The national debt of France, (\$4,683, 840,000,) is three times as large as ours. Twenty-eight mining explosions occurred last year, of which fifteen were

The winner of a corn-raising contest near Rome. Ga., raised thirty-seven bushels on a half acre.

Figures were used by the Arabian Moors about 900, and were introduced into Spain in 1050, and into England

The pension list of the United States is eight times as large as that of England and ten times greater than that of France.

The first systematic attempt to instruct the deaf and dumb was made by Pedro de Ponce, a Spanish Benedictine monk, about 1570.

A chicken ventriloquist is one of the curiosities of Concord, Ky. He crows with clarion notes, and then makes echo-like repetitions of them, gradually dying away as if at an increasing dis-

William Campbell, a young farmer of Mexico, Mo., won a wager of \$100, and received 21 cents a bushel besides for his labor, at a corn-shucking bee. In eight days he threw over his shoulder 542 bushels of corn.

Tin is frequently mentioned in the Iliad, and it would seem that the Greeks were very familiar with it. It was used for the raised work on shields and for greaves, and it was also employed for domestic purposes.

It has been said that a blind man named Benson, who has been an inmate of the Wethersfield (Conn.) town house for more than fifty years, has such a remarkable memory that he can repeat almost every word of any sermon he

The demise and obsequies of a Brunswick (Me.) cat gave a hint to the long-named society. The family physician nursed the animal in its illness, the undertaker composed its remains in a \$12.50 casket, and its mistress cabled her husband in Europe that the end had come.

catechism of the Church of England at first contained only the baptismal vow, the creed, the ten commandments and the Lord's prayer with explanations, but an explication of the sacraments was added by the bishops in obedience to an order made by James I.

Trained horses have shown in England that they are capable or jumping great distances. Chandler cleared thirty-nine feet over a break at Waiwick; Calverthorpe, thirty-three fee over hurdles at Newport Pagnell; King of the Valley, thirty-five feet over the Wissedine brook, Leicestershire: Lottery, thirty-four feet at Liverpool; Peter Simple, thirty-seven feet at Bos-

A Honest Man.

A gentleman stopped his horse at a tollgate, and not seeing the gate-keeper, went into the house. Finding no one, he began a general search and finally discovered the gate-keeper out in the field at work. Although the old man was quite a distance away, the gentleman went into the field, approached the old man and said:

"You are the tollgate keeper, I be-

"Yes, sir," the old man replied, turning and leaning on his hoe handle. "Well, I want to go through the

"Ain't the gate open?"

"Yes." "Well, why don't you go through?

It's my business to be there." "Because I wanted to pay you." "And you came all the way out here

to pay me five cents?" "Yes, sir," said the gentleman, proudly looking the old man in the eye.

"Couldn't you have left the money on the table?"

"Yes, but I wanted you to know that I paid you."

"You are an honest man." "Yes, sir," replied the gentleman. while a pleased expression spread over

"You would have walked three times as far to have paid me that five cents,

wouldn't you?" "Yes, sir, I would."

"Here, John," the old man called to a boy that lay in the shade, "call the dog and go along and watch this feller till he gets away. Bet a hundred dollars he steals something 'fore he leaves the place."—Arkansas Traveller.

An Unsophisticated Way.

Any Esquimaux asked to undertake a journey or perform a labor he does not like does not declare that he is not at home, but he has a precisely similar formality adapted to his own circumstances. He does not like to tell the stranger proposing to him that he does not wish to go, or that the pay is not sufficient, or, in short, that he will not go; but he says, "I have no boots." This is not to be accepted as a hint that a pair of boots would be an acceptable present; it is merely a polite refusal, and in strict politeness must be accepted as unhesitatingly as our own "Not at home."

FOR THE FARM AND HOME.

Hot Bath for Insects.

