

FOR THE FARM AND HOME.

Thumps in a Horse. Thumps is excessive action of the heart, commonly called palpitation of that organ. It may be due to nervous disorder, functional disease of the heart, indigestion, pressure of the collar, overwork, and pulmonary disease. It is most often due to disease of the heart itself, and while it may not be curable, yet it may be much relieved by proper treatment. If the disorder comes on suddenly and has intermissions it is functional in its character and tonics are to be used. Give a table-spoonful daily of Peruvian bark powdered, with one dram of carbonate of iron, and feed the very best of food. If it is constantly occurring and changing from bad to worse at intervals and there is swelling of the limbs, the disorder is nervous or structural, and sedatives must be given, as 15 grains of digitalis daily, and all exciting causes must be avoided.—New York Times.

Souring Milk. Pure, wholesome milk kept in a clean cellar or milk house, where the temperature is not over seventy degrees, will keep sweet for thirty-six hours, and will not become thick under forty-eight hours. Otherwise something is wrong with the cows. A cow exposed to the hot sun in a pasture, or having impure water to drink, cannot be in a healthy condition, and the first appearance of trouble will be the premature souring of the milk. If the pans are not perfectly well washed and the smallest particles of sour milk left about them, the milk will not keep sweet more than twelve hours or so. Again, the first indication of tuberculosis of the lungs in the cow is rapid thickening and souring of the milk. If milk kept as above stated is not sweet in a day and a half, and is thick before two days, something is wrong in one or other of the ways mentioned.

Manuring Trees. The Germantown Telegraph says: We notice frequently outlandish recommendations, agriculturally and horticulturally, which must lead to failure and discouragement. We have now before us one of these for stimulating the growth of trees by boring holes in the ground and pouring in liquid manure about the roots! How the roots are generally to be got at in this way we cannot see. What better can be desired than applying the same liquid uniformly over the ground and let it soak in? If the surface is very hard it should be loosened, or what we contend is still better, top dress the surface as far as the branches extend with good manure, and the substance will soon find its way uniformly to the roots with the assistance of rains. Our own judgment and practice have always been to treat the soil in which the trees, fruit and ornamental, grow, as far as can be done, the same as soil that is cultivated for vegetables or general farm crops, and we have always been satisfied with the result. As some evidence of the effect of such application we will mention this instance: Some years ago a hemlock spruce had a rusty appearance and at last fell much behind the others in depth of color. It was about twelve feet in height and must have been set out at a spot where the soil was not affluent as that where others were planted. At any rate, two wheelbarrow loads of good manure, spread out as far as the extremity of the branches, restored it perfectly the first year, and it was among one of our handsomest trees.

Decency in the Dairy. The following account, from the Dairy, of an Iowa farmer's clean and careful method of milking, is in agreeable contrast to the slovenly practice of many keepers of cows. If his conscientious and wholesome plan could be generally adopted it would result to the credit of agriculture, in the improvement of quality of dairy products. After a remark about the application of the Golden Rule to dairying, the writer referred to says: "At 5 o'clock I am in the cow stables. The feed prepared the night before is put into the feed boxes, which are first cleared out of all remnants of former feed, and, if sour, they are scoured out with water and a broom. While the cows are eating, they are thoroughly carded and brushed, as well as any well-kept horse is—and all over, from head to switch. The udder is sponged if necessary, and wiped with a clean towel, and not a dirty rag. The gutters are then cleaned out, and the stalls; a common road broom being used, to finish after a broad scraper, which draws the manure down to the trap doors and into the cellar. The floor and gutter are then littered well with sawdust, when we have no straw. For fifteen cows this takes an hour. Then I go to breakfast. At half-past 6 the cows are milked, and each milk-er has overalls and an apron made of striped ticking, with which he can milk in his Sunday clothes, if he likes; and any lady may go in with a silk dress on and not hurt it. As the milk is drawn it is strained at once into the deep pails which stand on the platform and are kept covered; the milk pails have strainers and a double strainer is kept in the deep cans, so that the milk goes through three strainers. But this is not really necessary, as I would

LATEST NEWS.

