large and thick and the blossoms will be made and come richly into the before. To keep the plants clear of insects syringe them with quassa tea. Quassa chips can be obtained from the apothecaries.

TURNIPS.—When turnips placed in the cellar begin to sprout they are usually thrown away, but a bushel of turnips will furnish you with salad all winter, and very good one if properly prepared. Place the bushel of turnips in a dark, warm cellar to sprout, and when the sprouts are three or four inches long cut them off, pick the leaves from the stems and pour on hot water a moment; place the sprouts in the colander to drain off all the water, and send to table with a plain dressing poured over them.

EVERY farmer who has to contend with stony land will thank us for saying that when the small ones are to be picked two men with dug torks will do more work, and do it easier, than four will with their hands. We got the idea from an exchange, and put it into practical execution the other day, to our own advantage and the great gratification of the men we put at the job.

SPRING BUTTERS are the best, while henlock makes a sweeter butter, acids from the oak color the butter and injure its appearance; white ash gives the butter a strong flavor if kept long and increases the liability to mould; maple smells and cracks taddy. Soak all tubs four to six days in brine before using.

GIVE fattening cattle as much as they will eat, and often five times a day. Never give rapid changes of food, but change often. A good guide for a safe quantity of grain per day to maturing cattle is found to every hundred of their weight; thus an animal weighing one thousand may receive ten pounds.

DOMESTIC.

GUMBO.—Gumbo is the name of soup; Okra is the plant. Okra is cultivated in every vegetable garden in Texas. The tender pods are boiled and dressed with salt, pepper and butter, and always called Okra. Soup, made by boiling beef, chicken, or duck until the meat will part from the bone, which is then chopped fine as for mince meat and put back into the soup, and young Okra pods cut up thin across the pod are put into the soup and simmered for an hour, and black pepper is added, and when done it is called "Gumbo," and persons accustomed to the dish are very fond of it. The Crooles often add Sassafras leaves cut fine to give the Gumbo a flavor and add to the mucilaginous qualities of the Gumbo. Okra is much used in all soups with other vegetables. It should not be cooked in an iron kettle, as it turns the Okra black. The test for Okra is to break the pod from the plant; if it will not break it has passed the edible state. Okra, Tomatoes and Green Corn, in equal quantities, seasoned with butter, pepper and salt, and baked for two hours, is a favorite Southern dish.

EVERYBODY should send 25 cents to Strawberry & Clothier and receive their Fashion Quarterly for six months. Nearly 1000 illustrations and four pages of new music in each issue.

WARNING FLANNEL.—Put it on at once. Winter or summer, nothing better can be worn next to the skin than a loose, red, woolen flannel shirt, "loose," for it has room to move on the skin, thus causing a circulation which draws the blood to the surface and keeps it there; and, when this is the case, no one can take cold, "red," for white flannels put together and become stiff, heavy and impervious; "woolen," the product of a sheep and not of a gentleman of color, not of ootton wool, because that merely absorbs the moisture from the surface, while woolen flannel conveys it from the skin and deposits it in droplets on the outside of the shirt, from which the ordinary cotton shirt absorbs it, and, by its nearness to the skin, draws the air, it is soon dried without injury to the body. Having these properties, red woolen flannel is worn by sailors even in the midsummer of the hottest countries. Wear a thinner material in summer.

For dyspepsia, indigestion, depression of spirits and general debility, in its various forms; also as a preventive against fever and ague and other intermittent fevers, the "Ferro-Phosphated Elixir of Calissa" made by Cawell, Hazard & Co., New York, sold by all Druggists, is the best tonic; and for patients recovering from fever or other sickness, it has no equal.

TO MAKE POTATOES MEALY.—A Canadian paper says: "In our kitchen we overcome the soggy disposition of these valuable vegetables by soaking them a few hours in cold water, and putting them into hot water to boil, without salt; then when they are tender nearly all the way through, turn the water off and refill the saucepan with cold water. Put in salt and boil till they are quite done; drain off that water also, cover as tightly as possible, and set on the back of the range to steam, lifting the potato for an instant once or twice; then with one hand holding down the lid, shake the saucepan gently, quickly, and steadily for a moment and serve your potatoes hot. If rightly managed they will be like snowflakes."

No poisonous drugs enter into the composition of Carbonic Acid, a deodorizer, a tract of petroleum, the natural hair restorer and dressing as now improved and perfected. It is the perfection of the chemist's art, and will, beyond a peradventure, restore the hair on bald heads.

TO STRAIGHTEN WARPED BOARDS.—If the wood is in a large piece, the convex or hollow side should be steamed or moistened a little, and then laid on a dry floor, holding it down with a smooth, flat board upon which weights are placed. When the quire dry it will be found to have regained its original shape. If the wood is in small pieces, it can be easily straightened by gently steaming the convex side over a tea-kettle, and then holding the other side toward the heat until it becomes straight, when it can be left in a press or under weights for a few hours. Almost any warped woods will yield under this treatment.