A German method for destroying thrips and red spiders is to have a large vessel filled with clean hot water at a temperature of 133 degrees. The infested plants are dipped into the water for the space of four seconds when the insects will be killed, and no damage result to the plants; it is best not to continue the immersion longer than the time noted. If afterwards a few insects appear that have developed since the operation, it may be repeated. The temperature of the water should be watched and not allowed to fall below 122 degrees. It is said that even young shoots and flower buds will not suffer in the least from this treatment .- Vick.

How to Feed Meal to Cows. It is a matter of some importance, says a writer in the New England Farmer, how meal is fed to cows. Owing to the peculiar structure of the cow's digestive organs, when meal is fed alone, instead of going into the first stomach where the hay goes and remaining until it is remasticated, it goes directly to the third and thence to the fourth stomach. The consequence is that the meal is not subjected to the softening process which the hav undergoes, and which would render it more easily digestible. Where considerable meal is fed a portion of it is liable to be imperfectly digested and thus occarions loss. By wetting the meal and may and mixing them together before feeding, the meal will be eaten along with the hay and will be subjected to the whole digestive process. It is believed that by thus feeding the cows, more meal can be digested without disturbance of the digestive organs, and, consequently more milk obtained than by feeding the milk separately. This is a matter worthy the consideration of those who feed dairy cows.

How Butter May be Spoiled. Good butter may be spoiled in churning. Over-churning rains the texture and changes the proper waxiness to a disagreeable, sickly greasiness. This is the more easily done in a churn with dashes, which press the butter against the sides of the churn and squeeze and rub it until it is spoiled. Too long churning spoils the Catechisms were compiled in the quality by the oxidation of the butter, eighth or ninth century; Luther's and the premature formation of strong were published 1520 and 1529. The flavored acids in it, the full presence of which we call rancidity. It may be spoiled at too high a temperature, by which it is made soft and oily and of greasy texture and flavor. No subsequent treatment can remedy this error. It may be spoiled before the cream reaches the churn by keeping it long, or, what is practically the same, by keeping it in too warm a place; 50 degrees is about the right temperature if the cream is kept a week; if it is kept at 62 degrees three days is long enough. White specks are produced in butter by overchurning or by having the cream too sour. Either of these falts produces curd in the milk, and the small flakes of this cannot be washed out of the butter. So will the use of salt containing specks of lime which unite with the butter and form insoluble lime soap. White specks are covered up to a large extent by using good coloring, which is made of oil as the solvent. But this use of coloring being used to disguise a fault and to add an undeserved virtue is worthy of depunciation .- American Dairy-

Budding and Grafting

An address read by A. F. Barron before the North of Scotland horticultural society, is published in the London Garden, occupying several columns. It contains a statement of many interesting facts, but some of its statements, not being of universal application, may be modified. One of these is that "in strong calcareous soils dwarf stocks for fruit trees do not succeed." In this country we have never had better success with dwarfs than on strong calcareous soils, good cultivation being given. Another is that "peaches worked on the plum are far more hardy and vigorous." We find otherwise. They grow slower on the plum, and so far as this retarded growth exists, with its earlier ripening of wood, the trees are slightly hardier, precisely the same as when the growth is reduced on poor soils or in uncultivated ground. Again, "a pear may be grafted on the apple, but does not live beyond a year or so." Some pears will live for several years; we have seen the old summer Bonchretien some twelve years or more grafted on a Spitzenburg apple, bearing well, and some other sorts several years. The same writer further states that a gardener grafted a certain pear on a common hawthorn, and "the fruit was very similar to haws." Obviously, he mistook a shoot closely below the point of union for one above it; or else inserted by mistake one of the shoots he had just trimmed from the hawthorn. We have known both these mistakes committed by men usually careful.-

A New Use for Sawdust.