London, Aug. 23.—At a conference of Irish members of Parliament on Saturday night in a program was arranged for the Irish National League at Leeds, September 27. It embraces self-government for Ireland and the direct representation of the Irish laboring classes. It is reported that Stanley has closed the Upper Congo to commerce. Dr. Conolly and his brother Patrick, were examined on the charge of murderous conspiracy Saturday, and remanded. The French Council of Ministers yesterday discussed the adoption of measures against the Orléanists. The council decided to take no action unless measures are rendered necessary by events with which Orléanist princes are connected. A collision occurred in the English Channel yesterday between the steamers St. Germain and Woodburn. The latter was sunk, and eighteen of her crew were drowned. The steamer Palermo ran down and sank the steamer Havel off Ushant. Five persons were drowned. Miss Phoebe Cuzzins, the Woman's Rights lecturer, is reported to have been killed by the late cyclone in Missouri. At a meeting of the Central Labor Union in New York a resolution to Boycott the New York Sun was adopted because of alleged hostility to workmen's interest. Walter F. Pool, Congressman-elect from the First North Carolina district, succeeding Louis C. Latham, died at Elizabeth City, N. C., after a long illness. He was thirty-two years of age. Henry Hertz and wife, German shopkeepers, of Savannah, Ga., were found murdered in their store. Hertz was lying on the floor, a handkerchief tied over his eyes and his skull crushed in. His wife was lying on the sofa in the parlor with her throat cut and one arm nearly severed. Two colored men were arrested on suspicion. Hertz was supposed to have a large sum of money in his possession. At the competitive drill between Knights Templar Commanderies at San Francisco, only three commanderies competed, the Roper of Indianapolis, the De Molay of Louisville, and the St. Bernard of Chicago. The De Molay Commandery was awarded the first prize, and selected the miners' vase. Roper the second, an ox yolk, and the St. Bernard a silver globe. Thousands of visitors are expected in Baltimore during the Oriole festivities. The South and West have been informed of the coming event by all sorts of fanciful posters, as well as by newspapers. The railroad companies are doing everything in their power to make the arrival a success. The Southern trunk lines will follow the example of the New York pool commission in issuing half-rate tickets. The Philadelphia papers publish a list showing that 106 applications for divorce have been docketed for the September term of the courts, and the lawyers are still busy filling applications. This indicates anything but a healthy condition of affairs matrimonial in Philadelphia. There was a riot at Mannington, W. Va., between a party of lumbermen from Buffalo creek and the town police force and a large number of citizens, in which knives, revolvers, clubs and rocks were freely used, and which resulted in serious wounds to half a dozen of the combatants, one of whom, Walter Furbee, is fatally hurt. Ex-Gov. Benjamin Conley, postmaster at Atlanta, Ga., and five attaches of the post-office, have been removed. The removal was wholly unexpected by the public. The cause is said to be general dissatisfaction. A report comes from Ogden, Utah Territory, to the effect that a band of cowboys have started for Yellowstone Park for the purpose of kidnapping President Arthur and holding him until a heavy ransom is paid. At Millington, Pa., the Foreman Hotel, the postoffice, a private residence and a block of stores occupied by the San Francisco Hardware Company, Simon's saddlery and other firms were burned. Loss, \$66,000; insurance, \$47,000. In reply to a demand on the part of a clerk in the patent office for leave of absence and an allowance of thirty days, exclusive of Sundays, to be granted as a legal right under the act of March 3, 1883, the Assistant Secretary of the Interior says that while the head of a department may lawfully grant thirty days leave of absence in one year, exclusive of Sundays and legal holidays, he is not bound by any law to grant any leave whatever.

Foreign Labor in Egypt. The conditions of forced labor do not seem to differ much in the different parts of the country. Nowhere do the laborers receive any pay or food or shelter, while their treatment by their task-masters would seem to be simply brutal. Mr. Stuart describes the system as he saw it in operation in the province of Keneh, in Upper Egypt. A cut of about eighteen feet in depth had to be made through a conglomerate of sand and gravel; this was flanked right and left by high embankments constructed of the material taken from the trench, and along the bottom and on the slopes "men swarmed thickly, like bees on a honey-comb, for a distance of about a mile in length." The entire strength of the impressive labor in the province amounting to about 40,000 men, was concentrated on this work. The men toiled from sunrise to sunset, with the thermometer at 92 degrees in the shade, having only a brief interval at midday for a meal of bread soaked in unfiltered Nile water. This, with a similar meal before beginning and after leaving off, constituted the day's dietary. The laborers provided their own baskets for carrying the excavated soil, and their own tools, when they used any, but most employed their fingers. Overseers walked about among them armed with sticks, with which they struck the men while they were carrying loads upon their heads, often without any apparent reason. At night they slept upon the ground almost without clothing, and quite without shelter, though the air was often very cold. Mr. Stuart has often seen negro slaves at work in the cotton plantations of Cuba, and the convicts at Portland, and both were to be envied, in his opinion, by the side of these fellahs.—London Globe.