Vegetine.—For eradicating all impurities of the blood from the system, it has no equal. It has never failed to effect a cure, riving tone and strength to the system debilitated by disease.

SOOT TEA FOR ROSES.—Get some soot from a chimney or stove where wood is used for fuel, and mix it with water and pour hot water upon it. When cold, use it to water your plants every few days. When it is all used, fill up the pither with hot water. The effect upon plants, especially upon roses that have almost hopelessly deteriorated, is wonderful in procuring a growth of thrifty shoots, with large thick leaves and a great number of richly-tinted roses. Never despair of a decayed rose bush until this has been tried.

HUMOROUS.

THE upper hotel in Nevada: When he said he had lived in Nevada several years a man who looked some thing like a church deacon stepped forward and asked: "My friend, is the Bible respected in that State?" "Oh, yes," "Do they have churches?" "Plenty of 'em." "And the Lord rules there as well as in New Jersey?" "Well, I don't know about that," was the doubtful answer. "When I bought mining stocks for twenty per cent, of their face value and saw them jump to fifty above par I thought the Lord had a firm grip on the State; but again, when I struck a silver mine and sold the whole for a gallon of whiskey which burnt the soles off my boots, I had a dim suspicion that the devil and Nevada were partners in stocking the cards."

The poor sufferer that has been doing himself with so called Troches and thereby upset his stomach without curing the troublesome cough, should take our advice and use at once Dr. Bull's Cough Syrup and get well.

THEIR: Footie's favorite butt was Garrick, whose thrifty habits he was constantly turning into ridicule. One day while in company with him David, after satirizing some individual, wound up his attack by saying: "Well, perhaps before I condemn another I should pull the beam out of my own eye." Footie replied: "And so you would if you could sell the timber."

"* * * Wise men say nothing in dangerous times." Wise men use nothing in dangerous diseases but the best and most approved remedies. Thus Kidney-Wort is employed universally in cases of diseased liver, kidney and bowels. It will cost you but a trifle to try it, and the result will be most delightful.

Millions of packages of the Diamond Dyes have been sold without a single complaint. Everywhere they are the favorite Dyes.

"I TELL yer wot, boys," exclaimed old Ben, the roughest man in the camp; "I tell yer wot, boys, it made a feller feel kinder watery round the lids to hear that little chat of a thing a-settin' up thar like an angel a-sayin' his prayers so cute, 'Mary had a little lamb,' or 'sunthin' er thet sort."

Consumption Cured. An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all throat and Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this receipt, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. NOYES, 149 Power's Block, Rochester, N. Y.

MARKETING ITEM: A man who detected a piece of bark in his sausage visited the butcher's shop to know what had become of the rest of the dog. The butcher was so affected that he could give him only a part of the tale.

AN EXTRAORDINARY CASE. AGENS, TEXAS, FEBRUARY 20, 1881. To Mr. J. W. Graham, Druggist: Dear Sir—My case was an acute form of Bronchitis, and was of one and a half year's duration. I employed the best medical and domestic remedies, but failed rapidly, until the doctor said I would die—that my case was incurable. Thrown upon my own resources, I got a bottle of DR. WM. HALL'S BALSAEM FOR THE LUNGS, and in six hours found a decided relief. In three days the cough almost disappeared. Now at my chest is free of all disease, and I am as well as ever. I earnestly recommend the above to every sufferer of throat or lung disease. O. G. LATHROP.

GENERAL SPENCER is fishing down in Florida with eminent success. He just baits with his signature, and the fish that can distinguish it from the worthless kind of a worm has to be an expert of many years' standing.

Vegetine.

Purifies the Blood and Gives Strength.

DR. QUINN, Ill., Jan. 21, 1878. MR. H. R. STEVENS: Dear Sir,—"Your 'Vegetine' has been doing wonders for me. I have been having the Chills and Fever, contracted in the swampy parts of the South, nothing giving me relief until I began the use of your 'Vegetine,' it giving me immediate relief, and strength, whereas all other medicines weakened me, and my system was left poisoned; and I am satisfied that if families that live in the aque districts of the South and West would take 'Vegetine' two or three times a week, they would not be troubled with the 'Chills,' or the malignant 'Fever,' that prevail at certain times of the year, save doctors' bills, and to a great advantage. Respectfully yours, J. E. MITCHELL, Agent Henderson's Looms, St. Louis, Mo.

ALL DISEASES OF THE BLOOD. If Vegetine will relieve pain, cleanse, purify and cure such diseases, restoring the patient to perfect health, after trying different physicians, many remedies, and after trying several blood-purifiers, you are a sufferer, you can be cured? Why is this medicine performing such great cures? It can truly be called the Great Blood Purifier. The great source of disease originates in the blood, and medicines that do not act directly upon it, to purify and renovate, has any just claim upon your patient attention.

