**Paul and Mary,**  
AN INDIAN STORY.  
TO WHICH IS ADDED,  
**The Indian Cottage**  
From the French of M. de St. Pierre.  
"THE above Stories have been lately published, amongst the works of a very different nature, by M. de St. Pierre, who resided in the country which it describes, and was well acquainted with the principal facts. Its ornaments are the Landscape—the Climate—and the natural history of the Torrid Zone, observed with the eye of Taste, and delineated with the eye of Philosophical knowledge. It is a Pastoral, of which the fable and the machinery may be said to be equally real. To these are added, the pure vein of Moral Instruction, and the sublime Ideas of M. de St. Pierre."

**Peale's Museum,**  
HAS lately received a number of articles; among which are the following: That remarkable bird called the Cut-water, or scissars-bill; The Avocette, commonly called the Shoe-maker, because of its bill resembling a crooked awl—The Long-legs, commonly called the Black-bet, having perhaps the longest legs, in proportion to the size of the bird, of any of the feathered tribe—The Storm-finch, commonly called mother Cary's chicken—The Seawallow, and various Gulls; besides a variety of Cranes, Curlews, Snipes, &c.  
The skull of a Whale and one of its Vertebrae.  
An Indian hatchet made of chrysal: It is curious that those uninformed wild people, having very little knowledge of the arts, and being ignorant even of the existence of iron and steel, should be able to form such hard substances into fanciful forms as this, and other Indian manufactures now in the Museum.  
A lignified Quince: The specimen shews what a remarkable effect a dry warm situation has on fruit. It is now about 8 years since it was gathered; and it was a real quince, now become wood, at least in appearance.  
Presented by Mrs. Manon of Charlestown, S. C.—a tool used by the Otahitians in making their bark cloth, by pounding the bark on this instrument of wood, it produces the ribs which resemble threads: the perfectly straight and equal lines made in this extreme hard wood, by men without the use of iron, are curious & wonderful.  
Also, a rope made of grafs, part of the rigging of a vessel of Kamkataka.  
Presented by Dr. Hall, of Lewis-town, a Squid in spirits: when this fish was found, a number of stones were appended to strings or ligaments that projected from the front of its head, which occasioned a conjecture, as it is not furnished with sufficient fins to resist the violence of the tide and currents, that it fastened with these ligaments on whatever it found at the bottom; so that the stones answered the purpose of anchors and the ligaments of a glutinous sticky nature, that of cables. Some of the stones are in the same phial.  
A collection of Minerals and other Fossils are now displayed in drawers covered with glass and in a mode which will secure them from derangement. To each specimen are affixed references to a book of descriptions. This management of specimens of the Fossil kingdom, renders this part of the Museum very convenient and satisfactory, and great attention will be paid to the systematical order of them, and in making the necessary essays of each: Also in giving in a concise manner, the various uses they are applied to; thereby rendering them the more interesting to the public.  
A Living Elk, of 2 years old, is just received. By the account which monf. Buffon gives of the Elk, it appears that he was not acquainted with this American animal; he particularly omits all notice of the curious apertures adjoining the eyes of this Elk.

**George Bringham,**  
COACH-MAKER,  
In Mulberry (Arch) between Fourth and Fifth Streets, adjoining the Episcopal burying-ground,  
TAKES this opportunity of returning his grateful thanks to his former employers, and requesting their future favors, as well as those of the public in general.  
He continues to make and repair at the shortest notice, all kinds of pleasure carriages, such as coaches, chariots, phaetons with and without crane necks, coaches, chaises, kittereens, windfor fulkeys and chairs, and harness of every description, in the neatest and newest fashion now prevailing in the United States.  
And as he has a quantity of the best seasoned wood by him, and capital workmen, he has not the least doubt but he will be able to give satisfaction to those who please to employ him.  
He has for sale, several carriages almost finished, such as coaches, an Italian windfor chair, hung on steel springs, a light phaeton for one or two horses, and a fulkey with a falling top.  
Carriages sold on Commission.

**Encyclopedia, Vol. X.**  
JUST PUBLISHED;  
By **THOMAS DOBSON**,  
Bookseller, at the Stone House, in Second-street Philadelphia.  
VOLUME X. OF  
ENCYCLOPEDIA; OR DICTIONARY  
OF Arts, Sciences, and Miscellaneous Literature, on a Plan entirely new;  
BY WHICH  
The Different Sciences and Arts,  
are digested into the form of  
Distinct Treatises or Systems:

THIS volume contains principles of Levels, Liberty, Doctrine of Light, Lightning, Locks, Logarithms, Logic, History of London, Longitude, Luther, Lydia, Macedon, Madagascar, Magic, Magnetism, Malts, History of Man, Marriage, Mary, Maryland, Masonry, Materia Medica, Meadow, Mechanics, with a great variety of Biographical and Miscellaneous articles, illustrated with TWENTY TWO COPPERPLATES.  
As a number of families are still in the country, and it is not generally known who are returned. T. Dobson, solicits the favor of the subscribers to call or send for their volumes, that they may be supplied as early as possible.  
The TENTH VOLUME of the Encyclopedia is now presented to the public; but as it makes its appearance in an imperfect state, some account of the reason of that imperfection should be given. On the 8th of September last, the Publisher had the misfortune of having his Printing-Office burnt down by a fire which broke out in the neighbourhood, and a great quantity of his printing materials destroyed, and among other articles, the FIGURES, with which he was printing the TABLES of LOGARITHMS, belonging to the present volume, were melted down by the violence of the fire. As a supply of these could not be immediately obtained, he was under the necessity of publishing the volume without these TABLES; but hopes he shall be able to publish them in the next volume which is now in considerable forwardness.  
The Publisher embraces this opportunity of expressing his grateful acknowledgments to the generous public, for the very liberal patronage with which his undertaking has been honored; at the same time he takes the liberty of representing to such of the subscribers as are in arrears, the indispensable necessity of punctuality, both in taking up the volumes as early as possible after publication, and of paying for them when taken. Many of the subscribers having got only one, two, three, &c. volumes, and several volumes remain UNPAID. Thus the work hangs in all its different stages from the commencement; and though the importance of a few dollars may be but a trifle to the individuals, yet the accumulation of these trifles UNPAID lays the Publisher under very serious embarrassment, and deprives him of the use of many Thousands of Dollars which at this time would be of very essential service. For these reasons the Publisher finds himself under the necessity of recurring to the original terms of publication, and in future no volumes will be delivered but only to those who take and pay to the time of publication.
