good many playmates. While Nelly was there Emma had a tea-party and invited her little friends. Nelly enjoyed it very much, and after she went home wanted to have a party

"But," said her mamma, "whom will you invite?"

"Oh, I don't know," replied Nelly. "I can find somebody, I think. And I'll have my dolls.'

Nelly had three dolls-Maria Louisa, Victoria and Cinderella. Then she had a little dog named Frisk and three cats. Snowdrop was the mother, and Punch and Judy were kittens. Nelly thought that with all of them she could have quite a party.

F Her mamma gave her some cookies and milk. She picked a bouquet of daisies and buttercups for her table. Maria Louisa and Victoria were taking their afternoon nap when they were invited, but Cinderella was nowhere to be found. It took Nelly some time to remember where she had her last. And where do you think it was? Up in the old apple-tree! Then Nelly called Frisk and Snowdrop, and of course Punch and Judy came running

- So they went to Nelly's little playhouse. They all had to sit on the ground except Victoria, who had a high chair. They soon ate up the refreshments, and as only Nelly could talk, the party did not last long.

"Oh, mamma," said Nelly, "it was such a funny party; Frisk wanted all the cake, and while I was talking to Maria Louisa and Victoria, Punch and Judy drank up all the milk. Then poor Cinderella rolled down the bank, but Frisk brought her back again. Idon't believe Snowdrop had a mouthful to eat. And I'd rather have my supper with you."

"Well," said mamma, "now go put your dollies to bed and have a good run with Frisk. By the time you come back supper will be ready, and I'll tell you a story." -Our Little Ones.

Honorable Scars.

There is one member of the present United States government whose face is so scarred as to be pitiful to look upon; but the story of these scars is a record so honorable that no decoration of the Legion of Honor confers more glory than do these cruel seams and gashes.

When this man of whom we write was but a boy, he was sitting with his younger sister before the fire of a country house, where they were spending the Christmas holidays. Did a spark snap from the blazing wood that crackled so merrily upon the hearth? Or did some incautious movement on the girl's part bring her dress too near the blaze? At any rate, in an instant her clothes were all aflame.

The boy loved his pretty sister even more, perhaps, than most brothers do. He-was proud of her cleverness and of her beauty. Should the fierce flames scorch her life out before his eyes?

He caught a wrap from the sofa, a rug from the floor. He wrapped them round her and struggled for her life, so utterly forgetful of himself that, at the end, he was burned almost beyond human recognition, while on her fair girl's face the fire had left no mark.

And the boy was well content. "I am a boy," he said, "and it does not matter. She could not have borne it."

For a long time his life was despaired of, but at length the vital forces of his strong youth triumphed, and he went forth into the world again, wearing his scars for a badge of glory in the eyes of all those who knew the

He has made himself one of the men of mark of his generation. He has won love for himself and distinction and the fair repute of men. But of all the gains of his life, none do him such honor as those scars of his early battle.

The sister, whom he saved from the awful fate that threatened her, has won her own laurels also. She lives in Italy amid "the grandeur that was Rome," whence she sends to America some of the brightest and most charming work which our journals print.

She has a salon where you meet the men and women best worth knowing. Her life is happy and prosperous-but, for all its pleasures, she has to thank the scars which would make her brother's face unpleasant to look upon, did not the knowledge of how they were won make them his crowning glory .-Youth's Companion.

Cut Flowers.

One of the safest and best ways to send a few choice cut flowers to a distance is to cut slits in potatoes and insert the flower stems, taking care that they are firmly fastened in and supported by a little cotton or paper. An or dinary potato will keep most flowers fresh for two weeks or more in a modbe used in floral decorations through duty. -Cultivator.

SMUGGLING BY MAIL.

