a kissen' 'em.

'About mermaids,' said the captain, An entirely new process for refining as he stood upon the unfinished end of sugar, electricity being the agent emthe seawall and surveyed the landlubber reporter of the San Francisco Call with an expression of pitiful condescension. 'Why, I've see'd the most wonderful things in that line: Well, we were over in the China sea. One night, just after we'd past theFormosa group, I was aroused out of my bunk by the mate, who sings out 'Mermaids aboard!' Out I jumps and gets on deck in a turn of a helm. You can splice my mains' if there wasn't 'bout twenty of the biggest mermaids a floppin' around the deck I ever seed. Two of 'em had got the fellows on watch cornered and was 'The mate had took to the riggin' after hailing me. I was a little s'prised,

though I had seen mermaids afore, but never more'n one at a time. 'Ladies,' said I, 'make yourselves at home,' and you bet your hawsers they did. They slowly. "Mr. Jones, ask Mr. Welling quit floppin,' and all got on the rail, side by side, a holdin' their tails in their hands and commenced to sing, and I jest tell you they whooped things up. They skipped through the 'Sweet By and By' and took several reefs in the Red, White and Blue' and slewed to port on a 'Life on the Ocean Wave' in beautiful style.' 'Didn't see them again, did you ?' asked a landlubber.

Well, yes. The next day we was becalmed. There wasn't a smell of a breeze, and whistlin' tor it didn't do any good. I was madder'n a stuck whale, for I wanted to make a quick passage. Suddenly I sees a commotion in the water, and, shiyer my binnacle the least clew till now. What do you lights, if them mermaids warn't swim-

min' around us. One of 'em boarded us as slick as could be and ses, 'Give "I think," I tremblingly said, "that us a rope.' Well, I throwed 'em one, I must tell you the bad business at our house last night, which brought me to and I'll lay to on a lee shore if they didn't tow us till we struck a breeze. Got the rope right in their mouths-So I told him my story, and then he about fifty of 'em-and pulled us along. went with me to Dick's office. And I was so 'bleeged to 'em that I threw when I went home I knew all I had to 'em a mass of looking-glasses, clocks and shoe blacking out of the cargo.

Sugar by Electricity.

ployed, is one of the latest discoveries. If the half that is claimed for it be true, it is also one of the most important that has been made in the last half of this century. The process is said to be a dry one throughout, dispeosing altogether with boiling and the use of boneblack. It is claimed that no syrup whatever is produced, the whole product being hard sugar of nearly, if not quite, absolutely purity -namely, 100 per cent. cane sugar, per analysis. This result has been obtained from the lowest grades, the parcels treated ranging all the way from ten pounds to over a ton in weight. The refined sugar is obtained within four hours from the time the

machinery is set in motion, and the process is continuous, the output of fine sugar being kept up so long as the raw material is fed in and the machinery kept in motion. The cost of the process is almost ridiculously low, being set at not more than eighty cts. per ton, with a guarantee that the loss will not be greater than about one-half of one per cent. The cost of the re-

quisite machinery, including power and aparatus needed to put the sugar into barrels and the buildings required to inclose the works, is estimated to be about \$100,000; in England, for an output of four thousand barrels every twenty-four hours.

There is nothing that demands states. manship of a high order as much as the driving of a cow with a young calf to any particular place. Two Dallas colored men took a job of this character yesterday, and although they gave the matter their careful attention, the result was very far from satisfactory to anybcdy but the cow, who seemed to enjoy it very much. Sam and Bill were to get a dollar to take the cow and calf and put them in the yard of the owner, Mr. Thomas Carlyle, who lives at the south end of Elm street. After trying in vain to get the cow to understand in which direction they preferred she should go, Sam and Bill called a cabinet meeting, at which the following campaign plan was agreed upon : Sam was to take up the calf in his arms and go ahead, while Bill was to hold the cow back by the rope which was fastened to her horns. 'Ef she goes too fast,' said Bill, 'I'll jest hold her back.'

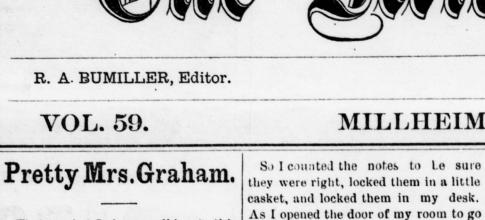

'And ef she don't follow fast enough, I'll jest twist de calf's tail, and den she will come right along,' said Sam.

Sam took up the calf and went ahead, while Bill, in order to get a real good hold, tied the rope around his wrist. The procession proceeded slowly in the desired direction, and would have reached its destination in safety had not Satan tempted Bill to get off a joke onSam, so he called out :

'Sam, jest twist dat calf's tail.' Sam did so, and the calf bleated as if it was opposed to an encore to the performance.

The old cow began to trot. So did Sam, holding on to the calf as if he had stolen it. Then the fun began. For every once in a while the cow would polish her horns in the ceiling of Sam's pants. Bill could not get his hands out
