For months past there have been rumors of a terrible apparition which has frightened all the women and cuildren in Clear Creek townsnip, North Carolina. The women say that for two weeks they have been subject to terrifying visits, in the absence of their husbands, from a creature like a sniny black negress, with long hair and gleaming eyes. She asks in hardly distinguishable gibberish for a baby to eat and makes efforts to get hold of the children. The men, getting tired of the fears of their wives, determined to try the night or early in the morning. While to eatch the creature, and for the last she is in perfect health she will do this; week crowds of farmers have been daily and nightly chasing her, without among birds of this class is irregularity in success. The first effort to catch her laying. The eggs laid will invariably nearwas made a week ago by John Roberts, ly approach the color of the layer—lighta blacksmith, The wild creature had colored ducks laying white eggs, and brown appeared several times at a fire, which ducks greenish-blue eggs. Dark-colored it was the habit of Corey Moore, colored, ducks lay the largest eggs, One time of of the neighborhood, to light after day the notion was prevalent that a duck dark in the yard of his house for the would hatch no other eggs than her own; preparation of his meals. Roberts was this is not true; nevertheless it will be as but there to watch for her and she well to match the duck's own eggs as nearappeared even before the flames were ly as possible, for I have known instances well kindled. She presented such a where the duck has turned out of nest and wild look in the haif light and asked for destroyed eggs differing from her own in food in such a wild fashion that Koberts size and color. The simple way to fatten was demoralized. He recovered, how-ducks is to let them have as much subever, made an outcry and attempted to stantial food as they will eat. They will seize the woman, but she shipped require no cramming, as does the turkey through his hands and disappeared in and some other poultry-they will cram the dark shadows of the wood. Tues- themselves to the verge of suffocation; day morning Mannar Steven Cawell they should, at the same time, be allowed caught sight of the creature and chased plenty of exercise and clean water. Vegetine.

FEMALE WEAKNESSES.

NO better remedy in the whole materia-medica has yet been compounded for the relief and cure of Female Complaints, of the ordinary kind, than VEGETINE. It seems to act in these cases than VEGETINE. It seems to act in these cases with unwonted certainty, and never fails to give a new and healthful tone to the female organs, to remove relaxed debility and unhealthy secretions, and restore a healthful vigor and elasticity. One of the most common of these complaints is Leucorrhosa or Whites which are brought on either by the presence of Serrolus in the system or by the presence of Scrofula in the system, or by some affection of the womb, or even by general debility. For all these complaints, and when danger begins to threaten woman at the turn of life, VEGETINE can be commended without qualification. The great prevalence of these disorders, and their cure by VEGETINE, has amply shown that the sure alleviating agent remains not yet to be discovered, but is already known, and is a favorite with American ladies. Too long has i been the custom to prescribe nauseating and un-certain remedies in place of what is pleasant, effi-cacious and cheap. Try VEGETINE and do not denot its power to carry you safely through dan-ger and disease,

FOR ALL LADIES WHO ARE SUF-FERERS.

FEMALE WEAKNESS.

St. Louis, Mo., March 10, 1879. MR. H. R. STEVENS:
Dear Sir—After having paid over four hundred dollars during the past two years, for doctors for my wife, who has been a sufferer from derange-ment of the womb, I was recommended to try VEGETINE. She has now taken four bottles of it and it has done her more good than anything else, and I am encouraged to think she will be once more in good health.

I am with respect, yours, HENRY SPECHER, Bock Springs City.

Vegetine is sold by all Druggists.

The Bad and Worthless.

are never imitated or counterfetted- This is especially true of a family medicine, and it is positive proof that the remedy imitated is of the highest value. As soon as it had been tested and proved by the whole world that Hop Bitters was the purest, best and most valuable family medicine on earth, many imitations sprung up and began to steal the notices in which the press and the people of the country had expressed the merits of H. B., and in every way trying to induce suffering invalids to use their stuff instead expecting to make money on the credit and good name of H. B. Many others started nostrums put up in similar style to H. B., with variously devised names in which the word "Hop," or "Hops" were used in a way to induce people to believe they were the same as Hop Bitters. All such pretended remedies or cures, no matter what their style or name is, and especially those with the word "Hop' or "Hops" in their name or in any way connected with them or their name, are imitations or counterfeits. Beware of them. Touch none of them. Use nothing but genuine Hop Bitters, with a bunch or cluster of green Hops on the white label. Trust nothing else. Druggists and dealers are warned against dealing in imitations or counterfeits.

LATIN is a dead language, and this is why the doctors use it in writing out their prescriptions.

BARLEY is one of the best grains for a soiling crop. It grows more vigorously at the start than oats and has a peculiar rich, sweet flavor which all animals relish. It should be cut, however, before getting into

OLD meadows should have a sprinkling of fine manure early in the Autumn to give the grass a good start again before Winter. We do not believe in pasturing meadows much, if any, after the hay crop has been removed.

Papered veneers have come to be an important article of manufacture, the extension of the industry being largely due to the new and wonderful processes of cutting. The mechanism cuts the logs to lengths of twelve feet, which are then halved or quartered, and bolted securely on a revolving iron table. As the table and wood revolve, the surface of the later comes in contact with a knife 12 feet long, ground to a razor edge and perfectly true, secured to a rigid iron frame-the entire cutting apparatus weighing about 30 tons. The vencers roll off in sheets at every revolution, of from one-nineteenth to onehundred and seventy-fifth of an inch in thickness, and of the slightest vibration of either the knife or log, as the sheet of wood in such cases would be either broken or take up the spring like a wedge. The sheets are backed with paper.

Among the most remarkable natural echoes is that of Eagle's nest, on the banks of Killarney, in Ireland, which repeats a bugle call until it seems to be sounded and that on from a hundred instruments; the banks of Naha, between Bingen and Coblentz, which repeats a sound seventeen times. The most remarkable artificial echo known is that in the Castle of Simonetta, abovt two miles from Milan. It is occasioned by the existence of two parallel walls of considerable length. It repeats the report of a pistol sixty times.