Origin of Names of the Fabrics. Everything connected with one's business is of importance. Very few dry-goods men know the origin of the names of the goods they handle. They may seem trivial points, but they are of interest to the man who seeks to be thoroughly familiar with the merchandise in which he deals. For the information of such we give the derivation of the names of the following goods: Damask is from the city of Damascus; satins from Zaytown in China; calico from Calicut, a town in India, formerly celebrated for its cotton cloth, and where calico was also printed. Muslin is named from Mosul in Asia. Alpaca is from an animal of Peru, of the llama species, from whose wool the fabric is woven. Buckram takes its name from Bochara; fustian comes from Fostat, a city of the middle ages, from which the modern Cairo is descended. Taffeta and tably from a street in Bagdad. Cambrie from Cambrai. Gauze has its name from Gaza; baize from Bajaz; dimity from Damietta, and jeans from Jean. Drugget is derived from a city in Ireland, Drugheka. Duck comes from Torque, in Normandy. Blanket is called after Thomas Blanket, a famous clothier connected with the introduction of woollens into England about 1340. Serge derives its name from Xerga, a Spanish name for a peculiar woolen blanket. Diaper is not from D'Ypres, as is sometimes stated, but from the Greek "diaspron," figured. Velvet comes from the Italian *velveto*, woolly (Latin *velvus*—a hide or pelt). Shawl is from the Sanscrit *salva*, floor, for shawls were first used as carpets and tapestry. Pandanna is from an Indian word, meaning to bind or tie, because they are tied in knots before dyeing. Chintz comes from the Hindoo word "chett." Delaine is the French "of wool."

The Longevity of Stones. Dr. Julian of Columbia college, comes to the following conclusions in regard to the life of stones, defining life as the period during which the stone presented a decent appearance: Coarse brownstone, best used out of the sun, from 5 to 15 years; laminated fine brownstone, from 25 to 50 years; compact fine brownstone, from one to two centuries; Nova Scotia stone will probably last from 50 to 100 years; Ohio sandstone, the best of the sandstones, 100 years; Caen stone, from 35 to 40 years; coarse dolomite marble, 40 years; fine marble, 60 years; pure calcareous marble, from 50 to 100 years; granite, from 75 to 200 years, according to variety; bluestone is as yet untried, but will prove a good building material. Some of the causes that produce decay in stones are, first, solutions are hydrations of the stones and heat of the sun. The mammoth Russian variety of sunflower is grown on some of the Western cattle ranches to supply the deficiency of wood for fuel.

LATEST NEWS.

London, Aug. 23.—The French papers report the charges contained in the *North German Gazette*, and intimate that France is better prepared now to say that Prince Bismarck is seeking a pretext for a quarrel or for the imposition of fresh army burdens. The American press asks if the article means war. The English journals think that the warning was overdone, and that the cause for it was insufficient. The capture of Hai-Dzung, in Tonquin, by the French, is regarded as an important one. It is believed that the French will need at least 10,000 reinforcements before entering upon a new campaign. The Imperial (Madrid) says that the Spanish government, after the recent rising, informed the representatives abroad that a friendly request would be made that France comply with international law and expel the reputed author of the outbreak. The French Ambassador to England says that the British missionary recently arrested by the French in Madagascar, was arrested as a dignitary of the Hova government and not as a British subject. The ambassador has given the British government the assurance that Shaw will have every facility for conducting his defence. The details of the late Western cyclone are startling for the damage done to property, crops and life. A dispatch from Minneapolis, Minn., says: "Tuesday evening Rochester was one of the most beautiful cities in the West. Ten minutes later its beauty had disappeared, and in parts of the city ruin and desolation reigned. A terrible cyclone had visited the city, leaving death and destruction in its track. Just one month ago a fearful cyclone passed six miles north of the city. Now it passed through it. The day had been beautiful and warm until evening, when clouds began to gather. The atmosphere was oppressive, heavy and hot. About 4 o'clock it seemed as though it had commenced to clear up, but soon heavy black clouds came from the northwest, and rain fell in torrents. Directly after 6 o'clock the clouds assumed a greenish tint, accompanied by a rumbling noise and in a short time the wind increased in violence until the full force of a cyclone was felt. A fire at Middleport, Ohio, recently destroyed ten buildings, including the St. James Hotel. Wm. Jenkins & Co., grocers and commission merchants, of Richmond, Va., have failed. Their liabilities amount to about \$35,000. It is believed the assets will be sufficient to pay secured creditors in full.