A writer to the Home and Farm, Kentucky, makes mention of the use of sawdust in planting potatoes, and asserts that the product where sawdust was used was twice as great as where none was used, and larger and smoother. It was not stated whether the sawdust was used as an absorbent.

was mixed with manure, or was used as it originally came from the saw, which would make considerable difference. Neither was it stated how much was used in the hill, nor whether the sawdust was from hard or soft wood, all of which are very important considerations. But it is hardly probable that this article in its native state will be used very extensively as a fertilizer until more is known about it, although if as stated, the yield of potatoes can be doubled by its use, at the present time, when there are so many portable mills at work in the general destruction of the forests of New England, and sawdust is accumulating in quantities, if it can be utilized as profitably, it certainly should be done.

Within a few years farmers in Columbia, Ct., have been in the habit of carting from a permanent saw-mill the sawdust that accumulated, using it as an absorbent and for bedding purposes, but no claim has ever been made, nor has it been suggested, that of itself it possessed any agricultural value further than its absorptive power, but that it exerted a remarkably beneficial mechanical effect upon the manure with which it was incorporated, so that it very much aided its disintegration or pulverization, a thing that is always desirable. Sawdust is a substance that is useful to the farmer in the office it performs as an absorbent and disintegrator, and also in the use that is so satisfactorily made of it for packing around the ice of an ice house, but its further use has not yet been satisfactory proved.

Taking Tea with the Japanese.

Says a traveler: "The great peculiarity of this tea drinking ceremony consists in the exactness with which everything is done. A spoon, cup, or whatever is handled, has to be taken hold of in a particular way, set down in a particular place, and touched in a particular part, and everything is done with the same strange precision. What I saw was part of the ceremony of 'thin tea drinking,' and part of the ceremony of 'thick tea-drinking,' but the whole is simply a lesson in those laws of politeness which were formerly so rigidly exacted in every mansion and on every state occasion; and which are still largely kept up in the houses of the old aristocracy. Originally, the ceremony was of a secret character, and no servant entered the house in which | since it was built. it took place—the master kindling the fire, boiling the water, making the tea, and, in short, doing everything for the guests; but in later years it has become a mere ceremony of an extremely fashionable character. One or two things in this service struck me as especially strange. Thus, both host and guests knelt from the time they entered the building till the time they left it; and even when the master had to go to a little back room to fetch water, cups or whatever else he might require, he shuffled on his kness to the slide which served as a door, and then, having opened it, shuffled through the opening till he was well on the other side, when he rose to his feet; but this he must not do while in the presence of his guests. The chief guest, moreover, is the spokesman for the company, and no word is uttered save by the chief guest or host during the service, be it ever so long. The chief guest also demands everything-thus he asks for tea and refreshments; but the particular moment at which each request has to be made is arranged by the code of etiquette. At opportune moments the chief guest also asks if he may look at the tea-caddy, a spoon, a bowl, or the teapot. Receiving the necessary permission, he shuffles on his knees to the place where the object demanded is, takes it, bows his forehead to the ground, then rising, touches his forehead with the object received, and begins to examine it. Looking at the tea-pot, he asks if it is silver; then, who made it; then opening it and smelling the tea, what tea costs per pound; after which inquiries he passes it to the next guest, and makes a remark to the host which should, if possible, be at the same time a compliment and a pun. After each guest has duly inspected the object, the chies guest shuffles again across the floor and returns it to its place. Objec after object is brought, examined and returned in the same manner."

A JOYFUL GREETING.

Hello! How are you? I am glad at last your eyes have fallen upon me. Now that we have met, pray cultivate the acquaintance, for it is my purpose to interest and serve you. Between you and I, though only a newspaper article, I am ambitious. a portentous message for all mankind, if i be cordially received, its import truly real ized and acted upon, I shall be considered world's benefactor. Could have no higher ambition you will admit.