Devices Which the Custom Officers in the

Postoffice Have to Meet. "You will be surprised to hear of the curious assortment of dutiable articles that we intercept in the st amship mails from foreign postoffices," said Mr. William Freeman, who, with Mr. J. M. Wilson, has charge of the customs bureau in the New York postoffice. "The post is a favorite medium with persons in Great Britain, France, Germany and other countries for shipping presents to friends in the United States. The senders probably do not think of the duties to be paid when they forward their packages, but under the customs laws and regulations presents of merchantable value are classed as dutiable, like goods imported in the regular way. Tradesmen in London, Paris, Berlin and other European capitals use the mails pretty regularly to send samples and goods of small bulk to American customers. "Ladies find an easy, cheap and safe way of putting into letters and news-

papers articles of fashion, knick-knacks and mementoes from the Old World. The mails are also used for intentional smuggling, but it is sometimes difficult to distinguish between smuggling and legitimate importations. Diamonds, watches and precious stones and jewelry of all kinds are intercepted by the bureau. The supposed dutiable packages and letters are detained, and the persons to whom they are addressed are notified to appear and open them in the presence of the officers. Not long ago a package which was opened by a Maiden lane diamond dealer was found to contain several thousand dollars' worth of uncut diamonds. He paid \$800 on them at the custom house. There were also received packages of cat's eyes, rubies, cameos, intaglios, emeralds and sapphires sufficient to stock a good-sized jewelry

"Some of the queer mailable matter of dutiable value received in ludes jars of home-made German pickles, meerschaum pipes, bundles of cigarettes, packages of garden seeds, ladies' silk vests, surgical instruments, largesized paintings on tin from Italy, pedometers for pedestrians, hair nets, German cheese, architects' tools, fancy mats, mushrooms from France, picture frames, druggists' chemicals, shawls and valentines.'

"What class of goods constitute the bulk of the mail importations?"

"Books. They come in large quantities, and the greater part of the duties is collected on them. Authors, clergymen and other professional men are numbered among the consignees. The duty is twenty-five per cent. of the value. Books for educational institutions are a lmitted free where copies of the articles of incorporation are filed with the bureau. Books for addresses outside of New York are forwarded to the postmasters, with a printed form stating the amount of duties due, and the postmaster is requested to collect them and remit to the collector of customs."

"Can you tell me some of the devices for sending goods through the mails?" "Laces, kid gloves, silk stockings, silk handkerchiefs and other light articles are inclosed in newspapers and pamphlets. They are inclosed so it is hard to detect them. A pair of silver sardine tongs going to California was recently found hidden in a package of pamphlets. In an English newspaper were discovered lady's silk stockings, one black and one red. According to the revenue law these might be taken as samples and entered free. A trick was suspected, and the articles were detained. The next steamer's mail contained a newspaper a ldressed to the ame person. In it were folded one red and one black stocking to match the others. The lady to whom they were addressed was sent for and paid the duty."-New York Sun.

A Ceal Calculation.

An official statement shows that more than 154,000,000 tons of coal were taken out of the British mines last year, and in doing this vast work nearly half a million persons were employed. Sir Henry Bessemer has made the calculation that if this coal were formed into cylindrical columns of fifty feet diameter and five hundred feet in height, and if these were placed in a row, th ir own diameter apart, they would make a colonnade eightyfive miles and seven hundred and fifty yards long, the product of each working day being sufficient to make fourteen such columns.

Convict Printers.

The Bavarian government is about to establish an extensive printing office in the penitentiary at Nuremburg, and to have all the government printing done there. The Austrian Journal fur Buchdruckerkunst mentions that penal printing offices are carried on at Graz (Steirmark), at Prague, and at Brieg (Silesia). The employment is, however, limited to convicts who are printers by profession, with a single exception of one in the first-named prison, where the convict Tourville, who, it will be remembered, murdered his wife, an English lady, is employed in the composing department.

Withoft Limit. Dr. Thomas C. Pugh, of Baltimore, Md., business men, officials of corparations, attorneys and state officers, testify unqualifiedly to the magical effieacy of Dr. Worthington's Cholera and Diarrhea Medicine as the best, surest and cheapest cure in use, for all complaints of the stomach and bowels. None genuine without the name of The Charles A. Vogeler Company blown in the bottle and their fac-simile signature on each wrapper. Price 25 and 50 cents a bottle.

How to Keep a Store.

A new book is called "How to Keep a Store." It is a work of several hun dren pages, and life is to short to read it. The best way to keep a store is to advertise judiciously, and thus prevent it falling into the hands or the sheriff."

The largest mule in the world was recently sell at Kansas City. It was 183 hands high, w ighed 1.975 pounds, measured fifteen feet from nose to tail, and was six years old.