Washington Notes. The first appointment in the Treasury Department under the new civil service rules was recently made to fill a \$900 vacancy in the National Bank redemption agency of the treasurer's office. The civil service commission certified the names of four ladies to the Acting Secretary of the Treasury, who selected that of Miss Mary F. Hoyt, of Connecticut, which was the first on the list. Several of the revenue officers in the upper part of South Carolina are charged with swindling the government by hiring persons to put up oil stills in remote places, then capturing the stills and claiming the reward. The same material, it is charged, has been "captured" repeatedly. It is said that only a few oil stills captured in the mountains of South Carolina have really been used for illicit distilling. Acting Postmaster-General Hatten has addressed a letter to Postmaster Conroy, of this city, stating that at present it is impossible to grant the letter-carriers' request for annual leave of absence with pay. He says that when Congress makes an appropriation for the purpose the department will be pleased to grant the carriers the deserved and needed relief. The Colorado potato bug has gone to join the trade dollar. "Rough on Corns." Ask for Wells' "Rough on Corns." 15c. Quick relief; complete cure. Corns, warts, bunions. The "height of the season" is generally measured by the length of the summer hotel bill. That Husband of Mine Is three times the man he was before using Wells' Health Renewer. S. I. Druggists. A grizzled wretch, at our elbow, asks if the naked truth isn't a bare story. For burns, scalds, bruises, chapped hands, sores or piles, use St. Patrick's Salve. A process has been invented by which heavy planks can be manufactured from straw. NO TROUBLE TO SWALLOW. Dr. Pierce's "Pellets" (the original "Little Liver Pills") and no pain or griping. Cure sick or bilious headache, sour stomach, and cleanse the system and bowels. 25 cents a vial. A man may die before he gets justice. Then again he may get it when he dies, if he is hanged by due process of law. HARD LUMPS IN BREAST. Dr. R. V. Pierce, Buffalo, N. Y.: Dear Sir—I wrote you some time ago that I thought I had a cancer. There was a large lump in my breast as large as a walnut, and had been there four months. I commenced taking your "Golden Medical Discovery," "Favorable Prescription" and "Pellets" in June, and the lump is gone. Yours gratefully, Mrs. R. R. CLARK, Irvington, Mich. Peanuts are pounded in Georgia to make pastry. "BECAME SOUND AND WELL." R. V. PIERCE, M. D.: Dear Sir—My wife, who had been ill for over two years, and had tried many other medicines, became sound and well by using your "Favorable Prescription." My niece was also cured by its use, after several physicians had failed to do her any good. Yours truly, THOMAS J. METHVIN, Hatcher's Station, Ga. In Virginia they are making flour of peanuts, and it is praised. Have you seen the Chrolithon collars and cuffs? Something new. Ask for them. A spunky miss in Miami City clubbed a "masher" limp with a fence rail. Nervousness, debility and exhausted vitality cured by using Brown's Iron Bitters. The latest bangs is of silver. Trade dollars are not used in its manufacture. BALTIMORE, Md.—Dr. Irwin H. Elderidge says: "I would recommend a trial of Brown's Iron Bitters in all cases of anemic debility where a tonic or appetizer is indicated." Solomon said "Go to the ant," but the poorer youth of to-day goes to his "uncle." OWENSON, Ky.—Dr. I. F. Mundy says: "I have found Brown's Iron Bitters one of the best tonics, and prescribe it frequently. Champagne is said to be slowly going out of fashion in London. American whisky is beginning to assert its power. PUREST AND BEST COOL-LIVER OIL, from selected livers, on the seashore, by Caswell, Hazard & Co., N. Y. Absolutely pure and sweet. Patients who have once taken it prefer it to all others. Physicians declare it superior to all other oils. CHAPPED HANDS, face, pimples and rough skin cured by using Juniper Tar Soap, made by Caswell, Hazard & Co., New York. An Oregon man wants to trade a mule for a wife. The deluded fellow thinks he will get something that won't kick.

