J. H. KEATTY, of Iowa, is the suc cessor of Oscar J. Harvey, the forger as chief of division in the treasury department. Keatty is a former Pennsylvanian.

THE probibition state ticket is follows: Dallas C. Irish, for state treasurer. John B. Chase, for judge of supreme court. Of course the ticket of the third party it always subject to sure defeat and this is about the last we'll hear of it.

THAT great republican blusterer Gov. Foraker seems bound to make political, and of course republican organizations out of the G. A. R. posts. His order at Wheeling, the other day that the veterans must not pass in parade under a portrait of President C eveland is unmistakable proof of his to say the order was obeyed by some of the veterans, while the majority were disgusted and indignant over the conduct of Foraker.

THE answers received to inquiries which we think should be at once removed sent out by the Kansas City Times through Kansas and Missouri as to the presidental preferences show that by defective water pipes; and we find a the west is practically settling down to Cleveland and Blaine as the candidates in 1888. In Missouri 270 answers from democrats were received. Of these 251 were for Cleveland, 3 for Thurman, 1 for Wade Hampton, and the rest scattering. The republicans sent 261 answers, of which 125 were for Blaine, 77 for Sherman 41 building. for Lincoln, and the rest scattering. In Kansas 326 democrats answered as follows : Cleveland. 306 : Thurman, 7; Hill, 6; the remainder scattering. The republicans sent 302 answers, of which 181 were for Blaine 86 for Sherman, 44 for Lincoln, and the rest scattering.

A LITTLE more than two months hence the Democrats of Centre county, if they are so minded, will have a chance to show their Republican friends that the nominations made last Tuesday was simply a matter of hungry land-sharks, and the powerful railform. In other words the success of the Democratic ticket is beyond a ruthlessly given away by Republican Adquestion of doubt, if the Democrats ministration. Under the swamp-land law, see proper to organize thoroughly and passed by Congress in 1850, authority was form a solid front in November. And we think the rank and file of the party swamp and overflowed lands, preparing are fully awake to their duty and are them for purposes of agriculture; later, acts of the meeting totally deaf in both ears. ready to go into the fight with the set determination to win and win with rousing majorities. This thing of Government after the act of 1850 and up to "kicking" and knifing their own can- the date of the indemnity act of 1855. Then didates has proven too dangerous an in 1857 Congress passed a law securing to experiment to the Democratic party in the past to indulge in it again and the mass of the Democratic voters are Louisiana is the only State that has made solid for their ticket for the sake of party victory.

THE Democratic State Convention advantage of which was taken by thousassembled at Allentown yesterday ands of unscrupulous persons who falsely and on Tuesday already something like a thousand strangers filled the town. As far as candidates are concerned nothing can be said at this writing, but it was apparent on Tuesday that everybody was most concerned about what the platform would such lands; but still "swamp land claims" have to say. A dispatch to yesterday's Harrisburg Patriot reports as follows:

At the last Cabinet meeting, for the first time during this Administration, all the nembers were absent, except Secretary Bayard, the other portfolios being repre sented by Assistant Secretaries.

As it is regarded as practically settled that President Cleveland will be renominated, some interest is being manifested in the nomination for Vice-President, and both Postmaster-General Vilas and Commission er Black have been often mentioned. Many ong-headed Democratic statesmen and pol iticians are understood to favor a soldie for second place, and it is probable the Pres ident is of the same opinion.

A pair of good Republicans, one a claim Attorney, and the other a Government clerk, were arrested a few days since for stealing public records from the Pension Office. For such a crime the punishment is five years in the penitentiary.

WILKESBARRE, Pa., Aug. 2s-At 10 'clock this morning, Miner George Eyere, a German, aged 50 years, and a man of family met with a horrible death in the Gaylord slope of the Kingston coal company, at Plymouth. He was engaged at the time in tamping a drill-hole in a breast of anthracite with powder, prior to blasting. The proceeding is always a dangerous one, and great care is generally taken in the work. The drill used by Eyere was six feetlong and an inch and a half in diameter. While pounding the powder vigorously it ignited by friction, and caused a loud explosion. When the neighboring miners ran to see what had caused the trouble they found Eyere lying on his back, having been lown some distance away, his drill having passed entirely through his right breast, just under the shoulder. He was de ad and covered with blood, His body was sent to the surface and carried to his grief-stricken family. HIS STRENGTH IN THE SOUTH.

Senator Butler Says There is But One Sentiment in the South.

"Why, there is but one sentiment in the party," he continaed, "and that is in support of the presideut. The grumblers are to few to amount to anything. The south is solid for Cleveland and he will be reelected. In my opinion Blaine will be the republican mominee and Cleveland will defeat him again. If the present general prosperity continues until the next presidential election there is no telling what the vote for Cleveland will be. Cleveland's great strength hes in the confidence the business interests have in him. He is safe, conservative and cautious. It is feared that another epidemic is a-Would Not Pass Under Cleveland's bout to visit the place. Gross careless-

ness is charged against the authorities. When the last victim of the great epidemic of two years ago, which caused the death of more than one hundred persons, had been buried, public opinon demanded that the town be sewered and other improvements made to ward off contagious diseases in the future; tut there was delay and with it came indifference. A great many of the well-to-do citizens were opposed to any improvements which would result in the outlay of a large sum of money, and the Borough Council refused to act

in harmony. The outcome of all this carelessness and indifference was that the streets remained in the same filthy condition, no sewers were thilt and stagmant water was allowed to accumulate in the many pond holes in and about the town. To cap the climax three or four men engaged in the business of cleaning cess-pools hauled the contents of vaults through the streets in broad daylight. A number of residents of the town were shortly taken down with fever and the physicians of town have now come to the conclusion that the disease originated and was transmitted by the exposure of impure matter. The cess-pools emptied have not been cleaned for four or five years.

Just where the present crisis will end, no one is able to say. Physicians interviewed say they

hope for the best. The Borough Council has ordered that all the nuisances be abated at once, and that a general cleaning up throughout the town te inaugurated. Many believe that the order comes too late. In order to make doubly sure that the contents of the vaults are not exposed again, the Burgess has ordered the digging of a long trench for the desposit of such mate-