In ten years the wheat acreage of the United States has nearly doubled, 19,000,000 acres being the number reported at the beginning, and 36,000,-000 at the end of the decade.

A SCIENTIFIC DISCOVERY.

New and Most Important Theory on One of the Most Vital Questions of the Day.

If any one had informed Queen Elizabeth in her palmiest days that she could have been seated in her palace in London and conversed with Sir Walter Raleigh in his North Carolina home; receiving a reply from him within an hour's time, she would have declared it to be a miracle. And yet, had they lived in the present day, this apparent miracle would most readily have been witnessed and not seem at all strange or unnatural. The truth is, new principles are coming into existence, and the operation of many laws unknown in the past is being fully understood in the present. In no way does this fact come more forcibly to the mind than in the care and treatment of the human body. Millions of reople have died in past ages from some inignificant or easily controlled cause which thoroughly understood now and readily handled. Consumption during the entire past has been considered an incurable disease. And yet it is demonstrated that it has been and can be cured, even after it has had a long run. Dr. Felix Oswald has just contributed a notable article on this subject to the Popular Science Monthly. He regards consumption as pulmonary scrofula. The impurities of the blood produce a constant irritation in the lungs, thus destroying their de icate tis-sues and causing death. His theory shows conclusively that consumption is a blood disease. It has its origin primarily in a deranged condition of the kidneys or liver, the only two organs of the body, aside from the lungs, that purify the blood. When the kidneys or liver diseased they are in a sore or lacerated state, which communicates poison to every ounce of blood that passes through them. This poisonous blood circulates through the system and comes to the lungs, where the poison is deposited, onusing decomposition in the finely formed cells of the lungs. Any diseased part of the body has contaminating power, and yet the blood, which is the life of the system, is brought into direct contact with these poisoned organs, thus carrying contagion to al! parts of the body. Bishop Jesse T. Peck, D. D., LL.D., whose death has been so recently regretted, is reported to have died of pneumonia, which medical authorities affirm indicates a diseased condition of the kidneys. It is we'll known, moreover, that for several years he had been the victim of severe kidney trouble, and the pneumonia which finally terminated his life was only the last result of the previous blood poisoning. The deadly matter which is left in the lungs by the impure blood clogs up and finally chokes the patient. When this is accomplished rapidly it is called pneumonia or quick consumption; when slowly, consumption, but in any event it is the result of impure blood, caused by diseased kidneys and liver. These are facts of science, and vouched for

by all the leading physicians of the day. They show the desirability—nay, the necessity, of keeping these most important organs in perfect condition, not only to insure health, but also to escape death. It has been fully shown, to the satisfaction of nearly every unprejudiced mind, that Warner's Safe Kidney and Liver Cure is the only known remedy that can cure and keep in health the great bloodpurifying organs of the body. It acts directly may have formed in them, and placing them in a condition to purify and not poison the blood. This is no idle statement nor false theory. Mr. W. C. Beach, foreman of the Buffalo (N.Y.) Rubber Type Foundry, was given up to die by both physicians and friends. For four years he had a terrible cough, accompanied by night sweats, chil's, and all the well known symptoms. He spent a season South and found no relief. He says: "I finally concluded to try Warner's Safe Cure, and in three months I gained twenty pounds, recovered my lost energy and my health was fully restored." The list could be prolonged indefinitely, but enough has been said to prove to every sufferer from pulmonic troubles that there is no reason to be di couraged in the east, and that health can be resto; el.

Savings Bank Statistics.

According to the returns made to the commissioner of United States internal revenue, the great bulk of the savings deposits in this country is held by the banks in only twelve out of thirty-eight States of the Union. The following will show the amount of the deposits in each of those States as returned on May 31, 1882, and the population according to the United States

States.	Deposits.	Population.
California	\$ 46,132,843	861,694
Connecticut		622,700
Maine	25,729,790	648,936
Maryland	24,958,901	934,943
Massachusetts	252,000,519	1,783,085
New Hampshire		346,991
New Jersey		1,131,116
New York	376,637,163	5,082,871
Ohio		3,198,062
Pennsylvania		4,282,891
Rhode Island		276,531
Vermont	D' 201 4 HA	332,203
	D' 201 4 HA	332,

