It is wholly unnecessary to expatiate on the advantage, to American readers, that this edition possesses, over every imported edition of any system of Geography extant. The addition of maps of the several states, procured at a very great expense, and from the best materials that are attainable, speaks such full conviction on this subject, that it would be disrespectful to the reader's understanding to suppose it requisite to enter into a detail of arguments to prove its superiority. In no similar work have such maps been ever introduced.

The emendations and additions which are made in this work, are innumerable, and occur in every page. The public are referred to the preface for a slight sketch of a few of them.

The publisher takes the present opportunity of returning his most sincere thanks to those respectable characters who have favored him with documents for improving the maps of several of the states. He requests a continuance of their kindness; and hopes that such public spirited citizens, as are possessed of similar documents, will favor him with their assistance in perfecting his undertaking.

The extraordinary encouragement with which he has been favored, has excited in his breast the warmest sentiments of gratitude—sentiments which time will not efface. He pledges himself to the citizens of the United States, to spare neither pains nor expense to render the present edition of Guthrie's Geography improved, deserving of their patronage.