A misanthrope of ample means deter mined to end his life by drowning himself. Going to the banks of the canal, found the time not favorable for the purpose, a number of persons being in the vicinity, and day light still present. He concluded to walk along the towpath until it was dark. doing so, he heard piteous cries issuing from the door of a hovel near by, and unconsciously walked over to the place, and found a poor family consisting of a mother surrounded by several children, who told him of their sufferings for food. He took from his pocket his wallet and handed it to the woman, reasoning with himself that he would not need it. The grateful thanks and praises that he received from the recipients of his bounty awoke emotion in his breast, of such a pleasurable character, that he changed his suicidal intent, and decided to live for others. His future life became replete with good deeds-many a dark home and heart were made bright by his presence.

Well, my appearance in these columns, springs simply from a desire on the part of those I represent, to benefit your news-de vouring race. My province is to help you, your friends, your relations, aye, even your mother-in-law, if that interesting lady be not already far beyond the pale of good influ-

Dr. Pierce's Golden Medical Discovery.

This remedy is a medicine, not a beverage and is to be taken according to full and perfeetly plain directions accompanying each bottle. It is specific, but not a patent medicine, and contains no vile narcotics or viler quor. It is a prescription used for years by the well-known physician, Dr. R. Pierce, of Buffalo, N. Y., whose name is household word in innumerable homes all over our own and foreign lands. Golden Med.cal Discovery is prepared and offered to the public by the World's Dispensary Medical Association, a body corporate, existing by and under the laws of the State of New York; its president is Dr. Pierce, the great specialist in chronic d seases. The loctor has devoted the best years of a very busy and wonderfully successful life to the relief and cure of his suffering fellow menand at a time when high po broadly open before him, Dr. Pier e resigned his seat in the Congress of the United States, simply from a sense of duty toward others. His associates in the great sanatarjum represented to the doctor that the imbusiness of their association demanded that his personal attention should be paid to the great army of patients crowding upon them from every clime. Dr. Pierce is also the founder of the Invalids' Hotel at Buffalo, N. Y. This establishment, possess ing all the comforts and luxuries of class American hotel, has in addition the daily attendance of a large faculty of eminent specialists, whose practice collectiey cover the whole field of surgery and chromic The laboratory in which Dr. Pierce's Golden Medical Discovery is preared is an object of interest and wonder. It has a frontage of one hundred feet, a depth of one hundre 1 and twenty-five feet, and is six stories high. In this mammoth and palatial workshop two hundred persons are constantly employed in putting up Dr. Pierce's Medicines.

While the Golden Medical Discovery's curative effects are almost immediately felt, it is not merely a temporary stimulant, but is as certainly a safe and complete cure, in all cases for which it is recommended, as it is that certain misery and death will follow their neglect. Dr. Pierce's Golden Medical Discovery will not cure club feet, will not refurnish armless or legless unfortunates with new and perfect limbs, and it is not guaranteed that even a dozen bottles applied to any stray portion of a second hand skeleton, will develop such member into an animate, human form divine (?). In brief, it is not asserted that this medicine will, or can, counteract the decrees of Providence. in all cases where a high state of civilization and cultivation has engendered disease and suffering, whereby God's natural man has become a nervous, artificial being, the Golden Medical Discovery will positively restore to him the strong, vigorous, self-asserting life, from which, almost unconsciously, he had drifted far, and perhaps hopelessly away. It is claimed, and guaren eed, if this medicine be used as prescriped, and faithfully persevered in a reasonable time, it will permanently cure liver complaint, and the various blood disorders consequent upon torpor of the liver, in all their various forms and

ramifications, including bronchitis, consumption, which is scrofula of the lungs, dyspepsia, costiveness, sick-headache, skin diseases, fever and ague, malaria, and other disorders arising from poisoned or deteriorated blood. This wonderful medicine cures all humors, from the worst scrofula to a common blotch, pimple or eruption. Erysipelas, salt rheum. fever sores, scaly or rough sk n, in short, all diseases caused by bad blood, are conquered by this powerful, purifying and invigorating medicine. Great eating ulcers rap d'y