19,505,106 49,371,340 Total.....\$970,585,514 All the States..... 981,380,832 From this statement it appears that the banks in these twelve States, with a population in 1880 of 19,505,106, held \$970,585,554 out of \$981,380,832 of savings deposits in all the States of the Union on May 31, or very nearly ninety-nine per cent. of the whole. Assuming that the population was the same in May, 1882, as in June, 1880, which is near enough to the truth for the purposes of the present calculation, the deposits in the twelve States named averaged very nearly \$50 per head of population. The same average for all the States would bring the aggregate deposits up to the snug sum of \$2,465,-900,000 or about \$1,110,000,000 more than the total interest-bearing debt of the United States.

Head men--Phrenologists. A willing mind makes a light foot. The tongue is not ste 1. but it cuts. A Woman's Experience.

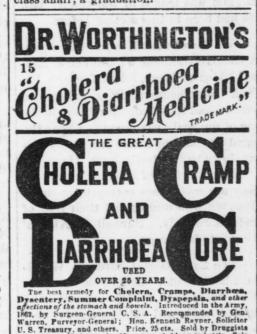

Mrs. WILLIAM DOWNES, of Uxbridge, Mass., writes on March 15, 1883, as follows: During the past three years I have been a great sufferer from a complication of diseases which bafiled the skill of the most experience I dectors, as I could not obtain permanent relief by their treatment and prescriptions; and I have also tried many so-called cures in the medicine line, but could get no relief. The pains, aches and weakness increased so rapidly and constantly that I was so reduced in strength as to be unable to leave the bed, and the doctors informed me that there was no hope of a recovery. In this exhausted and discouraged condition a dear friend persuaded me to use Hunt's Remedy, and after taking it only three days I commenced to get better, and to my great joy and delight I have continued to improve constantly by its use, until now, after having taken the remedy only a few weeks, I am able to be about my house sgain, and am now doing my housework. My lame back is cured, the severe pains have disappeared, and I am now in better health than for many years, and beg this privi-lege of gladly recommending Hunt's Remedy to all who are affected with any disease of the kidneys or liver; and I also highly recommend it for the attacks of sick head-ache. My hust and also has experienced a very great benefit to his health by the use of this most valuable medicine, Eunt's Remedy."

"Our Fing is Still There." Mr. S. B. Longfellow, Augusta, Me., east side river, writes us under date of April 15, 18:3: "To whom it may concern: Tais may certify that two years ago I was very badly afflicted with kidney and urinary difficulties, which extended through the system and laid me up for weeks, so that I could do ne work. I had the most skillful physician in town, who gave me no assistance. Hearing of Hunt's Remedy, I got a bottle, and half of it cured me entirely, so that I have been well ever since. The other half I gave to a neighbor who was afflicted much as I was, and it restored him to health. I can truly say Hunt's Remedy has been of great and inexpressible worth to me."

A Splendid Remedy for Lung Diseases. Dr. Robert Newton, late President of the Eclectic College of the City of New York, and formerly of Cincinnati, Ohio, used Dr. Wm. Hall's Balsam very extensively in his practice, as many of his patients, now living, and restored to health by the use of this invaluable medicine, can amply testify. He always said that so good a remedy ought not to be considered merely as a patent medicine, but that it ought to be prescribed freely by every physician as a sovereign remedy in all cases of Lung Disease. It is a sure cure for Consumption, and has no equal for

all pectoral complaints. Kellinger's Liniment Applied to the head it relieves headache, and prevents the hair from falling out.

Off on a tear-the tail of a coat. A firstclass affair; a graduation.

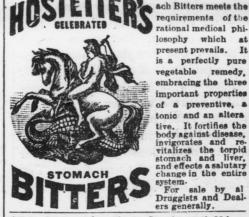

Ladies

Do you want a pure, bloom-

THE CHARLES A. VOGELER COMPANY,

ing Complexion? If so, a few applications of Hagan's MAGNOLIA BALM will gratify you to your heart's content. A Sure Cure for Epilepsy or Fits in 24 hours. Free to poor. Dr. Kruse, 2844 Arsenal St., St. Louis, Mo. \$72 a week. \$12 a day at home easily made. Costly outfit free. Address TRUE & Co., Augusta, Me. | COLEMANS' Business College, Newark, N. J. Terms \$40. Positions for graduates. Write for circulars.