Humor in the Blood Cured. BALTIMORE, MD., April 25, 1879. MR. H. R. STEVENS: Dear Sir,—"I have been afflicted with Humor in the Blood for several years, which gave me considerable annoyance, and after trying several blood-purifiers, recommended for similar affections, I was induced to try two bottles of 'Vegetine,' which benefited me so much that I continued its continued taking it, and after six bottles were taken, I found the annoyance had ceased, and up to this date I am not in the least troubled by it, and am enjoying the best of health. I can cheerfully recommend it to all persons suffering from any humor in the blood. Respectfully, MARY E. LAMBDIN.

Vegetine thoroughly eradicates every kind of humor, and restores the entire system to a healthy condition.

Vegetine is sold by all Druggists.

D. BULL'S COUGH SYRUP. HOSPIETER'S CELEBRATED STOMACH BITTERS.

HOP BITTERS NEVER FAIL. The true antidote to the effects of miasma is Hostetter's Stomach Bitters. This medicine is one of the most popular remedies of an age of successful proprietary specifics, and is in immense demand wherever on the continent fever and ague exist. A winey, assiduous three times a day is the best possible preparative for encountering a malarious atmosphere, regulating the liver, and invigorating the stomach.

DR. J. N. J. B. HOBENSACK'S LUNGS BALSAM. Cures Consumption, Colds, Pneumonia, Influenza, Bronchitis, etc.

OVER 1,000,000 BOTTLES SOLD. IT CURES COUGHS, COLDS, BRONCHITIS, ASTHMA, WHOOPING COUGH, SPITTING BLOOD, AND ALL AFFECTIONS OF THE THROAT AND LUNGS.

KIDNEY-WORT THE GREAT CURE FOR RHEUMATISM. It is the only medicine that cures the disease, and restores the system to a healthy condition.

PENSION TO ALL. A strong superlative: "Yes, sir," said the Kentuckian; "I never was in a more tantalizing position in my life. There were three of us, with a pack of cards, in the room and not a deuced cent in the crowd."

TRUTH IN THE HISTORY OF THE WORLD. Embracing full and authentic accounts of every nation of ancient and modern times, and including a history of the rise and fall of the Greek and Roman Empires, the middle ages, the discovery and settlement of the New World, etc.

Our Progress. As stages are quickly abandoned with the completion of railroads, so the huge, drastic, cathartic pills, composed of crude and bulky medicines, are quickly abandoned with the introduction of Dr. Pierce's "Pleasant Purgative Pellets," which are sugar-coated, and little larger than mustard seeds, but composed of highly concentrated vegetable extracts. By druggists.

The new reporter was sent to the school exhibition. His reports read pretty well; but there were a few things in it which did not meet the approval of the local editor—such, for instance, as these: "The essays of the graduating were good, whoever wrote them;" "the floral offerings were excessive, and from the number received by Miss Simple-gush we judge her father owns a first-class greenhouse;" "the young lady who read the valedictory to the teachers has in her the making of a fine actress. She simulated sorrow so accurately that the writer might have been misled had he not subsequently heard the young lady speak of this same 'dear teacher' as a hateful old thing."

Lydia E. Pinkham's Vegetable Compound. A DILEMMA: An Austin boy had the bad habit of reading after he went to bed, and leaving the candle burning, much to the alarm of his parents, who were afraid he would set the house on fire. As the boy did pretty much as he pleased, his father told the colored boy who waited on the table to go up into the son's room after he had gone to sleep and put out the light, which programme was carried out for several months. One night, however, the parents of the boy were aroused from a sound slumber by the calling out: "Boss, oh Boss! what am I ter do?" "Merciful Moses! what has happened?" "De boy has done—"

KIDNEY-WORT. HAS BEEN PROVED THE SUREST CURE FOR KIDNEY DISEASES. Does a lame back or disordered urine indicate that you have a weak or diseased kidney? If so, you need Kidney-Wort. It is a simple, safe, and effective remedy for all kidney troubles.

NEVER FAILS. THE DR. S. A. RICHMOND MEDICAL CO. Agents Wanted. The Celebrating Triumph. HOW TO LIVE. A complete Cyclopaedia of household knowledge for the masses; now ready. Nothing like it. Going fast. Low price. Illustrated, and full particulars on. Outfit and instruction how to sell, free to actual agents.

DR. J. N. J. B. HOBENSACK'S LUNGS BALSAM. Cures Consumption, Colds, Pneumonia, Influenza, Bronchitis, etc. Those afflicted with the effects of INDIAN SMOKE AND MERCURIALIZATION should not hesitate to consult J. N. J. B. HOBENSACK, of 26 North Second street, Philadelphia, either by personal call, or by mail, during the hours from 9 A. M. to 5 P. M., and 6 to 9 P. M.