A Matter-of-Fact Woman. The following may be interesting to busy women who are afraid to marry poor men: "I am milliner, and I have made between fifteen hundred and twenty-five hundred dollars a year in my business for some time past. I married four years ago. My husband is kind and good-looking, but he never learned any trade, had no profession, and could not average five hundred dollars a year. I loved him, however, but I saw that it would not do to depend upon him, so I kept on with my business. After a time I think he got a little lazy, and as we were both away during the day we could not keep house and get sick of boarding. Finally I proposed that he should keep house, and I would run the business, and find the money. We have now lived very happily this way for two years. My husband gets up and builds the fire, gets breakfast, and I leave home a little before eight for my place of business. He does the washing and ironing, the cleaning, and I do not know of any woman who can beat him. He is as neat as wax, and can cook equal to any one in town. I may be an isolated case, but I think the time has now come when women who have husbands to support should make them do the work, otherwise they are luxuries we must do without."

A Rare Occurrence. Nearly all the physicians of the South seem to agree. Dr. P. H. Arthur and Dr. S. N. McAlpine and other leading doctors of North Carolina and Virginia, endorsed and used in their practice, Dr. Warthington's Cholera and Diarrhoea Medicine as a sure cure for all complaints of the stomach and bowels. Price 25 and 50 cents a bottle. Secrets of the Kitchen. An hotel cook has been betraying some of the secrets of hotel cooking. He says the head cook in making preparation for dinner, cuts off the head and feet of the poultry and trims out the bones and fat off the meat. These are all dumped into a kettle of water. Everything in the way of meat is thrown into this receptacle, and the heterogeneous mass is boiled up as soup for dinner. Say a guest calls for vermicelli soup. A ladleful is dipped from this common kettle into a dish, and a handful of vermicelli, taken from a side table and dropped into it, gives it at least the semblance of the kind ordered. Say it is tomato soup. A spoonful of cooked tomatoes thrown in the same way will make the average guest think he has received all he has ordered. So it is when beef soup, ox-tail soup—in fact, all other soups are made by this process out of this kettle. Don't order soup. Souls are not saved in bundles. The Spirit asks of every man, how is it with thee? 25c buys a pair of Lyon's Patent Hair Stiffeners; makes a boot or shoe last twice as long. "Are trade dollars taken at par?" inquired little Rufus Botts of his mother. "No, but they are taken from pa, when he goes to bed with his boots on." Dr. Sittes, Brooklyn, N. Y., was cured by Dr. Elmore's Rheumatic-Gouttine of very severe Rheumatism and kidney disease of several years' standing, after trying everything else without benefit. A prize was offered in Clarksville, Tenn., for one who could kill the most rats, and a negro boy won 1,049 in one day. Catarrh of the Bladder. Stinging irritation, inflammation, kidney, urinary complaints, cured by Buchu-pabai. The Colorado potato bug has gone to join the trade dollar. "Rough on Corns." Ask for Wells' "Rough on Corns." 15c. Quick relief; complete cure. Corns, warts, bunions. The "height of the season" is generally measured by the length of the summer hotel bill. That Husband of Mine Is three times the man he was before using Wells' Health Renewer. S. I. Druggists. A grizzled wretch, at our elbow, asks if the naked truth isn't a bare story. The Use of crutches. Thon little tricky Puck! With antic toys so fondly bestuck: Light as the singing bird that wings the air, (Carboline, Carboline restores the hair.) "I have no prejudices against color," remarked Green. "Very well," replied Brown, "let me introduce you to Yellow Jack." The hygiene of quackery has done more to aggravate dyspepsia by self-inflicted starvation than gluttony ever did. GASTRIC CURE, the worst forms of dyspepsia. Controversy equalizes fools and wise men in the same way—and the fool knows it. A Veteran Soldier. Mr. G. F. BOWLEN, of No. 24 Common Street, Lynn, Mass., says: "While in the army, at the battle of Spottsylvania, I fell while sitting on a rail fence and was badly injured and left for dead, but after a time I was picked up by comrades, and upon examination it was found that my back was badly hurt and my kidneys seriously injured, and I have suffered the most excruciating pain since, and could obtain no relief although treated by several physicians, and I had given up all hope of getting help when I was recommended to use Hunt's Kidney. I purchased several bottles at one of our drug stores in Lynn, and began to use it as directed, and can now attend to business, and am free from the pains I once suffered, and I wish to say to my friends and comrades that Hunt's Kidney will do all that is claimed for it, and is worthy of all praise. You can use my testimony when you have occasion to use Hunt's Kidney, I can recommend it to all that have kidney or liver troubles." April 26, 1883. "You May Use My Name." I desire to inform you what your valuable medicine has done for me. I was induced to try it by a member of my family, who had been afflicted by its use. I have suffered terribly from kidney difficulties. At times I have been very bad, having severe pains in my back, with general loss of strength and vitality. My urine was very bad, with a heavy sediment of brick-dust, which was fast leading to gravel. I commenced using Hunt's Kidney, with a marked improvement from the start, the pain in the back, the urine became more natural, and I can truly say one bottle effected a permanent cure. I have recommended it to many persons both here and to Boston, all of whom speak of it with the highest praise. You are at liberty to use this letter or my name in any manner you may think best, that other sufferers may learn the value of the greatest of all remedies. Most truly yours, JOHN F. COX, 10 Pleasant Street, Malden, Mass., April 23, 1883. A Remarkable Tribute. Sidney Ouchurch, of Pittsburg, Pa., writes: "I have used Dr. Wm. Hall's Balsam for the Cough many years, with the most gratifying results. The relieving influence of Hall's Balsam is wonderful. The pain and rack of the body, incidental to a light cough, soon disappear by the use of a spoonful according to directions. My wife always sends for Hall's Balsam instead of a physician." Dr. Green's Oxygenated Bitters is the oldest and best remedy for Dyspepsia, Biliousness, Malaria, Indigestion, and all disorders of the Stomach, and all diseases indicating an impure condition of the Blood, Kidneys and Liver. I slept and dreamed that life was beauty, and waked and found that life was duty.

