And other sneezy things. And when, their labor done, they took Their tea and toasted bread, "Why, where is kitty?" some one asked, And "I know," Lulu said; "She's in my dollie's biggest trunk; I brushed and beated her; Det into her nice fur.

There can' not any moths, I dess, She scratched my finders when I put The camphor snuff about. Div' me some toast that's buttered frew," They left it all to her and flew To let poor kitty out.

-Harper's Young People.

The Little Cookle Boy.

Abbie's mamma made a little cookie boy. He had a head and body, legs and arms. She made two little places for eyes. Then she put him in the oven, with some other little cookie boys, and baked them all to a pretty brown

Our little cookie boy was taken out of the oven and laid upon the table. the question could not get out.

He wondered next whether his hair was curly like Abbie's auntie's. He tried to feel, but Abbie's mamma had forgotten to give him any elbow joints, or make his shoulder blades loose. He tried to get up, but, poor fellow, he had no knees or hips. All he could do was to lie still and look around and wonder what he was made

While he was wondering, Abbie's mamma took him and tied a blue ribbon around his neck. She hung him up on a green tree, with little lights shining all over it. It was loaded with pretty things. He now began to feel quite vain. He thought he, too, must be very beautiful to be put

One by one the things were taken off the tree. Little faces grew brighter as the little arms became fuller. At last our little cookie boy was taken She soneezed him so tight that he wanted to scream. He did not think she meant to kiss him, but she did put him toward her mouth. He did not know what to do. He could not faint or turn pale, he was too brown. He could not get away for he had no joints. He was looking at the rosy little mouth so near him. He saw one of his own brown arms go into that mouth. Then he saw the other arm go in. He wanted to cry. Before he had time to be sorry that he could not, his head was popped into the mouth. He knew no more. The little rosy-lipped girl thought he was the best cookie boy she ever ate. My advice to mammas, when they make little cookie boys, is not to give them any eyes. Then they need not look on and see themselves

Contrary Billy.

Billy was a peddler's horse. Every day he drew a large wagon along the country roads. This large wagon was loaded with tin and brooms. It was a heavy load to draw. He stopped at all the houses, so that his master could sell the brooms and tins. One day after he had trotted along for several miles, Billy stopped where there was no house in sight.

"Go along!" said his master. "I won't!" said Billy.

This is the way Billy said "I won't." He set his fore feet out. He laid back his ears and shook his head. His master got out of the wagon

and patted him on the neck. Billy would not stir. He moved all the harness here and

there, and patted him more. Billy would not stir.

He talked to him in a very pleasant

But Billy would not stir.

What was to be done? The peddler wished to sell his brooms and tins, and go home to supper. But he could not do this if Billy refused to do his part. He went to the back of the wagon. A gentleman who passed by thought he was going to whip the horse with some heavy thing. Instead, the peddler took a pail from the wagon. There was some meal in this pail. He ed in groups on the shore. Just at showed this to Billy, then he walked sunset, the sea suddenly began retreaton and set the pail down.

Billy could see the pail. Pretty soon Billy lifted his ears. He looked very good-natured. He went forward to the pail.

Then his master let him eat the meal. Then he put the pail back in the wagon, and Billy trotted off brisk- and broke with a noise as if a mountain

the whip.-Little Folks' Reader.

every morning is all that is needed to ed in the bay. The tidal wave dashed set the trap again."

TOPICS OF THE DAY.

Mr. J. K. Parkinson, of Cincinnati, who was recently admitted to practice in the supreme court of the United States, is probably the only deaf and dumb lawyer ever admitted to that court. He has had an extensive prac tice as a patent lawyer, and is said to be both accurate and ready.

A few years ago a chimney made of paper would have seemed a preposterous absurdity. Yet a chimney of paper pulp, fifty feet high, has lately been put up at Breslau, in Germany. Compressed paper pulp is one of the least inflammable of substances, and is now generally recognized as superior to iron as a material for fire-proof doors.

The combined efforts of four policemen were recently required to carry into the House of Commons a petition in faver of closing public houses on Sunday-one of the largest documents of the kind ever presented to Parliament. It contained 590,332 signatures upon a continuous roll of paper, which was 4832 yards long and weighed 350

> Oleomargarine, it seems, is not the only or the most disagreeable imitation of butter which finds a place in the market. There is an abomination called "sucine," made from the fat of hogs, which was the cause, not long since, of prostrating an entire family at Cleveland with trichinosis. The proper punishment for the vender of such an article would be to compel him to eat

It is estimated that nine-tenths of all the mercantile failures of the United States are due to speculations in affairs outside the particular lines of business in which those who fail were engaged. This looks like an exaggeration, yet the percentage is known to be very large. In the haste to be rich, men make hazoff and given to a merry little girl, ardous adventures, and, if unsuccessful, find themselves so crippled that assignment is inevitable.

