The Norfolk Mail STAGE.

day.

The diffusee on this route, between Philadelphia and Norfolk, is so miles less than on any stage route between those places.

Too much cannot be said in favor of the road, which is most excellent indeed. The proprietors willingly engage to return the whole fare to any passenger, who, after having performed this route, will say that he ever travelled in a stage for the same distance, so good a road in America.

Office of Inspection at

Germantow, 12th Sept. 1727. Notice is also given,

PEALE'S MUSEUM.

His veluable repository of the works of Nature, so well calculated to delight the mind and enlarge the understanding, is opened daily, as signal. It stands in an airy and healthy fituation, and free from the epidemic that at present assists he city; it may, therefore, be frequented with he greated fafety.

As an Annuscement, the study of Nature is the most rational and pleaning; as a Science, the most

Wasen Figures, of Men large as life (fome of them cans from nature) are here dreffed in their praper habits, and placed in attitudes characteristic of their respective nations. Here may be seen the North-American Savage, and the Savage of South-American-laboring Chinese, and the Chinese Gentleman—the soots African, and the Kamtschadale—with some Natures of the South Sea shads. The immense variety and interesting diversity which this Museum offers to the view, may be seen but cannot be described with full effect.

The price only 1-4th of a dollar.

At the Federal Blaft Furnace, In Carver—for Slitting, Platting, and Rolling, MILLS. SEYMOUR's Patent Rollers.

SEVMOUR'S Patent Rollers.

THEIR superiority consists in being free from holes and boney-combed places, which are commonly found in rollers cast in sand, or clay moulds. These patent rollers are cast in iron moulds, previously beated, and will be found to be more dense, solid and durable than any rollers have objected. Another important advantage they, have over others, is, that the necks require no turning, but are immediately set for use, and from their accuracy, run with less friction, and require ies water to make them perform their work. They may be had by application to the Patentee in Plymouth, of Gen. Nathaniel Goodwin, or of Messirs. That cher and Hayward Boston, Aug. 31. Sept. 19. 96t.
