

JAMES LEACH,

He has taken the Chamber, in State-Street, over Mr. David Townsend, Watch Maker's Shop.—Where PUBLIC SECURITIES, of all kinds, are bought and sold; and where Commission Business of all kinds, will be transacted on reasonable terms. HOUSES and VESSELS will be constantly exposed for sale, on commission.

AN INDIAN STORY.

TO WHICH IS ADDED,

The Indian Cottage

From the French of M. de St. Pierre.

THE above Stories have been lately published, amongst the works of a very different nature, by M. de St. Pierre, who resided in the country which it describes, and was well acquainted with the principal facts. Its ornaments are the Landscape—the Climate—and the natural history of the Torrid Zone, observed with the eye of Taste, and delineated with the eye of Philosophical knowledge. It is a Pastoral, of which the fable and the machinery may be said to be equally real. To these are added, the pure vein of Moral Instruction, and the sublime Ideas of M. de St. Pierre.

Peale's Museum,

HAS lately received a number of articles; among which are the following: That remarkable bird called the Cut-water, or scissars-bill; The Avofette, commonly called the Shoe-maker, because of its bill resembling a crooked awl—The Long-legs, commonly called the Black-bet, having perhaps the longest legs, in proportion to the size of the bird, of any of the feathered tribe—The Storm-finch, commonly called mother Cary's chicken—The Sea-swallow, and various Gulls; besides a variety of Cranes, Curlews, Snipes, &c.

The skull of a Whale and one of its Vertebrae.

An Indian hatchet made of chrytal; It is curious that those unimproved wild people, having very little knowledge of the arts, and being ignorant even of the existence of iron and steel, should be able to form such hard substances into fanciful forms as this, and other Indian manufactures now in the Museum.

A lignified Quince: The specimen shews what a remarkable effect a dry warm situation has on fruit. It is now about 8 years since it was gathered; and it was a real quince, now become wood, at least in appearance.

Presented by Mrs. Manson of Charlestown, S. C.—a tool used by the Otahetians in making their bark cloth, by pounding the bark on this instrument of wood, it produces the ribs which resemble threads: the perfectly straight and equal lines made in this extreme hard wood, by men without the use of iron, are curious & wonderful.

Also, a rope made of grass, part of the rigging of a vessel of Kamikata.

Presented by Dr. Hall, of Lewis-town, a Squib in spirits: when this fish was found, a number of bones were appended to strings or ligaments that projected from the front of its head, which occasioned a conjecture, as it is not furnished with sufficient fins to resist the violence of the tide and currents, that it fastened with these ligaments on whatever it found at the bottom; so that the bones answered the purpose of anchors and the ligaments of a glutinous sticky nature, that of cables. Some of the bones are in the same phial.

A collection of Minerals and other Fossils are now displayed in drawers covered with glass and in a mode which will secure them from derangement. To each specimen are affixed references to a book of descriptions. This management of specimens of the Fossil kingdom, renders this part of the Museum very convenient and satisfactory, and great attention will be paid to the systematical order of them, and in making the necessary essays of each: Also in giving in a concise manner, the various uses they are applied to; thereby rendering them the more interesting to the public.

A Living Elk, of a years old, is just received. By the account which monf. Buffon gives of the Elk, it appears that he was not acquainted with this American animal; he particularly omits all notice of the curious apertures adjoining the eyes of this Elk.

George Bringham,

COACH-MAKER,

In Mulberry (Arch) between Fourth and Fifth Streets, adjoining the Episcopal burying-ground,

TAKES this opportunity of returning his grateful thanks to his former employers, and requesting their future favors, as well as those of the public in general.

He continues to make and repair at the shortest notice, all kinds of pleasure carriages, such as coaches, chariots, phaetons with and without crane necks, coaches, chaises, kitterens, windfor sulkeys and chais, and harness of every description, in the neatest and newest fashion now prevailing in the United States.

And as he has a quantity of the best seasoned wood by him, and capital workmen, he has not the least doubt but he will be able to give satisfaction to those who please to employ him.

He has for sale, several carriages almost finished, such as coaches, an Italian windfor chair, hung on steel springs, a light phaeton for one or two horses, and a sulkey with a falling top.

Carriages sold on Commission.