inder its benign influences. Especially has it manifested its potency in curing tetter, boils, carbuncles, scrofulous sores swellings, whi e swellings, goitre or thick and enlarged glands. Consump ion, which is scrofulous d sease of the lungs, is promptly and positively arres'ed and cured sovereign and God-given remedy, if taken before the last stages are reached. For weak lungs, spitting of blood, sumptive night-sweats, and kindred affections, it is a sovereign remedy. For indigestion, dyspepsia and torpid liver, or "bil-Golden Med cal Discovery has no equal as it effects perfect and radical cures. To al suffering from lassitude, weariness despondency, lack of vigor or ambition, be it man, woman or child, Dr. Pierce's Golden Medical Discovery will speedily impart new tone, vigor and life to the whole system. The haggard face will grow round, ruddy, and beam with the expression of long lost confidence. The step will be firm and elastic, and the relieved sufferer will once more enjoy in common with fellow men that feeling roprietorship in earth, air and being, only fully realized by those in perfect health. The Golden Medical Discovery will not

make drunkards or opium eaters; on the contrary, any unfortunate, driven by tro ble, ad ersity or inherited appetite, to the use of insidious stimulants, will find the Discovery of great assistance in efforts to break the chains binding him to a shameful and miserable existence.

Those feeling only "out of sorts," with no predominant symptoms, and who, if asked, would find it difficult to explain their sensa tions, will find a sovereign remedy in the Golden Medical Discovery. Those who are irritable, petulant, or fret-

ful, ever seeing the gloomy side of life; who imagine "the time is out of joint;" to whom life is a heavy burden, not a bles think the whole world is arrayed a jainst them, and anticipate calamity at every turn; to all such let this message be full of encouragement and joy—Dr. Pierce's Golden Medical Discovery will radically cure them, when it will be found, to their lasting benefit, that line and the world have not changed, but that disease had thrown clouds of misery and woe about them, through which all things were seen, as "through a glass

Let no sufferer be discouraged because he or she has tried other medicines without benefit. In fact, these are the cases the

World's Dispensary Medical Association particularly desire to reach through their Dr. Pierce's Golden Medical Discovery. When all other medicines fail let this be tried and no one will be doomed to further disap-

intment. The Golden Medical Discovery is a pre cription of a physician with a wide-awake reputation and an honorable position to maintain. It is far beneath the dignity of Dr. Pierce to lend his name to any vile nos rum, or catch-penny preparation, whereby public may be deceived. Having used his Discovery for many years in his unprecedented private practice, he is convinced is indeed a specific in diseases mentioned Desiring this marvelous cure shall benefit not only those with whom he comes person ally in contact, but that all mankind may be embraced in his grand plan for the ameliora tion of human sustering, the doctor, through the World's Dispensary Medical Association earnestly and most confidently recommend his G lden Medical Discovery to the publi at large, assured the most skeptical will be thoroughly convinced of its worth by a trial

In stubborn, or long-seated affections, and

of a single bott.e.

where the bowels are very costive, the gentle, though certain action of the Discovery, will be more rapid and satisfactory by supple ing Dr. Pierce's Pleasant Purgative Pellets in small daily doses of one or two. Thes pills (the original and only genuine Little Liver Pilis) are purely vegetable, sugarcoated, and very small, yet by the peculiar process used in their preparation, they pos sess the strength and virtue of larger and inpalatable pills. Pleasant Purgative Pellets will speedily remove all ill and disagreeable effects ar sing from over-eating or drinking, and are recommended as a ca thartic at all times, being perfectly safe, sure and unattended by the griping pains usually experenced in the use of purgatives less carefully prepared. Promptly resorted to, these little Pellets will radically cure indigestion, biliousness and sick-headache, thus saving the patient from serious and lingering disorders. Dr. Pierce, the President of the World's Dispensary, and his faculty of twelve skilled specialists, can be consulted by letter or in person in any case of chronic disease requiring either medical or surgical treatment free of charge. For those desiring more exhaustive information than can be mparted through correspondence, the docto as written a book, called "The People's common Sense Medical Adviser, in Plain

