—In speaking of the various impositions and frauds practiced upon farmers by the many city sharpers "who go about seeking whom they may devour" the Bellefonte Daily News gives the following bit of advice which is worthy of consideration:

While every stranger traveling among the farmers should be treated civilly, as many of them are on honest business, the farmer should be very guarded in his dealings with all. Do not believe all of what they have to say in regard to any goods they may be selling, and if they happen to be acting for firms at a great distance, do not purchase of them, as there are certainly firms in the town nearest you who are known to be reliable and will give you the very best bargain the market can afford. Do not, under any circumstances, sign your name, even if it be on the most innocent-looking paper, for it will be certain to change itself into a promise to pay before many days. Do not allow any man to take advantage of you. This you owe as much to them as to yourself, especially if your daily petition is, "Lead us not into temptation."