An investigator into the influence of climate upon consumptives, says that, in choosing places of residence for such patients, too little attention is given to the character of the soil. It is shown that, other things being equal, the prevalence of the disease is in proportion to the habitual dampness of the earth. The atmospheric conditions to be sought for are "rarity, calmness, purity and sun warmth."

The French do not seem to be troubled with scruples against vivisection. In Paris, not long ago, a professor of natural history announced that he intended to make some experiments on quivering flesh. For this purpose he procured a rabbit, skinned it alive, nailed it on a board by the" paws, and proceeded to cut holes in the wretched animal by way of illustrating his theories. This sickening exhibition took place before a class of young girls.

A Tidal Wave.

At 5 o'clock on the morning of May 10, 1877, a cry of terror from the beach of Hilo, Hawaii, roused the sleepers on the hill. They rushed down to meet half-drowned men, women and children, running from their ruined homes. A tidal wave had overwhelmed several hundred houses and swept away fifty. A little church stood on the beach. The wave moved it inland two hundred feet, scarcely injuring a timber, but tolling its bell as an accompaniment to its own angry roar. Several weeks after, news came that there had been a severe earthquake at Iquique, Peru, at 8 o'clock on the evening of May 9th. As the distance is about eight thousand miles, the tidal wave had travelled that distance in nine hours. Miss Cummings, in a recent work on the kingdom of Hawaii, describes the remarkable tidal wave which rolled on the beach at Hilo,

November 7, 1837. She writes: At Hilo ten thousand natives, who had assembled for religious instruction, were either resting at home or gathering from the beach at the rate of five miles an hour. The natives rushed in crowds to see the strange sight, when suddenly a gigantic wave formed and rushed toward them with an appalling roar. Rising twenty feet above highwater mark, it dashed into the village had fallen. Then arose wails of an-The meal was better for Billy than guish. WORD BLINDNESS.

A Remarkable Medical Case. Defective

Speech From Defective Memory. Dr. A. D. Williams described at a meeting of the St. Louis medical society, a case of aphasia which had recently come under his observation, and it is generally acknowledged that the case is one of the most remarkable ever put on record. John McWilliams, a whitthis extraordinary attack. McWilliams came to the free dispen-

sary to be treated for a supposed ail-

before, during the very sleety weather, he fell on the sidewalk at the mouth of the alley in which he lives striking the whole of the right side of his body and especially his head, at once. There were no symptoms to speak of at first, but he felt faint and weak. He went into the house, and felt some trouble in his left side, the force of the shock having been transmitted and caused a contra-coup. Even now that side seems the most affected. For two or three days he did not know that any ill result had followed, until he was doing a job of plastering on a porch, when he discovered that his sight was defective in some way. He wished to put a piece of plaster on a certain spot above his head, but could not succeed. He could see the plaster well enough, and the spot of ceiling, but when it came to combining the two he failed, always striking some other spot. Returning home he further found that he could not call his wife and son by their Christian names. There was no paralysis, but a weakness of the body. He could generally say what he wanted if time were given him, and he understood everything that was said to him, and could repeat any word that was suggested. Another feature of his case was that although he was a man of considerable education, he had forgotten how to write or to read either written or printed words. When he was sent to Dr. Hazard, that gentleman tested him by pointing to the word "surgery" in large capitals in a medical journal, "Do you know what that is?" "Oh, yes." "Spell it then." 'B-e-" "Oh, no! - s-u-1-g-6-r-y." "Why, yes, that's surgery." Then the doctor bade him try again, but again he misname I the letters. He did not seem to connect any meaning with the forms. Again he could not locate objects correctly with the eye. Were a chair pointed out to him he would recognize it immediately, but if started on a line toward it he could not turn out of course, and would infallibly walk into it. He could not lift his finger up and touch his eyeball; he would always strike to the right or left of it if he watched the finger. With his eyes closed, however, he could readily place his finger on them. At first he thought there was some trouble with the eveball, and that was

It was, however, deflected somewhat out, the nerve that holds the eye in place having been jarred by the shock. The case was entirely one of amnæsic aphasia, defective speech from defective memory. There were two kinds of it. In one the centers concerned in hearing were affected; in the other, as McWilliams's, those concerned in sight were impaired. His was an extraordinary example of word blindness. In ordinary ataxic aphasia the patient knows only a few things by the same name, but he is able to write and understand anything written or print ed, and so convey his ideas. McWilliams was in a situation just the converse of this, and his intellect must be deeply affected.

why he called on Dr. Williams; but

the orb was found perfectly natural.