English; or, Medicine Simplified." This work alone is a good'y harvest for an ordinary life, and stamps its author a profound scholar and a very remarkable The book contains nine hundred and twenty two pages, illustrated with two hundred and eighty-six wood cuts and colored plates, and makes plain as a, b, c, anatomy, physiology, materia medica, practice of medicine, ygiene, temperaments, psychology, e.c.and answers in plain, easily-to-be stood terms all questions that may arise within their range, especially those ques-tions the wou d-b inquirer is deterred by fear, or modesty, from asking the family or other physician. That all may be enabled to acquaint themselves with matter so vital to ealth, happiness, and success, the price of this great work has been fixed at one dollar and fifty cents, postpaid by mail to any ad dress, while smaller and far inferior books purporting to cover the same ground, have sold at five dollars a copy. It being the aim of the proprietors of the Common Sense Medical Adviser to reach not only the affluent, but also those in moderate, and ever straitened, circumstances, the price of the work places it within the reach of all.

President. An Internal Revenue Officer Saved.

DEAR SIR-During my term of service in the Internal Revenue Department of the United States, at the time my office was in this city, I was afflicted with a seven attack of kidney disease, and at times suffered intensely received the medical advice of some of our best physicians for a long time, without being benefited by then prescriptions. Being discouraged by the failure of the doctors to help me, and being urged to use Hunt's Remedy by a friend who had tested its merits, although reluctant to try a patent medicine. I was finally induced to try the Remedy, and procured two bottles of it, and enced taking it faithfully according to the dire ions. Before I had taken it three days the excruciating pains in my back had disappeared, and before I had used two bottles I was entirely cured. Whenever, from ove exertion or a violent cold, the pains in my kidneys ret a few doses of Hunt's Remedy quickly effects a cure. Before closing I beg to mention the remarkable cur of a friend of mine in New York City, to whom I recon mended this valuable medicine. He was suffering severely from an attack which was prophysician a decided case of Bright's Disease of the Kid neys. I obtained two bottles of Hunt's Remedy for him, and he commenced taking it, and began to impre at once, and was speedily restored to health, and attributes the saving of his life, under the blessing of a merciful Providence, to Hunt's Remedy.

Another friend of mine in New York, to whom I re mended Hunt's Remedy, was suffering severely from this wonderful medicine only a short period. Feeling deeply grateful for the great benefits expe enced by my friends and myself from the use of Hunt's Remedy. I feel it to be my duty, as well as a great privi lege, to furnish you this voluntary and unsolicited statement of facts for the information of your large number of readers, many of whom are undoubtedly suffering from this widely-spreading scourge, and I believe that it is the best medicine now known, and that it will cure al cases of kidney diseases that can be cured. I shall be pleased to confer with any one who may desire an interview regarding the statements herein

I had on a forefinger of my right hand one of those

nets a "run-round." The finger became inflamed to a degree unbearable and swollen to nearly twice its natural size. A friend gave me Henry's Carbolic Salve, and in twenty minutes the pain had so much subsided as to give me a fair night's rest, which I had not had be-fore for a week. The inflammation left the finger in a day. I consider it a most valuable article for the hou hold. Edouard Reintard, of New York, writes: It gives me great pleasure to say that a single box of Henry's Carbolic Salve effected a complete cure of Piles with which I had been troubled for over a year, and

IF FORESIGHT Were as good as hind sight how much trouble we poor misera e sinners would escaps! W. H. Casey, of Smithsville, Va., writes to Dr. T. H. Southall, that he was sick with a terrible cold and cough all last winter and got no relief until he commenced taking New Life, the Great Cough, Remedy. The same medicine also cured Mr. Casey's neighbor

"They tell me you had some money left you," said Brown. "Yes," replied Fogg, sadly, "it left me long ago."