Wells' Richardson & Co's IMPROVED BUTTER COLOR. A NEW DISCOVERY. For several years we have furnished the Dispensary of America with an excellent artificial color for butter for all kinds of purposes, and with great success everywhere receiving the highest and only prizes at both International and National Fairs. It is not only safe, but it is also the best in the world. It will not turn rancid, it is the strongest, brightest and cheapest color made. It is composed of all the best ingredients, and is so prepared that it will be found to be all other colors for they are liable to become rancid and spoil the butter. If you cannot get the "improved" write us to know where and how to get it without extra charges. WELLS, RICHARDSON & CO., BURLINGTON, VT.

DR. WORTHINGTON'S Cholera & Diarrhoea Medicine. THE GREAT HOLEREA CRAMP AND DIARRHOEA CURE. I slept and dreamed that life was beauty, and waked and found that life was duty. Dr. Green's Oxygenated Bitters is the oldest and best remedy for Dyspepsia, Biliousness, Malaria, Indigestion, and all disorders of the Stomach, and all diseases indicating an impure condition of the Blood, Kidneys and Liver. I slept and dreamed that life was beauty, and waked and found that life was duty.

LOVELY COMPLEXIONS POSSIBLE TO ALL. What Nature denies to many Art secures to all. Hagan's Magnolia Balm dispels every blemish, overcomes Redness, Freckles, Sallowness, Roughness, Tan, Eruptions and Blisters, and removes all evidences of heat and excitement. The Magnolia Balm imparts the most delicate and natural complexional tints—no detection being possible to the closest observation. Under these circumstances a faulty complexion is little short of a crime. Magnolia Balm sold everywhere. Costs only 75 cents, with full directions. BAD, BAD, BAD BLOOD. Some blood is bad because it is poor and weak. Some is bad because it contains impurities. Some men have such bad blood that the wonder is it does not poison the mosquitoes who come to bite them. The rich red color of good blood is owing to the iron which is present. Blood which has not enough iron in it is always unsatisfactory. The person in whose veins it circulates cannot be said to enjoy good health. The efforts of expert chemists to produce a preparation of iron which can be assimilated with the blood have resulted in that perfect preparation which is an important part of Brown's Iron Bitters. It is the only one which freely enters into the blood. It is the only one which accomplishes Weak, poor, thin blood may be made rich and strong, and impure blood may be purified by the use of that Great Iron Medicine, Brown's Iron Bitters.