He Smashed Their Idol. A series of revival meetings was in progress, and the subject on one evening was the book of Ruth. Among the congregation was a brother whom the sisters delighted to hear. His language was always flowery-grandly eloquent. Waiting for his chance, he at length arose and said: "Brethren and sisters, the subject this evening is the book of Ruth. And do you know that I never turn to the book of Ruth without a thought coming to my mind that there it lies, like a beautiful jewel, between the ermine of the Judges and the purple of the Kings." Such an exquisite thought did not fail to have its effect upon his admiring hearers. Later in the evening an elderly clergyman came in, and, after listening to the remarks for some time, arose and said: "My friends, whenever I turn to the book of Ruth, I am always reminded of that beautiful quotation from Taylor, that it lies, like a lovely jewel, between the ermine of the Judges and the purple of the Kings." And he sat down, blissfully unaware of the idol he had smashed.

A REMARKABLE STORY.

The following narrative is self-explanatory The letter which precedes it is a true copy of the original, and was sent to us, together with the details, by an officer now in the United States Navy.

United States Flagship Nomad, Navy Yard, Boston, Mass., January 10, 188-.

My dear Friend-Your kind favor containing congratulations on my restoration to health is before me. When we parted thirty months ago little did we imagine that either would be brought near death's door by a disease which selects for its victims those who present an internal field of constitutional weakness for its first attack, because you and were in those days the personification of ealth-and can claim this to-day, thank God Why I can do so will be told to-morrow, when we meet at your dinner, as you only know that I have passed through a terrible illness my delivery from death being due to the wonderful discovery in medical science, made by a man who to-day stands in the front rank of his fellow workers-unequaled by any in my own opinion. That I, who eretofore have ever been the most orthodox believer in the old school of medicine, its application and results, should thus recant in favor of that which is sneered at by old practitioners, may startle you, but "seeing is believing," and when I recount the attack made on my old hulk, how near I came to lowering my colors, and the final volley which, through the agency above mentioned which, through the agency above mentioned, gave me victory, you will at least credia me with just cause for sincerity in my thankfulness and belief. I will also spin my yarn anent my China cruise, and altogether, expect to entertain as well as be entertained

by you. With best wishes. Sincerely yours,

Rear Admiral U. S. Navy. Hon. GEORGE WENDELL, Sinclair Place, Buston

An autumnal afternoon in the year 188found the taut flagship Nomad rounding the treacherous and dangerous extremity of South America. And this day certainly in tended to place itself on record with those of its predecessors marked stormy, its nastiness in wind and weather giving all hands on board the flagship their fill in hard work and discomforts. The record of the Nomad on this cruise, which she was now completing on her homeward bound passage to Boston, had been most disagreeable, when considered in the light of heavy weather work. From Suez to Aden, then on to Bombay, Point de Galle, Singapore, Hong Kong, Shanghai, Nagasaki and Yokohama, the balance sheet stood largely in favor of old Neptun 's rough characteristics, but with remarkable evenness the health and original roster of the ship's company stood this day as it did nearly three years ago-with one exception. Throughout the diverse and varied exposures incidental to cruising over the Asiatic station, where cholera, fevers, liver complaints, malaria, and colds of all egrees reign in full force, none of the crew had suffered more than temporary inconvenience, and thus it seemed very hard that now, in the closing days of the cruise, the te stood nine chances for, to one against, a victory being at last scored for the destroying angel Death. When the Nomad reached Shanghai in the early portion of her cruise ner admiral was the healthiest man aboard. A grand specimen of manhood was he. Over six feet in height, weighing two hundred pounds, broad in chest and strong in limb, he rightly claimed for himself a full share of lature's blessings. While returning late one night from a diplomatic reception at the Consulate at Shanghai, through overheating and insufficient protection from the dan-gerous effects of the peculiar damp and sea ching night air, he caught cold. "Only a cold," remarked the admiral to the doctors of his ship, "and easy to cure." So though! the medical officers, but with a quiet though insidious progression, this cold clung to the admiral in spite of their best efforts to eradicate it, and when the time came for leaving Yokohama, homeward bound, the admiral realized that his lungs and throat were decidedly out of order. The doctors advised returning home by mail steamer to San Francisco, so that greater means for curing this persistent cough might be found in the Naval Hospital there; but the admiral preferred to stick to his ship, still imagining that his trouble would eventually be overcome by the doctors' treatment.

