## Items of Interest.

Infant mortality in France is computed at from 20 to 23 per cent. of the popula-

A Paris company has submitted to the Pope plans for lighting up the dome of St. Peter's at Easter coremonies with electric burners.

Near Danbury stands a white oak tree that is thought to be 200 years old. It is more than 100 feet high, and the circumference at the first limb is 13 feet.

Italy has to keep 5,363 persons under sentence of penal servitude for life. Prison expenses are \$2,000,000 a year more than those for education.

A recent estimate, made by means of a very intricate testing apparatus, places the rate at which an electric dot travels over a telegraph wire at 16,000 miles

A clean and perfect copy of John Bunyan's "Pilgrim's Progess" 1678, has just been added to the British Muesum library. Only three other copies are known, and but two of these are perfect.

The wife of the jailer, at Oconta, Wis., was left on guard and armed for the day with a pistol, which ber son doubted she had the courage to discharge. He made a test by putting on a prisoner's costume and whooping at her.

There is little of interest now to be found in Elba, Napoleon's island prison. All the relies of his stay there were long since carried away, and the place has sunk into the insignificance from which his presence raised it temporarily. The population is rather over 20,000.

The fire engines in Italian cities are still the same little hand pumps used in the beginning of the century; not a single steam fire engine exists on the peninsula, owing to the rarity of fires, but a movement is now on foot to introduce steam engines according to the American style.

Dr. Spitzka says the popular delusion that the human eye has an influence over insane people similar to that claimed for the same organ over wild animals, is one that is often ridiculed by the insane themselves. He adds that whoever attempts to utilize the notion will recognize its absurdity.

A dealer in cod-liver oil in marseilles advertises that his fish are caught in a safe and quiet harbor, where marine monsters cannot enter to frighten them into diseases of the liver. "They live there," he says, "in peace and comfort; their livers are healthy, and this is the reason why my cod-liver oil is the best."

That the cars upon the rails of certain ilroads creen has been a matter for co plaint which every one has heard. It will be greater news to many to know that the rails on sleepers creep, too, in the direction of greater traffic. On the St. Louis bridge proper the rails have been known to creep 260 feet in one year, and on the bridge approach 400 feet.

It is said that the sand used in the manufacture of mirrors is now used by a Paris company to make white bricks and blocks, said not to be injured by frosts, rain, etc., and to be very light, the specific gravity being only 1.50 to 1.85 of clay bricks. The sand is first strongly pressed by hydraulic power, and then baked in ovens at a very high temperature. The bricks are almost pure silica.

"Old Moses" is the name of what is thought to be the largest tree in the world. It stands in a grove near Tule River, in California. Although the top is broken off, it is 240 feet high and 12 feet in diameter at the broken part. The hollow of the trunk will hold 150 persons, and is hung with scenes of California, is carpeted and fitted up like a drawing room, with table, chairs, and pianoforte.

It has been discovered by experiments with dogs placed under the influence of morphia even to coma, that the hypodermic injection of solution of theine, the active principle of ten, is an almost instantaneous antidote, neutralizing the effect of the narcotic, and reviving the animal, after the action of the heart has become imperceptible. Cafeine possesses similar properties, but is less immediate in its operation.

Fredericksburg, Virginia, lays claim to the distinction of being the burial place of Edward Heldon, a contemporary and one of the pall-bearers of the immortal Shakespeare. A red saudstone slab marked the grave in St. George's churchyard until it was misplaced by Burnside, who cut a road through the burial ground and removed the stone to the Masonic cemetery, where it now lies under a locust tree. It was in Fredericksburg that the mother of Washington lived after she became a widow and reared her family.
