

Ladies' Guide to Fancy Work.

This work contains nearly 300 handsome illustrations with instructions for making hundreds of things, either for your home or presents for your friends...

A Woman's Experience With a Saw Mill.

TUCKERTOWN, FLA., November 17.—Your letter of a late date requesting me to give my experience as a lumber manufacturer is at hand. I will state at the start that I am not in the business through choice...

Although accustomed to manage my own affairs, commencing by the time I was grown, I found difficulties enough in making lumber, and I have often said that a saw mill and satch belong in the same family...

Another Art Craze.—The latest art work among ladies is known as the "French Craze," for decorating china, glassware, etc. It is something entirely new, and is both novel and fascinating...

I knew well enough that machinery is made to run, and when running it should be at work, and all I had to do was to keep the saw cutting for 10 hours a day and six days in the week...

Many a man in the saw mill business would do well if he could get skilled labor, but this state is cursed with a tribe of saw mill tramps who claim to know everything and when tried can do nothing...

for at least 10 years, receiving not less than \$6 a day. They all know more of machinery than the men who make it, and are ready, not to commence sawing, but to commence cutting, changing, splicing and rebuilding with a promise that if I will give them \$3.50 per day and board they will double the capacity of my mill...

I have never been deceived by one of them, but they leave their mark wherever employed. One half of them ought to be hung and the other half sent to the penitentiary. One came to me a few days ago who was an exception, for notwithstanding he was "the best sawyer in Florida," he was willing to work for \$10 a month and board, or \$12 if he boarded "his self"—hungry looking wretch!

I wouldn't have boarded him even a day for \$2, and I knew he couldn't board himself at any such price. Said I, "Do you see that road out there?" He very meekly said he did. "Then," said I, "you go out there, and when you get to it you take either end you like; the one that will put you out of my sight the quickest will suit me best."

PENNSYLVANIA

Next Term begins September 8, 1888. This institution is located in one of the most beautiful and healthful spots of the entire Allegheny region. It is open to students of both sexes, and offers the following course of study: 1. A Full Scientific Course—Four Years.

I row have my second husband, and I am the mother of nine children, seven of whom are now living. Several of the elder are doing business for themselves, yet they always come to "mother" for advice, and when they don't take it they wish they had. I have always managed my own business, and I expect to while I live. I awake in the morning and plan the day's work while the men are asleep, and at the breakfast table I give every one his orders, including my husband, who never objects to my doing the thinking for the family.

My first advice to men who contemplate going into the saw mill business—don't do it, for not one in 20 of you has the ability to succeed. If, however, you are determined to try it, be careful that you get the best machinery, strong and heavy enough to stand the bad treatment of awkward hands. Buy the most durable tools, no matter what they cost, for half the failures in our backwoods mills are caused by constant breaking of belts. And when a complete outfit is secured, locate where you can get timber and sell lumber. Keep your machines in good order, taking special care of all parts out of sight. Pay your hands in cash, and not in promises.