No one who looked at the admiral even in those days imagined that he would fall victim to lung trouble. But it was the old story again typified in this case. Only a cold at first; and in spite of orthodox treat ment the peculiar climatic effects of China nursed it, and hastened the sure result of such a deep-seated trouble. Time passed after leaving Yokohama for Boston, bringing varying symptoms in the admiral's case, and the doctors imagined that they held the disease in check at least. But with the formation of tubercles, night-sweats and the now rapid consumption of lung tissues, which had set in with alarming symptoms, the pa-tient realized that his cold had laid the seeds of that fell agent of Death, consumption e hacking cough of the admiral had in itself been sufficient food for serious consid eration, and now, as in the warm autumn days the flagship gallantly rode over the blue waters of the Pacific, bound for Cape Horn, the doctors hoped much for success But this boisterous afternoon found the good ship struggling with gigantic seas set off from the Cape by a fierce northerly wind. Leaden were the heavens and sad the hearts of all aboard, for that morning the usual bulletin of the medical officers had set forth this intelligence: "The admiral is in same condition as reported last night. A burning fever has been slightly reduced while other symptoms are as heretofore an nounced." All understood these words without questioning. The beloved admiral had during the past two weeks sunk very low. The symptoms of blood-poisoning, a torpid intense pains throughout the body, eyesight and mental faculties affected, appetite gone, through inaction of that great reg--the liver. These were the means which had reduced the admiral from the pinacle of health to the valley and shadow of Consumption held full sway now, and the well-known skill of naval doctors

was in this instance at least completely The admiral had issued orders for the flag ship to touch at Montevideo for coal, and it was the intention of the doctors to land the admiral there for treatment. But one man in the ship was wrapped in the gloom of despair, as standing by the weather rigging on poop deck he guzed absently over the seething waste of waters. This was the admiral's son, a lieutenant, and attachel to his father's staff. He feared that the wear and tear of ship life would sap his father's strength beyond endurance, and before the nip could reach Montevideo. Among group of sailors gathered around one of the great guns on the spar deck stood the captain of the foretop, Brown, a slight but healthy-looking man, His companions were listening to a recital of his sufferings from consumption, which had developed while he was attached to the sloop-of-war Ranger, lying in the harbor of Yokohama a year ago, this "yarn" having been started by a discussion about the admiral's condition. The menhad just returned from some work around the deck, an order for which had interrupted Brown's story a few moments previously. "A year ago this day I was hove to in the 'pill man's' sick bay in the Ranger, then off Yokohama, an' I tell you, pards, 'twas no use pipin' my number, 'cause I was nigh on passin' in my enlistment papers for a long cruise aloft," continued Brown. sumption had me flat aback, and the doctor says it was no use to stow away his lush in my hold seein' that my bellows was con-

demned by a higher power than he could wrastle with." "How did you pucker out of it?" asked gunner's mate. "Wa'all," replied Brown, "my Chinee washman came to me one mornin' an' he Fays to me, "me hab got allee same Melican man medikin, do you heap good!' I says, 'bring it off, Chang; I buy all the same.' That afternoon Chang hove up with fourteen bottles of a lush, enough to kill or cure the whole ship's crew, an' that looked fresh in their nice wrappers. Says Ching, 'China man doctor hab got plentee more, he make heap good well with my sick, this number one mediken allee same through Yokobama. Wa'all, I took the bottles an' told the doctor I was goin' to try one as by the sailin' orders on the bottle, and the docter he laughed and said 'twas no good, but I done as the regulations says from the first, an' here I

looked about the circle. Then, lowering his voice, said: "Boys, I've four of those precious bottles left—ain't give 'em all away yet after I was cured—au' if you a!l think that it would not be too free with the old man, suppose I go to his son there on the poop deck an' say what I have to you, an' askin' his pardon, say we want the admiral to try the stuff in my bottles, seein'

interview with the admiral's son, with no little anxiety in his good heart as to the re-sult of his mission. Approaching the lieu-tenant, Brown saluted, and asked for permission to state his reasons for doing so. This was readily granted, and Brown spoke

Seeing that I was once cured of consumption; lieutenant, I make bold to ask if I can tell you how, an' why I've the reasons for wi hing you to use on your father

what was my salvation. In a few moments the lieutenant had Brown's story out, and nuch to the latter's gratification, granted a ready permission to It did not take Brown long to run to his ditty box, get the bottles of medicine. and return to the lieutenant with them.