Thon little tricky Puck! With antic toys so fondly bestuck: Light as the singing bird that wings the air, (Carboline, Carboline restores the hair.) "I have no prejudices against color," remarked Green. "Very well," replied Brown, "let me introduce you to Yellow Jack." The hygiene of quackery has done more to aggravate dyspepsia by self-inflicted starvation than gluttony ever did. GASTRIC CURE, the worst forms of dyspepsia. Controversy equalizes fools and wise men in the same way—and the fool knows it. A Veteran Soldier. Mr. G. F. BOWLEN, of No. 24 Common Street, Lynn, Mass., says: "While in the army, at the battle of Spottsylvania, I fell while sitting on a rail fence and was badly injured and left for dead, but after a time I was picked up by comrades, and upon examination it was found that my back was badly hurt and my kidneys seriously injured, and I have suffered the most excruciating pain since, and could obtain no relief although treated by several physicians, and I had given up all hope of getting help when I was recommended to use Hunt's Kidney. I purchased several bottles at one of our drug stores in Lynn, and began to use it as directed, and can now attend to business, and am free from the pains I once suffered, and I wish to say to my friends and comrades that Hunt's Kidney will do all that is claimed for it, and is worthy of all praise. You can use my testimony when you have occasion to use Hunt's Kidney, I can recommend it to all that have kidney or liver troubles." April 26, 1883. "You May Use My Name." I desire to inform you what your valuable medicine has done for me. I was induced to try it by a member of my family, who had been afflicted by its use. I have suffered terribly from kidney difficulties. At times I have been very bad, having severe pains in my back, with general loss of strength and vitality. My urine was very bad, with a heavy sediment of brick-dust, which was fast leading to gravel. I commenced using Hunt's Kidney, with a marked improvement from the start, the pain in the back, the urine became more natural, and I can truly say one bottle effected a permanent cure. I have recommended it to many persons both here and to Boston, all of whom speak of it with the highest praise. You are at liberty to use this letter or my name in any manner you may think best, that other sufferers may learn the value of the greatest of all remedies. Most truly yours, JOHN F. COX, 10 Pleasant Street, Malden, Mass., April 23, 1883. A Remarkable Tribute. Sidney Ouchurch, of Pittsburg, Pa., writes: "I have used Dr. Wm. Hall's Balsam for the Cough many years, with the most gratifying results. The relieving influence of Hall's Balsam is wonderful. The pain and rack of the body, incidental to a light cough, soon disappear by the use of a spoonful according to directions. My wife always sends for Hall's Balsam instead of a physician." Dr. Green's Oxygenated Bitters is the oldest and best remedy for Dyspepsia, Biliousness, Malaria, Indigestion, and all disorders of the Stomach, and all diseases indicating an impure condition of the Blood, Kidneys and Liver. I slept and dreamed that life was beauty, and waked and found that life was duty.

Wells' Richardson & Co's IMPROVED BUTTER COLOR. A NEW DISCOVERY. For several years we have furnished the Dispensary of America with an excellent artificial color for butter for all kinds of purposes, and with great success everywhere receiving the highest and only prizes at both International and National Fairs. It is not only safe, but it is also the best in the world. It will not turn rancid, it is the strongest, brightest and cheapest color made. It is composed of all the best ingredients, and is so prepared that it will be found to be all other colors for they are liable to become rancid and spoil the butter. If you cannot get the "improved" write us to know where and how to get it without extra charges. WELLS, RICHARDSON & CO., BURLINGTON, VT.

DR. WORTHINGTON'S Cholera & Diarrhoea Medicine. THE GREAT HOLEREA CRAMP AND DIARRHOEA CURE. I slept and dreamed that life was beauty, and waked and found that life was duty. Dr. Green's Oxygenated Bitters is the oldest and best remedy for Dyspepsia, Biliousness, Malaria, Indigestion, and all disorders of the Stomach, and all diseases indicating an impure condition of the Blood, Kidneys and Liver. I slept and dreamed that life was beauty, and waked and found that life was duty.