A NOTED BUT UNTITLED WOMAN,

The above is a good likeness of Mrs. Lydia E. Pini ham, of Lynn, Mass., who above all other human beings may be truthfully called the "Dear Friend of Woman," as some of her correspondents love to call her. She is zealously devoted to her work, which is the oute of a life-study, and is obliged to keep six lady assistants, to help her answer the large correspondence which daily pours in upon her, each bearing its special burden of suffering, or joy at release from it. Her Vegetable Compound is a medicine for good and not evil purposes. I have personally investigated it and am satisfied of the truth of this. On account of its proven merits, it is recommended

and prescribed by the best physicians in the country. One says: "It works like a charm and saves much pain. It will cure entirely the worst form of falling of the uterus, Leucorrheea, frregular and painful Menstruction, all Ovarian Troubles, Inflammation and Ulceration, Floodings, all Disp'acements and the conrequent spinal weakness, and is especially adapted to the Chance of Life." It permeates every portion of the system, and gives

new life and vigor. It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times, and under all circumstances, act in harmony with the law that governs the female system.

It costs only \$1. per bottle or six for \$5., and is sold by druggists. Any advice required as to special cases, and the names of many who have been restored to perfect health by the use of the Vegetable Compound, can be obtained by addressing Mrs. P, with stamp for reply, at her home in Lynn, Mass.

For Kidney Complaint of either sex this compound is unsurpassed as abundant testimonials show.

"Mrs. Pinkham's Liver Pills," says one writer, "are the best in the world for the cure of Constipation, Billousness and Torpidity of the liver. Her Blood Purifier works wonders in its special line and bids fair to equal the Compound in its popularity. All must respect her as an Angel of Mercy whose sole

ambition is to do good to others. Mrs. A M. D. Philadelphia, Pa. (2)

SIGNIFICANT SPRING.

A Dissertation upon its advent, and its effect upon mankind.

The green leaf of the new come Spring."-Shak. Everybody recognizes spring, when it is once upon us, but many persons are not familiar with the exact date of its appearance. Webster, the world-renowned lexicographer, gives us a definition, which may not be inappropriate here. "Spring," says he, "is the season of the year when plants begin to regetate and rise; the vernal season, comprehending the months of March, April and May, in the middle latitudes north of the equator. Thompson, in his "Seasons," and Shakespeare, in many of his works, have, perhaps, no peers in describing it, and yet "ethereal spring" is freighted with malaria, "that insidious foe, lurking unseen in the very air we breathe." It spreads over the fairest portions of our land; brings death and disease to thousands: cuts off scores upon scores of our children and youth, as well as those in advanced life. A pestilence is regarded with little less apprehension, and people everywhere are asking, "What is it?" "Where does it come from?" "What will cure it?"

KIDNEY-WORT AS A SPRING MEDICINE.

When you begin to lose appetite;-have a headache, a pain in your side, back and shoulders:-to toss about at night in restless dreams;-wake in the morning with a foul mouth and furred tongue;-feel disinclined to go about your work, heavy in body and oppressed in mind;-have a fit of the blues;when your urine gets scanty or high colored; -to suffer with constipation, diarrhoea or indigestion;-have a pasty, sallow face, dull eyes, and a blotched skin; -one or all of these common complaints will certainly be evidences that your liver is disordered, torpid or perhaps diseased. A bottle of Kidney-Wort is, under such circumstances, a priceless boon to such a person.

Bare assertions of proprietors have come to possess less force than they frequently merit. The cause of this condition of popular skepticism is, in the main, to be found in the fact that charlatanism covers our broad land. Meritorious articles are too frequently

found in bad company. The proprietors of Kidney-Wort always prove all their assertions touching the merits of their preparations. When we affirm, therefore, that Kidney-Wort is a specific for fust such disorders as have been mentioned in this article, the proof, too, belongs to and shall follow this statement.

Consumption Can Be Cured!

it. Consumption is not an incurable maindy, HALL'S BALSAM will cure you, ever though professional aid fails.