"I'm afeared that the doctors will kick the use of this blessed stuff, an' what will you do, sir," said Brown, as he placed the medicine in the cabin orderly's ands to be taken into the admi. al's room. "I will attend to that, B.own, and rest assured that your remedy will have a fair trial

in spite of any opposition. It will not harm my father, judging from your statement and the opinion of the Medical officers of the

Thank you, sir, an' God help the admiral to weather his trouble, is the prayer of all the ship," said Brown, as the lieutenant turned to enter the cabin.

There was no cessation in the storm that evening. The gale howled through the rigwild, discordant tones; the great ship abored through the white-capped tains of water threatened to engulph her with each burst of their storm-whipped Within the admiral's cabin the Argand lights, the comfortable furniture, and numerous evidences of the admiral's wanderings over land and water, as displayed in choice bric-a-brac and trimmings, gave to the room a warm, snug appearance, most pleasing this wild night to those within. In his stateroom lay the admiral, made comfortable by all that loving hands and willing hearts could suggest. By his side sat his server when it quiet waits was reconsting to son, who in quiet voice was recounting to his father the interview with Brown, and the opposition met with from the doctors when

the idea of giving this new medicine was "You were sleeping at the time, father, and therefore missed a laughable scene, made so, in spite of your condition, by the intense dislike displayed by the doctors for this 'new-fang'ed stuff,' this 'patent liquid,' which they declared with their consent should never be given to you. Well, I cut should never be given to you. the matter short by saying that I would take .. the responsibility, and with your permison would administer it. That I obtained when I found you awake, and now you are under way with the first bottle as per tions. I am satisfied, dear father, that it will do you good, a premonition filling my heart that at last we have found the means of arresting the burning fever and hacking cough which have been troubling you so

The admiral's reply was cut short by severe spell of coughing, during which he spat blood, and when finished sank back ex-But the grateful look which he bestowed on his son was an additional assur-ance of belief in that which the admiral had at firs. sight dubbed as a possible but doubtful means of doing him any good. But lay-ing aside his dislike for any but old-estabshed remedies, the admiral acquiesced in his son's request, and now, after this last pell, admitted that the effect of the doso nad softened the dreaded severity of the racking cough.

Three weeks later found the Nomad making the harbor of Montevideo. After severe und prolonged weather she had rounded the Cape and was now standing in the harbor for the purpose of recoaling and watering. To one given to the study of human linesments the faces of those aboard the flagship this bright morning would have afforded infinite scope for such pursuit. But the source of each man's happiness flowed from the same fountain of g a eful joy. The beloved admiral was the cause of this. And why? If you could have seen the admiral this bright morning, dear reader, your answer would have been easily found in his face. A Victory was perched changed man was he. on his guidons! the dread enemy was s'owly retreating! The fight was a severe one out with no cessation in vigilant action and careful application of the contents of forr bottles the admiral had turned the flank of consumpt.on, and was slowly but surely driving him off the field with a power which astounded the doctors and filled all hearts with joy and thankfulness.

What was this then that had won the victory for the seaman Brown, and was now leading the admiral's shattered forces to the same grand result? When asked this question by one of his officers on duty, in Montevideo, the admiral, slowly lifting his hand, replied, "I would that in letters of gold, and so placed that all the world could read them. the name of this great remedy could be shown, co'pled with the genius who discovered i.—'The Golden Medical Discovers'.
Dr. Pierce, of Buffalo, N. Y.,' the man who has given to his fellow men the greatest re-lief from all ills that mortal flesh is heir to!" This is the name of the contents of that bottle on my table, and God bless the man who has found the secret of filling it with a medicine at once purifying and strengthening, wholesome and thorough in its results, and claiming, in my humble opinion, nothing for itself that it cannot reasonably per form. Nature's ally against the abuse of

Well might the admiral sing the praises of that which had so unexpectedly rescued him from a fatal illness. When the ship anchored the first commission for the admiral's son to execute was a large purchase of Dr. Pierce's Golden Medical Discovery, which, as the admiral sadly admitted, he had seen in every port the world around and had only admired as an evidence of the energy and enterprise of an American who could thus place his Golden Medical Discovery in every nook and corner of the globe. But now he was one more to testify to the wonderful power of this medicine, and certainly did so in Montevideo, by praising it up to all the high officials who visited him.

