**The Indian Cottage**

From the French of M. de St. PIERRE.  
 THE above Stories have been lately pub-  
 lished, amongst the works of a very different  
 nature, by M. de St. Pierre, who resided in the  
 country which it describes, and was well ac-  
 quainted with the principal facts. Its orna-  
 ments are the Landscape—the Climate—and  
 the natural history of the Torrid Zone, obser-  
 ved with the eye of Taste, and delineated with  
 the eye of Philosophical knowledge. It is a  
 Pictorial, of which the fable and the machi-  
 nery may be said to be equally real. To these are  
 added, the pure vein of Moral Instruction, and  
 the sublime Ideas of M. de St. Pierre."

**Peale's Museum,**

HAS Lately received a number of articles;  
 among which are the following: That  
 remarkable bird called the Cut-water, or scilars-bill;  
 The Avofete, commonly called the  
 Shoe-maker, because of its bill resembling a  
 crooked awl—The Long-legs, commonly called  
 the Black-bet, having perhaps the longest legs,  
 in proportion to the size of the bird, of any of  
 the feathered tribe—The Storm-finch, common-  
 ly called mother Cary's chicken—The Sea-  
 swallow, and various Gulls; besides a variety  
 of Canes, Curlews, Snipes, &c.  
 The skull of a Whale and one of its Vertebres.  
 An Indian hatchet made of crystal: It is  
 curious that those uninformed wild people, hav-  
 ing very little knowledge of the arts, and being  
 ignorant even of the existence of iron and steel,  
 should be able to form such hard substances in-  
 to fanciful forms as this, and other Indian ma-  
 nufactures now in the Museum.

A lignified Quince: The specimen shews  
 what a remarkable effect a dry warm situation  
 has on fruit. It is now about 8 years since it  
 was gathered; and it was a real quince, now be-  
 come wood, at least in appearance.

Presented by Mrs. Manson of Charlestown,  
 S. C.—a tool used by the Otaheites in making  
 their bark cloth, by pounding the bark on this  
 instrument of wood, it produces the ribs which  
 resemble threads: the perfectly straight and  
 equal lines made in this extreme hard wood, by  
 men without the use of iron, are curious & won-  
 derful.

Also, a rope made of grass, part of the rig-  
 ging of a vessel of Kamskatka.

Presented by Dr. Hall, of Lewis-town, a Squib  
 in spirits: when this fish was found, a number  
 of stones were appended to strings or ligaments  
 that projected from the front of its head, which  
 occasioned a conjecture, as it is not furnished  
 with sufficient fins to resist the violence of the  
 tide and currents, that it fastened with these li-  
 gaments on whatever it found at the bottom; so  
 that the stones answered the purpose of anchors  
 and the ligaments of a glutinous sticky nature,  
 that of cables. Some of the stones are in the  
 same phial.

A collection of Minerals and other Fossils—  
 are now displayed in drawers covered with glass  
 and in a mode which will secure them from de-  
 rangement. To each specimen are affixed refer-  
 ences to a book of descriptions. This manage-  
 ment of specimens of the Fossil kingdom, ren-  
 ders this part of the Museum very convenient  
 and satisfactory, and great attention will be paid  
 to the systematical order of them, and in mak-  
 ing the necessary essays of each: Also in giving  
 in a concise manner, the various uses they are  
 applied to; thereby rendering them the more  
 interesting to the public.

A Living Elk, of 2 years old, is just receiv-  
 ed. By the account which monf. Buffon gives  
 of the Elk, it appears that he was not acquaint-  
 ed with this American animal; he particularly  
 omits all notice of the curious apertures adjoining  
 the eyes of this Elk.

**George Bringhurst,**  
 COACH-MAKER,

In Mulberry (Arch) between Fourth and Fifth  
 Streets, adjoining the Episcopal burying-  
 ground,

TAKES this opportunity of returning his  
 grateful thanks to his former employers,  
 and requesting their future favors, as well as  
 those of the public in general.

He continues to make and repair at the  
 shortest notice, all kinds of pleasure carriages,  
 such as coaches, chariots, phaetons with and  
 without crane necks, coaches, chaises, kitte-  
 reens, windfor sulkeys and chairs, and harness  
 of every description, in the neatest and newest  
 fashion now prevailing in the United States.

And as he has a quantity of the best seasoned  
 wood by him, and capital workmen, he has  
 not the least doubt but he will be able to give  
 satisfaction to those who please to employ him.

He has for sale, several carriages almost  
 finished, such as coaches, an Italian windfor  
 chair, hung on steel springs, a light phaeton for  
 one or two horses, and a sulkey with a falling  
 top.

JUST PUBLISHED,  
 By THOMAS DOBSON,  
 Bookseller, at the Stone House, in Second-  
 street Philadelphia.

VOLUME X. OF  
 ENCYCLOPEDIA; OR DICTIONARY  
 OF Arts, Sciences, and Miscellaneous  
 Literature, on a Plan entirely new;

BY WHICH  
 The Different Sciences and Arts,  
 are digested into the form of  
 Distinct Treatises or Systems:

THIS volume contains principles of Levels,  
 Liberty, Doctrine of Light, Lightning,  
 Locks, Logarithms, Logic, History of Lon-  
 don, Longitude, Luther, Lydia, Macedon,  
 Madagascar, Magic, Magnetism, Malts, His-  
 tory of Man, Marriage, Mary, Maryland,  
 Masonry, Materia Medica, Meadow, Mecha-  
 nics, with a great variety of Biographical and  
 Miscellaneous articles, illustrated with TWENTY  
 TWO COPPERPLATES.

As a number of families are still in the  
 country, and it is not generally known who  
 are returned, T. Dobson, solicits the favor  
 of the subscribers to call or send for their vo-  
 lumes, that they may be supplied as early as  
 possible.

The TENTH VOLUME of the Encyclopedia is  
 now presented to the public; but as it makes  
 its appearance in an imperfect state, some ac-  
 count of the reason of that imperfection should  
 be given. On the 8th of September last, the  
 Publisher had the misfortune of having his  
 Printing Office burnt down by a fire which  
 broke out in the neighbourhood, and a great  
 quantity of his printing materials destroyed,  
 and among other articles, the FIGURES, with  
 which he was printing the TABLES OF LO-  
 GARITHMS, belonging to the present volume,  
 were melted down by the violence of the fire.  
 As a supply of these could not be immediately  
 obtained, he was under the necessity of pub-  
 lishing the volume without these TABLES; but  
 hopes he shall be able to publish them with  
 the next volume which is now in considerable for-  
 wardness.

The Publisher embraces this opportunity of  
 expressing his grateful acknowledgments to  
 the generous public, for the very liberal pa-  
 tronage with which his undertaking has been  
 honored; and at the same time he takes the li-  
 berty of representing to such of the subscribers  
 as are in arrears, the indispensable necessity of  
 punctuality, both in taking up the volumes as  
 early as possible after publication, and of pay-  
 ing for them when taken. Many of the sub-  
 scribers having got only one, two, three, &c.  
 volumes, and several volumes remain UNPAID.  
 Thus the work hangs in all its different stages  
 from the commencement; and though the im-  
 portance of a few dollars may be but a trifle  
 to the individuals, yet the accumulation of  
 these trifles UNPAID lays the Publisher under  
 very serious embarrassment, and deprives him  
 of the use of many Thousands of Dollars which  
 at this time would be of very essential service.  
 For these reasons the Publisher finds himself  
 under the necessity of recurring to the original  
 terms of publication, and in future no vo-  
 lumes will be delivered but only to those who  
 take and pay to the time of publication.