A week later and the *Nomad* sailed for Boston direct. What the condition of the admiral was when she arrived there is shown in his letter above. Let it be recorded to the credit of the doctors on the flagship that they were completely cured of all dislike for the Golden Medical Discovery, used it faithfully on the voyage to Boston, and landed through its wonderful power, the admiral completely restored; and more than one poor fellow who started out in the sick bay of the What stanch friends the Golden Medical Discovery made in that ship!

The above, reader, is an outline of the story, sp in by the admiral to his friend when they met at the dinner. We will not touch on othe portions of his interesting recital of his cruise in general, our aim being to record his testimony for the greatest wonder in medical science that this nineteenth century of surprising developments has pro-

From the wonderful power of Dr. Pierce's Golden Medical Discovery over that terribly fatal disease, consumption, which is scrofula of the lungs, when first offering this now world-famed remedy to the public, Pierce thought favorably of calling it his "consumption cure," but abandoned that name as too restrictive for a medicine that from its wonderful combination of germ-destroying, as well as tonic, or strengthening, alter tive or blood-cleansing, anti-bilious, diuretic, pectoral and nutritive properties, is unequaled, not only as a remedy for consumption of the lungs, but for all chronic diseases of the liver, blood, kidneys and lungs. Golden Medical Discovery cures all humors, from the wo st scrofula to a common blotch, pimple or erup ion. Erysipe las, salt-rheum, fever-sores, scaly or rough skin, in short, all diseases caused by disease germs in the blood, are conquered by this powerful, purifying and invigorating medicine. Great eating ulcers rapidly heal under benign influences. Especially has it manifested its potency in curing tetter, rose rash, boils, carbuncles, sore eyes, scrofulous sores and swellings, white swellings, goitre or thick neck, and enlarged glands. "The blood is the life." The

cleanse this fountain of health by using Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, vital strength and soundness of constitution are

For weak lungs, spitting of blood, short breath, consumptive night-sweats and kindred affections, it is a sovereign remedy. In the cure of bronchitis, severe coughs and consumption, it has astonished the medical faculty, and eminent physicians pronounce am, ag'in the doctor's ideas, to be sure!'

With this triumphant assertion Brown

The nutritive properties possessed by cod liver oil are trifling when compared with those of the Golden Medical Discovery. It rapidly builds up the system and increase

The reader will pardon the foregoing digression, prompted by our admiration for a that they cured my consumption." remedy that performs such marve ous cures,
This idea met with approval from all and permit us to say that when the admiral sides. Therefore Brown walked off for an returned to his home in New York the only \$72 a week. \$12 a dzy at home easily made. Costly onthit free, Address Taug & Co., Augusta, Me

cloud east upon the happiness of the reunic with his family was caused by the continued illness of his el lest son, a young man of tenty-four, whose disease, when the adenty-four, whose disease, miral sailed from Montevedio, had been reported as succumbing to the treatment of the family doctor. But his father thought it otherwise; the unfortunate young man with suffering severely from chronic disease of the kidneys and bladder. Before leaving Boston the admiral had purchased a copy of Dr. Pierce's book, "The People's Common Sense Medical Adviser." He read this valnable book thoroughly, and upon his affival home had made up his mind as to the future treatment for his son. The latter was sent to the famous Invalids' Hotel, at Buffalo, N. Y., conducted by Dr. R. V. Pierce, and his competent staff of specialists, where, under skillful treatment, the sufferer soon found relief and a permanent cure.

Skeletons, supposed to be those of giants, have been discovered in a North Carolina

Rheumatism, disordered blood, general debility, and many chronic diseases pronounced incurable, are often cured by Brown's Iron Bitters

Four brothers named Burnett recently married four sisters named Berry.

Joplin, Mo .- Dr. J. B. Morgan, says: "I find that Brown's Iron Bitters gives entire satisfaction to all who use it.'

There are forty-nine female physicians in Brooklyn, N. Y. FAIRFIELD, Iowa.-Dr. J. L. Myers says:

Brown's Iron Bitters is the best iron preparation I have ever known in my thirty years of practice.

The idea that color cannot be distinguished in the dark is false: You may not be able to see but you can feel blue.

The Frazer Axle Grease. Is the best in the market. It is the most economical and cheapest, one box lasting as long as two of any other. One greasing will last two weeks. It received first premium at the Centennial and Paris Expositions, also medals at various State Fairs. Buy no other.
